INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Empire of Iran lies in western Asia, bordered by the U.S.S.R. to the north, Turkey and Iraq to the west, the Persian Gulf and the Gulf of Oman to the south, and Pakistan and Afghanistan to the east. The climate is one of great extremes. In summer temperatures of over 55°C (130°F) have been recorded, while in the winter, the great altitude of much of the country results in temperatures of -18°C (0°F) and below. The official language is Persian (Farsi), but various dialects of Kurdish and Turki are spoken. The great majority of Persians are Shi'i Muslims. The national flag (proportions 3 by 1) has green, white and red horizontal stripes. The Government flag has, in addition, a lion and sun emblem on the central white stripe. The capital is Teheran.

Recent History

The Empire of Iran, called Persia until 1935, adopted its first constitution in 1906. In 1921 Reza Khan, a Cossack officer, staged a military coup and became Minister of War. In 1923 he became Prime Minister and in 1925 the National Assembly deposed the Shah and handed full power to Reza Khan. He was subsequently elected Shah, taking the title Reza Shah Pahlavi, and began the modernization of the country. During the Second World War Reza Shah favoured Nazi Germany. British and Soviet forces entered Iran in 1941, forcing the Shah to abdicate in favour of his son, Mohammed Reza Pahlavi.

After the Second World War British and American forces left Iran, Soviet forces remaining in Azerbaijan until 1946. In 1951 the Prime Minister, Dr. Mohammed Mussadeq, nationalized the oil industry and in 1954 an agreement was reached with foreign interests whereby oil concessions were granted to a consortium of eight companies. Early in 1963 the Shah began an extensive re-distribution of large estates among small farmers. In the same year women were given the vote.

Since 1965 Iran has enjoyed continued political stability and considerable economic growth. In March 1975 the Shah announced the formation of a single party system, the Iran National Resurgence Party (*Rastakhiz*), and elections were held in June 1975, after which a new Majlis was formed, consisting of more than 80 per cent new members. During 1977, however, there was much agitation for the extension of human rights, partially met by certain judicial reforms, and there was evidence of dissatisfaction with the one-party system. In August 1977 Dr. Jamshid Amouzegar, the former Secretary General of *Rastakhiz*, replaced Amir Abbas Hoveida as Prime Minister.

Since 1973 relations with the Arab world have greatly improved but relations with Iraq were soured until March 1975 when Iran and Iraq signed a pact resolving their differences. This led to the collapse of the Kurdish resistance movement in Iraq which Iran had previously supported. Iran has built up its armed forces for the defence of the Persian Gulf area, and has bought large quantities of arms from the U.S.A. and the United Kingdom.

Government

Iran is a constitutional monarchy, with executive power resting with the Shah. Legislative power rests with the Senate and the National Consultative Assembly (*Majlis*). The Senate has 60 members, half of whom are elected, and half are nominated by the Shah. The National Consultative Assembly consists of 268 elected members. Iran is divided into 21 provinces (*Ostan*), administered by Governors-General nominated by the Ministry of the Interior. These provinces are sub-divided into counties (*Shahrestan*), municipalities (*Bakhsh*), and rural districts (*Dihestan*).

Defence

The Iranian armed forces totalled 342,000 men in 1977, with an army of 220,000, a navy of 22,000 and an air force of 100,000. There is a two-year period of military service. Iran planned to spend 562,480 million rials on defence in 1977/78, and has equipped itself with sophisticated weapons for the defence of the Persian Gulf area.

Economic Affairs

Iran is one of the world's leading oil producers, and the massive oil revenues have been instrumental in developing the rest of the economy. Although industry now predominates over agriculture in the formation of the gross national product, the majority of the Iranian people are engaged in agriculture. Most types of grain, sugar beet, fruit, nuts and vegetables are grown. Dairy produce, wool, hair and hides are also produced, especially by the nomads. There is a large fishing industry, both in the Caspian Sea, where caviar is obtained, and in the Persian Gulf. Forests, owned chiefly by the State, cover over 20 million hectares. A large deposit of copper was discovered in south eastern Iran in 1967 and smelting is due to begin in early 1980.

The National Iranian Oil Company achieved greater control of the Iranian oil industry in mid-1973 and Iran has benefited enormously from the increased prices which oil-producing countries have been obtaining since late 1973.

Iran's oil revenues increased from about U.S. \$4,000 million in 1973 to about U.S. \$20,000 million in 1974, falling to about \$19,000 million in 1975 and increasing to \$22,000 million in 1976. Per capita income increased from U.S. \$200 in 1963 to an expected U.S. \$2,000 in 1978. The Government embarked on an ambitious \$70,000 million development plan running from 1973 to 1978. Various difficulties were soon encountered which prevented the full realization of the plan on schedule. These included inflation, bottlenecks at the ports, a fall in world demand for oil in 1975 and a large outflow of capital. Many of these problems had become less serious by the end of 1977, and it was expected that a Sixth Development Plan, running from 1978-83, would be less rigidly structured than the Fifth Plan, and that emphasis would be placed on schemes carried over from the previous plan and on communications.

IRAN

Transport and Communications

Communications are made difficult in Iran by the extensive mountain ranges, but there are over 3,500 km. of railways, and extensions are under construction and electrification is planned. There are 35,000 km. of national and provincial roads, and, when completed, the CENTO highway will link Turkey, Iran and Pakistan. The principal ports on the Persian Gulf are Bushire, Lingah, Bandar Abbas, Khorramshahr and Bandar Shahpur. Ports on the Caspian Sea are Bandar Shah and Pahlavi. Iran National Airlines Corporation provides internal and international air services.

Social Welfare

The Pahlavi Foundation established in 1958 has received considerable gifts from the Shah for improving the education, health and social welfare of the poorer classes. National service draftees with medical experience have been formed into a Health Corps, bringing medical assistance to outlying areas of the country. It was announced in May 1975 that all Iranians will be covered under a national social security programme by 1983.

Education

Primary education is free and compulsory for both sexes, but this has not been fully implemented in rural areas. In 1975/76 about 7 million children were attending many thousands of primary and secondary schools. There are 13 universities. Vital to the campaign for literacy has been the conscription of young secondary school and college graduates as teachers in place of military service.

Tourism

Iran's chief attraction for the tourist is its wealth of historical sites—notably Isfahan, Rasht, Tabriz, Susa, Persepolis—and its museums of Persian art and culture. Tourism is under the care of the Iranian National Tourist Organisation, Teheran.

Visas are not required to visit Iran by nationals of Belgium, Denmark, France, the Federal Republic of

Germany, Greece, Italy, Japan, Luxembourg, Morocco, the Netherlands, Norway, Spain, Turkey, the United Kingdom and Yugoslavia.

Sport

Wrestling is the national sport of Iran. Football and polo are also popular. Winter sports are drawing more visitors to the Elburz mountains.

Public Holidays

The Iranian year 2537 corresponds with the Gregorian calendar March 21st 1978 to March 20th 1979, and the year 2538 with March 21st 1979 to March 20th 1980.

There are 15 official holidays in Iran—five national days and 10 religious days. In the Iranian year 2537 these will be as follows: March 21st–25th (Now Ruz, the Iranian New Year), April 2nd (13th day of Now Ruz), July 3rd (Ascension of Muhammad)*, August 5th (Constitution Day), September 4th (Id ul Fitr, end of Ramadan)*, October 6th (Birthday of the Twelfth Imam), October 26th (The Shah's Birthday), November 10th (Death of Imam Ali), November 11th (Id ul Qurban)*, December 2nd (Muslim New Year)*, December 11th (Ashoura)*, December 14th (Death of Imam Jafar Sadeq), December 30th (Birthday of Imam 'Reza).

* Indicates that these are religious holidays whose dates are determined by the lunar calendar; the other holidays fall on the same day each year.

Weights and Measures

The metric system is in force, but some traditional units are still in general use.

Coins: 50 dinars; 1, 2, 5, 10 and 20 rials.

Notes: 5, 10, 20, 50, 100, 200, 500, 1,000, 5,000 and 10,000 rials.

Exchange rates (December 1977): £1 sterling=129.075 rials; U.S. \$1=70.475 rials.
1,000 Iranian rials=£7.75=\$14.19.

Note: From December 1946 to May 1957 the official exchange rate was U.S. \$1=32.25 rials (1 rial=3.1008 U.S. cents) but other rates were in operation for certain commercial transactions. From 1956 the trade rate was \$1=75.75 rials (1 rial=1.3201 U.S. cents) and this was the official parity from May 1957 to February 1973, despite the devaluation of the U.S. dollar in December 1971. In terms of sterling, the exchange rate was £1=181.80 rials from November 1967 to August 1971; and £1=197.38 rials from December 1971 to June 1972. In February 1973 a new par value of \$1=68.175 rials was established but the Iranian authorities introduced market rates of \$1=67.50 rials (buying) or 67.75 rials (selling), with a mid-point of \$1=67.625 rials. In February 1975 the direct link with the dollar was broken and the rial has since been tied to the IMF Special Drawing Right (at a mid-point of 82.24 rials per SDR), whose value is determined by changes in a weighted "basket" of 16 national currencies. The market rate against the U.S. dollar has been frequently adjusted. It was \$1=66.641 rials from February to July 1975, \$1=69.275 rials from October 1975 to March 1976 and \$1=70.625 rials from June 1976 to December 1977. The average exchange rate (rials per U.S. dollar) was: 67.64 in 1975; 70.22 in 1976.

THE CONSTITUTION

On August 15th, 1906, an Imperial Decree was issued to convoke a Constituent Assembly. This Assembly adopted the Constitution of Iran on December 30th of that year.

THE EXECUTIVE POWER

The executive power rests in the Shah. He appoints the Prime Ministers, who must be approved by the *Majlis*. In addition to their individual responsibility for their departments, ministers have a joint responsibility for the affairs of the country.

In 1949 an amendment to the Constitution was made whereby the Shah was granted the right to dissolve the *Majlis* when it was deemed necessary, provided that a new election was ordered to take place soon afterwards.

THE LEGISLATIVE POWER

According to the Constitutional Law the legislative power comprises the Senate and the National Consultative

Assembly (the *Majlis*). The latter Assembly consists of 268 members elected for four years, although it is expected that the number of members will rise to more than 300, to keep pace with the growth of population. Since 1963 women have had the vote, and can also be elected. The Senate, which was convened for the first time in February 1950, comprises 60 Senators: 30 elected and 30 nominated by the Shah, 15 representing Teheran, and 15 representing the provinces. Senators must be Muslims. Their term of office is four years.

PROVINCIAL DIVISIONS

According to the latest state division (March 1974), Iran is divided into 21 provinces (*Ostans*), two independent Governorate-Generals, 153 counties (*Shahrestan*) and 461 municipalities (*Bakhsh*).

All towns have a municipal administration, the director of which is chosen by the town council. The nomination must be approved by the Ministry of the Interior.

JUDICIAL SYSTEM

The Judiciary in Iran was originally based on Islamic Law. Between 1926 and 1928 the French judicial system was adopted as a basis for a modernized legal system. While the judiciary was to be a fully independent branch of the government, its head was given cabinet rank as Minister of Justice. In 1927 Parliament voted special powers to the then Minister, who dissolved all the courts and re-organized the entire Ministry. While the courts were being re-organized and the Ministry expanded, Parliament enacted new laws governing the functions of the courts, including new laws of Civil and Criminal Procedure, a Civil Code, a Criminal Code, a Commercial Act and a Registration Act.

COURTS OF LAW

The highest legal authority is the Supreme Court, which is the Highest Court of Appeal. The Supreme Court sits under a Chief Justice, with several associate justices presiding over its branches. In addition to hearing appeals, the court takes on such cases as:

- (i) trial of prime ministers, ministers, acting ministers and ex-ministers
- (ii) complaints lodged by government employees against their ministers or departments
- (iii) disputes between judicial and government departments
- (iv) disputes regarding the duty and authority of government departments
- (v) disputes concerning competence of civil or military courts to try a case.

The Prosecutor-General, assisted by a number of deputies, appears before the Supreme Court. The Supreme Court has 13 branches, each of which has 4 associate justices. The Chief Justice presides over the first branch, generally known as the Central Branch. Courts of Law also exist at the provincial (*ostan*), county (*shahrestan*) and municipal (*bakhsh*) levels, and may have several branches. They are presided over by a judge or a magistrate. Crimes punishable by execution or life imprisonment are handled by a provincial court consisting of five judges. There are civil and criminal courts.

HOUSES OF JUSTICE

Under the reforms of the "White Revolution", Houses of Justice have been set up at village level to deal with minor local offences and misdemeanours.

COURTS OF APPEAL

Every province (*ostan*) has an appellate court which has civil and criminal branches. The civil branches have two or three judges, who hear appeals against judgments passed by courts of misdemeanour or courts of first instance.

SPECIAL COURTS

Civil Service Tribunal: handles all cases involving civil servants' offences against their department, ministry, or the State, including embezzlement and misappropriation of funds. The court has its own prosecutor, magistrates and investigators.

Religious Courts: one such court exists in Teheran, and there are others in several provinces; deal with disputes of a religious nature.

Judges' Disciplinary Court: deals with impeachment of judges and is the only authority that can unseat a judge.

Courts Martial: Military Tribunals and courts come under the Armed Forces' Judge Advocate, and are guided by their own code. Under the law, military courts are empowered to deal with many crimes committed by civilians, such as treason, armed uprising against the legally constituted government, and banditry. During 1977 it became permissible for civilian lawyers to appear before military tribunals, and charges had to be made within a specified period.

Under the reforms of the "White Revolution", Equity Courts were established in rural areas, and Arbitration Councils in towns to deal with civil and criminal claims.

RELIGION

According to the Constitution the officially recognized religions of Iran are Islam, Zoroastrianism, Christianity and Judaism.

MUSLIMS

The great majority of the Iranian people are Shi'i Muslims, and Iran with Iraq and the Yemen Arab Republic are notable as the only countries in the world where Shi'i adherents are in a majority. About five per cent of the population are Sunni Muslims, but there is complete religious toleration. Iran is thus in many ways the centre of the Shi'i faith, and pilgrimage to Iranian shrines is an important activity; Qum and Meshed are in particular regarded as holy cities.

ZOROASTRIANS

There are about 40,000 Zoroastrians, a remnant of a once widespread sect. Their religious leader is MOUBAD.

OTHER COMMUNITIES

Communities of Armenians, and somewhat smaller

numbers of Jews, Assyrians, Greek Orthodox, Uniates and Latin Christians are also found as officially recognized faiths. The Baha'i faith, which originated in Iran, has about 60,000 adherents.

Baha'i faith: Shirkat-i-Nawnahalan, Manuchehri Avenue, Teheran; 1,854 centres, 1 school.

Roman Catholic (Chaldean) Archbishop of Teheran: Ave. Forsat 91, Teheran; Most Rev. YOHANNAN SEMAAN ISSAYI; 28,395 Catholics (1976).

Anglican Bishop in Iran and President-Bishop, Episcopal Church in Jerusalem and the Middle East: Rt. Rev. HASSAN BARNABA DEHQANI-TAFTI, Bishop's House, P.O.B. 12, Isfahan; Diocese founded 1912

Synod of the Evangelical (Presbyterian) Church in Iran: Assyrian Evangelical Church, Khiaban-i Shapur, Khiaban-i Aramanch, Teheran; Moderator Rev. ADLE NAKHOSTEEN.

THE PRESS

The working of the Iranian Press is set out in the 1955 Press Law as modified in 1963. This legislation defines the qualities of education and character required in persons intending to publish newspapers; and stipulates that no newspaper may be banned without a court order, except for criticism of religion or the monarchy, for disclosing military information or for provoking the people to oppose government troops. With the exception of scientific, cultural and government publications, newspapers with less than 3,000 circulation and magazines with less than 5,000 are illegal.

In 1965 the cabinet approved the Reporters' Code of Journalism which required reporters to be licensed by the Ministry of Information and Tourism, prevented them accepting government service and prohibited the reporting or photography of specified military areas and closed court sittings, etc. All communist publications are prohibited in Iran.

Teheran dominates the press scene as many of the daily papers are published there and the bi-weekly, weekly and

less frequent publications in the provinces generally depend on the major metropolitan dailies as a source of news. In the city are published some 10 daily and 6 weekly newspapers, and 17 weekly and 28 monthly magazines. There are at least 19 registered provincial papers.

With the exception of a small number of political organs and official publications, all newspapers are owned by private individuals.

The major dailies also publish other papers and periodicals thus forming small publishing groups which are still largely family concerns. The *Ettela'at Group* (Prop. FARHAD MASSOUDI) includes *Ettela'at* with two foreign language dailies, one weekly newspaper and six popular weekly magazines, including one for women and two for children. The *Kayhan Group* (Prop. Dr. M. MESHAZADEH) includes *Kayhan* with its English daily and three weekly magazines, including one for women and one for children. The *Echo of Iran Group* (Prop. JAHANGIR BEHROUZ) includes the monthly *Iran Trade and Industry*, *Iran Economic Service* and the annual *Almanac and Iran Who's Who*, all in English.

IRAQ

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Iraq is an almost landlocked state with a narrow outlet on to the Persian Gulf. Its neighbours are Iran to the east, Turkey to the north, Syria and Jordan to the west, and Saudi Arabia and Kuwait to the south. The climate is extreme, with hot, dry summers, rising to over 43°C (110°F), and cold winters. Summers are humid near the Persian Gulf. The official language is Arabic, spoken by about 80 per cent of the population. About 15 per cent speak Kurdish and there is a small Turkoman-speaking minority. Ninety per cent of the population is Muslim. The national flag (proportions 3 by 2) is a horizontal tricolour, red, white and black, the white band charged with three five-pointed green stars. The capital is Baghdad.

Recent History

Iraq was formerly part of Turkey's Ottoman Empire. During the 1914-18 war it was captured by British forces and after the war became a kingdom under a League of Nations mandate, administered by Britain. The mandate ended in October 1932, when Iraq became independent.

A *coup d'état* by the army in 1958 resulted in the assassination of King Faisal and the establishment of a Republic under General Kassem. For more than four years General Kassem maintained a precarious and increasingly isolated position opposed by Pan-Arabs, Kurds and other groups. In February 1963 the Pan-Arab element in the armed forces staged a *coup d'état* in which General Kassem was assassinated and a new government set up under Colonel Aref, who initiated a policy of closer relations with Egypt. Martial law, in force since 1958, was brought to an end in January 1965, and a purely civilian government was inaugurated in September 1965. In March 1966 President Aref was killed in an air accident, and was succeeded by his brother, Major-General Abdul Rahman Muhammad Aref. The second President Aref was ousted by members of the Baath Party in July 1968. Major-General (later Field-Marshal) Ahmed Hassan al-Bakr, a former Prime Minister, became President and Prime Minister, and supreme authority was vested in the Revolutionary Command Council, of which President Al-Bakr was also President.

Relations with Iran deteriorated after April 1969, following a dispute over the Shatt el Arab waterway, which forms the frontier. Diplomatic relations, broken off in 1971, were resumed in 1973 after the October war between the Arabs and Israel, but there was frontier fighting during 1974 and early 1975. In March 1975 Iran and Iraq signed a pact settling their differences, and there has been a consequent improvement in relations. Relations with Syria, however, have been deteriorating since 1975, partly because of Iraqi accusations that Syria was retaining too much water from the River Euphrates, but mainly due to rivalry between the different wings of the Baath Party in Damascus and Baghdad. During 1976 an additional strain in relations between Iraq and Syria was caused by Iraqi hostility to Syria's role in the Lebanese situation. In November 1977 both Syria and Iraq objected to President Sadat's peace initiative in visiting Israel, but Iraq walked out of the Tüppeli Conference called by the objecting Arab States on the grounds that the attitude taken by Syria and

the other States was too moderate. In July 1973 a National Front was formed on the basis of a common programme endorsed by the Baath Party and the Iraqi Communist Party, which was legally recognized for the first time. In September 1977, by Presidential decree, all members of the Iraq Regional Command of the Baath Party were appointed members of the Revolutionary Command Council (RCC), thus raising RCC membership to 22. The change in structure appeared to strengthen the role of the Baath Party in the National Front.

A settlement was apparently made with the Kurdish rebels in the north-east in March 1970, by which the Kurds would be granted autonomy by March 1974. Autonomy was offered to the Kurds in March 1974, but rejected by many of them because, among other things, the Iraqi Government retained control of the oil-rich Kirkuk area. Between March 1974 and March 1975 there was fighting in north-eastern Iraq between the Kurds who supported Mulla Mustafa Barzani and Iraqi Government troops. In October 1974 a Kurdistan Legislative Council was set up in Arbil for Kurds who accepted the autonomy offered by the Iraqi Government. After the 1975 Iran-Iraq pact the Kurdish anti-government movement collapsed. Barzani fled to Iran, but subsequently many of the Kurds who fled with him returned to Iraq under amnesties offered by the Iraqi Government. Many of these returning Kurds were at first resettled in southern areas, but were later encouraged to resettle in northern Kurdish areas.

Government

Power rests with the President and a Revolutionary Command Council, which contains 22 members, and is identical with the Iraq Regional Command of the Baath Party, while the day-to-day running of the country is carried out by a Council of Ministers. The country is divided into 15 Provinces and 3 Autonomous Regions. A Kurdish autonomous area has been set up by the Iraqi Government.

Defence

Military service is compulsory for all men at the age of eighteen years and lasts for two years. The army has a total strength of 160,000; the air force has a strength of 25,000, and the navy 3,000. There are 250,000 reserves.

Economic Affairs

Oil is the most important sector of the economy. Oil revenues were estimated at U.S. \$6,000 million for 1974, U.S. \$8,000 million for 1975 and U.S. \$8,850 million for 1976, although exports of crude petroleum were about the same by volume as in 1975.

Iraq is using some of its increased oil revenues in a programme of industrialization, but is experiencing some difficulties with bottlenecks at the ports and shortage of skilled manpower. The position at the ports improved during 1977.

Over three-quarters of the population still continue to depend on agriculture for their living. Iraq is the world's largest exporter of dates.

IRAQ

Introductory Survey, Statistical Survey

Transport and Communication

Iraq has about 2,000 miles of railway track. The main means of travel is road. New trunk roads have been built and the current development plan provides for building and extending the road system. In many desert areas the natural surfaces are passable for vehicles. The lower reaches of the Euphrates and the combined mouth of the Tigris and Euphrates, the Shatt el Arab, are navigable and deep-water oil berths serve the oilfields.

Social Welfare

A limited Social Security Scheme was introduced in 1957 and extended in 1976. Benefits are given for old age, sickness, unemployment, maternity, marriage and death. Health services are free.

Education

Education is free and primary education lasting six years is compulsory in an effort to reduce illiteracy. In 1976 more than 1.9 million children were attending 8,100 primary schools. There are six universities. Many Iraqis study abroad.

Tourism

Iraq is the ancient Mesopotamia of early history, and one of the oldest centres of civilization. The ruins of Ur of the Chaldees, Babylon, Nineveh and other relics of the Sumerian, Babylonian, Assyrian and Persian Empires are of interest to the tourist. Hatra and Ctesiphon represent the early medieval period.

Visas are not required to visit Iraq by nationals of Egypt, Jordan, Kuwait, Lebanon and Syria.

Sport

There is little organized sport. Football is played, while duck shooting, hawking and other field sports are enjoyed.

Public Holidays

1978: May 1st (Labour Day), July 14th (Republic Day), July 17th (Republic Day), September 3rd* (Id ul Fitr, end of Ramadan), November 10th* (Id ul Adha), December 1st* (Muslim New Year), December 11th (Ashoura)*.

1979: January 1st (New Year's Day), January 6th (Army Day), February 8th (14 Ramadan Revolution), February 10th* (Mouloud, Birth of the Prophet), March 21st (Navroos Day).

* Approximate only; these are Muslim holidays determined by sightings of the moon, which vary each year.

Weights and Measures

The metric system is in force. Mesbara or dunum = 0.62 acre (2,500 sq. metres).

Currency and Exchange Rates

1,000 fils = 20 dirhams = 1 Iraqi dinar (I.D.).

Exchange rates (December 1977):

£1 sterling = 542.22 fils;

U.S. \$1 = 296.05 fils.

THE CONSTITUTION

The following are the principal features of the Provisional Constitution issued on September 22nd, 1968:

The Iraqi Republic is a popular democratic and sovereign state. Islam is the state religion.

The political economy of the state is founded on socialism.

The state will protect liberty of religion, freedom of speech and opinion. Public meetings are permitted under the law. All discrimination based on race, religion or language is forbidden. There shall be freedom of the Press, and the right to form societies and trade unions in conformity with the law is guaranteed.

The Iraqi people is composed of two main nationalities: Arab and Kurds. The Constitution confirms the nationalistic rights of the Kurdish people and the legitimate rights of all other minorities within the framework of Iraqi unity.

The highest authority in the country is the Council of Command of the Revolution (or Revolutionary Command Council—RCC), which will promulgate laws until the election of a National Assembly. The Council of Command of the Revolution has six members including the President and the Vice-President. The Council exercises its prerogatives and powers by a two-thirds majority.

Two amendments to the constitution were announced in November 1969. The President, already Chief of State and head of the government, also became the official Supreme Commander of the Armed Forces and President of the Command Council of the Revolution. Membership of the latter body was to increase from five to a larger number at

the President's discretion. In September 1977 the members of the Iraq Regional Command of the Baath Party were appointed members of the RCC, thus raising RCC membership to 22.

Earlier, a Presidential decree replaced the 14 local government districts by 16 governorates, each headed by a governor with wide powers. In April 1976 Tekrit (Saladin) and Kerbala became separate governorates, bringing the number of governorates to 18, although three of these are designated Autonomous Regions.

The fifteen-article agreement which aimed to end the Kurdish war was issued on March 11th, 1970. In accordance with this agreement a form of autonomy was offered to the Kurds in March 1974, but some of the Kurds rejected the offer and fresh fighting broke out. The new Provisional Constitution was announced in July 1970. Two amendments were introduced in 1973 and 1974, the 1974 amendment stating that "the area whose majority of population is Kurdish shall enjoy autonomy in accordance with what is defined by the Law".

The President and Vice-President are elected by a two-thirds majority of the Council. The President, Vice-President and members of the Council will be responsible to the Council. Vice-Presidents and Ministers will be responsible to the President.

In July 1973, President Bakr announced a National Charter as a first step towards establishing the Progressive National Front. A National Assembly and People's Councils are features of the Charter.

JUDICIAL SYSTEM

Courts in Iraq consist of the following: The Court of Cassation, Courts of Appeal, First Instance Courts, Peace Courts, Courts of Sessions, Shara' Courts and Penal Courts.

The Court of Cassation: This is the highest judicial bench of all the Civil Courts; it sits in Baghdad, and consists of the President and a number of Vice-Presidents and not fewer than fifteen permanent judges, delegated judges and reporters as necessity requires. There are four bodies in the Court of Cassation, these are: (a) The General

body, (b) Civil and Commercial body, (c) Personal Status body, (d) The Penal body.

A Technical Bureau has been established which is related to the Court of Cassation and is carrying out the work of abstracting and classifying the legal principles which are contained in the judgments issued by it.

Courts of Appeal: The country is divided into five Districts of Appeal: Baghdad, Mosul, Basrah, Hilla, and Kirkuk, each with its Court of Appeal consisting of a President, Vice-Presidents and not fewer than three mem-

bers, who consider the objections against the decisions issued by the First Instance Courts of first grade.

Courts of First Instance: These courts are of two kinds: Limited and Unlimited in jurisdiction.

Limited Courts deal with Civil and Commercial suits, the value of which is five hundred Dinars and less; and suits, the value of which cannot be defined, and which are subject to fixed fees. Limited Courts consider these suits in the final stage and they are subject to Cassation.

Unlimited Courts consider the Civil and Commercial suits irrespective of their value, and suits the value of which exceeds five hundred Dinars with first grade subject to appeal.

First Instance Courts consist of one judge in the centre of each *Liwa*, some *Qadhas* and *Nahiyas*, as the Minister of Justice judges necessary.

Revolutionary Courts: These deal with major cases that would affect the security of the state in any sphere: political, financial or economic.

Courts of Sessions: There is in every District of Appeal a Court of Sessions which consists of three judges under the presidency of the President of the Court of Appeal or one of his Vice-Presidents. It considers the penal suits prescribed by Penal Proceedings Law and other laws. More than one Court of Sessions may be established in one District of Appeal by notification issued by the Minister

of Justice mentioning therein its headquarters, jurisdiction and the manner of its establishment.

Shara' Courts: A Shara' Court is established wherever there is a First Instance Court; the Muslim judge of the First Instance Court may be a *Qadhi* to the Shara' Court if a special *Qadhi* has not been appointed thereto. The Shara' Court considers matters of personal status and religious matters in accordance with the provisions of the law supplement to the Civil and Commercial Proceedings Law.

Penal Courts: A Penal Court of first grade is established in every First Instance Court. The judge of the First Instance Court is considered as penal judge unless a special judge is appointed thereto. More than one Penal Court may be established to consider the suits prescribed by the Penal Proceedings Law and other laws.

One or more Investigation Court may be established in the centre of each *Liwa* and a judge is appointed thereto. They may be established in the centres of *Qadhas* and *Nahiyas* by order of the Minister of Justice. The judge carries out the investigation in accordance with the provisions of Penal Proceedings Law and the other laws.

There is in every First Instance Court a department for the execution of judgments presided over by the Judge of First Instance if a special President is not appointed thereto. It carries out its duties in accordance with the provisions of Execution Law.

RELIGION

ISLAM

Over 90 per cent of the population are Muslims. The Arabs of northern Iraq, the Bedouins, the Kurds, the Turkomans, and some of the inhabitants of Baghdad and Basra, are mainly of the Sunni sect, the remaining Arabs south of the Diyala, belong to the Shi'i sect. Leaders: Mr. ALWAIDH (Sunni), Prof. ABDUL QASSEM AL MOUSAWI AL KHOUI (Shi'i).

CHRISTIANITY

There are Christian communities in all the principal towns of Iraq, but their principal villages lie mostly in the Mosul district. The Christians of Iraq fall into three groups. (a) the free Churches, including the Nestorian, Gregorian, and Jacobite; (b) the churches known as Uniate, since they are in union with the Roman Catholic Church including the Armenian Uniates, Jacobite Uniates, and Chaldeans; (c) mixed bodies of Protestant converts, New Chaldeans, and Orthodox Armenians.

SHIPPING

State Organization of Iraqi Ports: Basra; Acting Pres. FALEH MAHMOUD EL MOOSA.

The Ports of Basra and Um Qasr are the commercial gateway of Iraq. They are connected by various ocean routes with all parts of the world, and constitute the natural distributing centre for overseas supplies. The Iraqi Maritime Company maintains a regular service between Basra, the Gulf and north European ports. Other shipping lines operate cargo and passenger services from Basra and Um Qasr to all parts of the world. There are fast mail and passenger services from Basra to Bombay via Khorramshahr. Orient Mail Services to England, Australia, South Africa and the Far East.

At Basra there is accommodation for 12 vessels at the Maqal Wharves and accommodation for 7 vessels at the buoys. There are 1 silo berth and 2 berths for oil products at Muftia and 1 berth for fertilizer products at Abu Flus. There is room for 3 vessels at Um Qasr.

In 1975 the port of Basra was visited by 950 ships; the total tonnage exported (excluding oil) was 1,161,126 and imported tonnage totalled 3,258,807. Um Qasr port handled 174 vessels, imports were 207,640 tons and exports 280,139.

There are deep-water tanker terminals at Fao and Khor Al-Amaya for 4 and 3 vessels respectively.

For the inland waterways, which are now under the control of the State Organization of Iraqi Ports, there are 1,036 registered river craft, 48 motor vessels and 105 motor boats.

University of Technology: Baghdad; 300 teachers, 6,042 students.

ISRAEL

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The State of Israel lies at the eastern end of the Mediterranean Sea. All its frontiers are with Arab countries, the longest being with Egypt to the west and Jordan to the east. Lebanon lies to the north and Syria to the north-east. The climate is Mediterranean, with hot dry summers when the temperature is generally around 30°–35°C, and mild, rainy winters. The language is Hebrew. Arabic is spoken by the half million Arab minority (as well as the population of the "occupied areas") and many European languages are spoken. Judaism is the religion followed by the great majority of the population. The national flag (proportions 250 by 173) consists of a white background, with a blue six-pointed star composed of two equilateral triangles (the "Shield of David") between two blue horizontal stripes near the upper and lower edges. The capital is Jerusalem.

Recent History

Before 1948 Palestine (of which present-day Israel now forms a part) was a Mandated Territory under British colonial administration. Zionists had long sought to establish a National Home in Palestine; the flow of Jewish immigration, and Arab concern over the position of the Palestinians and the impending creation of a Jewish state, finally led to war between Arabs and Jews in 1947. In November 1947 a UN resolution called for the partition of Palestine into two states, one Jewish and one Arab. The Arab states and the Palestinian Arab leadership rejected the UN resolution, and fighting intensified. In May 1948 the British Mandate ended and the neighbouring Arab states sent forces into Palestine in an attempt to crush the newly-proclaimed State of Israel. Fighting continued until January 1949. The cease-fire agreements left Israel in control of 75 per cent of Palestine. No peace treaty has been signed and no Arab state has diplomatic relations with Israel. A UN Truce Supervisory Organization continues to operate. The Six-Day War between Israel and neighbouring Arab countries in June 1967 left Israel in possession of all Jerusalem, the west bank of the Jordan, the Sinai peninsula, the Gaza Strip and the Golan Heights. East Jerusalem was almost immediately integrated into the state of Israel, the other regions may be regarded as "occupied areas". There is considerable freedom of movement between the Occupied areas and restricted access to and from the state of Jordan. On the death of Levi Eshkol in February 1969 Golda Meir was elected Prime Minister by the Labour Party executive, and continued in office following the general election of October 1969. In August 1970, a cease-fire agreement was reached between Egypt and Israel which put an end to the two years of war of attrition in the Suez Canal zone but other Arab states and the Palestine guerrilla organizations continued their hostilities. Another war between the Arab States and Israel broke out on October 6th, 1973 (Yom Kippur, the Jewish Day of Atonement), and ended with a cease-fire agreement in November. A peace conference held in Geneva the following month, with the participation of Egypt, Jordan and Israel, and U.S. mediatory efforts, ultimately led to the withdrawal of Israel's forces from the areas it held west of the Suez Canal

as well as from the whole of the east bank during January and February 1974. A disengagement agreement with Syria on the Golan Heights followed in May 1974. After intense diplomatic activity, a further disengagement agreement between Israel and Egypt was signed in September 1975.

Little further progress towards permanent peace was made until November 1977, when President Sadat of Egypt visited Israel and addressed the Knesset. The move was a tacit recognition by Egypt of the State of Israel and was regarded throughout the world as a hopeful pointer to peace. The Israeli Prime Minister, Mr. Begin, visited Egypt in late December 1977 and presented a plan which would involve Israeli withdrawal from some of the occupied territories and administrative autonomy for the Palestinian Arabs in the West Bank and the Gaza Strip. By February 1978 it was recognized that this plan was not acceptable to Egypt, and it was clear that it did not offer enough to satisfy the PLO and the more militant Arab States, notably Syria, Libya and Iraq.

General elections in December 1973 resulted in a Labour alignment coalition Government headed by Golda Meir. After her resignation Gen. Yitzhak Rabin became Prime Minister in June 1974. In December 1976 the National Religious Party abstained in a confidence vote in the Knesset arising from charges that the Sabbath had been desecrated at a ceremony marking the arrival of three U.S. aircraft. Mr. Rabin subsequently dismissed two of the NRP ministers from his cabinet, and the consequent withdrawal of NRP support left the Government in a minority in the Knesset, thus precipitating Mr. Rabin's resignation. Mr. Rabin's Government continued in office in a caretaker capacity until May 1977, when Likud, under Menachem Begin, won 43 out of the 120 seats—the largest single total. With the support of the National Religious Party, Agudat Israel and Shlomzion, Mr. Begin was able to form a cabinet in June 1977. His position was strengthened in October 1977 when the Democratic Movement for Change joined the Likud coalition.

Immigration reached 55,888 in 1972, falling to 54,886 in 1973, 31,979 in 1974, 20,028 in 1975 and 19,754 in 1976.

Government

Supreme authority in Israel rests with the *Knesset* (Assembly), which is elected by universal suffrage under proportional representation for four years. The President, who is Head of State, is elected by the *Knesset* for a period of five years. The Cabinet, which is headed by the Prime Minister, is responsible to the *Knesset*. Ministers are usually members of the *Knesset*, but non-members may be appointed. The country is divided into six administrative districts. Local authorities are elected once every four years at the same time as the *Knesset*. There are 31 municipalities (2 Arab), 115 local councils (46 Arab and Druze) and 49 regional councils (one Arab) comprising representatives of 700 villages.

Defence

The Israel Defence Forces consist of a small nucleus of commissioned and non-commissioned regular officers, a

contingent called up for national service, and a large reserve. Some unmarried women between the ages of 18 and 26 are called up for twenty-four months of military service, and all men between 18 and 29 are called up for 36 months of military service. Total armed forces numbered 164,000 in 1977 and full mobilization of 400,000 men can be achieved within 72 hours. The armed forces are divided into an army of 138,000, a navy of 5,000 and an air force of 21,000. The defence budget for 1977/78 amounted to I£40,200 million.

Economic Affairs

Six per cent of the labour force is employed in agriculture and 33.1 per cent in industry, mining and construction. Continuous immigration and an Arab economic boycott have obliged Israel to develop both agriculture and industry on an intensive scale and to seek far afield for international trade. Particular features of agriculture are the *kibbutzim* (collective settlements), the irrigation schemes and the reclamation of the Negev desert in the south. Citrus fruit is the main export crop. A wide variety of industrial goods is produced. Israel is second only to Belgium in processing diamonds. Some 15 per cent of industry is controlled by the *Histadrut* (Israel Federation of Labour) which, in addition to its trade union activity, fosters economic development. Israel receives aid from Jews in North America and Europe. In May 1975 Israel signed an Association agreement with the EEC under the EEC global policy for the Mediterranean.

During recent years the high cost of imports, particularly defence imports, has put the economy under strain. A continuing high trade deficit, a fall in investment, a slowdown in the growth of G.N.P., a high rate of inflation (38.5 per cent in 1976), are some of the difficulties which have been facing the Government. In an effort to remedy the situation the Labour Government introduced a 30 per cent devaluation of the pound in November 1974, combined with severe austerity measures. A system of "crawling devaluations", by which the pound was devalued by 2 per cent each month, was then introduced. The Begin Government came to office in June 1977 with the intention of fostering a more capitalist economy, and in November 1977 introduced a new economic programme by which almost all controls were lifted from foreign currency and the pound was allowed to float. Travel tax was abolished, incentives for exporters were removed, VAT was raised from 8 to 12 per cent and subsidies reduced still further so that the price of basic foodstuffs rose by 15 per cent. Welfare payments were increased, but telephone and fuel bills rose by 20 and 25 per cent. It was hoped that a move to a freer economy would encourage foreign investment and the return of capital which had been smuggled abroad.

Transport and Communications

The Israel Railway Administration runs 550 km. of main line. Ultimately Eilat, the port on the Gulf of Aqaba, will be served by rail. 3,918 km. of roads are metalled and about 432,000 motor vehicles are in service. Communications with the Arab countries are severely limited. Israel has a merchant fleet of 106 vessels with a gross tonnage of 2,304,253. El Al Israel Airline operates international services and Arkia Israel Inland Airlines provide domestic route coverage.

Social Welfare

There is a highly advanced system of social welfare. Old age pensions, industrial injury and maternity benefits, and allowances for large families, are provided under the National Insurance Law. The *Histadrut*, to which over 90 per cent of all Jewish workers belong, provides sickness benefit and medical care. The Ministry of Social Welfare provides for general assistance, relief grants, child care and other social services.

Education

Israel has European standards of literacy and educational services. Free compulsory primary education is provided for all children between the ages of five and fifteen. There is secondary, vocational and agricultural education. There are six universities, one institute of technology and one graduate school of science.

Tourism

Israel's tourist attractions include biblical sites, places holy to three religions, sunny beaches and *kibbutzim* (collective settlements). The Government maintains 20 tourist offices abroad. 796,600 tourists visited Israel in 1976.

Citizens of Austria, Barbados, Belgium, the Central African Empire, Colombia, Costa Rica, Denmark, the Dominican Republic, Ecuador, Finland, France, Greece, Hong Kong, Iceland, Jamaica, Japan, Lesotho, Liechtenstein, Luxembourg, the Maldives, Mauritius, the Netherlands, the Netherlands Antilles, Norway, Paraguay, the Philippines, Surinam, Swaziland, Sweden, Switzerland, Trinidad and Tobago, the United Kingdom and Uruguay do not require *visas* for stays of up to three months. *Visas* can be had free on entry by citizens of Argentina, Australia, Brazil, Canada, Chile, New Zealand, South Africa and the U.S.A. All other visitors to Israel are required to obtain *visas* before their departure.

Sport

All sport in Israel is amateur. Football, basketball, swimming, athletics, hockey, tennis, rowing, handball, volleyball, gymnastics, boxing, wrestling and fencing all have their followers.

Public Holidays

The Sabbath starts at sunset on Friday and ends at nightfall on Saturday. The Jewish year 5739 begins on October 2nd, 1978.

1978: June 12th (Shavuot), October 2nd/3rd (Rosh Hashanah, Jewish New Year), October 12th (Yom Kippur), October 17th-24th (Succot), October 25th (Simhat Torah).

1979: March 13th (Purim), April 12th-18th (Passover).

(The Jewish festivals and fast days commence on the evening preceding the dates given.)

Muslim holidays are observed by Muslim Arabs and Christian holidays by the Christian Arab Community.

Weights and Measures

The metric system is in force.

1 dunam = 1,000 sq. metres.

Currency and Exchange Rates

100 agorot = 1 Israeli pound (I£).

Exchange rates (December 1977):

£1 sterling = I£28.02; U.S. \$1 = I£15.30.

100 agorot (singular, agora) = 1 Israeli pound (₪).

Coins: 1, 5, 10, 25 and 50 agorot; 1 pound.

Notes: 50 agorot; 1, 5, 10, 50 and 100 pounds.

Exchange rates (December 1977): £1 sterling = ₪28.02; U.S. \$1 = ₪15.30; 1£100 = £3.57 sterling = \$6.54.

Note: The Israeli pound was introduced in August 1948, replacing (at par) the Palestine pound, equal to the pound sterling, then worth U.S. \$4.03. In September 1949 the Israeli pound was devalued (in line with sterling) to \$2.80 and this valuation remained in effect until February 1952. Multiple exchange rates were in operation between February 1952 and mid-1955. From July 1955 to February 1962 the official exchange rate was U.S. \$1 = ₪1.80. Between February 1962 and November 1967 the exchange rate was \$1 = ₪3.00. From November 1967 to August 1971 the rate was \$1 = ₪3.50 (₪1 = 28.57 U.S. cents). It was \$1 = ₪4.20 (₪1 = 23.81 U.S. cents) from August 1971 to November 1974; \$1 = ₪6.00 (₪1 = 16.67 U.S. cents) from November 1974 to June 1975. Since June 1975 the currency has been frequently devalued. In July 1976 the Israeli pound was linked to a "basket" of five currencies of the country's main trading partners, instead of being linked to the U.S. dollar alone. The average market rate (£1 per U.S. \$) was: 4.50 in 1974; 6.39 in 1975; 7.98 in 1976. The exchange rate was £1 sterling = ₪8.40 from February 1962 to August 1971; and £1 sterling = ₪10.944 from December 1971 to June 1972.

THE CONSTITUTION

There is no written Constitution. In June 1950, the Knesset voted to adopt a State Constitution by evolution over an unspecified period. A number of laws, including the Law of Return (1950), the Nationality Law (1952), the State President (Tenure) Law (1952), the Education Law (1953) and the "Yad-va-Shem" Memorial Law (1953) are considered as incorporated into the State Constitution. Other constitutional laws are: The Law and Administration Ordinance (1948), the Knesset Election Law (1951), the Law of Equal Rights for Women (1951), the Judges Act (1953), the National Service and National Insurance Acts (1953), and the Basic Law (The Knesset) (1958).

The President

The President is elected by the Knesset for five years.

Ten or more Knesset Members may propose a candidate for the Presidency.

Voting will be by secret ballot.

The President may not leave the country without the consent of the Government.

The President may resign by submitting his resignation in writing to the Speaker.

The President may be relieved of his duties by the Knesset for misdemeanour.

The Knesset is entitled to decide by a two-thirds majority that the President is incapacitated owing to ill-health to fulfil his duties permanently.

The Speaker of the Knesset will act for the President when the President leaves the country, or when he cannot perform his duties owing to ill-health.

The Knesset

The Knesset is the parliament of the State. There are 120 members.

It is elected by general, national, direct, equal, secret and proportional elections.

Every Israel national of 18 years or over shall have the right to vote in elections to the Knesset unless a court has deprived him of that right by virtue of any law.

Every Israel national of 21 and over shall have the right to be elected to the Knesset unless a court has deprived him of that right by virtue of any law.

The following shall not be candidates: the President of the State; the two Chief Rabbis; a judge (*shofet*) in office; a judge (*dayan*) of a religious court; the State Comptroller; the Chief of the General Staff of the Defence Army of Israel; rabbis and ministers of other religions in office; senior State employees and senior Army officers of such ranks and in such functions as shall be determined by law.

The term of office of the Knesset shall be four years.

The elections of the Knesset shall take place on the third

Tuesday of the month of Cheshven in the year in which the tenure of the outgoing Knesset ends.

Election day shall be a day of rest, but transport and other public services shall function normally.

Results of the elections shall be published within fourteen days.

The Knesset shall elect from among its members a Chairman and Vice-Chairman.

The Knesset shall elect from among its members permanent committees, and may elect committees for specific matters.

The Knesset may appoint commissions of inquiry to investigate matters designated by the Knesset.

The Knesset shall hold two sessions a year; one of them shall open within four weeks after the Feast of the Tabernacles, the other within four weeks after Independence Day; the aggregate duration of the two sessions shall not be less than eight months.

The outgoing Knesset shall continue to hold office until the convening of the incoming Knesset.

The members of the Knesset shall receive a remuneration as provided by law.

The Government

The Government shall tender its resignation to the President immediately after his election, but shall continue with its duties until the formation of a new Government.

After consultation with representatives of the parties in the Knesset, the President shall charge one of the Members with the formation of a Government.

The Government shall be composed of a Prime Minister and a number of Ministers from among the Knesset Members or from outside the Knesset.

After it has been chosen, the Government shall appear before the Knesset and shall be considered as formed after having received a vote of confidence.

Within seven days of receiving a vote of confidence, the Prime Minister and the other Ministers shall swear allegiance to the State of Israel and its Laws and undertake to carry out the decisions of the Knesset.

POLITICAL PARTIES

Likud: Tel-Aviv; f. September 1973; is a parliamentary bloc of Herut, the Liberal Party of Israel (Chair. SIMCHA EHRLICH), Laam (Leader YIGAL HOROWITZ) and Ahdut (Leader HILLEL SEIDEL); aims: territorial integrity (advocates retention of all the territory of post-1922 mandatory Palestine); absorption of newcomers; a social order based on freedom and justice, elimination of poverty and want; development of an economy that will ensure a decent standard of living; improvement of the environment and the quality of life; has 45 seats in 9th Knesset, having received 43 seats in the elections in May 1977, and having been joined by Shlomzion (which dissolved itself as a separate party and merged with Herut). After the election, with the support of the National Religious Party and Agudat Israel, and later with the Democratic Movement for Change, Likud became the government party in June 1977; Leader of Likud MENACHEM BEGIN.

Labour-Mapam Alignment: P.O.B. 3263, Tel-Aviv; the Israel Labour Party was formed in 1968 as a merger of the three Labour groups, Mapai, Rafi and Ahdut Ha'avoda; since 1969 has been joined in a parliamentary bloc by United Workers' Party (Mapam) which remains a separate party; in one form or other was government party from 1949 to 1977; Zionist social democratic party; has 32 seats in 9th Knesset; Chair. SHIMON PERES; Sec.-Gen. MEIR ZARMI.

THE JEWISH AGENCY FOR ISRAEL

P.O.B. 92, Jerusalem.

Organization:

The governing bodies are the Assembly which determines basic policy, the Board of Governors which manages the Agency between Assembly meetings and the Executive responsible for the day to day running of the Agency.

Chairman of Executive: YOSEF ALMOGI.

Chairman of Board of Governors: MAX M. FISHER.

Budget: (1977/78) U.S. 4,570,000 million

Acting Director-General: HARRY M. ROSEN.

Functions:

According to the Agreement of 1971, the Jewish Agency undertakes the immigration and absorption of immigrants in Israel, including absorption in agricultural settlement and immigrant housing, social welfare and health services in connection with immigrants, and education, youth care and training.

JUDICIAL SYSTEM

The law of Israel is composed of Ottoman law, British law, Palestine law, applicable in Palestine on May 14th, 1948, when the independence of the State of Israel was declared, the substance of the common law and doctrines of equity in force in England, as modified to suit local conditions, and religious law of the various recognized religious communities as regards matters of personal status, in so far as there is nothing in any of the said laws repugnant to Israeli legislation and subject to such modifications as may have resulted from the establishment of the State of Israel and its authorities, and also of the laws enacted by the Israeli legislature. The pre-1948 law is increasingly being replaced by original local legislation.

CIVIL COURTS

The Supreme Court is the highest judicial instance in the State. It has jurisdiction as an Appellate Court from the District Courts in all matters, both civil and criminal (sitting as a Court of Civil Appeal or as a Court of Criminal Appeal), and as a Court of First Instance (sitting as a High Court of Justice) in matters in which it considers it necessary to grant relief in the interests of justice and which are not within the jurisdiction of any other court or tribunal. This includes applications for orders in the nature of *habeas corpus*, *mandamus*, prohibition and *certiorari*, and enables the court to review the legality of acts of administrative authorities of all kinds.

President of the Supreme Court: Y. SUSSMAN.

Permanent Deputy President of the Supreme Court: M. LANDAU.

Justices of the Supreme Court: A. WITKON, H. COHN, E. M. MANNY, M. ETZIONI, I. KAHN, M. SHANGAR, S. ASHER, Mrs. M. BEN-PORAT.

The District Courts: Jerusalem, Tel-Aviv-Jaffa, Haifa, Beersheba, Nazareth. They have unlimited jurisdiction as

Courts of First Instance in all civil and criminal matters not within the jurisdiction of a Magistrates' Court, all matters not within the exclusive jurisdiction of any other tribunal, and matters within the concurrent jurisdiction of any other tribunal so long as such tribunal does not deal with them, and as an Appellate Court in appeals from judgments and decisions of Magistrates' Courts and judgments of Municipal Courts and various administrative tribunals.

Magistrates' Courts: There are 26 Magistrates' Courts, having criminal jurisdiction to try contraventions and misdemeanours, and civil jurisdiction to try actions concerning possession or use of immovable property, or the partition thereof whatever may be the value of the subject matter of the action, and other civil actions where the amount of the claim, or the value of the subject matter, does not exceed I£50,000.

Labour Courts: Established in 1969. Regional Labour Courts in Jerusalem, Tel-Aviv, Haifa and Beersheba, composed of Judges and representatives of the Public. A National Labour Court in Jerusalem, presided over by Judge Z. Bar-Niv. The Courts have jurisdiction over all matters arising out of the relationship between employer and employee; between parties to a collective labour agreement; matters concerning the National Insurance Law and the Labour Law and Rules.

Municipal Courts: There are 5 Municipal Courts, having criminal jurisdiction over any offences against municipal regulations and by-laws and certain other offences, such as town planning offences, committed within the municipal area.

RELIGIOUS COURTS

The Religious Courts are the Courts of the recognized religious communities. They are competent in certain defined matters of personal status concerning members of

their community. Where any action of personal status involves persons of different religious communities the President of the Supreme Court will decide which Court shall have jurisdiction. Whenever a question arises as to whether or not a case is one of personal status within the exclusive jurisdiction of a Religious Court, the matter must be referred to a Special Tribunal composed of two Justices of the Supreme Court and the President of the highest court of the religious community concerned in Israel.

The judgments of the Religious Courts are executed by the process and offices of the Civil Courts.

Jewish Rabbinical Courts: These Courts have exclusive jurisdiction in matters of marriage and divorce of Jews in Israel who are Israeli citizens or residents. In all other matters of personal status they have concurrent jurisdiction with the District Courts with the consent of all parties concerned.

Muslim Religious Courts: These Courts have exclusive jurisdiction in matters of marriage and divorce of Muslims who are not foreigners, or who are foreigners subject by their national law to the jurisdiction of Muslim Religious Courts in such matters. In all other matters of personal status they have concurrent jurisdiction with the District Courts with the consent of all parties concerned.

Christian Religious Courts: The Courts of the recognized Christian communities have exclusive jurisdiction in

matters of marriage and divorce of members of their communities who are not foreigners. In all other matters of personal status they have concurrent jurisdiction with the District Courts with the consent of all parties concerned. But neither these Courts nor the Civil Courts have jurisdiction to dissolve the marriage of a foreign subject.

Druze Courts: These Courts, established in 1963, have exclusive jurisdiction in matters of marriage and divorce of Druze in Israel, who are Israeli citizens or residents, and concurrent jurisdiction with the District Courts in all other matters of personal status of Druze with the consent of all parties concerned.

MILITARY COURTS

Courts-Martial: A Court-Martial is competent to try a soldier within the meaning of the Military Justice Law, 1955, who has committed an act constituting a military offence, without prejudice to the power of any other Court in the State to try him for that act if it constitutes an offence under any other law. A Court-Martial is also competent to try a soldier for any offence which is not a military offence, but the Attorney General may order that be tried by another Court if he is of the opinion that the offence was not committed within the framework of the Army or in consequence of the accused's belonging to the Army.

RELIGION

JUDAISM

Judaism, the religion evolved and followed by the Jews, is the faith of the great majority of the population. Its basis is a belief in an ethical monotheism.

There are two main Jewish communities: the Ashkenazim and the Sephardim. The former are the Jews from Eastern, Central, or Northern Europe, while the latter originate from the Balkan countries, North Africa and the Middle East. Although they have separate synagogues, and differ somewhat in their ritual and pronunciation of Hebrew, there is no doctrinal distinction. The prevailing influence is that of the Ashkenazim Jews, who are more modern and westernized, but the recent Hebrew revival has been based on the Sephardi pronunciation of the ancient Hebrew tongue.

The supreme religious authority is vested in the Chief Rabbinate, which consists of the Ashkenazi and Sephardi Chief Rabbis and the Supreme Rabbinical Council. It makes decisions on interpretation of the Jewish law, and supervises the Rabbinical Courts. There are 8 regional Rabbinical Courts, and a Rabbinical Court of Appeal presided over by the two Chief Rabbis.

According to the Rabbinical Courts Jurisdiction Law of 1953, marriage and divorce among Jews in Israel are exclusively within the jurisdiction of the Rabbinical Courts. Provided that all the parties concerned agree, other matters of personal status can also be decided by the Rabbinical Courts.

There are 195 Religious Councils, which maintain religious services and supply religious needs, and about 405 religious committees with similar functions in smaller settlements. Their expenses are borne jointly by the State and the local authorities. The Religious Councils are under the administrative control of the Ministry of Religious Affairs. In all matters of religion, the Religious Councils are subject to the authority of the Chief Rabbinate. There are 365 officially appointed rabbis. The total number of synagogues is about 7,000, most of which are organized within the framework of the Union of Israel Synagogues.

Head of the Ashkenazi Community: The Chief Rabbi SHLOMO GOREN.

Head of the Sephardic Community: The Chief Rabbi OVADIA YOSSEF.

Two Jewish sects still loyal to their distinctive customs are:

The Karaites, a sect which recognizes only the Jewish written law and not the oral law of the Mishna and Talmud. The community of about 12,000 many of whom live in or near Ramla, has been augmented by immigration from Egypt.

The Samaritans, an ancient sect mentioned in 2 Kings xvii, 24. They recognize only the Torah. The community in Israel numbers about 500; about half of them live in Holon, where a Samaritan synagogue has been built, and the remainder, including the High Priest live in Nablus, near Mt. Gerizim, which is sacred to the Samaritans.

ISLAM

The Muslims in Israel are in the main Sunnis, and are divided among the four rites of the Sunni school of Muslim thought: the Shafe'i, the Hanbali, the Hanafi, and the Maliki. Before June 1967 they numbered approximately 175,000; in 1971, approximately 343,900.

CHRISTIAN COMMUNITIES

The Greek Catholic Church: P.O.B. 279, Haifa; numbers about 40,000 and Haifa is the seat of the Archbishop of Acre, Haifa, Nazareth and all Galilee; Archbishop MAXIMOS SALLOUM; publ. *Ar-Rabita* (Arabic monthly; circ. 4,000).

The Greek Orthodox Church in Israel has approximately 22,000 members. The Patriarch of Jerusalem is His Beatitude BENEDICTOS.

The Latin (Roman Catholic) Church has about 10,000 native members in Israel plus about 2,000 Polish and

Hungarian Catholic refugees. The Latin Patriarch of Jerusalem is His Beatitude JAMES JOSEPH BELTRITTI; Representative in Israel H.E. Bishop HANNA KALDANY.

The Maronite Community, with approximately 4,000 members, has communal centres in Haifa, Jaffa, Jish, Nazareth and Jerusalem. The Maronite Patriarch resides in the Lebanon.

Episcopal Church in Jerusalem and the Middle East, belongs to the Anglican Communion; was reorganized in

1976; has Jerusalem Diocese and also Diocese of Iran, Egypt, Cyprus and the Gulf; Presiding Bishop Rt. Rev. HASSAN DEHQANI-TAFTI, P.O.B. 12, Isfahan, Iran.

Other denominations include the *Armenian Church* (900 members), the *Coptic Church* (700 members), the *Russian Orthodox Church*, which maintains an Ecclesiastical Mission, the *Ethiopian Church*, and the *Baptist Lutheran* and *Presbyterian Churches*.

THE PRESS

Tel-Aviv is the main publishing centre, only three dailies being published in Jerusalem. Largely for economic reasons there has developed no local press away from these cities; hence all papers regard themselves as national. Friday editions, Sabbath eve, are increased to up to twice the normal size by special weekend supplements, and experience a considerable rise in circulation. No newspapers appear on Saturday.

Most of the daily papers are in Hebrew, and others appear in Arabic, English, French, Polish, Yiddish, Hungarian and German. The total daily circulation is 500,000–600,000 copies, or twenty-one papers per hundred people, although most citizens read more than one daily paper.

Most Hebrew morning dailies have strong political or religious affiliations. *Al Hamishmar* is affiliated to Mapam, *Hatzofeh* to the National Religious Front—World Mizrahi. *Davar* is the long-established organ of the Histadrut. Mapai publishes the weekly *Ol*. Although the revenue from advertisements is increasing, very few dailies are economically self-supporting; most depend on subsidies from political parties, religious organizations or public funds. The limiting effect on freedom of commentary entailed by this party press system has provoked repeated criticism.

The Jerusalem Arabic daily *Al Anba* has a small circulation (10,000) but an increasing number of Israeli Arabs are now reading Hebrew dailies. The daily, *Al Quds*, was founded in 1968 for Arabs in Jerusalem and the West Bank; the small indigenous press of occupied Jordan has largely ceased publication or transferred operations to Amman.

There are around 400 other newspapers and magazines including some 50 weekly and 150 fortnightly; over 250 of them are in Hebrew, the remainder in eleven other languages.

The most influential and respected dailies, for both quality of news coverage and commentary, are *Ha'aretz* and the trade union paper, *Davar*, which frequently has articles by government figures. These are the widest read of the morning papers, exceeded only by the popular afternoon press, *Ma'ariv* and *Yedioth Aharonoth*. The *Jerusalem Post* gives detailed and sound news coverage in English.

The Israeli Press Council, established in 1963, deals with matters of common interest to the Press such as drafting the recently published code of professional ethics which is binding on all journalists.

The Daily Newspaper Publishers' Association represents publishers in negotiations with official and public bodies, negotiates contracts with employees and purchases and distributes newsprint, of which Israel now manufactures 75 per cent of her needs.

THE HISTADRUT

Hahistadrut Haklalit shel Haovdim Beeretz Israel, 93 Arlosoroff St., Tel-Aviv

(GENERAL FEDERATION OF LABOUR IN ISRAEL)

Secretary-General: YERUHAM MESHEL.

The General Federation of Labour in Israel, usually known as the Histadrut, is the largest voluntary organization in Israel, and the most important economic body in the State. It is open to all workers, including members of co-operatives and of the liberal professions, who join directly as individuals. The Histadrut engages in four main fields of activity: trade union organization; economic development; social insurance based on mutual aid; and educational and cultural activities. Dues—between 2.5 per cent and 5.9 per cent of wages (up to £3,500 per month)—cover all its trade union, health and social services activities. The Histadrut was founded in 1920.

ORGANIZATION

In 1977 the Histadrut had a membership of 1,456,000, including over 150,000 in collective, co-operative and private villages (*kibbutzim* and *moshavim*) affiliated through the Agricultural Workers' Union, and 370,000 wives (who have membership status); 112,950 of the members were Arabs. In addition some 100,000 young people under 18 years of age belong to the Organization of Working and Student Youth, a direct affiliate of the Histadrut. The main religious labour organizations, *Histadrut Hapoel Hamizrachi* and *Histadrut Poalei Agudat Israel*, belong to the trade union section and welfare services, which thus extend to 90 per cent of all workers in Israel.

All members take part in elections to the Histadrut Convention (*Veida*), which elects the General Council (*Moetsa*) and the Executive Committee (*Vaad Hapoel*). The latter elects the 22-member Executive Bureau (*Vaada Merakezet*), which is responsible for day-to-day implementation of policy. The Executive Committee also elects the Secretary-General, who acts as its chairman as well as head of the organization as a whole and chairman of the Executive Bureau. Nearly all political parties are represented on the Histadrut Executive Committee. Throughout Israel there are 68 local Labour Councils.

The Executive Committee has the following departments: Trade Union, Arab Affairs, Mutual Security Centre, Organization, International, Finance, Legal, Employment, Vocational Training, Absorption and Development, Academic Workers, Culture and Education, Institute of Economic and Social Research, Diaspora Communities, Youth and Sport, Consumers' Authority, Industrial Democracy, Religious Affairs and Higher Education.

TRADE UNION ACTIVITIES

Collective agreements with employers fix wage scales, which are linked with the retail price index; provide for social benefits, including paid sick leave and employers' contributions to sick and pension and provident funds; and regulate dismissals. Dismissal compensation, until recently fixed by collective agreements, is now regulated by law. The Histadrut actively promotes productivity through labour management boards and the National Productivity Institute, and supports incentive pay schemes.

There are unions for the following groups: clerical workers, building workers, teachers, engineers, agricultural workers, technicians, textile workers, printing workers, diamond workers, metal workers, food and bakery workers, wood workers, government employees, seamen, nurses, civilian employees of the armed forces, actors, musicians and variety artists, social workers, watchmen, cinema technicians, institutional and school staffs, pharmacy employees, medical laboratory workers, X-ray technicians, physiotherapists, social scientists, microbiologists, psychologists, salaried lawyers, pharmacists, physicians, occupational therapists, truck and taxi drivers, hotel and restaurant workers, workers in Histadrut-owned industry, garment, shoe and leather workers, plastic and rubber workers, Editors of periodicals, painters and sculptors and industrial workers.

ECONOMIC ACTIVITIES AND SOCIAL SERVICES

These include *Havat Ovdim* (Economic Sector, employing 249,650 workers in 1977), *Kafat Heken* (the Sick Funds, seven pension funds, and *Na'amat* (women's organization which runs nursery homes and kindergartens, organizes vocational education and promotes legislation for the protection and benefit of working women).

THE IVORY COAST

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of the Ivory Coast lies on the west coast of Africa between Ghana to the east and Liberia to the west, with Guinea, Mali and Upper Volta to the north. The climate is hot and wet with temperatures varying from 14° to 39°C (57° to 103°F). The official language is French and a large number of African languages are spoken. The majority of the population follows traditional beliefs; Christians, mainly Roman Catholic, make up 12 per cent of the population, and Muslims about 23 per cent. The national flag (proportions 3 by 2) is a vertical tricolour of orange, white and green. The capital is Abidjan.

Recent History

The Ivory Coast became an independent Republic in August 1960. Formerly a province of French West Africa, in 1958 it was declared to be a self-governing member of the French Community. In 1959 it joined with Dahomey, Niger and Upper Volta to form the Conseil de l'Entente, a regional politico-economic association. Though it did not rejoin the French Community on attaining independence it is closely bound to France.

The President, Félix Houphouët-Boigny, has been in power without formal opposition since before independence. His *Parti démocratique de la Côte d'Ivoire* is the only political party. A high rate of economic growth and strong support from the French have contributed to the stability of the regime. Opposition has come from workers and students rejecting the ideology and economic policy of the Government and from tribal groups or politicians who are excluded from a share in power. A serious attempt at a *coup d'état* was foiled in 1963 and there were demonstrations and riots in 1968 and 1969. Twelve army officers were arrested in 1973 for allegedly planning a coup but most have since been released. The Government responded to criticism by implementing a policy of regional development and increased Ivorian direction of commercial enterprises. In November 1975 Houphouët-Boigny was re-elected unopposed for a fourth five-year term of office. In July 1977, in a campaign against waste and corruption, he replaced several senior members of the Cabinet and passed a series of measures against trading corruption and commodity speculation.

Houphouët-Boigny is committed to a policy of dialogue between black Africa and white-ruled South Africa. Although strongly criticized by other African states, he argues that the maintenance and extension of links with South Africa can better serve the interests of the black majority there and in 1976 he reiterated his belief that dialogue would eventually secure a non-violent end to apartheid. In 1977 he held talks with the South African Foreign Minister. He is also outspokenly anti-Communist and has denounced Soviet intervention in African affairs. Relations with Liberia were cemented during 1977 by agreements on joint projects, including a hydro-electric dam on the Cavally river. In January 1978 President Giscard d'Estaing of France made a state visit which emphasized the special role of the Ivory Coast in French foreign policy.

Government

The Ivory Coast is a Republic with executive power vested in the President, who is elected for a five-year term by direct universal suffrage. The Council of Ministers is directly responsible to him. Legislative power is vested in the unicameral National Assembly, with 120 members directly elected for five years. The ruling *Parti démocratique de la Côte d'Ivoire* is the only political party. The country is divided into 24 Departments, each with its own elected Council.

Defence

Defence matters are the concern of the Regional Defence Council of the Conseil de l'Entente through which agreements with France have been negotiated. France supplies equipment and training in return for bases in case of need. The Ivory Coast has 4,500 men in the army, 200 in the air force, 250 in the navy and a gendarmerie of 3,000.

Economic Affairs

Since independence the Ivory Coast has been one of the most successful nations of West Africa in developing its economy from a largely agricultural base. Initially France provided the managerial and technical skills necessary for the further development of plantation cash crops such as coffee, cocoa, oil palms, coconut palms, rubber, pineapples and bananas, and in 1977 there were still 47,000 French nationals living in the Ivory Coast. However, the policy of "Ivorianization" and a system of uniform guaranteed prices for commodities paid by the state purchasing organizations have created a class of moderately prosperous planters. The Ivory Coast is Africa's leading exporter of coffee and timber, and is planning to become the principal African cocoa exporter by 1985. The development of rice and sugar-cane growing has reduced imports of these commodities, and a policy of reforestation aims to prevent exhaustion of timber resources.

The discovery in 1977 of petroleum deposits off the coast at Assilic, expected to yield 400,000 metric tons per year by 1980, should enable the country to reduce imports and stimulate the pharmaceuticals, textiles, paper and metal industries. Diamonds are mined and there are large quantities of high-quality iron ore at Bangolo.

Industrial development has been steady, the G.D.P. growing at about 8 per cent annually, and has been based on the processing of primary commodities before export. An increasing proportion of timber is treated locally and a pulp mill is planned. Most exported palm oil is now refined, and large quantities of fruit are tinned or preserved. However, 70 per cent of Ivoirians still work in the agricultural sector, and President Houphouët-Boigny is attempting to reduce unemployment and stop the drift of workers to the towns by the provision of an "urban infrastructure" of services such as sewerage, hospitals and entertainments in regional centres and villages. The development of the northern regions was a priority of the 1976-80 five-year plan, and the coast is being developed as an "African Riviera".

IVORY COAST

Financially the Ivory Coast remains dependent on foreign money, especially from France, for investment projects, in spite of the establishment in 1976 of a stock exchange in Abidjan which gave Ivorians priority in buying shares.

The Ivory Coast is a member of the OAU, CEAO and OCAM and an associate member of the EEC, and Abidjan is the headquarters of the African Development Bank.

Transport and Communications

A one-metre gauge railway runs to Upper Volta from Abidjan. The Ivory Coast has an extensive road system of 45,214 km. of roads (1976), of which over 7,000 km. are surfaced. The lower courses of the rivers and the coastal lagoons are used for local transport. Abidjan is the most important seaport in French-speaking West Africa, and in addition a new port at San Pedro in the south-west has been operational since 1971. The Ivory Coast is a member of Air Afrique.

Social Welfare

Medical services are organized by the state. There are 12 hospitals with a total of 9,252 beds and 300 doctors. There is a minimum wage (SMIG) for workers in industry and commerce.

Education

The Government provides education at nominal rates and attendance at primary school is compulsory. On average, 65 per cent of children attend school, though in the towns there is over 90 per cent attendance. In 1976/77 there were 740,375 pupils in primary schools, 113,366 in secondary schools, 9,165 in technical schools and 8,196 in higher education. The University of Abidjan, now the National University with five faculties, was founded in 1964 and in 1976/77 had 7,560 students. In addition a large number of students enrol at French universities.

Tourism

The game reserves, forests and lagoons, and the capital Abidjan, are all of interest to tourists and there were 108,934 visitors in 1975. In 1976 revenue from tourism was 14,427 million francs CFA, 21 per cent more than 1975. The 10 km. coastal strip along the Lagune Ebrié to the west of Abidjan is being developed as a tourist riviera. There are 132 hotels with a total of 4,698 rooms in the Ivory Coast.

Visas are not required by nationals of the following countries: Andorra, Benin, Cameroon, the Central African Empire, Chad, France, Gabon, Madagascar, Mali, Mauritania, Monaco, Niger, Togo and Zaire.

Sport

There is little organized sport. Football is popular.

Public Holidays

1978: May 1st (Labour Day), May 4th (Ascension), May 14th (Whit Monday), August 15th (Assumption), September 4th (Id ul Fitr, end of Ramadan), November 1st (All Saints' Day), November 11th (Tabaski, Id ul Adha), December 7th (Independence), December 25th (Christmas).

1979: January 1st (New Year), April 16th (Easter Monday).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 centimes = 1 franc de la Communauté financière africaine (CFA).

Exchange rates (December 1977):

1 franc CFA = 2 French centimes;

£1 sterling = 442.4 francs CFA;

U.S. \$1 = 241.4 francs CFA.

THE CONSTITUTION

(Promulgated October 31st, 1960, modified June 1971 and October 1975.)

Preamble: The Republic of the Ivory Coast is one and indivisible. It is secular, democratic and social. Sovereignty belongs to the people who exercise it through their representatives or through referendum. There is universal, equal and secret suffrage. French is the official language.

Head of State: The President is elected for a 5-year term by direct universal suffrage and is eligible for re-election. He is Head of the Administration and the Armed Forces and has power to ask the National Assembly to reconsider a Bill, which must then be passed by two-thirds of the members of the Assembly; he may also have a Bill submitted to a referendum. In case of the death or incapacitation of the President his functions are carried out by the President of the National Assembly.

Executive Power: Executive power is vested in the Presi-

dent. He appoints a Council of Ministers, who are responsible only to him. Any member of the National Assembly appointed minister must renounce his seat in the Assembly, but may regain it on leaving the government.

Legislative Power: Legislative power is vested in a National Assembly of 120 members, elected for a 5-year term of office at the same time as the Presidential elections. Legislation may be introduced either by the President or by a member of the National Assembly.

Judicial Power: The independence of the judiciary is guaranteed by the President, assisted by a High Council of Judiciary.

Economic and Social Council: An advisory commission of 45 members appointed by the President because of their specialist knowledge or experience.

JAMAICA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Jamaica is an island in the Caribbean, 90 miles (145 km.) south of Cuba. Haiti is 100 miles (160 km.) to the east. The climate varies with altitude, being tropical at sea level and temperate in the mountain areas. Average temperature is 80°F (27°C) and mean annual rainfall is 78 inches (198 cm.). The language is English. The majority of the population belong to Christian churches, of which the Church of England and the Baptist Church are the strongest. The national flag (proportions 2 by 1) consists of a diagonal gold cross on a black and green background. The capital is Kingston.

Recent History

Formerly a British colony, the island achieved internal self-government in 1959 and full independence in 1962. In 1958 Jamaica joined with Trinidad, Barbados, the Leeward Islands and the Windward Islands to form the West Indies Federation. Jamaica seceded in 1961 following a referendum and the Federation broke up. The two dominant political figures after the Second World War were the late Sir Alexander Bustamante, leader of the Jamaica Labour Party (JLP), who retired as Prime Minister in 1967, and Norman Manley, a former Premier and leader of the People's National Party (PNP), who died in 1969.

The Labour Party won the elections of 1962 and 1967 but under the premiership of Hugh Shearer it lost the elections of February 1972 to the People's National Party, led by Michael Manley, the son of Norman Manley. Mr. Manley is an advocate of democratic socialism and his government puts great emphasis on social reform and economic independence.

In late 1973 the Government introduced measures to counter growing violence which included the establishment of a "Guns Court", to try firearms cases, and the introduction of a Suppression of Crime Act giving the security forces wider powers of arrest and detention. Despite these measures the crime rate increased: between January and June 1976 162 people were killed, including 19 policemen and the Peruvian ambassador, and in June the Government declared a state of public emergency. Despite the unrest, high unemployment, and an economic crisis due to strikes, falling sugar prices and bauxite production, and a drop in tourism, the PNP won the election of December 1976 with an increased majority, which was reinforced by its victory in the local government elections in March 1977. The state of emergency was lifted in June 1977. Its ending, together with the call for public discussion of Jamaica's proposed change to republican status, fulfilled two of the pledges which Mr. Manley made when the PNP was returned to power.

Jamaica pursues a policy of non-alignment in its foreign relations, and is seeking to diversify its international trading links. Relations with the U.S.A., which had deteriorated in 1976, improved in 1977. Technical and economic co-operation agreements were signed with Venezuela and Cuba. Jamaica has expressed an interest in closer links with the member countries of the Council for Mutual Economic Assistance (CMEA).

Government

The Head of State is the British monarch, who is represented by a Governor-General appointed on the advice of the Prime Minister.

The legislature consists of a Senate of 21 members and a House of Representatives of 60 members. Thirteen members of the Senate are appointed by the Governor-General on the advice of the Prime Minister and eight on the advice of the Leader of the Opposition. The House of Representatives is elected for five years by universal suffrage, the voting age being 18. Executive power lies with the Cabinet. The Governor-General appoints the Prime Minister and, on the latter's recommendation, other Ministers. The Cabinet is responsible to Parliament.

Defence

Jamaica has a total defence force of some 1,400 men. The police force numbered 2,391 in 1976.

Economic Affairs

The economy is based on sugar, bauxite and tourism. The major agricultural exchange earner is sugar, with molasses and rum as important by-products. Bananas, citrus fruits and coconuts are also cultivated. The citrus industry was severely affected by drought in 1975 and 1976. Production of raw sugar fell from 357,000 tons in 1976 to 291,000 tons in 1977. In 1974 Jamaica signed a five-year agreement with the People's Republic of China to export 100,000 tons of sugar and it is also under a seven-year contract to supply 350,000 tons to Iran. A more general agricultural development plan was introduced in 1974, with measures aimed at bringing more land into production and developing a system of land reform designed to make Jamaica self-sufficient in food and thus improve the balance of payments problem. A major programme of rural electrification has been launched.

Jamaica is the world's second largest producer of bauxite and alumina and has a policy of increased intervention in bauxite processing, previously handled by American companies. In 1974 the Government increased the bauxite production levy on foreign-owned companies and concluded an agreement with the Kaiser Bauxite Company, which gave it a 51 per cent interest in the company's local mining assets. This became effective in 1977, with the establishment of the Kaiser Jamaica Bauxite Company. Similar agreements were concluded with Alcoa in 1976 and with the Reynolds Metal Company in 1977. Jamaica and Guyana have agreed to construct two joint alumina processing smelters by 1981. Jamaica and Mexico are to establish a multi-national bauxite and aluminium complex at a cost of U.S. \$360 million. Revenue from bauxite fell in 1975 and 1976 due to strikes and a fall in the world demand for aluminium, but rose in 1977 to J\$193 million. Bauxite production in 1977 was estimated at 12 million tons.

Industry is expanding and covers cement, tobacco and a number of consumer goods. An oil refinery with an initial capacity of 50,000 barrels per day is under construction, with Mexican aid. Trade is chiefly with the U.S.A., Canada and the United Kingdom.

Tourism is Jamaica's second largest foreign exchange earner. However, the number of tourists dropped in 1976, due to the political unrest, and continued to fall in 1977 by 34 per cent in the first five months compared with the same period in 1976. Strict monetary measures, including exchange control regulations and import restrictions, are in force. Economic measures introduced in January 1977 included a freeze on prices and wages until July 1st, a J\$600 million ceiling on imports in 1977, a tightening of exchange controls and increases in surtax and petrol prices. The Government also undertook to nationalize three foreign-owned commercial banks and a locally-owned cement factory. In April an Emergency Production Plan, with the principal aim of reducing food imports, was announced. A dual exchange rate system was also introduced, with a basic rate applicable to Government purchases and essential imports, and a special rate to all other transactions. The basic rate corresponded to the existing parity but the special rate represented a 27 per cent devaluation of the Jamaican dollar. In terms of the special rate, the dollar was devalued by a further 2.3 per cent in October, and both rates were devalued in January 1978. The Government hoped to present a national development plan later in 1978. The austerity measures had some effect in 1977; the current account deficit on the balance of payments was reduced to J\$19 million during the six months to June 1977, compared with J\$168 million during the corresponding period of 1976, and the deficit on the net foreign exchange reserves was reduced from J\$200 million in late 1977 to J\$170 million in early 1978. Unemployment, however, rose to 27 per cent in 1977, and inflation in late 1977 was 11 per cent. Jamaica received foreign aid in 1977 from various sources, and negotiated a U.S. \$74.6 million loan from the IMF, which was, however, dependent on the fulfilment of specific conditions.

Jamaica is a member of the Organization of American States, the Caribbean Common Market (CARICOM), the International Bauxite Association and the Latin American Economic System (SELA).

Transport and Communications

There are 205 miles (330 km.) of railway, including a line 112 miles (180 km.) long running diagonally across the island from Kingston to Montego Bay; 2,825 miles (4,546 km.) of main roads and 7,223 miles (11,624 km.) of parochial and subsidiary roads link towns and villages. The principal ports are Kingston and Montego Bay. There are two international airports. Jamaica has its own airline and is well served by a number of international air lines.

Social Welfare

Social welfare is undertaken by the Government; the Social Development Commission arranges and co-ordinates social welfare in the villages. Contributory national insurance and housing trust schemes are run by the Government. In 1974 there were 7,780 beds in government hospitals and the country had 570 physicians.

Education

Primary education is compulsory in certain districts and free education is ensured. Five of the eight faculties of the University of the West Indies are in Kingston. Adult illiteracy averaged 18.1 per cent (males 21.4 per cent, females 15.2 per cent) in 1970, but had fallen to 11 per cent by 1976 as a result of the Jamaica Movement for the Advancement of Literacy (JAMAL), established in 1972.

Tourism

Jamaica attracts many tourists, mainly from the U.S.A. In 1976 470,714 tourists visited the island. Revenue from tourism in 1976 was J\$96.1 million. Hotel proprietors receive tax concessions to encourage development.

Visas are not required to visit Jamaica by nationals of Commonwealth countries, EEC countries (except Ireland), Finland, Iceland, Israel, Liechtenstein, Norway, San Marino, Spain, Sweden, Switzerland and the U.S.A.

Sport

The chief sports are cricket, athletics, tennis and football.

Public Holidays

1978: May 23rd (Labour Day), August 7th (for Independence Day), October 17th (National Heroes' Day), December 25th and 26th (Christmas).

1979: January 1st (New Year), February 28th (Ash Wednesday), April 13th (Good Friday), April 16th (Easter Monday).

Weights and Measures

The imperial system is in force but the metric system is to be introduced by 1980.

Currency and Exchange Rates

100 cents = 1 Jamaican dollar (J\$).

Exchange rates (December 1977):

£1 sterling = J\$1.665;

U.S. \$1 = 90.9 Jamaican cents.

FINANCE

100 cents = 1 Jamaican dollar (J\$).

Coins: 1, 5, 10, 20 and 25 cents.

Notes: 50 cents; 1, 2, 5 and 10 dollars.

Exchange rates (December 1977): £1 sterling = J\$1.665 (basic rate) or J\$2.344 (special rate);

U.S. \$1 = 90.9 Jamaican cents (basic rate) or J\$1.28 (special rate).

J\$100 = £60.06 = U.S. \$110.00 (basic rates).

Note: The Jamaican dollar (J\$) was introduced in September 1969, replacing the Jamaican pound (J£) at the rate of J£1 = J\$2.00. The Jamaican pound was at par with the pound sterling (fixed at U.S. \$2.40 in November 1967) so the initial value of the Jamaican dollar was U.S. \$1.20 (U.S. \$1 = 83.333 Jamaican cents). This remained in effect until August 1971. From December 1971 to January 1973 the Jamaican dollar was valued at U.S. \$1.303 (U.S. \$1 = 76.754 Jamaican cents). In January 1973 the currency was devalued by 15.6 per cent to U.S. \$1.10 (U.S. \$1 = 90.909 Jamaican cents) and this valuation has remained in effect despite the devaluation of the U.S. dollar in February 1973. In April 1977 a two-tier exchange rate system was introduced. The parity of J\$1 = U.S. \$1.10 became the basic rate, while a special rate of U.S. \$1 = J\$1.25 (J\$1 = 80 U.S. cents) was established for exports, non-essential imports and tourism. In October 1977 the special rate was revised to U.S. \$1 = J\$1.28 (J\$1 = 78.1 U.S. cents). In January 1978 both rates were adjusted, with a new basic rate of U.S. \$1 = J\$1.05 (J\$1 = 95.2 U.S. cents) and a special rate of U.S. \$1 = J\$1.35 (J\$1 = 74.1 U.S. cents). In terms of sterling, the exchange rate remained at £1 = J\$2.00 until June 1972.

THE CONSTITUTION

The Constitution came into force at the independence of Jamaica on August 6th, 1962.

THE GOVERNOR-GENERAL

The Governor-General is appointed by The Queen and holds office during her pleasure.

THE LEGISLATURE

The Senate or Upper House consists of 21 Senators of whom 13 will be appointed by the Governor-General on the advice of the Prime Minister and 8 by the Governor-General on the advice of the Leader of the Opposition.

The House of Representatives consists of 60 elected members called Members of Parliament.

A person is qualified for appointment to the Senate or for election to the House of Representatives if he is a citizen of Jamaica or other Commonwealth country, of the age of 21 or more and has been ordinarily resident in Jamaica for the immediately preceding twelve months.

THE PRIVY COUNCIL

The Privy Council consists of six members appointed by the Governor-General after consultation with the Prime Minister, of whom at least two are persons who hold or who have held public office. The functions of the Council are to advise the Governor-General on the exercise of the Royal Prerogative of Mercy and on appeals on disciplinary matters from the three Service Commissions.

THE EXECUTIVE

The Prime Minister is appointed from the House of Representatives by the Governor-General as the person who, in his judgement, is best able to command the support of the majority of the members of that House.

The Leader of the Opposition is appointed by the Governor-General in his discretion as the member of the

House of Representatives who, in his judgement, is best able to command the support of the majority of those members of the House who do not support the Government.

The Cabinet consists of the Prime Minister and not fewer than eleven other Ministers appointed by the Governor-General on the advice of the Prime Minister.

THE JUDICATURE

The Judicature consists of a Supreme Court, a Court of Appeal and minor courts. Judicial matters, notably advice to the Governor-General on appointments, are considered by a Judicial Service Commission, the Chairman of which is the Chief Justice, members being the President of the Court of Appeal, the Chairman of the Public Service Commission and three others.

CITIZENSHIP

All persons born in Jamaica after Independence automatically acquire Jamaican citizenship and there is also provision for the acquisition of citizenship by persons born outside Jamaica of Jamaican parents. Persons born in Jamaica (or persons born outside Jamaica of Jamaican parents) before independence who immediately prior to independence were citizens of the United Kingdom and Colonies also automatically become citizens of Jamaica.

Appropriate provision is made which permits persons who do not automatically become citizens of Jamaica to be registered as such.

FUNDAMENTAL RIGHTS AND FREEDOMS

The Constitution includes provisions safeguarding the fundamental freedoms of the individual, irrespective of race, place of origin, political opinions, colour, creed or sex, subject only to respect for the rights and freedoms of others and for the public interest. The fundamental freedoms include the right of life, liberty, security of the person and protection from arbitrary arrest or restriction of movement, the enjoyment of property and the protection of the law, freedom of conscience, of expression and of peaceful assembly and association, and respect for private and family life.

JAPAN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Japan forms a curved chain of islands off the coast of east Asia. There are four large islands, named (from north to south) Hokkaido, Honshu, Shikoku and Kyushu, plus the Ryukyu Islands and many smaller islands. Hokkaido lies just to the south of the large Soviet island, Sakhalin, and about 1,300 km. east of the U.S.S.R.'s mainland port, Vladivostok. Southern Japan is about 150 km. east of Korea. Although summers are everywhere temperate, the climate in winter varies sharply from north to south. Typhoons and heavy rains are common in summer. The language is Japanese. The major religions are Shinto and Buddhism and there is a minority of Christians. The national flag (proportions usually 3 by 2) consists of a red sun without rays on a white background. The capital is Tokyo.

Recent History

Following Japan's surrender in August 1945, ending the Second World War, the country was placed under U.S. military occupation. A new democratic constitution, which took effect from May 1947, renounced war and abandoned the doctrine of the Emperor's divinity. Following the peace treaty of September 1951, Japan regained its sovereignty in April 1952. Rival conservative political groups merged in November 1955 to form the Liberal-Democratic Party (LDP), which has held power ever since. The Bonin Islands and the Ryukyu Islands (including Okinawa), administered by the U.S.A. from 1945, were returned to Japan in June 1968 and May 1972 respectively.

Japan has attempted peace and co-operation treaties with both the Soviet Union and the People's Republic of China in recent years. American military support continues to be provided. Stability in South-East Asia is a vital consideration in foreign policy, since Japan depends on Asia for a third of its foreign trade as well as vital supplies of raw materials.

In July 1972 the Prime Minister, Eisaku Sato, after holding office for eight years, resigned and was succeeded by Kakuei Tanaka. However, increasing economic difficulties and allegations of personal misconduct eventually resulted in a loss of support for Tanaka's leadership. He resigned in December 1974 and was succeeded by Takeo Miki. The eruption in February 1976 of a scandal involving senior politicians, concerning massive bribes accepted from the Lockheed Aircraft Corporation, a leading U.S. aerospace company, and the subsequent arrest of Kakuei Tanaka, the former Prime Minister, had a serious effect on the political situation. A split developed within the ruling LDP and by September Miki was under pressure to resign. A Cabinet reshuffle failed to solve the crisis. In December the results of the general election, in which the LDP's majority was substantially reduced, finally forced Miki to resign, and he was replaced by Takeo Fukuda, a former Deputy Prime Minister. In the Upper House election of July 1977 the LDP suffered a further setback. In November Fukuda carried out a major reshuffle of the Cabinet, bringing in a number of economic experts, in a bid to avert a crisis over the huge trade surplus.

Government

Under the Constitution of 1946 the Emperor is Head of State but has no governing power. Legislative power is vested in the bicameral Diet, consisting of the House of Representatives (511 seats), whose members are elected for a four-year term, and the House of Councillors (252 seats), members of which are elected for six years, one half retiring every three years. There is universal suffrage at the age of 20. Executive power is vested in the Cabinet. The Prime Minister is appointed by the Emperor (on designation by the Diet) and himself appoints the other Ministers. The Cabinet is responsible to the Diet.

Japan has 47 prefectures, each administered by an elected Governor.

Defence

Although the Constitution renounces war and the use of force, the right of self-defence is not excluded and ground, maritime and air self-defence forces are maintained. Military service is voluntary. The U.S.A. provides equipment and training staff and also maintains bases. The total strength of the self-defence forces was estimated at 238,000 in 1977: army 155,000, navy 40,000 and air force 43,000. The defence budget for 1977/78 was 1,691,000 million yen.

Economic Affairs

Japan is not well endowed with natural resources. Some 66 per cent of the total land area is forested and, although almost completely self-sufficient in rice, the country has to import more than 70 per cent of the other cereals and fodder crops consumed. Mineral resources are meagre, except for limestone and sulphur, and Japanese industry is heavily dependent on imported raw materials and fuels. Crude petroleum accounted for 34 per cent of import costs in 1975.

Based on the promotion of manufacturing industries for the export market, Japan achieved and maintained a very high rate of economic growth after 1945. Gross national product (G.N.P.) grew at an average annual rate of 10.3 per cent between 1962 and 1972 and in 1971 Japan's G.N.P. became the second largest in the world, ranking behind only the U.S.A. (Soviet bloc countries excluded). The 1976-80 Economic Plan envisages an average annual growth rate of just over 6 per cent, and a reduction in the unemployment rate from 2 per cent (in 1975) to 1.3 per cent by 1980. Consumer prices are expected to be increasing by less than 6 per cent by the last year of the plan.

In 1976 the economy began to recover from the recessionary conditions of the preceding two years. G.N.P. grew by 6.3 per cent in real terms, compared with 2.4 per cent in 1975, and a great increase in exports, particularly those of the motor and electrical industries, produced a very large trade surplus. Another massive surplus of U.S. \$9,752 million was recorded in 1977, leading to increased tension between Japan and its western trading partners.

Since 1969, concessions have been granted for off-shore oil exploration in the Korean Straits, Sea of Japan and off Hokkaido Island. The first oil drilling began in February 1971. In January 1974 Japan and South Korea agreed on the joint development of oil resources on the continental shelf south of Cheju island.

The proportion of the labour force employed in agriculture, forestry and fisheries was 19 per cent in 1970, while the contribution of this sector to the gross domestic product was 6.5 per cent, a decline in each case. The principal crops are rice, wheat, barley and potatoes. Japan is a leading fishing nation, both in coastal and deep-sea waters. Mining, construction and manufacturing contributed 35 per cent of the gross domestic product in 1970, employing 44 per cent of the labour force. Heavy and chemical industries predominate in the increasing output of the manufacturing sector (26 per cent of national income), particularly petrochemicals, automobiles, steel, machinery, electrical equipment and chemicals. Investment in preventing pollution from industry is increasing. Commerce, transport, communications and services accounted for 49 per cent of the gross domestic product and 46 per cent of the labour force.

Japan has been under pressure to revalue its currency in view of the favourable conditions of Japanese exports on the world market. The yen was revalued in December 1971 and floated in February 1973, and remained steady until 1977, when it appreciated by over 20 per cent against the U.S. dollar.

Transport and Communications

Despite difficulties of terrain, rail transport is highly developed, and a 54 kilometre-long tunnel linking Hokkaido and Honshu Islands is being built. The whole project, estimated to cost 355,400 million yen, is expected to be completed by April 1982. Japanese National Railways owned 21,272 km. of track in 1977. Work began in 1971 on a new super express railway network linking all the major cities. To be completed by 1985, it will total 9,000 km. in length and was to cost 11,300,000 million yen. Japan's road network covered 1,068,252 km. in March 1977, and plans have been made to cover the country with a trunk automobile highway network of 7,600 km. by 1985. Large and small craft ply between the islands and there is a big fleet of ocean-going vessels. Japan had 39,496,000 gross tons of mercantile marine in June 1976. The main ports are Yokohama, Nagasaki and Kobe. Japanese Air Lines (JAL) are state-subsidized and there are over 20 other air transport companies. There are three international airports, at Tokyo, Osaka and Narita.

Social Welfare

About 90 per cent of the population are insured under schemes covering health, welfare annuities, unemployment and industrial accidents. In 1975 there were 10.4 hospital beds per thousand of the population.

Education

A kindergarten system provides education for children aged between three and five, although the majority of kindergartens are privately controlled. At the age of six children are required to attend elementary schools

(*shogakko*), from which they proceed after six years to lower secondary schools (*chugakko*), for a further three years. Education is compulsory to the age of 15, and there are plans to increase the age limit to 18. Upper secondary schools provide a three-year course in general topics or a vocational course in areas such as agriculture, commerce, fine art and technical studies. Higher education is divided into three types of institution. Universities (*daigaku*) offer a four-year degree course, as well as post-graduate courses. Japan has about 400 universities, both public and private. Junior colleges (*sankei-daigaku*) provide less specialized two- to three-year courses. Both universities and junior colleges provide facilities for teacher-training. Technical colleges (*tokushu-kyoiku-gakko*) offer a five-year specialized training for technicians in many fields of engineering.

Tourism

The forests and mountains, pagodas and temples, traditional festivals and the classical Kabuki theatre are some of the many tourist attractions of Japan.

Visas are not required to visit Japan for periods of less than 60 days (with the exception of New Zealand, when the period is 30 days), by nationals of Argentina, Austria, Bangladesh, Belgium, Canada, Chile, Colombia, Costa Rica, Cyprus, Denmark, the Dominican Republic, El Salvador, Finland, France, the Federal Republic of Germany, Greece, Honduras, Iceland, Iran, Ireland, Israel, Italy, Liechtenstein, Luxembourg, Malta, Mexico, the Netherlands, Norway, Pakistan, Peru, Portugal, San Marino, Singapore, Spain, Sweden, Switzerland, Tunisia, Turkey, the United Kingdom, Uruguay and Yugoslavia.

Sport

Traditional sports with a wide following are Judo, Sumo (Japanese wrestling) and Kendo (Japanese fencing). Baseball, swimming, skiing and table-tennis are the principal other sports and golf is becoming increasingly popular.

Public Holidays

1978: May 3rd (Constitution Memorial Day), May 5th (Children's Day), September 15th (Respect for the Aged Day), September 23rd (Autumnal Equinox), October 10th (Sports Day), November 3rd (Culture Day), November 23rd (Labour Thanksgiving Day).

1979: January 1st (New Year's Day), January 15th (Adults' Day), February 11th (National Foundation Day), March 21st (Vernal Equinox Day), April 29th (Emperor's Birthday).

THE CONSTITUTION

(Summary of the Constitution promulgated November 3rd, 1946, in force May 3rd, 1947).

The Emperor: Articles 1-8. The Emperor derives his position from the will of the people. In the performance of any State act as defined in the constitution, he must seek the advice and approval of the Cabinet though he may delegate the exercise of his functions, which include: (i) the appointment of the Prime Minister and the Chief Justice; (ii) promulgation of laws, cabinet orders, treaties and constitutional amendments; (iii) the convocation of the Diet, dissolution of the House of Representatives and proclamation of elections to the Diet; (iv) the appointment and dismissal of Ministers of State and as well as the granting of amnesties, reprieves and pardons and the ratification of treaties, conventions or protocols; (v) the awarding of honours and performance of ceremonial functions.

Renunciation of War: Article 9. Japan renounces for ever the use of war as a means of settling international disputes.

Articles 10-40 refer to the legal and human rights of individuals guaranteed by the constitution.

The Diet: Articles 41-64. The Diet is convened once a year, is the highest organ of State power and has exclusive legislative authority. It comprises of the House of Representatives (511 seats) and the House of Councillors (252 seats). The members of the former are elected for four years whilst those of the latter are elected for six years, one half of whom retire after three years. If the House of Representatives is dissolved, a general election must take place within 40 days and the Diet must be convoked within 30 days of the date of the election. Extraordinary sessions of the Diet may be convened by the Cabinet when one quarter or more of the members of either House request it. Emergency sessions of the House of Councillors may also be held. A quorum of at least one third of the

Diet members is needed to carry on Parliamentary business. Any decision arising therefrom must be passed by a majority vote of those present. A bill becomes law having passed both Houses except as provided by the constitution. If the House of Councillors either vetoes or fails to take action within 60 days upon a bill already passed by the House of Representatives, the bill becomes law when passed a second time by the House of Representatives, by at least a two-thirds majority of those members present.

The Budget must first be submitted to the House of Representatives. If, when it is approved by the House of Representatives, the House of Councillors votes against it or fails to take action on it within 30 days, or failing agreement being reached by a joint committee of both Houses, a decision of the House of Representatives shall be the decision of the Diet. The above procedure also applies in respect of the conclusion of treaties.

The Prime Minister and other government Ministers are responsible to the Diet and may be impeached as provided by law.

The Executive: Articles 65-75. Executive power is vested in the cabinet consisting of a Prime Minister and such other Ministers as may be appointed. The Cabinet is collectively responsible to the Diet. Members of the Cabinet are designated from among members of the Diet by a resolution thereof.

If the House of Representatives and the House of Councillors disagree, and if no agreement can be reached even through a joint committee of both Houses, provided for by law, or the House of Councillors fails to make designation within 10 days, exclusive of the period of recess, after the House of Representatives has made designation, the decision of the House of Representatives shall be the decision of the Diet.

JAPAN

The Prime Minister appoints and may remove other Ministers, a majority of whom must be from the Diet. If the House of Representatives passes a no-confidence motion or rejects a confidence motion, the whole Cabinet resigns unless the House of Representatives is dissolved within 10 days. When there is a vacancy in the post of Prime Minister, or upon the first convocation of the Diet after a general election of members of the House of Representatives, the whole Cabinet resigns.

The Prime Minister submits bills, reports on national affairs and foreign relations to the Diet. He exercises control and supervision over various administrative branches of the Government. The Cabinet's primary functions (in addition to administrative ones) are to: (a) administer the law faithfully; (b) conduct State affairs; (c) conclude treaties subject to prior (or subsequent) Diet approval; (d) administer the civil service in accordance with law; (e) prepare and present the budget to the Diet; (f) enact Cabinet orders in order to make effective legal and constitutional provisions; (g) decide on amnesties, reprieves

The Constitution, The Government

or pardons. All laws and Cabinet orders are signed by the competent Minister of State and countersigned by the Prime Minister. The Ministers of State, during their tenure of office, are not subject to legal action without the consent of the Prime Minister. However, the right to take that action is not impaired.

Articles 76-95. Relate to the Judiciary, Finance and Local Government.

Amendments: Article 96. Amendments to the Constitution are initiated by the Diet, through a concurring vote of two-thirds or more of all the members of each House and are submitted to the people for ratification, which requires the affirmative vote of a majority of all votes cast at a special referendum or at such election as the Diet may specify.

Amendments when so ratified must immediately be promulgated by the Emperor in the name of the people, as an integral part of the Constitution.

Articles 97-99 outline the Supreme Law, while Articles 100-103 consist of Supplementary Provisions.

POLITICAL PARTIES

The Political Funds Regulation Law provides that any organization which wishes to support a candidate for an elective public office must be registered as a political party. There are over 10,000 registered parties in the country, mostly of local or regional significance. The conservative Liberal-Democratic Party has the support of big business and the rural population and is also by far the richest of the political parties. The proportion of votes for the two socialist parties has increased slowly at each election since 1952. The split between the two parties reflects a long-standing division between supporters of a mass popular party (now represented by the DSP) and those seeking a class party on Marxist lines. The Communist Party of Japan has split since 1964, the official party being independent and supporting neither the U.S.S.R. nor the People's Republic of China. In the 1976 elections the militant religious organization Sokagakkai increased its representation in the Diet through its political wing Komeito. The Socialists and Communists also made gains. There are also a number of small extreme right-wing political organizations. In the Upper House election of July 1977, the Liberal-Democratic Party lost its majority. The Socialists and Communists also suffered reverses.

Liberal-Democratic Party (Jiyu-Minshuto): 7, 2-chome, Hirakawacho, Chiyoda-ku, Tokyo; f. 1955; programme includes the establishment of a welfare state, the build-up of industrial development, the levelling up of educational and cultural systems and the revision of the Constitution where necessary; follows a foreign policy of alignment with U.S.A.; 226,800 mems. JUDICIAL SYSTEM

The basic principles of the legal system are set forth in the Constitution, which lays down that the whole judicial power is vested in a Supreme Court and in such inferior courts as are established by law, and enunciates the principle that no organ or agency of the Executive shall be given final judicial power. Judges are to be independent in the exercise of their conscience, and may not be removed except by public impeachment, unless judicially declared mentally or physically incompetent to perform official duties. The judges of the Supreme Court are appointed by the Cabinet, the sole exception being the Chief Justice, who is appointed by the Emperor after designation by the Cabinet.

The Court Organization Law, which came into force on May 3rd, 1947, decreed the constitution of the Supreme Court and the establishment of four types of inferior court—High, District, Family (established January 1st, 1949), and Summary Courts. The constitution and functions of the courts are as follows:

THE SUPREME COURT

This court is the highest legal authority in the land, and consists of a Chief Justice and fourteen associate judges. It has jurisdiction over the following matters:

- (1) **Jokoku** (appeals).
- (2) **Kokoku** (complaints), prescribed specially in codes of procedure.

It conducts its hearings and renders decisions through a Grand Bench or three Petty Benches. Both are collegiate bodies, the former consisting of all justices of the Court, and the latter of five judges. A Supreme Court Rule prescribes which cases are to be handled by the respective Benches. It is, however, laid down by law that the Petty Bench cannot make decisions as to the constitutionality of a statute, ordinance, regulation, or disposition, or as to cases in which an opinion concerning the interpretation and application of the Constitution or of any laws or ordinances is at variance with a previous decision of the Supreme Court.

Chief Justice: EKIZO FUJIBAYASHI.

Secretary-General: JIRO TERADA.

INFERIOR COURTS

High Court

A High Court conducts its hearings and renders decisions through a collegiate body, consisting of three judges, though for cases of insurrection the number of judges must be five. The Court has jurisdiction over the following matters:

- (1) **Koso** appeals from judgments in the first instance rendered by District Courts, from judgments rendered by Family Courts, and from judgments concerning criminal cases rendered by Summary Courts.
- (2) **Kokoku** complaints against rulings and orders rendered by District Courts and Family Courts, and

against rulings and orders concerning criminal cases rendered by Summary Courts, except those coming within the jurisdiction of the Supreme Court.

- (3) **Jokoku** appeals from judgments in the second instance rendered by District Courts and from judgments rendered by Summary Courts, except those concerning criminal cases.
- (4) Actions in the first instance relating to cases of insurrection.

District Court

A District Court conducts hearings and renders decisions through a single judge or, for certain types of cases, through a collegiate body of three judges. It has jurisdiction over the following matters:

- (1) Actions in the first instance, except offences relating to insurrection, claims where the subject matter of the action does not exceed 300,000 yen, and offences liable to a fine or lesser penalty.
- (2) **Koso** appeals from judgments rendered by Summary Courts, except those concerning criminal cases.
- (3) Complaints against rulings and orders rendered by Summary Courts, except those coming within the jurisdiction of the Supreme Court and High Courts.

Family Court

A Family Court handles cases through a single judge in case of rendering judgments or decisions. However, in accordance with the provisions of other statutes it conducts its hearings and renders decisions through a collegiate body of three judges. A conciliation is effected through a collegiate body consisting of a judge and two or more members of the conciliation committee selected from among citizens.

It has jurisdiction over the following matters:

- (1) Judgment and conciliation with regard to cases relating to family as provided by the Law for Adjudgment of Domestic Relations.
- (2) Judgment with regard to the matters of protection of juveniles as provided by the Juvenile Law.
- (3) Actions in the first instance relating to adult criminal cases of violation of the Labour Standard Law, the Law for Prohibiting Liquors to Minors, or other laws especially enacted for protection of juveniles.

Summary Court

A Summary Court handles cases through a single judge, and has jurisdiction in the first instance over the following matters:

- (1) Claims where the value of the subject matter does not exceed 300,000 yen (excluding claims for cancellation or change of administrative dispositions).

- (2) Actions which relate to offences liable to fine or lesser penalty, offences liable to a fine as an optional penalty, and certain specified offences such as habitual gambling and larceny.

A Summary Court cannot impose imprisonment or a graver penalty. When it deems proper the imposition of a sentence of imprisonment or a graver penalty, it must transfer such cases to a District Court, but it can impose

imprisonment with hard labour not exceeding three years for certain specified offences.

A Procurator's Office, with its necessary number of procurators, is established for each of these courts. The procurators conduct searches, institute prosecutions and supervise the execution of judgments in criminal cases, and act as representatives of the public interests in civil cases of public concern.

RELIGION

The traditional religions in Japan are Shintoism and Buddhism. Neither is exclusive, and many Japanese subscribe at least nominally to both. Since the war a number of new religions based on an amalgamation of Shinto, Buddhist, Taoist, Confucian and Christian beliefs have grown up.

SHINTOISM

Shintoism is an indigenous cult of nature and ancestor worship. It is divided into two cults: national Shintoism, which is represented by the shrines; and sectarian Shintoism, which developed towards the end of the Tokugawa Shogunate. In 1868, Shinto was designated a national religion, and all Shinto shrines acquired the privileged status of a national institution. After the adoption of the present constitution in 1947, however, complete freedom of religion was introduced, and state support of Shinto was banned. There are an estimated 80,000 shrines, 200,000 priests and approximately 80,000,000 adherents.

BUDDHISM

World Buddhist Fellowship: Rev. RIRI NAKAYAMA, Hozenji Buddhist Temple, 1115, 3-chome, Akabane-cho, Kita-ku, Tokyo.

CHRISTIANITY

In 1969 the number of Christians was estimated at 875,000, with 5,000 churches and 20,000 clergy. Twenty-two universities are maintained by Christian communities.

The following are the largest groups:

Roman Catholic Church: Archdiocese of Tokyo: Sekiguchi, 3-chome, 16-15, Bunkyo-ku, Tokyo 112; Archbishop of Tokyo Mgr. PETER SEIICHI SHIRAYANAGI; Archdiocese of Nagasaki; 1 Otsu Minami-Yamate-cho, Nagasaki; Archbishop of Nagasaki Mgr. JOSEPH A. SATOWAKI; Archdiocese of Osaka: 1-55, Nishinomiya-shi, Hyogo-ken; Archbishop of Osaka H.E. Cardinal PAUL Y. TAGUCHI; 377,687 (1977) adherents.

United Church of Christ in Japan: Japan Christian Center, Room 31, 3-18 Nishi Waseda 2-chome, Shinjuku-ku, Tokyo 160; f. 1941; union of 34 Presbyterian, Methodist, Congregational, Reformed and other denominations; Moderator Rev. ISUKE TODA; Vice-Moderator Rev. YOICHI KISHIMOTO; Sec. Rev. TSUTOMU DEGUCHI.

Japanese Orthodox Church: Holy Resurrection Cathedral (Nicolai-Do), 1-3, 4-chome, Surugadai, Kanda, Chiyoda-ku, Tokyo 101; Primate H.E. Most Rev. THEODOSIUS, Archbishop of Tokyo and Metropolitan of All Japan; 24,783 adherents.

Nippon Sei Ko Kai (Anglican-Episcopal Church): 4-21, Higashi 1-chome, Shibuya-ku, Tokyo; in Communion with the Church of England; est. as Province of the Anglican Communion 1887; 54,178 mems. (1977); Primate Rt. Rev. STEPHEN KATSUHIKO IWAI (Bishop of Yokohama); 10 other diocesan bishops.

OTHER RELIGIONS

There are an estimated 5,000,000 adherents of other religions, with 1,200 shrines and temples and 15,000 priests.

THE "NEW RELIGIONS"

Many new cults have grown up in Japan since the end of World War II. Collectively these are known as the New Religions (*Shinko Shukyo*). The most important are as follows:

Soka Gakkai: 32 Shinano-machi, Shinjuku-ku, Tokyo; f. 1930; the lay society of Orthodox Nichiren Buddhism; membership 7.8 million households (1977); Buddhist group aiming at individual happiness and world peace; Pres. DAISAKU IKEDA.

Rissho Kosei-kai: 11-1, Wada 2-chome, Suginami-ku; Tokyo 166; f. 1938; Buddhist laymen; Pres. Rev. NIKKYO NIWANO; 4.6 million mems. in Japan, the U.S.A. and Brazil (1977).

THE PRESS

The average circulation of Japanese dailies is 55,840,000 copies, the highest in the world after the U.S.S.R. and the U.S.A., and the circulation per head of population is highest at 529 copies per thousand inhabitants. The two newspapers with the largest circulations are the *Asahi Shimbun* (combined circ. 12 million) and *Yomiuri Shimbun* (12 million). Other influential papers include *Mainichi Shimbun*, *Nihon Keizai Shimbun*, *Chunichi Shimbun* and *Sankei Shimbun*. A notable feature of the Japanese press is the number of weekly news journals.

Technically the Japanese press is highly advanced, and all three of the major newspapers are issued in simultaneous editions in the main centres.

FINANCE

BANKING

Japan's central bank and note-issuing body is the Bank of Japan, founded in 1882. More than half the credit business of the country is handled by 76 commercial banks, seven trust banks and three long-term credit institutions, collectively designated "All Banks". The most important of these are the 13 city banks, some of which have a distinguished history, reaching back to the days of the *zaibatsu*, the private entrepreneurial organizations on which Japan's capital wealth was built up before the Second World War. Although the *zaibatsu* were abolished as integral industrial and commercial enterprises during the Allied Occupation, the several businesses and industries which bear the former *zaibatsu* names, such as Mitsubishi, Mitsui and Sumitomo, continue to flourish and to give each other mutual assistance through their respective banks and trust corporations. Among the commercial banks, one, the Bank of Tokyo, specializes in foreign exchange business, while the Industrial Bank of Japan provides a large proportion of the finance for capital investment by industry. The Japan Long-Term Credit Bank also specializes in industrial finance; the work of these two privately-owned banks is supplemented by the government-controlled Japan Development Bank.

The Government has established a number of other specialized organs to supply essential services not performed by the private banks. Thus the Japan Export-Import Bank advances credits for exports of heavy industrial products and imports of raw materials in bulk. A Housing Loan Corporation assists firms building housing for their employees, while the Agriculture, Forestry and Fisheries Finance Corporation gives loans to the named industries for equipment purchases. Similar services are provided for small businesses by the Small Business Finance Corporation.

An important part is played in the financial activity of the country by co-operatives, and by the many small enterprise institutions. Each prefecture has its own federation of co-operatives, with the Central Co-operative Bank of Agriculture and Forestry as the common central financial institution. This Central Co-operative Bank also serves as an agent for the government's Agriculture, Forestry and Fisheries Finance Corporation.

The commonest form of savings is through the government-operated Postal Savings System, which collects petty savings from the public by means of the post office network. The funds thus made available are used as loan funds by the Government financial institutions, through the Government's Trust Fund Bureau.

Clearing houses operate in each major city of Japan, and total 166 institutions. The largest are those of Tokyo and Osaka.

SUBWAYS AND MONORAILS

Subway service is available in Tokyo, Osaka, Kobe, Nagoya, Sapporo and Yokohama with a combined network of about 300 km. Most new subway lines are directly linked with existing J.N.R. or private railway terminals which connect the cities with suburban areas.

Japan started its first monorail system on a commercial scale in 1964 with straddle-type cars between downtown Tokyo and Tokyo International Airport, a distance of 13 km. In 1969, the total length of monorail was 24 km. Work started in 1971 on the 54-km. Seikan Tunnel (electric rail only) linking Honshu Island with Hokkaido, and is scheduled to be completed in 1982.

JORDAN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Hashemite Kingdom of Jordan is an almost landlocked state in the Middle East. Israel separates it from the Mediterranean, while Syria lies to the north, Iraq to the east and Saudi Arabia to the south. The port of Aqaba in the far south gives Jordan a narrow outlet to the Red Sea. The climate is hot and dry. The average temperature is 15.5°C (60°F) but the winters can be cold. The official language is Arabic. Over 90 per cent of the population are Sunni Muslims and there are small communities of Christians and Shi'ite Muslims. The national flag (proportions 2 by 1) is a horizontal tricolour of black, white and green, with a red triangle, containing a seven-pointed white star, at the hoist. The capital is Amman.

Recent History

Transjordan became independent in March 1946 with the ending of the British mandate, established by the League of Nations in 1922. The first ruler was the Amir Abdullah, proclaimed king in May 1946. When the British Government terminated its mandate in Palestine in May 1948, Jewish leaders proclaimed the State of Israel but Palestinian Arabs, supported by the armies of Arab states, opposed Israeli claims and hostilities continued until July. Transjordan's forces occupied about 5,900 sq. km. of Palestine, including East Jerusalem, and this was confirmed by the armistice with Israel in April 1949. In June 1949 the country was renamed Jordan and in April 1950 King Abdullah formally annexed the West Bank territory, which contained many Arab refugees from Israeli-held areas. Abdullah was assassinated in July 1951 and, after his son had abdicated, the crown passed in August 1952 to Hussein ibn Talal, then aged 16. King Hussein formally took power in May 1953. Jordan's treaty relationship with the United Kingdom was ended in March 1957.

The war with Israel in June 1967 left Israel in possession of all Jordanian territory on the west bank of the Jordan. The Old City of Jerusalem was incorporated into Israel; the rest of the conquered area has the status of an Israeli "occupied territory". Many refugees are still housed in camps on the East Bank. Jordan used to be a base for several Palestine guerrilla organizations in their raids on the occupied territories. The strength of these organizations frequently constituted a challenge to the Government's authority as well as to Israel; the latter responded with frequent attacks on suspected commando camps on the East Bank. The conflict between the Government and the guerrilla groups developed into civil war in 1970, and the Government finally overcame the guerrilla forces in July 1971. Since then King Hussein has resolutely refused to allow guerrilla activity from Jordan, although in September 1973 and November 1974 he issued amnesties which released several hundred guerrilla prisoners.

In March 1972 King Hussein presented a plan for a United Arab Kingdom in which a Palestinian region (capital Jerusalem) would be federated with the Jordanian region, whose capital, Amman, would be the federal capital. Israel, the Palestine Liberation Organization (PLO) and Egypt reacted unfavourably, and Egypt broke

off diplomatic relations, which were not restored until September 1973, when King Hussein became reconciled with President Sadat of Egypt and President Assad of Syria.

During the first part of 1974 King Hussein became increasingly estranged from other Arab States when it became clear that they considered the PLO as the legitimate representative of the Palestinians. In October 1974, at the Rabat Arab summit, King Hussein had to accept the situation and support a unanimous resolution giving the PLO the right to establish an independent national authority on any piece of Palestinian land to be liberated.

In November 1974 King Hussein amended the Jordanian Constitution, dissolved the House of Representatives, appointed a new Senate and reshuffled his Council of Ministers in order to decrease Palestinian participation in Jordanian life in preparation for the eventual formation of an independent Palestinian state on the west bank of the Jordan.

Since 1975 Jordan and Syria have been co-operating increasingly closely, setting up a Joint Military Command and signing agreements in the fields of transport, telecommunications, education, information, electric power and phosphates. In November 1977 Hussein found himself in a delicate position over Sadat's peace initiative with Israel. Although he did not oppose Sadat's visit to Jerusalem, he was anxious not to destroy his close relationship with Syria, who strongly opposed Sadat. Jordan therefore took a conciliatory position, trying to reconcile the divisions in the Arab ranks. In common with the other Arab States, Jordan found Israel's peace proposals of December 1977 unacceptable.

Government

Jordan is a constitutional monarchy. Legislative power is vested in a bicameral National Assembly. The Senate (Chamber of Notables) has 30 members appointed by the King for eight years (half retiring every four years) and the House of Representatives (Chamber of Deputies) has 60 members, including 50 Muslims and 10 Christians, elected by universal adult suffrage for four years (subject to dissolution). In each Chamber there is equal representation for the East Bank and the (occupied) West Bank. Executive power is vested in the King, who governs with the assistance of an appointed Council of Ministers, responsible to the Assembly. Constitutional amendments approved in 1974 gave the King powers to dissolve the Senate and postpone elections. The Assembly was dissolved in November 1974, although briefly reconvened in February 1976, when it approved a constitutional amendment giving the King power to postpone elections indefinitely and to convene the Assembly as required.

There are eight administrative provinces, of which three have been occupied by Israel since June 1967.

Defence

The total strength of the Jordanian armed forces is 67,810. The army has 61,000 men, the air force 6,650 and the navy 160. There is a para-military force of 10,000

consisting of a Civil Militia of 7,000 and a Mobile Police Force of 3,000. There is a two-year period of military service. The 1977 defence budget was 67 million dinars.

Economic Affairs

About three-quarters of the settled population are engaged in agriculture. Israeli occupation of the West Bank in 1967 resulted in a substantial loss of productive farming land. Principal crops are wheat, barley, lentils, citrus fruits, tomatoes and water-melons. Bad weather limited agricultural production in 1973 and again in 1975.

Jordan is short of natural resources and has had to rely heavily on foreign aid, which in recent years has been coming increasingly from oil-rich Arab governments, Iran and Japan. Phosphates are the country's biggest natural resource, and the Jordan Phosphate Mines have an expansion programme which planned to increase production from 1.6 million tons in 1974 to 8 million tons in 1980, but production in 1977 was expected to be about 2 million tons. Export earnings from phosphates exceeded JD19 million in 1974, 1975 and 1976, enabling Jordan to rely less heavily on foreign aid. A U.S. \$425 million potash project on the Dead Sea should begin production by December 1981.

Transport and Communications

Jordan has a railway system but most traffic uses the excellent roads. Parts of the desert can be traversed safely by vehicles except after heavy rain. The port of Aqaba in the far south is Jordan's only outlet to the sea and civil aviation is of increasing importance.

Social Welfare

There is no comprehensive welfare scheme but the Government runs medical and health services and there is a large government medical complex in Amman. In June 1977 there were 664,000 refugees registered with UNRWA in east Jordan and a further 306,000 on the West Bank.

Education

Primary education is free and, where possible, compulsory. It starts at 6 to 8 and lasts for six years. A further three-year period, known as the preparatory cycle, is also compulsory. UNRWA provides schooling for the Palestinian refugees. In 1976 there were more than 2,300 primary and secondary schools, and 92 per cent of all 6 to 11-year-olds were enrolled in primary school. Jordan's first university was inaugurated in December 1962.

Tourism

Visas are required by nationals of all countries except Arab countries.

Sport

There is little organized sport. Car racing, horse racing and hawking are popular. Water skiing takes place at Aqaba.

Public Holidays

1978: May 25th (Independence Day), July 3rd (Leilat al Meiraj, Ascension of the Prophet), August 11th (King Hussein's Accession), September 4th (Id ul Fitr, end of Ramadan), November 11th (Id ul Adha), November 14th (King Hussein's Birthday), December 2nd (Muslim New Year).

1979: January 15th (Arbor Day), February 10th (Mouloud, Birth of the Prophet), March 22nd (Arab League Day).

Weights and Measures

The metric system is in force. In Jordan the dunum is 1,000 square metres (about a quarter of an acre).

FINANCE

1,000 fils = 1 Jordanian dinar (JD).

Coins: 1, 5, 10, 20, 25, 50, 100 and 250 fils.

Notes: 500 fils; 1, 5 and 10 dinars.

Exchange rates (December 1977): £1 sterling = 593.4 fils; U.S. \$1 = 324.0 fils.

100 Jordanian dinars = £168.52 = \$308.64.

Note: The Jordanian dinar was introduced in July 1950, with a value of £1 sterling, then equal to U.S. \$2.80 (\$1 = 357.14 fils). This valuation in terms of U.S. currency remained in effect until February 1973, so that from December 1971 (when the U.S. dollar was devalued) the dinar became equivalent to 2.579 Special Drawing Rights (SDRs). In February 1973, when the dollar was again devalued, the dinar's par value was fixed at \$3.111 (\$1 = 321.43 fils), thus maintaining the exchange rate in terms of SDRs. Until the end of 1973 the market rate against the U.S. dollar was allowed to fluctuate above and below this valuation. During the first six months of 1974 the par value and market rate were unified. Since July 1974, when the fixed relationship between the SDR and the U.S. dollar was ended, the exchange rate has been maintained at a mid-point of 1 dinar = 2.579 SDRs. The average market value of the dinar was \$3.0549 in 1973; \$3.1198 in 1974; \$3.1305 in 1975; \$3.0115 in 1976. The dinar was at par with the pound sterling until November 1967, after which the exchange rate was £1 = 857.14 fils (1 dinar = £1.167) until August 1971. The rate was £1 = 930.61 fils (1 dinar = £1.075) from December 1971 to June 1972.

THE CONSTITUTION

(Revised Constitution approved by King Talal I on January 1st, 1952)

THE Hashemite Kingdom of Jordan is an independent, indivisible sovereign state. Its official religion is Islam; its official language Arabic.

Rights of the Individual. There is to be no discrimination between Jordanians on account of race, religion or language. Work, education and equal opportunities shall be afforded to all as far as is possible. The freedom of the individual is guaranteed, as are his dwelling and property. No Jordanian shall be exiled. Labour shall be made compulsory only in a national emergency, or as a result of a conviction; conditions, hours worked and allowances are under the protection of the State.

The Press, and all opinions, are free, except under martial law. Societies can be formed, within the law. Schools may be established freely, but they must follow a recognized curriculum and educational policy. Elementary education is free and compulsory. All religions are tolerated. Every Jordanian is eligible to public office, and choices are to be made by merit only. Power belongs to the people.

The Legislative Power is vested in the National Assembly and the King. The National Assembly consists of two houses: the Senate and the House of Representatives.

The Senate. The number of Senators is one-half of the number of members of the House of Representatives. Senators must be unrelated to the King, over 40, and are chosen from present and past Prime Ministers and Ministers; past Ambassadors or Ministers Plenipotentiary, past Presidents of the House of Representatives, past Presidents and members of the Court of Cassation and of the Civil and Sharia Courts of Appeal, retired officers of the rank of General and above, former members of the House of Representatives who have been elected twice to that House, etc. . . . They may not hold public office. Senators are appointed for four years. They may be re-appointed. The President of the Senate is appointed for two years.

The House of Representatives. The members of the House of Representatives are elected by secret ballot in a general direct election and retain their mandate for four years. General elections take place during the four months preceding the end of the term. The President of the House is elected by secret ballot each year by the Representatives. Representatives must be Jordanians of over 30, they must have a clean record, no active business interests, and are debarred from public office. Close relatives of the King are not eligible. If the House of Representatives is dissolved, the new House shall assemble in extraordinary session not more than four months after the date of dissolution. The new House cannot be dissolved for the same reason as the last.

General Provisions for the National Assembly. The King summons the National Assembly to its ordinary session on November 1st each year. This date can be postponed by the King for two months, or he can dissolve the Assembly before the end of its three months' session. Alternatively, he can extend the session up to a total period of six months. Each session is opened by a speech from the throne.

Decisions in the House of Representatives and the Senate are made by a majority vote. The quorum is two-thirds of the total number of members in each House. When the voting concerns the Constitution, or confidence in the Council of Ministers, "the votes shall be taken by calling the members by name in a loud voice". Sessions are public, though secret sessions can be held at the request of

the Government or of five members. Complete freedom of speech, within the rules of either House, is allowed.

The Prime Minister places proposals before the House of Representatives; if accepted there, they are referred to the Senate and finally sent to the King for confirmation. If one house rejects a law while the other accepts it, a joint session of the House of Representatives and the Senate is called, and a decision made by a two-thirds majority. If the King withholds his approval from a law, he returns it to the Assembly within six months with the reasons for his dissent; a joint session of the Houses then makes a decision, and if the law is accepted by this decision it is promulgated. The Budget is submitted to the National Assembly one month before the beginning of the financial year.

The King. The throne of the Hashemite Kingdom devolves by male descent in the dynasty of King Abdullah Ibn al Hussein. The King attains his majority on his eighteenth lunar year; if the throne is inherited by a minor, the powers of the King are exercised by a Regent or a Council of Regency. If the King, through illness or absence, cannot perform his duties, his powers are given to a Deputy, or to a Council of the Throne. This Deputy, or Council, may be appointed by *Iradas* (decrees) by the King, or, if he is incapable, by the Council of Ministers.

On his accession, the King takes the oath to respect and observe the provisions of the Constitution and to be loyal to the nation. As head of the State he is immune from all liability or responsibility. He approves laws and promulgates them. He declares war, concludes peace and signs treaties; treaties, however, must be approved by the National Assembly. The King is Commander-in-Chief of the Navy, the Army and the Air Force. He orders the holding of elections; convenes, inaugurates, adjourns and prorogues the House of Representatives. The Prime Minister is appointed by him, as are the President and members of the Senate. Military and civil ranks are also granted, or withdrawn, by the King. No death sentence is carried out until he has confirmed it.

Ministers. The Council of Ministers consists of the Prime Minister, President of the Council, and of his Ministers. Ministers are forbidden to become members of any company, to receive a salary from any company, or to participate in any financial act of trade. The Council of Ministers is entrusted with the conduct of all affairs of State, internal and external.

The Council of Ministers is responsible to the House of Representatives for matters of general policy. Ministers may speak in either House, and, if they are members of one House, they may also vote in that House. Votes of confidence in the Council are cast in the House of Representatives, and decided by a two-thirds majority. If a vote of "no confidence" is returned, the Ministers are bound to resign. Every newly-formed Council of Ministers must present its programme to the House of Representatives and ask for a vote of confidence. The House of Representatives can impeach Ministers, as it impeaches its own members.

Amendments. Two amendments were passed in November 1974 giving the King the right to dissolve the Senate or to take away membership from any of its members, and to postpone general elections for a period not to exceed a year, if there are circumstances in which the Council of Ministers feels that it is impossible to hold elections. A further amendment in February 1976 enabled the King to postpone elections indefinitely.

(HOUSE OF NOTABLES)

President: BAHJAT TALHOUNI.

The Senate consists of 30 members, appointed by the King. A new Senate was appointed by the King in November 1974, containing 7 Palestinians compared with 15 in the previous Senate.

HOUSE OF REPRESENTATIVES

Elections to the 60-seat House of Representatives took place in April 1967. There were no political parties. Parliament (the House of Representatives) was dissolved by Royal Decree on November 23rd, 1974, but reconvened briefly on February 5th, 1976. Elections have been postponed indefinitely.

POLITICAL PARTIES

Political parties were banned before the elections of July 1963. In September 1971 King Hussein announced the formation of a Jordanian National Union. This was the only political organization allowed. Communists, Marxists and "other advocates of imported ideologies" were ineligible for membership. In March 1972 the organization was renamed the Arab National Union. In April 1974 King Hussein dissolved the executive committee of the Arab National Union, and accepted the resignation of the Secretary-General and in February 1976 the Cabinet approved a law abolishing the Union. Membership was estimated at about 100,000.

JUDICIAL SYSTEM

With the exception of matters of purely personal nature concerning members of non-Muslim communities, the law of Jordan was based on Islamic Law for both civil and criminal matters. During the days of the Ottoman Empire, certain aspects of Continental law, especially French commercial law and civil and criminal procedure, were introduced. Due to British occupation of Palestine and Transjordan from 1917 to 1948, the Palestine territory has adopted, either by statute or case law, much of the English common law. Since the annexation of the non-occupied part of Palestine and the formation of the Hashemite Kingdom of Jordan, there has been a continuous effort to unify the law.

Court of Cassation. The Court of Cassation consists of seven judges, who sit in full panel for exceptionally important cases. In most appeals, however, only five members sit to hear the case. All cases involving amounts of more than JD 100 may be reviewed by this Court, as well as cases involving lesser amounts and cases which cannot be monetarily valued. However, for the latter types of cases, review is available only by leave of the Court of Appeal, or, upon refusal by the Court of Appeal, by leave of the President of the Court of Cassation. In addition to these functions as final and Supreme Court of Appeal, the Court of Cassation also sits as High Court of Justice to hear applications in the nature of habeas corpus.

JORDAN

Judicial System, Religion, The Press, Publishers, Radio and Television

mandamus and certiorari dealing with complaints of a citizen against abuse of governmental authority.

Courts of Appeal. There are two Courts of Appeal, each of which is composed of three judges, whether for hearing of appeals or for dealing with Magistrates' Courts judgments in chambers. Jurisdiction of the two Courts is geographical, with the Court for the Western Region sitting in Jerusalem (which has not sat since June 1967) and the Court for the Eastern Region sitting in Amman. The regions are separated by the River Jordan. Appellate review of the Courts of Appeal extends to judgments rendered in the Courts of First Instance, the Magistrates Courts, and Religious Courts.

Courts of First Instance. The Courts of First Instance are courts of general jurisdiction in all matters civil and criminal except those specifically allocated to the Magistrates' Courts. Three judges sit in all felony trials, while only two judges sit for misdemeanor and civil cases. Each of the seven Courts of First Instance also exercises appellate jurisdiction in cases involving judgments of less than JD 20 and fines of less than JD 10, rendered by the Magistrates' Courts.

Magistrates' Courts. There are fourteen Magistrates' Courts, which exercise jurisdiction in civil cases involving no more than JD 250 and in criminal cases involving maximum fines of JD 100 or maximum imprisonment of one year.

Religious Courts. There are two types of Religious Court: The Sharia Courts (Muslims); and the Ecclesiastical Courts (Eastern Orthodox, Greek Melkite, Roman Catholic and Protestant). Jurisdiction extends to personal (family) matters, such as marriage, divorce, alimony, inheritance, guardianship, wills, interdiction and, for the Muslim community, the constitution of Waqfs (Religious Endowments). When a dispute involves persons of different religious communities, the Civil Courts have jurisdiction in the matter unless the parties agree to submit to the jurisdiction of one or the other of the Religious Courts involved.

Each Sharia (Muslim) Court consists of one judge (Qadi), while most of the Ecclesiastical (Christian) Courts are normally composed of three judges, who are usually clerics. Sharia Courts apply the doctrines of Islamic Law, based on the Koran and the Hadith (Precepts of Muhammad), while the Ecclesiastical Courts base their law on various aspects of Canon Law. In the event of conflict between any two Religious Courts or between a Religious Court and a Civil Court, a Special Tribunal of three judges is appointed by the President of the Court of Cassation, to decide which court shall have jurisdiction. Upon the advice of experts on the law of the various communities, this Special Tribunal decides on the venue for the case at hand.

RELIGION

Over 80 per cent of the population are Sunni Muslims, and the King can trace unbroken descent from the Prophet Muhammad. There is a Christian minority, living mainly in the towns, and smaller numbers of non-Sunni Muslims.

Prominent religious leaders in Jordan are:

SHEIKH ABDULLAH GHOSHEH (Chief Justice and President of the Supreme Muslim Secular Council).

SHEIKH MOHAMMED FAL SHANKITI (Director of Sharia Courts).

SHEIKH ABDULLAH QALQILI (Mufti of the Hashemite Kingdom of Jordan).

TRANSPORT

RAILWAYS

Hedjaz Jordan Railway: (administered by the Ministry of Transport); P.O.B. 582, Amman; f. 1902; length of track 618 km.; Gen. Man. M. R. QOSEINI.

This was formerly a section of the Hedjaz railway (Damascus to Medina) for Muslim pilgrims to Medina and Mecca. It crosses the Syrian border and enters Jordanian territory south of Dera'a, and runs for approximately 366 km. to Naqb Ishtar, passing through Zarka, Amman, Qatrana and Ma'an. Some 844 km. of the line, from Ma'an to Medina in Saudi Arabia, have been abandoned for the past fifty years. Reconstruction of the Medina line, begun in 1965, was scheduled to be completed in 1971 at a cost of £15 million, divided equally between Jordan, Saudi Arabia and Syria. However, the reconstruction work has been suspended at the request of the Arab States concerned, pending further studies on costs. The line between Ma'an and Saudi Arabia (114 km.) is now completed, as well as 15 km. in Saudi Arabia as far as Haret Ammar Station. A new 115 km. extension to Aqaba was financed by a JD 12 million loan from the Federal Republic of Germany; this line became operational in October 1975. It is used mainly for transporting phosphates and connects Aqaba to Beirut.

ROADS

Ministry of Public Works: Amman.

Amman is linked by road with all parts of the kingdom and with neighbouring countries. All cities and most

JORDAN

towns are connected by a 2-lane paved road system. In addition, several thousand km. of tracks make all villages accessible to motor transport. At the end of 1977, the latest inventory showed the East Bank of Jordan to have 1,910 km. of main roads, 818 km. of secondary roads and 2,097 km. of village roads, all of which are asphalted.

Royal Automobile Club of Jordan: P.O.B. 920, Jebel Lweibdeh, Amman; Head Office: Wadi Seer Cross Roads; f. 1953; affiliated to the F.I.A., A.I.T.; Pres. of Honour H.M. King HUSSEIN; Gen. Man. D. H. LEDGER.

SHIPPING

The port of Aqaba is Jordan's only outlet to the sea and has two general berths of 340 metres and 215 metres, with seven main transit sheds, covered storage area of 4,150 sq. metres, an open area of 50,600 sq. metres and a phosphate berth 210 metres long and 10 metres deep. Four new berths and storage facilities are being built, and a separate potash berth is planned.

PIPELINES

Two oil pipelines cross Jordan. The former Iraq Petroleum Company pipeline, carrying petroleum from the oilfields in Iraq to Haifa, has not operated since 1967. The 1,067-mile pipeline, known as the Trans-Arabian Pipeline (TAPLINE) carries petroleum from the oilfields at Dhahran in Saudi Arabia to Sidon on the Mediterranean seaboard in Lebanon. It traverses Jordan for a distance of 110 miles and has frequently been cut by hostile action.

CIVIL AVIATION

There are international airports at Amman and Aqaba. Work has begun on a new international airport in Amman.

The Department of Culture and Arts: Ministry of Culture and Information, P.O.B. 6140, Amman; aims to encourage artistic movements throughout the Kingdom, promote growth of talents and prepare specialists in all fields of culture and fine arts. Consists of seven sections:

Culture: publishes books, issues quarterly literary magazine (*Alfarj*), arranges regular lectures by specialists in all subjects and collaborates with men of letters in the Kingdom.

Folklore: issues quarterly journal covering all aspects of folklore of various countries, popular tales and traditions; carries out research and promotes traditional folklore customs, and organizes folklore festivals.

Theatre: produces local and other plays, encourages playwrights and trains actors.

Institute of Fine Arts: aims to promote painting and sculpture and gives regular courses; offers assistance to improve and widen talents and arranges exhibitions in Jordan and abroad.

Jordan Conservatory of Music: aims to develop musical talents; three-year courses.

Folklore Dancing Troupe of Jordan: revives folk dancing in Jordan, organizes festivals in Jordan and takes part in international festivals abroad.

Public Relations: responsible for all foreign and local relations

UNIVERSITIES

University of Jordan: near Jubailha, P.O.B. 1682, Amman; 212 teachers, 5,420 students.

KENYA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Kenya lies astride the equator on the east coast of Africa, with Somalia to the north-east, Ethiopia to the north, Uganda to the west and Tanzania to the south. The climate varies with altitude: the coastal zone is hot and humid, temperatures averaging 69°–90°F (20.5°–32°C), while inland, above 5,000 ft., it averages 45°–80°F (7°–27°C). The highlands and western areas receive ample rainfall but most of the northern part is very dry. Swahili is the official language; English, Kikuyu and Luo are also widely spoken. The majority of the African population follows traditional beliefs. Christians make up about 25 per cent of the population and Muslims 6 per cent. The national flag (proportions 3 by 2) has horizontal stripes of black, red and green, separated by two narrow white stripes. Superimposed is a red shield, with black and white markings, upon crossed white spears. The capital is Nairobi.

Recent History

A former British colony and protectorate, Kenya was given internal self-government in June 1963, became independent in December 1963 and a republic one year later. Jomo Kenyatta has led the nation since independence and as head of the Kenya African National Union (KANU), which alone contested the 1969 and 1974 National Assembly elections, he has established stability in Kenya and won great personal prestige both at home and abroad. However, past political crises include the assassination in 1969 of Tom Mboya, the Minister for Economic Planning and Development and Secretary-General of KANU, which led to civil unrest and the banning of the opposition Kenya People's Union, and an unsuccessful revolutionary plot in 1971. The National Assembly, elected in October 1974, was not convened until February 1975 and seven members, including one Minister, were subsequently unseated as a result of election petitions. Political discontent was heightened by the assassination in March 1975 of the outspoken politician J. M. Kariuki, and the later detention of John Seroney, the Deputy Speaker, Martin Shikuku, George Anyona and other unofficial opposition figures in the Assembly. In August 1976 the mayoral elections in Nairobi were postponed after opposition to the candidature of Kenyatta's daughter and KANU meetings in the city were banned. In September a proposal, backed by a number of Kikuyu ministers and members of parliament, to alter the constitution to debar the succession of the non-Kikuyu Vice-President, Daniel Arap Moi, was thwarted by Kenyatta. Nevertheless, Kenyatta's rule remains firm and popular.

Kenya's relations with neighbouring states have never been altogether easy, particularly with the decline of the East African Community from about 1971. The collapse of East African Airways in February 1977 strained relations with Tanzania, which closed the border. Somalia claims Kenya's northern province and, after an attack by Somali forces on a Kenyan frontier post in June 1977, Kenya declared its support for Ethiopia in its conflict with Somalia the following September. After President Amin of Uganda's territorial claims in February 1976 and reci-

minations over Kenyan co-operation in an Israeli commando raid on Entebbe Airport to release Israeli hostages in July, conflict with Uganda was only narrowly averted.

Government

Legislative power is vested in the unicameral National Assembly, with 171 members (158 elected by universal adult suffrage, the Attorney-General and 12 members nominated by the President) serving a term of four years, subject to dissolution. Executive power is held by the President, also directly elected for four years. He is assisted by an appointed Vice-President and Cabinet. Kenya has been a one-party state since 1969. The country has seven provinces, each with an advisory Provincial Council.

Defence

Of a total armed force of 7,700, the army numbers 6,500, the navy 400 and the air force 800. Military service is voluntary. The police force numbers 13,300, including a paramilitary force of 1,800 men. Kenya receives military assistance from the United Kingdom. In 1976 it was granted a \$75 million arms credit by the United States to re-equip the air force.

Economic Affairs

Kenya's prosperity rests largely on the production and processing of agricultural and pastoral products, and about 90 per cent of Kenya's population is dependent on agriculture. In 1976 this sector accounted for 29 per cent of G.D.P. and 70 per cent of export earnings. Farming is often adversely affected by climatic conditions. The principal cash crops are coffee, tea (of which Kenya is Africa's leading producer), sisal, pyrethrum, pineapple and wattle. African farmers, through their co-operatives, produce a very high proportion of the total. The country is self-sufficient in maize and rice, and hopes to become so in wheat and sugar. Pastoral farming varies from the traditional herding of the Masai tribes to the pedigree stock-raising of dairy and beef cattle on the Highland farms. Kenya is one of the few African countries with an important dairy industry.

Manufactures and food processing accounted for about 14 per cent of gross domestic product in 1976, and industry continues to expand. Political stability and liberal investment policies have encouraged a high level of foreign investment which has not been deterred by measures intended to ensure a greater degree of Kenyan participation in industry by 1982. Kenya had close trading links with its partners in the East African Economic Community, Tanzania and Uganda, with whom it participated in a customs union. Kenyan exports within the Community showed a healthy surplus but, with the progressive collapse of the Community by 1977 and the subsequent closure of the Tanzanian border, trade between the three countries has declined. Kenyan trade with Rwanda, Burundi, Zaire and Zambia has suffered because of the Tanzanian action.

An extension to the Mombasa oil refinery was opened in 1974, nearly doubling the original output, and a pipeline to

KENYA

Introductory Survey

Nairobi was completed in 1977. However, the Gitaru hydro-electric power project, scheduled to come on stream in 1978, will provide 75 per cent of Kenya's energy requirements. The most important mineral is soda ash and other minerals include salt, gold and limestone. Mineral production is relatively slight but is likely to increase considerably with the discovery of two million tons of lead and silver at Kinangoni, and the exploitation of a fluor-spar ore deposit in the Kerio valley.

In 1974 a third development plan, for 1974-78, was launched with a target annual G.D.P. growth rate of 7.4 per cent and estimated government expenditure of K£470 million. However, the high rate of economic growth achieved in the decade after independence, which produced a 27 per cent increase in per capita G.D.P. and a 50 per cent rise in smallholders' farm production, has not been maintained. Balance of payments difficulties caused by the sharp rise in the cost of imports, especially petroleum, and an overall decline in the prices of Kenya's commodity exports, led to a revision of the development plan in 1975, and contributed to the devaluation of the currency later that year. Problems of unemployment, exacerbated by an annual rate of population increase of 3.3 per cent, inflation and unequal distribution of wealth remain unsolved. In 1975 the estimated G.D.P. growth rate fell from 4 to 1.2 per cent, although in 1976 it rose to 5.1 per cent. This was due to improved terms of trade, a rise of 13.3 per cent in manufacturing output and buoyant transport, construction and tourist sectors, and the established pattern of development seems likely to continue. Paid employment rose by 4.7 per cent. There is a new series of projects under way which range from rural development schemes to industrial mills and vehicle assembly plants. The tourist sector had a record turnover of K£33.4 million in 1975.

Transport and Communications

Kenya's railways, inland waterways and harbours were administered by the inter-territorial East African Community until 1977 but Kenya has now formed its own institutions. There are international airports at Nairobi and Mombasa. Air services are also run in common with its neighbours. Main roads link the big towns and there is a country-wide bus service. A main road linking Nairobi and Addis Ababa, Ethiopia, was completed in 1977 and there are plans to build another from Kitale to Juba in the Sudan. Mombasa is a fully-equipped international seaport which has 17 deep-water berths and is being further extended. It serves Uganda and, from November 1977, Ethiopia as well as Kenya.

Social Welfare

There are State pension and welfare schemes and a National Social Security Fund has been set up. The Government runs hospitals and medical services; no fees are charged to out-patients. Free attention is given in case of need. Missions, private charities and commercial firms provide further facilities. A National Council of Social Services co-ordinates the work of voluntary agencies. In 1972 Kenya had 15,000 hospital beds and in 1973 there were 700 physicians. Major rural health improvements, including the construction of numerous health centres, and the launching of a family planning programme with Swedish aid were initiated in 1974.

Education

Education is not compulsory and less than half of the population is literate. The Government provides or assists in the provision of schools and since independence the number of primary school pupils increased from 900,000 in 1963 to 2.9 million in 1976. In 1973 school fees were abolished for the first four years of education. Education is multi-racial at all levels but is hampered by a lack of qualified teachers. There are also considerable inequalities; in 1977, 72 per cent of school-age children in Nairobi attended school, compared with only 4 per cent in North East Province. The National University in Nairobi, which has 5,000 students, was founded originally in 1956 as a college and was part of the University of East Africa between 1963 and 1970. Over 5,000 students a year study overseas.

Tourism

Kenya's attractions as a tourist centre are mainly the wildlife and the good all-year-round climate. There are eight National Parks and one National Reserve open to the public, several of which provide overnight accommodation. Photographic safaris are arranged but, for conservation reasons, a total ban on game hunting was introduced in May 1977.

Tourism in Kenya recently enjoyed unprecedented expansion. Several hotels and game lodges are being expanded or are under construction and more overseas tourist offices have been opened. In 1975 there were 386,000 tourists who spent K£33.4 million. However, the industry is likely to suffer from the closure of the Tanzanian border in February 1977 and the severance of air traffic between the two countries the following November.

Visas are not required to visit Kenya by nationals of Commonwealth countries (except British passport holders of Asian origin and nationals of Australia and Nigeria), Denmark, Ethiopia, the Federal Republic of Germany, Ireland, Italy, Norway, San Marino, Spain, Sweden, Turkey and Uruguay.

Sport

Organized sports include football, tennis, cricket and athletics. Watersports are popular in the coastal areas.

Public Holidays

1978: May 1st (Labour Day), June 1st (Madaraka Day, anniversary of self-government), September 1st (Id ul Fitr, end of Ramadan), October 20th (Kenyatta Day), November 12th (Id ul Adha, Feast of the Sacrifice), December 12th (Independence Day), December 25th, 26th (Christmas and Boxing Day).

1979: January 1st (New Year's Day), April 13th, 14th (Easter).

FINANCE

100 cents = 1 Kenya shilling (Ks.).

Coins: 5, 10 and 50 cents; 1 Ks.

Notes: 5, 10, 20 and 100 Ks.

Exchange rates (December 1977): £1 sterling = 14.78 Ks.; U.S. \$1 = 8.07 Ks.

100 Ks. = £6.77 = \$12.39.

Note: The Kenya shilling was introduced in September 1966, replacing (at par) the East African shilling, equal to one shilling sterling (£1 = 20 shillings). From September 1949 the shilling was equivalent to 14 U.S. cents (U.S. \$1 = 7.143 shillings) and this valuation remained in force until June 1973. When the U.S. dollar was devalued in December 1971 the rate of Kenya shillings per IMF Special Drawing Right (SDR) was fixed at 7.755. In February 1973 the dollar was again devalued and the exchange rate became 1 SDR = 8.617 shillings. In June 1973 Kenya's currency was revalued by 3.5 per cent, with a new exchange rate of \$1 = 6.90 shillings (1 SDR = 8.324 shillings), but in January 1974 the shilling was restored to its earlier valuation of 14 U.S. cents (\$1 = 7.143 shillings). From July 1974 the fixed relationship between the SDR and the U.S. dollar was ended but the Kenya shilling remained tied to U.S. currency. This remained in force until October 1975, when the link between the shilling and the U.S. dollar was ended and the shilling's value fixed at a mid-point of 9.66 per SDR, then equal to 8.16 per dollar, an effective devaluation of 12.5 per cent. The average exchange rate (shillings per U.S. dollar) was: 7.411 in 1975; 8.371 in 1976. In terms of sterling, the value of the Kenya shilling between November 1967 and August 1971 was 1s. 2d. (5.83p), the exchange rate being £1 = 17.14 Ks.; from December 1971 to June 1972 the rate was £1 = 18.61 Ks. In this survey the symbol "K£" is used to denote amounts of 20 Ks., equivalent to £1 35 sterling in December 1977.

THE CONSTITUTION

The Independence Constitution for Kenya came into force in June, 1963, with the introduction of full internal self-government.

Amendments were made in November, 1964, by which Kenya became a Republic within the Commonwealth. Under the terms of the Constitution, individual rights and liberties are protected, including freedom of expression and assembly, privacy of the home, the right not to be detained without cause, and the right of compensation for compulsory purchase of property.

By a voluntary evolution the Republic of Kenya is now a One-Party State governed by a united Central Government. For administrative purposes, the country is divided into seven Provinces, each of which has a Provincial Council playing a purely advisory role, especially in respect of rural development. The Provincial Councils and County Councils are maintained by grants from the Central Government, but raising of all other taxes and of foreign investment capital is the sole responsibility of the Central Government.

The central legislative authority is the National Assembly consisting of a single elected assembly. There are 158 Representatives elected for four years, and 12 Member

nominated by the President. There is also a seat for the Attorney-General.

Executive power is in the hands of the President, Vice-President and Cabinet. The Cabinet shall be formed by the President, who, following constitutional amendments adopted in June 1968, is to be directly elected by popular vote at general elections. In the event of his death or resignation the Vice-President will assume the Presidency, with limited powers, for a maximum period of three months. The Presidency becomes vacant on the dissolution of Parliament.

In October 1963, certain amendments to the Constitution were introduced. The Police and Public Services are to be centrally controlled. Changes in the Constitution about Human Rights, structure of Regions, Land, the Senate, and amendment procedure can be made only by a 75 per cent majority vote of the National Assembly. Changes concerning other clauses, including those affecting Regional powers, may be made by a 75 per cent vote of the Assembly or failing this by a two-thirds majority in a national referendum.

The High Court of Kenya: Nairobi. It has unlimited criminal and civil jurisdiction at first instance, and sits as a court of appeal from subordinate courts in both criminal and civil cases. The High Court is a court of admiralty.

There is a resident Puike Judge at Mombasa, Nakuru and Kisumu. Regular sessions are held at Nairobi, Mombasa and Meru.

Chief Justice: Hon. JAMES WICKES.

Registrar: V. KALIA.

SUBORDINATE COURTS

Resident Magistrates' Courts: There are 100 resident magistrates, with powers of jurisdiction extending up to five years or by the magistrate's order.

District Magistrates' Courts: At present there are 10 District Magistrates' Courts, with powers of jurisdiction extending up to five years, one year and six months, or by the magistrate's order up to three months, higher and lower courts.

Kadhi's Courts: There are 10 Kadhi's Courts, which determine questions of Islamic law.

RELIGION

African religions, beliefs and forms of worship show great variety both between races and tribes and from one district to another. The Arab community is Muslim, the Indians are partly Muslim and partly Hindu, and the Europeans and Goans are almost entirely Christian.

Muslims are found mainly along the coastline but the Muslim faith has also established itself among Africans around Nairobi and other towns up-country and among some tribes of the Northern Frontier Province.

Christian missions are active and about 25 per cent of Africans are Christian and East Africa is also an important centre for the Baha'i faith.

THE DEMOCRATIC PEOPLE'S REPUBLIC OF KOREA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Democratic People's Republic occupies the northern part of the Korean peninsula, bordered to the north by the People's Republic of China and to the south by the Republic of Korea. The climate is continental, with cold, dry winters and hot, humid summers; temperatures range from -6° to 25°C (21° – 77°F). The language is Korean. Buddhism, Confucianism, Taoism, Shamanism and Chundo Kyo are the chief religions. The national flag (proportions 65 by 33) is red with blue stripes on the upper and lower edges, each separated from the red by a narrow white stripe. Left of centre is a white disc containing a five-pointed red star. The capital is Pyongyang.

Recent History

Korea was formerly an independent kingdom. It was occupied by Japanese forces in 1905 and formally annexed by Japan in 1910, when the King was deposed. Following Japan's surrender in August 1945, ending the Second World War, Korea was divided at the 38th parallel into military occupation zones, with Soviet forces in the North and U.S. forces in the South. In the North a Provisional People's Committee, led by Kim Il Sung of the Korean Communist Party (KCP), was established in February 1946 and given government status by the Soviet occupation forces. In July 1946 the KCP merged with another group to form the North Korean Workers' Party. In 1947 a Supreme People's Assembly was established and Kim Il Sung became Premier. The Government instituted programmes of land reform and the nationalization of industry, transport and commerce. A new Assembly was elected in August 1948 and the Democratic People's Republic of Korea (D.P.R.K.) was proclaimed on September 9th. Initially the D.P.R.K. was recognized only by the U.S.S.R. and other communist countries. Soviet forces withdrew from North Korea in December 1948. By a merger between communists in the North and South, the Korean Workers' Party (KWP) was formed in June 1949.

As a result of the failure of negotiations on a unified government, Korea remained partitioned into two republics, each claiming to have legitimate jurisdiction over all Korea. Tension and rivalry between North and South culminated in the Korean War, beginning when North Korean forces invaded the South in June 1950. The UN mounted a collective defence action in support of South Korea and the invasion was repelled. North Korean forces were supported by the People's Republic of China from October 1950. Peace talks began in July 1951 but hostilities continued, inconclusively, until an armistice agreement was made in July 1953. The ceasefire line, roughly following the 38th parallel, remains the frontier between North and South Korea.

During and after the war Kim Il Sung purged many of his rivals from the leadership and by 1958, when Chinese forces withdrew, his supremacy was unchallenged. North Korea continued to maintain a militant attitude to the South and to the U.S.A. A new constitution, adopted in December 1972, created the office of President and Kim Il Sung was elected to the post.

In 1971 talks took place for the first time between the Red Cross Societies of both North and South Korea with the aim of improving relations between the two sides. In 1972 both parties affirmed that reunification should be achieved through peaceful means, that hostile propaganda should cease, and that official contacts between the two countries be encouraged. Reunification talks were, however, suspended in 1973, and hopes for better relations were undermined by a series of clashes between North and South Korean vessels in disputed waters, during 1974. Propaganda campaigns, suspended by agreement in 1972, were resumed by both sides, and minor border incidents have continued. However, in 1977, upon President Carter's decision to phase out American ground troops from South Korea, an improvement in relations was foreseen.

North Korea has achieved considerable success in increasing its international recognition and support, especially among "third world" countries: in 1970 only 36 nations recognized the government in Pyongyang, but by late 1977 diplomatic relations with over 90 states had been established. A motion, supported by North Korea, demanding the withdrawal of UN forces from South Korea was only narrowly defeated in the United Nations in 1974. North Korean prestige was further enhanced with its entry to the Conference of Non-Aligned Nations at Lima, Peru, in August 1975. However, the Pyongyang regime suffered a series of embarrassments in 1976, with the expulsion of a number of North Korean diplomats from Scandinavia and the U.S.S.R., following the exposure of drug trafficking and abuse of diplomatic privileges. The balance of payments continued to worsen, and North Korea was obliged to seek a rescheduling of several foreign debts. In December 1977 the First Session of the Sixth Supreme People's Assembly was held, and a government reshuffle was carried out, in an attempt to deal with the economic crisis.

Government

Under the 1972 Constitution, the highest organ of state power is the unicameral Supreme People's Assembly, with 579 members elected (unopposed) for four years by universal adult suffrage. The Assembly elects for its duration the President of the Republic and, on the latter's recommendation, other members of the Central People's Committee to direct the Government. The Assembly appoints the Premier and the Committee appoints other Ministers to form the Administration Council, led by the President.

Political power is held by the communist Korean Workers' Party (KWP), which dominates the Democratic Front for the Reunification of the Fatherland (including two other minor parties). The Front presents an approved list of candidates for elections to representative bodies. The KWP's highest authority is the Party Congress, which elects a Central Committee to supervise Party work. The Committee elects the Politburo to direct policy.

North Korea comprises nine provinces and two cities, each with an elected People's Assembly.

Defence

Defence treaties have been signed with the U.S.S.R. and the Chinese People's Republic. Military service is selective: army 5 years, navy 5 years, and air force 3/4 years. The total strength of the armed forces is reportedly 500,000 men and between 1 and 2 million men are in the Workers' and Peasants' Militia. The army comprises 430,000 men, the air force 45,000, and the navy 25,000. Security and border troops number 40,000. Defence expenditure in 1976 (2,060 million won) represented about 15 per cent of total government expenditure.

Economic Affairs

With the establishment of the Democratic People's Republic, all industry was nationalized and land distributed among the peasants. The years since 1957 have seen a determined effort to increase industrial and agricultural production. In September 1975 it was announced that virtually all the targets of the Six-Year Plan (1971-76) had been achieved 16 months ahead of schedule. The value of annual gross industrial output was reported to be 2.2 times as much as the 1970 figure. At the end of 1977, after a year of readjustment, a Seven-Year Plan was announced for 1978-84.

Although about half the working population are still employed on the land, a rapid increase in industrial output occurred in the 1970s. The country is rich in mineral wealth with large deposits of coal, iron, lead, copper, zinc, tin, silver and gold. Industrial development has concentrated on heavy industry (metallurgy, electricity, machine-building, cement and chemicals) and expansion has been marked in the steel and mining industries. It is estimated that crude steel production reached 4 million tons in 1975, and the target for 1984 is 8 million tons. Light industry has also benefited from large-scale automation. Modernization and re-equipment of the textile industry resulted in an estimated production of over 600 million metres in 1974. Industry relies mainly on hydro-electric power, for which North Korea has a large potential, and has not been unduly affected by increasing oil prices. Despite such advances, North Korea has found itself lagging behind in industrial techniques and is turning increasingly toward the West for sophisticated machinery and technology.

Rapid mechanization of agriculture has meant that North Korea, which formerly had to import food, now has an exportable surplus, and current irrigation schemes have included the construction of 39,723 kilometres of canals. Provision has been made for the reclamation of 100,000 hectares of land on the west coast by 1980.

The World Bank has estimated that North Korean G.N.P. totalled U.S. \$6,790 million in 1975 (per capita G.N.P. \$430). Reliable trade statistics are not available but it is calculated that imports amounted to U.S. \$575 million in 1975, leaving a trade deficit of about \$362 million. Since 1973, North Korea has become involved in increasingly serious difficulties with its balance of payments, and has defaulted on the repayment of several foreign loans. By the end of 1976, it was estimated that

North Korea owed some \$2,600 million. The country's major trading partners are the U.S.S.R., Czechoslovakia, Poland and the German Democratic Republic, with Japan and other Western countries accounting for roughly 15 per cent of the total. Budget expenditure for 1976 was estimated at 12,513.2 million won, compared with 11,586.3 million won in the previous year.

Transport and Communications

The road and rail network was almost completely destroyed during the Korean War. Electrification of the new railway system is proceeding rapidly and there are direct rail links with Moscow and Peking. Pyongyang is served by a circular underground. Roads have been rebuilt to take the increasing traffic but have a low priority to avoid over-dependence on imported fuel. There are regular passenger and freight services along the Aproz, Daidong and Ryesung rivers, but little air traffic exists. International air services connect Pyongyang to Peking and Moscow. A radio broadcasting network covers most villages. A television network, in operation in the main cities, is being extended to cover the whole country.

Social Welfare

The state provides rest homes, sanatoria and free medical services.

Education

Free and compulsory 11-year education in state schools was introduced in 1975. In 1976 there were 4,700 primary schools, and 4,100 senior middle schools. There is one university with more than 16,000 students, and 155 other higher educational institutions. English is compulsory as a second language at the age of 14.

Tourism

Tourism has yet to be developed although the country has great potential. Mount Keumgang and Songdowon are beauty spots. A favourable exchange rate of U.S. \$1 = 2.128 won is available for tourists.

Sport

The state encourages athletics, football, wrestling and table tennis.

Public Holidays

1978: May 1st (May Day), August 15th (Anniversary of Liberation), September 9th (Independence Day).

1979: January 1st (New Year).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

FINANCE

100 chon (jun) = 1 won.

Coins: 1, 5 and 10 chon.

Notes: 50 chon; 1, 5, 10, 50 and 100 won.

Exchange rates (December 1977): £1 sterling = 1.707 won (basic rate), 3.897 won (tourist rate) or 6.16 won (trade rate);

U.S. \$1 = 97.8 chon (basic rate), 2.128 won (tourist rate) or 3.363 won (trade rate).

100 won = £58.59 = \$102.25 (basic rates).

Note: The new won, equal to 100 old won, was introduced in February 1959. From 1958 the basic exchange rate was U.S. \$1 = 120 old won. The initial basic rate of \$1 = 1.20 new won (1 won = 83.33 U.S. cents) remained in force until August 1971. From December 1971 to February 1973 the basic rate was \$1 = 1.105 won (1 won = 90.48 U.S. cents). In terms of sterling, the basic rate was £1 = 2.88 won from November 1967 to June 1972. In January 1961 a commercial exchange rate was established for foreign trade transactions. This is fixed at £1 = 6.16 won, equal to \$1 = 2.20 won until November 1967. The commercial rate, tied to sterling, was \$1 = 2.567 won from November 1967 to August 1971; and \$1 = 2.364 won from December 1971 to June 1972. The tourist rate was the same as the commercial rate until February 1973, since when it has been \$1 = 2.128 won. The basic rate is linked to the Soviet rouble at a parity of 1 won = 75 kopeks.

THE CONSTITUTION

(adopted December 27th, 1972)

The following is a summary of the main provisions of the Constitution.

Articles 1-6: The Democratic People's Republic is an independent socialist State (Art. 1); the revolutionary traditions of the State are stressed (its ideological basis being the *Juche* idea of the Workers' Party of Korea) as is the desire to achieve national reunification by peaceful means on the basis of national independence.

Articles 7-10: National sovereignty rests with the working people who exercise power through the Supreme People's Assembly and People's Assemblies at lower levels, which are elected by universal, secret and direct suffrage.

Articles 11-17: Defence is emphasized as well as the rights of overseas nationals, the principles of friendly relations between nations based on equality, mutual respect and non-interference, proletarian internationalism, support for national liberation struggles and due observance of law.

Articles 18-48: Culture and education provide the working people with knowledge to advance a socialist way of life. Education is free and there are universal and compulsory one-year pre-school and ten-year senior middle school programmes in being.

Articles 49-72: The basic rights and duties of citizens are laid down and guaranteed. These include the right to vote (for those over the age of 17), to work (the working day being eight hours), to free medical care and material assistance for the old, infirm or disabled, to political asylum. National defence is the supreme duty of citizens.

Articles 73-88: The Supreme People's Assembly is the highest organ of State power, exercises exclusive legislative authority and is elected by direct, equal, universal and secret ballot for a term of four years. Its chief functions are: (i) adopts or amends legal or constitutional enactments; (ii) determines State policy; (iii) elects the President, Vice-President, Secretary and members of the Central People's Committee (on the President's recommendation); (iv) elects members of the Standing Committee of the Supreme People's Assembly, the Premier of the Administration Council (on the President's recommendation), the President of the Central Court and other legal officials; (v) approves the State Plan and Budget; (vi) decides on matters of war and peace. It holds regular and extraordinary sessions, the former being twice a year, the latter as necessary at the request of at least one-third of the deputies. Legislative enactments are adopted when approved by more than half of those deputies present. The Standing Committee is the permanent body of the Supreme People's Assembly. It examines and decides on bills; amends legislation in force when the Supreme People's Assembly is not in session; interprets the law; organizes and conducts the election of Deputies and judicial personnel.

Articles 89-99: The President as Head of State is elected for four years by the Supreme People's Assembly. He convenes and presides over Administrative Council meetings, is the Supreme Commander of the Armed Forces and chairman of the National Defence Commission. The President promulgates laws of the Supreme People's Assembly and decisions of the Central People's Committee and of the Standing Committee. He has the right to issue

orders, to grant pardons, to ratify or abrogate treaties and to receive foreign envoys. The President is responsible to the Supreme People's Assembly.

Articles 100-106: The Central People's Committee comprises the President, Vice-President, Secretary and Members. The Committee exercises the following chief functions: (a) directs the work of the Administration Council as well as organs at local level; (b) implements the constitution and legislative enactments; (c) establishes and abolishes Ministries, appoints Vice-Premiers and other members of the Administration Council; (d) appoints and recalls ambassadors and defence personnel; (e) confers titles, decorations, diplomatic appointments; (f) grants general amnesties, makes administrative changes; (g) declares a state of war. It is assisted by a number of Commissions dealing with Internal Policy, Foreign Policy, National Defence, Justice and Security and other matters as may be established. The Central People's Committee is responsible to the Supreme People's Assembly's Standing Committee.

Articles 107-114: The Administration Council is the administrative and executive body of the Supreme People's Assembly. It comprises the Premier, Vice-Premiers and such other Ministers as may be appointed. Its major functions are the following: (i) directs the work of Ministries and other organs responsible to it; (ii) works out the State Plan and takes measures to make it effective; (iii) compiles the State Budget and gives effect to it; (iv) organizes and executes the work of all sectors of the economy as well as transport, education and social welfare; (v) concludes treaties; (vi) develops the armed forces and maintains public security; (vii) may annul decisions and directives of State administrative departments which run counter to those of the Administration Council. The Administration Council is responsible to the President, Central People's Committee and the Supreme People's Assembly.

Articles 115-132: The People's Assemblies of the province (or municipality directly under central authority), city (or district) and county are local organs of power. The People's Assemblies or Committees exercise local budgetary functions, elect local administrative and judicial personnel and carry out the decisions at local level of higher executive and administrative organs.

Articles 133-146: Justice is administered by the Central Court—the highest judicial organ of the State, the local Court, the People's Court and the Special Court. Judges and other legal officials are elected by the Supreme People's Assembly. The Central Court protects State property, Constitutional rights, guarantees that all State bodies and citizens observe State laws and executes judgements. Justice is administered by the court comprising one judge and two people's assessors. The Court is independent and judicially impartial. Judicial affairs are conducted by the Central Procurator's Office which exposes and institutes criminal proceedings against accused persons. The Office of the Central Procurator is responsible to the Supreme People's Assembly, the President, and the Central People's Committee.

Articles 147-149: These articles describe the national emblem, the national flag and designate Pyongyang as the capital.

REPUBLIC OF KOREA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Korea forms the southern part of the Korean peninsula between North China and Japan. To the north, separated by a frontier which roughly follows the 38th parallel, is the Democratic People's Republic of Korea. The climate is marked by cold, dry winters with an average temperature of -6°C (21°F) and hot, humid summers with an average temperature of 25°C (77°F). The language is Korean. Mahayana Buddhism is the principal religion with about 12 million adherents. Christians number about 5 million, of whom about 80 per cent are Protestant. Other religions include Confucianism, Taoism and Chundo Kyo, a religion peculiar to Korea, combining elements of Shaman, Buddhist and Christian doctrines. The national flag (proportions 3 by 2) consists of a disc divided horizontally by an S-shaped line, red above and blue below, on a white field with parallel black bars (broken and unbroken) in each corner. The capital is Seoul.

Recent History

(For history of Korea up to the end of the Second World War, see Democratic People's Republic of Korea, p. 718.)

Unsuccessful negotiations were held in 1946 and 1947 to establish a unified government for Korea, after which UN-supervised elections for a National Assembly were held in May 1948 in the South only. The Assembly, dominated by conservative members, adopted a democratic constitution and South Korea became the independent Republic of Korea in August 1948, with Dr. Syngman Rhee, the Liberal Party leader, as first President. The U.S.A. withdrew its military forces in June 1949.

Tension and rivalry between North and South, each claiming to have legitimate jurisdiction over all Korea, culminated in the Korean War, beginning when North Korean forces invaded the South in June 1950, quickly capturing Seoul. The UN mounted a collective defence action in support of South Korea and the invasion was repelled. Peace talks began in July 1951 but hostilities continued, inconclusively, until July 1953, when an armistice agreement was made. The ceasefire line, roughly following the 38th parallel, remains the frontier between North and South Korea.

President Rhee was re-elected in 1952, 1956 and in March 1960. However, the 1960 election was held amid allegations of corruption and repression by the Government and was followed by demonstrations and riots. These forced Rhee and his cabinet to resign in April 1960, when a caretaker government took over. The Assembly amended the constitution, reducing the presidency to a ceremonial office and creating an executive Prime Minister. Elections in July 1960 were won by the Democratic Party, led by Chang Myon, who became Prime Minister in August, when the Second Republic was inaugurated. Chang's government was ineffective in tackling economic problems and was deposed in May 1961 by a military coup, led by Gen. Park Chung-Hee. Power was assumed by a Supreme Council for National Reconstruction (SCNR), with Gen. Park as

Chairman from July 1961. The SCNR dissolved the Assembly, banned political activity and declared martial law. In March 1962 the President resigned and Gen. Park became acting Head of State. Far-reaching constitutional amendments, approved by referendum in December 1962, restored a strong presidency. In January 1963 the military leadership formed the Democratic Republican Party (DRP). General Park retired from the army in August 1963 and was elected President in October. His DRP won a majority in the Assembly elections in November 1963. General Park took office as President in December 1963, when the Third Republic was established. A Treaty of Normalization was signed with Japan in June 1965. Despite the unpopularity of this, President Park and the DRP were re-elected with increased majorities in 1967, although the Opposition charged the Government with election irregularities. The constitution was later amended to allow the President a third term of office and he was elected, with a much reduced majority, in 1971.

Opposition to President Park's regime, and in particular to the activities of the Korean Central Intelligence Agency, led to the imposition of martial law in October 1972. A constitution for the Fourth Republic, giving the President greatly increased powers, was approved by national referendum in November 1972. A new body, the National Conference for Unification (NCU), was elected in December 1972. The NCU, in turn, re-elected President Park for a six-year term and the DRP obtained a decisive majority in elections for the new National Assembly. However, mounting criticism of President Park and a growing call for the restoration of democracy led to a series of emergency measures in 1974. A coalition of opposition groups merged to create the National Council for the Restoration of Democracy in November 1974. Opposition groups boycotted a national referendum held in February 1975, in which 73 per cent of the voters endorsed President Park's policies. Further emergency measures were introduced in May 1975 to combat unrest, with the effect of banning opposition to the Government, and a number of political trials took place in 1976. However, in 1977 some dissidents were released from prison.

Another attempt by South Korea to gain admittance to the United Nations in July 1975 was rejected, while relations with the Democratic People's Republic of Korea continued to be strained. In early 1977 the U.S.A. announced proposals for the gradual withdrawal of its ground troops from South Korea. Further problems were created by the revelation of a scandal involving the Korean Central Intelligence Agency, relating to the alleged bribery of American Congressmen in Washington, in an attempt to influence favourably U.S. policy towards South Korea. In December 1977 President Park carried out a cabinet reshuffle.

Government

Under the 1972 Constitution, executive power is held by the President, indirectly elected for six years by the National Conference for Unification (NCU), which has 2,359 delegates elected for six years by direct popular vote.

REPUBLIC OF KOREA

Introductory Survey

The President governs with the assistance of an appointed State Council (Cabinet), led by a Prime Minister. Legislative power is vested in the unicameral National Assembly, with 219 members (146 elected for six years by universal adult suffrage and 73 elected for three years by the NCU). The State Council is responsible to the Assembly. South Korea comprises nine provinces and two cities.

Defence

Protection of the Korean frontier is a United Nations' responsibility. In 1977 South Korea made plans for the rapid expansion of its arms industry, and greatly increased the defence budget, in preparation for the departure of 33,000 American ground troops. Military service lasts for thirty months in the army and three years in the navy and air force. The emergency decree of May 1975 stated that all males between the ages of 17 and 20 must join the civil defence corps. In 1977 the strength of the armed forces was 635,000 men; army 560,000, navy 25,000, marines 20,000, air force 30,000. Defence expenditure for 1978 is estimated at 1,251,592 million won, representing 35.6 per cent of the total budget.

Economic Affairs

The Republic's economy was severely disrupted by the Korean War, but a complete recovery was achieved by the United Nations Korean Rehabilitation Agency (UNKRA) and the United States. Agriculture is the principal source of employment, with about 46 per cent of the working population engaged in agriculture and fishing in 1976. Korea is far from self-sufficient in food production and there are plans to increase grain output in the five-year period commencing in 1977. The chief crop is rice. Wheat, barley and sweet potatoes are also important. Fishing is both an export and a food source, and South Korea is now one of the world's leading ocean-fishing nations. A deep-sea fishing base and associated processing plants have been built at Ulsan.

There are substantial coal deposits and other minerals include iron ore, tungsten, gold, graphite and fluorite. A five-year natural resources development plan was announced in 1973. Industry is playing an increasingly large role in the economy, particularly textiles, electronics, cars, steel and petrochemicals, and in 1977 the mining and manufacturing sectors accounted for 30 per cent of G.N.P. Large loans have been secured from Japan, the U.S.A. and Iran to expand oil refineries to support the petro-chemical industry.

After a short period of rapid industrial expansion, in 1974 South Korea found itself badly affected by the oil crisis and world-wide inflation, and the long-established trade deficit reached a record U.S. \$2,380 million. This was financed by foreign loans, aid and investment, mainly from the U.S.A. and Japan, and in December 1974 the Government responded with a 16.7 per cent devaluation of the won. By the end of 1975 the economy had begun to recover from the recession. Exports accelerated rapidly, and in 1976 increased by 43.4 per cent over the previous year. However, in 1977 this figure was estimated to have dropped to 28.5 per cent. The pace of inflation declined, with the rate of increase in wholesale prices being estimated at 10 to 12 per cent for 1976, compared with 45 per cent in 1974 and 20 per cent in 1975. G.N.P. growth in 1977 was

estimated at 10.3 per cent at current prices, compared with 15.5 per cent in 1976.

The fourth Five-Year Economic Development Plan (1977-81) envisages an annual average growth rate of 9 per cent. Total investment will increase by 52 per cent, and the share of mining and manufacturing in the national industrial structure is expected to increase from 30 to 38 per cent. Export volume is planned to rise by an annual rate of 16 per cent.

Transport and Communications

Roads and railways have been rebuilt since the war. There were 5,653 km. of railway track in 1976. In 1976 there were 45,514 km. of roads reaching all parts of the country. The Government hopes to pave all highways by 1980. Coastal shipping is important, the chief ports being Pusan, Incheon and Masan. Expansion of harbour facilities at Ulsan, Pohang and Yeosu is in progress. There are internal and international air services. In June 1970 a satellite communications system became operational at the Kumsan ground station, which relays signals via Intelsat-3. The first line of the Seoul underground railway system opened in 1974 and the network will eventually cover 140 km.

Social Welfare

The Government provides social relief services for the handicapped, wounded veterans and war widows. Special grants or subsidies are also given to the aged, disaster victims and orphans by numerous official and voluntary bodies. In 1974 the country had 22,089 hospital beds and 13,013 physicians.

Education

Primary education between the ages of 6 and 12 is free and compulsory and about 5.5 million children were enrolled in 1976, with over 2 million in secondary schools. There are 72 universities and colleges and 85 graduate schools. In 1976 student enrolment in higher education was estimated at 245,100. In 1970 adult illiteracy averaged 12.4 per cent (males 5.6 per cent, females 19.0 per cent).

Tourism

Korea has much to offer in mountain scenery, and the temples and museums and the Royal Palaces at Seoul contain many examples of the traditional Korean arts. There are excellent hunting and fishing facilities.

Visas are not required to visit the Republic of Korea for stays not exceeding 60 days by nationals of the following countries: Belgium, Denmark, Finland, Iceland, Lesotho, Luxembourg, the Netherlands, Norway, Sweden, Turkey and the United Kingdom.

Sport

The most popular sports are football, baseball, basketball and volleyball. Table-tennis, tennis and badminton are also played.

Public Holidays

1978: May 5th (Children's Day), May 14th (Buddha's Birthday), June 6th (Memorial Day), July 17th (Constitution Day), August 15th (Liberation Day), September 17th (Choo-Suk—Korean Thanksgiving Day), October 1st

(Armed Forces' Day), October 3rd (National Foundation Day), October 9th (Hangul Nal—Anniversary of Proclamation of Korean Alphabet), December 25th (Christmas Day).

1979: January 1st–3rd (New Year), March 1st (Sam Il Chul—Independence Movement Day), April 5th (Arbor Day).

Weights and Measures

The metric system is in force, although a number of traditional measures are also used.

FINANCE

100 chun (jeon)=10 hwan=1 won.

Coins: 1, 5, 10, 50 and 100 won.

Notes: 1, 5, 10, 50, 100, 500, 1,000, 5,000 and 10,000 won.

Exchange rates (December 1977): £1 sterling=886.4 won; U.S. \$1=484.0 won.

10,000 won=£11.28=\$20.66.

Note: The new won was introduced in June 1962, replacing the hwan at the rate of 1 new won=10 hwan. The hwan had been introduced in February 1953, replacing the old won at the rate of 1 hwan=100 old won. The official exchange rate was initially U.S. \$1=100 hwan but subsequently the hwan was frequently devalued. From February 1961 the exchange rate was \$1=1,300 hwan. The initial rate of \$1=130 new won (£1 sterling=364 new won) remained in force until May 1964, after which the won's value was allowed to fluctuate in a free market. The official buying rate was \$1=255 won (£1=714 won) from May 1964 to March 1965. For the next three years the rate was around 270 to 275 won per U.S. dollar, declining to 281 won per dollar (£1=674 won) by the end of 1968 and then to more than 300 won per dollar by November 1969. Depreciation of the won continued and in June 1971 the currency was officially devalued, the new buying rate being \$1=370 won (£1=888 won). Further depreciation followed, despite the devaluation of the U.S. dollar in December 1971, and the buying rate was \$1=400 won by June 1972. Thereafter the won's value held steady at around that rate (but unchanged by a further dollar devaluation in February 1973) until December 1974, when a new rate of \$1=484 won was introduced. The average market rates of won per U.S. dollar were: 271 in 1966; 270 in 1967; 276.3 in 1968; 288.4 in 1969; 310.4 in 1970; 350.1 in 1971; 394.0 in 1972; 398.5 in 1973; 406.0 in 1974.

THE CONSTITUTION

A new constitution was approved by national referendum in November 1972. The main provisions are summarized below.

THE GOVERNMENT

The President: The President is to be elected by the National Conference for Unification for a period of six years and may be elected for an unlimited number of such terms. In times of national emergency and under certain conditions the President shall have power to take necessary emergency measures in all matters of State. He may, in time of war, armed conflict or similar national emergency, declare martial law in accordance with the provisions of law. He is authorized to take directly to the people important issues through national referenda, and may dissolve the National Assembly at will. He is empowered to appoint members at all levels of the judiciary and may discipline them in cases of misconduct.

The State Council: The State Council shall be composed of the President, the Prime Minister and no more than 25 and no fewer than 15 others appointed by the President, and shall deliberate on policies that fall within the power of the executive.

The National Assembly: The National Assembly is to be unicameral with a membership as determined by law, two-thirds of whom are to be elected by direct popular

vote, and the remainder chosen by the National Conference for Unification. Regular sessions are to be held once a year for a maximum period of 90 days and two special sessions of not more than 30 days each may be held at the request of the President or one-third of the total members. In addition the President may, in extraordinary circumstances, convene an emergency session. The term of office of those members elected by popular vote shall be six years, those elected by the National Conference sitting for three years. The legislative power shall be vested in the National Assembly. It has the power to recommend to the President the removal of the Prime Minister or any other Minister. The National Assembly shall have the authority to pass a motion for the impeachment of the President or any other public official.

The National Conference for Unification: This shall be elected by direct popular vote and shall be composed of no fewer than 2,000 and no more than 5,000 delegates, whose term of office shall be six years. The National Conference for Unification is to be the supreme representative body for national consensus on matters concerning national unification. It shall elect the President and one-third of the members of the National Assembly and shall make the final decision on any draft amendments to the constitution passed by the National Assembly.

REPUBLIC OF KOREA

The Constitution Committee: The Constitution Committee shall be composed of nine members appointed by the President, three of whom shall be appointed from persons elected by the National Assembly and three from persons nominated by the Chief Justice. The term of office shall be six years. It shall pass judgment upon the constitutionality of laws upon the request of the Court, matters of impeachment and the dissolution of political parties. In these judgments the concurrence of six members or more shall be required.

The Judiciary: The courts shall be composed of the Supreme Court, which is the highest court of the State, and other courts at specified levels (for further details see Judicial System, page 744). When the constitutionality of a law is a prerequisite to a trial the Court shall request a decision of the Constitution Committee. The Supreme Court shall have the power to pass judgment upon the constitutionality or legality of administrative decrees, and shall have final appellate jurisdiction over military tribunals.

Political Parties: The establishment of political parties shall be free and the plural party system guaranteed. However, a political party whose aims or activities are contrary to the basic democratic order may be dissolved by the Constitution Committee.

THE GOVERNMENT

The Constitution, The Government, National Assembly

Constitutional Amendments: A motion to amend the Constitution shall be proposed by the President or by a majority of the total members of the National Assembly. Proposed amendments by the President are to be decided by national referendum. Those put forward by the National Assembly shall become effective when passed by a two-thirds majority thereof, having also received confirmation by the National Conference for Unification.

FUNDAMENTAL RIGHTS

Under the constitution all citizens are equal before the law. Freedom of speech, press, assembly and association are guaranteed, as are freedom of choice of residence and occupation. No state religion is to be recognized and freedom of conscience and religion is guaranteed. Citizens are protected against retrospective legislation, and may not be punished without due process of law.

Besides legal limitations on certain of these rights as provided for in specific provisions of the constitution, there is a general clause stating that rights and freedoms may be restricted by law when this is deemed necessary for the maintenance of national security, order or public welfare.

KUWAIT

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The State of Kuwait lies at the north-west extreme of the Persian Gulf and is bordered to the north-west by Iraq and to the south by Saudi Arabia. In the extreme south-east lies a Partitioned Zone, the oil wealth of which is shared equally between the two concessionaires of Kuwait and Saudi Arabia. Kuwait is a desert country with a hot and humid climate: temperatures average 24°C (75°F) and can soar very high, with humidity of 60-80 per cent in July and August. The language is Arabic, but English is widely used. Islam is the predominant religion. The national flag (proportions 2 by 1) has horizontal green, white and red stripes, with a black trapezoid next to the staff. The capital is Kuwait City.

Recent History

Until 1961, Kuwait accepted British protection and foreign policy was controlled by the British Government. Kuwait became independent in June 1961 and joined the United Nations in 1963. During 1965 agreement was reached with Saudi Arabia over sharing of oil revenues from the Neutral Zone (now called "Partitioned Zone"). Kuwait has played an important part in stimulating Arab co-operation. In November 1965 Sheikh Abdullah al-Salim al-Sabah, the first ruler of independent Kuwait, died and was succeeded by his brother, Sheikh Sabah al-Salim al-Sabah. Individual Kuwaiti residents (many formerly Palestinians) have given much financial assistance to the Palestinian guerrilla organizations, while the Government has been granting substantial financial assistance to Jordan and Egypt since September 1967.

In January 1971 a more representative national assembly was elected, and an extensive cabinet reshuffle took place for the first time since independence. In 1973 and early 1974 the National Assembly asserted itself by refusing to ratify participation agreements between the Kuwaiti Government and the Kuwait Oil Co., but in May 1974 the National Assembly ratified the agreement giving the Kuwaiti Government 60 per cent participation, finally increased to a 100 per cent holding in December 1975.

Elections to the National Assembly took place in January 1975, when 260 candidates stood for 50 seats. In August 1976 the Amir dissolved the National Assembly for four years and imposed restrictions on the press. He claimed that the National Assembly had been acting against the best interests of the State. On the death of Sheikh Sabah al-Salim al-Sabah in December 1977, his cousin the Crown Prince, Sheikh Jaber al-Ahmad al-Sabah, Prime Minister since 1966, succeeded as Amir. No major change of policy was expected.

Government

Under the 1962 Constitution, executive power is vested in the Amir, the Head of State chosen by and from members of the ruling family, and is exercised through a Council of Ministers. The Amir appoints the Prime Minister and, on the latter's recommendation, other Ministers. Legislative power is vested in the unicameral National Assembly of 64 members (14 appointed and 50 elected for four years by literate adult male Kuwaiti citizens except for service-

men and policemen). The National Assembly was dissolved by the Amir in August 1976. The country is divided administratively into three districts.

Defence

Kuwait has an army numbering about 8,500 men, an air force of 1,000 men (excluding expatriate personnel), and a navy of about 500 men manning 31 vessels. Defence expenditure in 1976 was KD 592.2 million. Compulsory military service is to be introduced in April 1978.

Economic Affairs

The economy is based on extremely rich deposits of petroleum, most of it exploited by the Kuwait Oil Company, which is government-owned and accounts for about 90 per cent of Kuwait's oil production.

In order to conserve its reserves, and also because of a fall in demand for oil by consumer countries, Kuwait's crude oil production declined from the peak of 1,200 million barrels in 1972 to 760 million barrels in 1975, rising slightly to 785 million in 1976. Oil refining and the production of natural gas and fertilizers are increasingly important industries. In recent years there has been a growth of companies which specialize in fund management and investment.

In spite of the fall in oil production since 1972, Kuwait was the richest country in the world in terms of G.N.P. per capita in 1975 and 1976. The Kuwait Fund for Arab Economic Development continued to make loans to other Arab countries.

Transport and Communications

There are no railways, and no internal air flights. The 1,920 km. of roads include the dual carriageway from Kuwait City to the border with Iraq. A Kuwait-Saudi highway was completed in 1976. The port of Kuwait is an important Middle Eastern port of call and has been modernized. Special oil terminals facilitate oil shipments, the chief one being Mina Al-Ahmadi. Kuwait Airways and a number of foreign airlines provide international air services.

Social Welfare

A comprehensive Social Security Law, which applies to all Kuwaitis, became effective in October 1977. Medical treatment is free, and medical teams from Kuwait assist other Arab governments. In 1972 the country had 3,799 hospital beds and 1,050 physicians. Large government subsidies keep down the cost of food.

Education

Education is free. Education is graded into pre-primary (four to six), primary (six to ten), intermediate (ten to fourteen) and secondary (fourteen to eighteen). There is a technical college and a university. Over 2,000 Kuwaiti students are now receiving education abroad. In 1970 adult illiteracy averaged 45.0 per cent (males 36.6 per cent, females 58.1 per cent).

Tourism

Visas are not required to visit Kuwait by nationals of Algeria, Bahrain, Egypt, Iraq, Jordan, Lebanon, Libya, Morocco, Qatar, Saudi Arabia, Syria, Sudan, Tunisia, the United Arab Emirates and the United Kingdom.

Public Holidays

1978: July 3rd (Leilat al Meiraj, Ascension of the Prophet), September 4th, 5th (Id ul Fitr, end of Ramadan), November 11th, 12th, 13th (Id ul Adha, Feast of the Sacrifice), December 2nd (Muslim New Year).

1979: February 10th (Mouloud, Birth of the Prophet), February 25th (Kuwait National Day).

Weights and Measures

The metric system is in force.

Note: The Kuwaiti dinar was introduced in April 1961, replacing the Persian Gulf Indian rupee. The dinar's initial value of U.S. \$2.80 (\$1=357.14 fils) remained in force until August 1971. Between December 1971 and February 1973 the dinar's par value was \$3.04 (\$1=328.95 fils). From February 1973 to March 1975 it was \$3.3778 (\$1=296.05 fils) but a fluctuating market rate was also in operation. The Kuwaiti dinar was at par with the pound sterling until November 1967, after which the exchange rate was £1=857.14 fils (1 dinar=£1.167) until June 1972. Since March 1975 the dinar's value has been determined in relation to a weighted group of currencies of the country's main trading partners. The average market value of the Kuwaiti dinar was \$3.39 in 1973; \$3.41 in 1974; \$3.45 in 1975; \$3.42 in 1976.

THE CONSTITUTION

(Promulgated November 16th, 1962)

On August 29th, 1976, the Amir suspended four articles of the Constitution dealing with Press freedom and the National Assembly, and dissolved the National Assembly. A committee will suggest constitutional amendments which must be approved by referendum within four years.

The principal provisions of the Constitution are as follows:

SOVEREIGNTY

Kuwait is an independent sovereign Arab State; her sovereignty may not be surrendered, and no part of her territory may be relinquished. Offensive war is prohibited by the Constitution.

Succession as Amir is restricted to heirs of the late MUBARAK AS-SABAH, and an Heir Apparent must be appointed within one year of the accession of a new Amir.

EXECUTIVE AUTHORITY

Executive power is vested in the Amir, who exercises it through a Council of Ministers. The Amir will appoint the Prime Minister "after the traditional consultations", and will appoint and dismiss Ministers on the recommendation of the Prime Minister. Ministers need not be members of the National Assembly, though all Ministers who are not Assembly members assume membership *ex officio* in the Assembly for the duration of office. The Amir also lays down laws, which shall not be effective unless published in the *Official Gazette*. The Amir sets up public institutions. All decrees issued in these respects shall be conveyed to the Assembly. No law is issued unless it is approved by the Assembly.

LEGISLATURE

A National Assembly of 50 members will be elected for a four-year term by all natural-born literate Kuwait males

over the age of 21, except servicemen and police, who may not vote. Candidates for election must possess the franchise and be over 30 years of age. The Assembly will sit for at least eight months in any year, and new elections shall be held within two months of the last dissolution of the outgoing Assembly.

Restrictions on the commercial activities of Ministers include an injunction forbidding them to sell property to the Government.

The Amir may ask for reconsideration of a Bill passed by the Assembly and sent to him for ratification, but the Bill would automatically become law if it were subsequently passed by a two-thirds majority at the next sitting, or by a simple majority at a subsequent sitting. The Amir may declare Martial Law, but only with the approval of the Assembly.

The Assembly may pass a vote of no confidence in a Minister, in which case the Minister must resign. Such a vote is not permissible in the case of the Prime Minister, but the Assembly may approach the Amir on the matter, and the Amir shall then either dismiss the Prime Minister or dissolve the Assembly.

An annual budget shall be presented, and there shall be an independent finance control commission.

CIVIL SERVICE

Entry to the Civil Service is confined to Kuwait citizens.

PUBLIC LIBERTIES

Kuwaitis are equal before the law in prestige, rights and duties. Individual freedom is guaranteed. No one shall be seized, arrested or exiled except within the rules of law.

No punishment shall be administered except for an act or abstaining from an act considered a crime in accordance with a law applicable at the time of committing it, and no penalty shall be imposed more severe than that which could have been imposed at the time of committing the crime.

Freedom of opinion is guaranteed to everyone, and each has the right to express himself through speech, writing or other means within the limits of the law.

The Press is free within the limits of the law, and it

should not be suppressed except in accordance with the dictates of law.

Freedom of performing religious rites is protected by the State according to prevailing customs, provided it does not violate the public order and morality.

Trade unions will be permitted and property must be respected. An owner is not banned from managing his property except within the boundaries of law. No property should be taken from anyone, except within the prerogatives of law, unless a just compensation be given.

Houses may not be entered, except in cases provided by law. Every Kuwaiti has freedom of movement and choice of place of residence within the state. This right shall not be controlled except in cases stipulated by law.

Every person has the right to education and freedom to choose his type of work. Freedom to form peaceful societies is guaranteed within the limits of law.

JUDICIAL SYSTEM

There is a codified system of law based largely upon the Egyptian system. In criminal matters, minor contraventions are dealt with by Magistrates Courts, felonies by Criminal Assize Courts. Appeal in the case of misdemeanours is to a Misdemeanours Court of Appeal.

Civil cases are heard by a General Court within which are separate chambers dealing with commercial cases,

other civil cases and matters of personal status. Appeal is to a High Court of Appeal. Matters of personal status may go beyond the High Court of Appeal to a Court of Cassation.

In criminal cases, investigation of misdemeanours is the responsibility of the police, while responsibility for the investigation of felonies lies with the Attorney-General's Office.

LAOS

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Lao People's Democratic Republic is a land-locked country bordered by the People's Republic of China to the north, Viet-Nam to the east, Cambodia to the south, Thailand to the west and Burma to the north-west. The climate is tropical, with a rainy monsoon season lasting from May to October. The official language, Lao or Laotian, is spoken by about two-thirds of the population. French is spoken widely and there are a number of tribal languages including Meo. The principal religion is Buddhism. There are also some Christians and followers of animist beliefs. The national flag has horizontal stripes of red, blue (half the depth) and red, with a white disc in the centre. The capital is Vientiane.

Recent History

Laos was formerly a part of French Indo-China and comprised the three principalities of Luang Prabang, Vientiane and Champassac. These were merged in 1946, when France recognized Sisavang Vong, ruler of Luang Prabang since 1904, as King of Laos. In May 1947 the King promulgated a democratic constitution, though until 1957 only men were allowed to vote. The Kingdom of Laos became independent, within the French Union, in July 1949 and full sovereignty was recognized by France in October 1953. The leading royalist politician was Prince Souvanna Phouma, who was Prime Minister in 1951-54, 1956-58, 1960 and from 1962 to 1975. King Sisavang Vong died in October 1959 and was succeeded by his son, Savang Vatthana.

From 1950 the Royal Government was opposed by the Lao Patriotic Front (LPF), an insurgent movement formed by a group of former anti-French activists. The LPF's Chairman was Prince Souphanouvong, a half-brother of Prince Souvanna Phouma, but its dominant element was the communist People's Party of Laos (PPL), led by Kaysone Phomvihane. The LPF's armed forces became known as the Pathet Lao. During the 1950s the Pathet Lao gradually secured control of the north-east of the country with the assistance of the Vietnamese communists, the Viet-Minh, engaged in war with the French (until 1954). Several agreements between the Royal Government and the LPF, attempting to end the guerrilla war and reunite the country, failed during the 1950s and early 1960s. By 1965 the *de facto* partition of Laos was established, with the LPF refusing to participate in national elections, and consolidating its power over the north-eastern provinces.

With the "Ho Chi Minh Trail", the communist supply route to South Viet-Nam, running through the Pathet Lao controlled areas, Laos remained closely involved with the war in Viet-Nam, which by the mid-1960s had evolved into a struggle between the Vietnamese communists and the U.S.A. In 1973 the Viet-Nam peace negotiations included provisions for a cease-fire in Laos. A new Government was set up in April 1974 with Royalist, neutralist and LPF participation and with Prince Souvanna Phouma continuing as Prime Minister and Prince Souphanouvong becoming Deputy Prime Minister. However, the rivalry between the parties continued and, with the advance of the communist forces in South Viet-Nam in 1975, the LPF

increased its power. A change in the composition of the Government gave effective control to the LPF, which was confirmed by election victories in many areas in October and November 1975. In November King Savang Vatthana abdicated and Souvanna Phouma resigned.

In December 1975 a National Congress of People's Representatives (264 delegates elected by local authorities) abolished the monarchy and elected a 45-member Supreme People's Council. Souphanouvong was appointed President of the newly named Lao People's Democratic Republic as well as President of the Supreme People's Council. Kaysone Phomvihane, who had become Secretary-General of the Lao People's Revolutionary Party (a merger of the LPF and the PPL), was appointed Prime Minister. Ex-King Savang Vatthana was named Supreme Counsellor to the President.

Since 1975 Laos has been heavily dependent on Vietnamese economic and military assistance. In July 1977 a 25-year treaty of friendship between the two countries was signed and Vietnamese troops were involved in action against counter-revolutionary groups with considerable success in 1977.

Between 1975 and 1977 relations with neighbouring Thailand were strained by Thailand's support for anti-communist elements in Laos and its acceptance of Lao refugees. Several times during this period Thailand closed the border to Lao imports and exports, causing considerable hardship. However, with the fall of the militantly anti-communist Government in Thailand in October 1977, there was an improvement in relations and the blockade of goods was lifted.

Government

In December 1975 a National Congress of People's Representatives proclaimed a republic. The Congress installed a President as Head of State and a Council of Ministers, led by a Prime Minister, to exercise executive power. A Supreme People's Council of 45 members, chaired by the President, has been appointed to draft a new constitution.

Defence

The strength of the Pathet Lao was estimated at 35,000 in July 1975. In 1977 there were an estimated 40,000-50,000 Vietnamese troops in Laos.

Economic Affairs

The essentially agricultural Laotian economy was severely disrupted by the years of civil war. The principal crop is rice but Laos has been unable to achieve self-sufficiency in this crop in recent years and since 1976 has relied on imported supplies from the People's Republic of China and the U.S.S.R. Poor harvests, due to drought and crop pests, compounded with a drop in productivity, a result of an agriculture tax introduced in late 1976, to produce a rice shortfall of an estimated 120,000 tons in 1977. As well as rice, essential imports include other food-stuffs, clothing, medical supplies and raw materials. There are few exports; timber and tin are the most important, earning an estimated U.S. \$5 million and \$1 million respectively in 1976.

The chronic balance of trade deficit, approximately 32,000 million old kips in 1974, was largely financed by U.S. aid. The shortage of foreign exchange was alleviated by contributions (U.S. \$32 million in 1974) from the Foreign Exchange Operations Fund (FEOF) which closed in March 1976. The Government also relied upon U.S. aid to finance the large annual budgetary deficit. Following the closure of the U.S. aid mission in June 1975, Laos has become increasingly dependent on assistance from the U.S.S.R., the People's Republic of China and Viet-Nam, as well as from international organizations.

The general economic dislocation was also responsible for the significant rise in the rate of inflation. This averaged 7 per cent between 1965 and 1971 but in 1974 reached 70 per cent. In June 1976, in an attempt to curb inflation, a new currency was introduced with an official exchange rate of 200 new kips to the U.S. dollar. However, by November the unofficial rate was about 1,400 to the dollar and inflation continued at a high rate.

The National Congress of People's Representatives which met in December 1975 stated that the principal aim of the new Government would be to develop agriculture and forestry as the basis for future industrial development, and more particularly become self-sufficient in food as soon as possible. Other objectives would include the effective exploitation of mineral and hydro-electric resources, the creation of a state trading network, the development of an efficient communications system and the restructuring of the financial system. However, in 1977 there was little improvement in the Laotian economy. Thailand's *de facto* blockade of supplies passing across the border contributed to severe shortages of a wide range of goods, including petroleum and machinery, and hampered reconstruction.

Transport and Communications

The Mekong and its left-bank tributaries form the principal artery of transport, although the size of craft is

limited by rapids and traffic is seasonal. There are no railways in Laos but in September 1976 an official communiqué confirmed that studies would be undertaken for the construction of a railway link between Laos and Viet-Nam. In 1977 there were about 15,600 km. of roads, of which about 1,300 km. were all-weather roads. Lao Aviation operates services to Cambodia, Thailand and Viet-Nam from Vientiane airport.

Social Welfare

In 1974 there were 39 hospitals (with 3,232 beds) and 151 physicians.

Education

Education was largely disrupted by the civil war, causing a high illiteracy rate. Educational facilities have since greatly improved, and education is compulsory for six years. Total enrolment at all educational institutions was 295,719 in 1973. College-level schooling is now available in Laos and there are six teacher-training institutes and an art school. The Sisavangvong University has about 1,000 students.

Tourism

The main attractions of Laos are the ancient temples, the traditional dancing and the forest and mountain scenery. Visas are required by all visitors.

FINANCE

100 at (cents)=1 new kip.

Coins: 10, 20 and 50 at.*

Notes: 10, 20, 50, 100, 200, 500 new kips.

Exchange rates (December 1977): £1 sterling=366.3 new kips; U.S. \$1=200.0 new kips.

1,000 new kips=£2.73=\$5.00.

Note: The kip was introduced in January 1955, replacing (at par) the Indo-Chinese piastre. From May 1953 the piastre's value was 10 old French francs. The initial exchange rate was thus U.S. \$1=35 kips (1 kip=2.857 U.S. cents). In October 1958 the currency was devalued by 56 per cent, the new exchange rate being \$1=80 kips (1 kip=1.25 U.S. cents). This rate remained in force until the end of 1963. From January 1964 to November 1971 the official exchange rate was \$1=240 kips (1 kip=0.417 U.S. cent), although a free market rate also operated officially at around 500 kips to the dollar. In November 1971 this official free rate was fixed at \$1=600 kips (1 kip=0.167 U.S. cent) and this became the rate used to convert the value of foreign trade transactions. The official basic rate of \$1=240 kips was abolished in April 1972, when the basic and free rates were unified at \$1=600 kips. A financial (selling) rate of \$1=840 kips was introduced in May 1972. The currency was devalued in March 1975, when the rates were fixed at \$1=750 kips (buying) or 1,200 kips (selling). In June 1976 the new kip was introduced, replacing the former currency at the rate of 1 new kip=20 old kips. However, the currency was devalued by 70 per cent so that the exchange rate became \$1=200 new kips. In terms of sterling the exchange rate was £1=576 old kips (official) from November 1967 to August 1971; and £1=1,563.43 old kips (free market) from December 1971 to June 1972.

* These are the denominations of the old kip, replaced in June 1976. Some of them remain in circulation, with their value adjusted to the new currency. Some of the old notes also remain in circulation.

LEBANON

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Lebanon lies at the eastern end of the Mediterranean Sea, with Syria to the north and east and Israel to the south. The climate varies widely, coastal lowlands being hot and humid in summer and mild in winter but in the hills there is a heavy winter snowfall. Rainfall is on the whole abundant. Arabic is spoken everywhere and French and English are widely understood. The population is almost equally divided between Christians and Muslims. The Christians are mainly Maronites, but many other sects flourish. The national flag (proportions 3 by 2) has horizontal stripes of red, white (half the depth) and red. In the centre of the white stripe is a cedar tree. The capital is Beirut.

Recent History

Before the Second World War Lebanon was a French mandated territory. Independence was proclaimed in 1941 and French forces left the country in 1946. The Lebanon has been a member of the Arab League since 1945 and has tried to follow a policy of neutrality in the disputes between Arab states, although accepting the Arab policy of boycotting Israel. Lebanon has for many years allowed various Palestinian guerrilla organizations to have bases within its borders, and guerrilla raids from these bases into Israel have frequently provoked reprisals from Israel.

The presence of Palestinian guerrilla groups provided the spark which began the civil war which lasted from April 1975 to October 1976. The war began over the killing of some Muslims (mainly Palestinian) travellers. The underlying reason for the war, however, was because, although no recent census has been taken, it is generally accepted that the population balance between Christians and Muslims, which had been slightly in favour of the Christians in 1943 when the formula for the allocation of parliamentary seats and administrative posts was adopted, has shifted in favour of the Muslims, who thus feel under-represented. Also the Muslims tend to identify with the Arab world while the Christians lean towards the Western world. It was for these reasons that the war escalated from a clash between Palestinian guerrilla groups and the Maronite (Christian) militia to a full-scale confrontation between the largely conservative Christian population and the National Movement comprising leftist Muslims and Palestinian guerrilla groups. Numerous attempts at mediation were made by Arab and Western states and more than 50 cease-fires proved abortive until Arab summit meetings in Riyadh and Cairo secured a lasting cease-fire in October 1976. It has been estimated that since April 1975 between 35,000 and 50,000 people were killed and up to 100,000 injured in the fighting.

Syrian intervention played an important part in the conflict. Syrian mediation secured a temporary cease-fire in January 1976 and Syrian troops intervened from April 1976 onwards. By mid-1976 Syrian troops were committed against the Palestine guerrillas, and an Arab Peace-keeping Force, under the sponsorship of the Arab League, failed to stop the fighting. A more effective 30,000-strong Arab Deterrent Force (mainly Syrians) arrived as a result of the cease-fire in October 1976, and has succeeded in pre-

venting renewed full-scale fighting. Spasmodic fighting, however, continued in the south of the country near the Israeli border, and it was not entirely eliminated by the Shtoura Agreement of July 1977, which endeavoured to regulate the Palestinian base camps and introduce a reconstituted Lebanese army into the border area.

President Sulaiman Franjiya was succeeded by Elias Sarkis in September 1976. Throughout the civil war Rashid Karami had been Prime Minister, but he was succeeded by Dr. Selim Hoss and a government of eight technocrats in December 1976. The Chamber of Deputies gave the Government power to rule by decree for six months, subsequently extended until January 1978. Restrictions on the freedom of the Press were imposed in January 1977. Elections to the Chamber, due in April 1976, were postponed for up to 26 months and in January 1978 the term of the Chamber was further extended until June 1980. The Druze leader of the Progressive Socialist Party, Kamil Jomblatt, was assassinated in March 1977 and succeeded by his son, Walid.

Government

Legislative power is normally held by the Chamber of Deputies, with 99 members elected by universal adult suffrage for four years (subject to dissolution), using proportional representation. Seats are allocated on a religious basis (53 Christian, 45 Muslim). Executive power is vested in the President, elected for six years by the Chamber. He appoints a Prime Minister and other ministers to form a Cabinet, responsible to the Chamber. In December 1976 the Chamber gave the Cabinet power to rule by decree.

Elections to the Chamber, due in April 1976, have been postponed until June 1980.

Defence

The Lebanese army disintegrated into a number of factions during the civil war. A new army, under the command of General Victor Khoury, is now being constituted, and by November 1977 had reached a strength of 4,500—about a quarter of its former 18,000. The mandate of the 30,000-strong Arab Deterrent Force (mainly Syrians) was due to end in April 1978.

Economic Affairs

Lebanon has traditionally favoured a private enterprise economy. Many people are employed in service industries, relatively few in agriculture. The principal crops are grain, olives and citrus fruits. Lebanon is a free market and about two-thirds of trade is transit traffic, Beirut being in normal times the principal commercial and financial centre of the Middle East. The civil war severely crippled the economy and Beirut's long-term position as the commercial centre of the Middle East was under threat. Many of the foreign banks moved elsewhere and Beirut port and airport were closed. Beirut port and airport reopened soon after the civil war and many of the banks quickly returned, but, because of the lack of a permanent political settlement, there has been a reluctance to return on the part of foreign companies. It was estimated in October 1977 that of the 700,000 people who left Lebanon during the war, 350,000 had not yet returned.

Transport and Communications

There are over 400 kilometres of railway, some of it narrow gauge. Towns are connected by good roads and there is heavy traffic between Beirut and Damascus, the capital of Syria. Beirut is the principal port of call for the main shipping lines covering the eastern Mediterranean. The port of Tripoli is the terminus of an oil pipeline from Iraq, and Sidon of the pipeline from Saudi Arabia. Beirut is an important international air junction. Communications were severely disrupted by the civil war, but were restored during 1977, and there are plans to expand Beirut port.

Social Welfare

A scale of compensation for loss of employment was introduced by the State in 1963. Medical services are largely in private hands but there is a Social Security Fund which covers the medical expenses of workers. Under a national agreement, wages are paid by employers for up to 26 weeks during sickness.

Education

There is state primary and secondary education but private institutions provide the main facilities for secondary and higher education. The literacy rate of 75 per cent is the highest in the Arab world.

Tourism

Lebanon is normally a tourist centre for the Middle East. Scenic beauty, sunshine and historical sites, notably Baalbek and Byblos, are the main attractions. There are many modern hotels, and, before the civil war, about two million tourists visited the country annually.

Visas are not required to visit Lebanon by nationals of Arab League member-states.

Sport

Football, basketball, tennis, swimming, skiing, water-skiing and golf are the most popular sports.

FINANCE

100 piastres = 1 Lebanese pound (£L).

Coins: 1, 2½, 5, 10, 25 and 50 piastres.

Notes: 1, 5, 10, 25, 50 and 100 pounds.

Exchange rates (December 1977): £1 sterling = £L5.60; U.S. \$1 = £L3.06.

£L100 = £17.84 sterling = \$32.68.

Note: A basic official exchange rate of U.S. \$1 = £L3.08 was introduced in January 1956. This remained in effect until February 1973, despite the devaluation of the U.S. dollar in December 1971. The official exchange rate was £1 sterling = £L7.392 from November 1967 to August 1971; and £1 sterling = £L8.026 from December 1971 to June 1972. However, the basic rate was used only for official exchange operations and for the valuation of official assets and customs duties. All commercial transactions take place on the basis of a fluctuating free market rate, established in November 1948. Prior to February 1973 the exchange rate in the free market usually fluctuated between £L2.97 and £L3.40 per U.S. dollar, with a "low" of £L3.50 in June 1967. In February 1973, when the U.S. dollar was again devalued, the Lebanese pound appreciated considerably on the free market. At the same time a new official rate of \$1 = £L2.772 was introduced but this became inoperative in March 1973, since when official valuations have been based on an "effective" rate whose parity is adjustable from month to month. The average market rates (£L per U.S. dollar) were: 3.1568 in 1968; 3.2546 in 1969; 3.2690 in 1970; 3.2277 in 1971; 3.0507 in 1972; 2.6104 in 1973; 2.3278 in 1974; 2.3095 in 1975; 2.9037 in 1976.

THE CONSTITUTION

(Promulgated May 23rd, 1926; amended by the Constitutional Laws of 1927, 1929, 1943 and 1947.)

According to the Constitution, the Republic of the Lebanon is an independent and sovereign State, and no part of the territory may be alienated or ceded. Lebanon has no State religion. Arabic is the official language. Beirut is the capital.

All Lebanese are equal in the eyes of the law. Personal freedom and freedom of the Press are guaranteed and protected. The religious communities are entitled to maintain their own schools, provided they conform to the general requirements relating to public instruction as laid down by the State. Dwellings are inviolable; rights of ownership are protected by law. Every Lebanese citizen who has completed his twenty-first year is an elector and qualifies for the franchise.

Legislative Power

Legislative power is exercised by one house, the Chamber of Deputies, with 99 seats, 53 of which are allocated to Christians and 45 to Muslims (for full details of allocation, see Parliament, p. 782). Its members must be over 25 years of age, in possession of their full political and civil rights, and literate. They are considered representative of the whole nation, and are not bound to follow directives from their constituencies. They can be suspended only by a two-thirds majority of their fellow-members. Secret ballot was introduced in a new election law of April 1960.

The Chamber holds two sessions yearly, from the first Tuesday after March 15th to the end of May, and from the first Tuesday after October 15th to the end of the year. The normal term of the Chamber of Deputies is four years; general elections take place within sixty days before the end of this period. If the Chamber is dissolved before the end of its term, elections are held within three months of dissolution.

Voting in the Chamber is public—by acclamation, or by standing and sitting. A quorum of two-thirds and a majority vote is required for constitutional issues. The only exceptions to this occur when the Chamber becomes an electoral college, and chooses the President of the Republic, or Secretaries to the Chamber, or when the President is accused of treason or of violating the Constitution. In such cases voting is secret, and a two-thirds majority is needed.

Executive Power

The President of the Republic is elected for a term of six years, and is not immediately re-eligible. He and his ministers deal with the promulgation and execution of laws passed by the Chamber of Deputies. The Ministers and the Prime Minister are chosen by the President of the Republic. They are not necessarily members of the Chamber of Deputies, although they are responsible to it and have access to its debates. The President of the Republic must be a Maronite Christian and the Prime Minister a Sunni Muslim; and the choice of the other Ministers has to reflect the division between the communities in the Chamber.

The President himself can initiate laws. Alternatively, the President may demand an additional debate on laws already passed by the Chamber. He can adjourn the Chamber for up to a month, but not more than once in each session. In exceptional circumstances he can dissolve the Chamber and force an election. Ministers can be made to resign by a vote of no confidence.

Elections to the Chamber of Deputies, due in April 1976, were postponed for up to 26 months. In January 1978 the Chamber's term was further extended to June 1980.

In December 1976 the Chamber of Deputies gave the Government power to rule by decree for six months, subsequently extended until January 1978.

THE GOVERNMENT

HEAD OF STATE

President: ELIAS SARKIS (elected May 8th, 1976; took office September 23rd, 1976).

THE CABINET

(January 1978)

Prime Minister, Minister of Economy and Trade, and Information: Dr. SELIM HOSS (Sunni).

Deputy Prime Minister, Minister of Defence and Foreign Affairs: FUAD BUTROS (Greek Orthodox).

Minister of Interior, Housing and Co-operatives: Dr. SALAH SALMAN (Druze).

Minister of Public Health and Hydroelectric Resources: Dr. IBRAHIM SHIEITO (Shia).

Minister of Tourism, Public Works and Transport: AMIN BIZRI (Sunni).

Minister of Agriculture, Industry and Oil: MICHEL DOUMIT (Maronite).

Minister of Labour and Social Affairs, and Education: Dr. ASAAD RIZQ (Greek Catholic).

Minister of Justice, Finance, and Posts and Telecommunications: FARID RAFAEL (Maronite).

PARLIAMENT

CHAMBER OF DEPUTIES

The electoral reform bill of April 1960 maintained the existing ratio of 6 Christians to 5 Muslims in the Chamber of Deputies. It is the custom for the President of the Chamber of Deputies to be a Shi'i Muslim.

President of Chamber: KAMAL ASAAD.

Deputy President: MICHEL SASSIN.

There was a General Election in May 1972, but the diversity of allegiance in the Chamber makes a strict analysis by party groupings impossible. The distribution of seats among religious groups is laid down by law. The elections due in April 1976 were postponed for up to 26 months and in January 1978 the term of the Chamber of Deputies was further extended until June 1980.

(9) Code d'Instruction Criminelle.

The following courts are now established:

(a) Fifty-six "Single-Judge Courts", each consisting of a single judge, and dealing in the first instance with both civil and criminal cases; there are seventeen such courts at Beirut and seven at Tripoli.

(b) Eleven Courts of Appeal, each consisting of three judges, including a President and a Public Prosecutor, and

LEBANON

dealing with civil and criminal cases; there are five such courts at Beirut.

(c) Four Courts of Cassation, three dealing with civil and commercial cases and the fourth with criminal cases. A Court of Cassation, to be properly constituted, must have at least three judges, one being the President and the other two Councillors. The First Court consists of the First President of the Court of Cassation, a President and two Councillors. The other two civil courts each consist of a President and three Councillors. If the Court of Cassation reverses the judgement of a lower court it does not refer the case back but retries it itself.

First President of the Court of Cassation: EMILE ABOUK-HEIR.

Judicial System, Religion

(d) The Council of State, which deals with administrative cases. It consists of a President, Vice-President and four Councillors. A Commissioner represents the Government.

President of the Court of the Council of State: ANTOINE BAROUD.

(e) The Court of Justice, which is a special court consisting of a President and four judges, deals with matters affecting the security of the State.

In addition to the above, Islamic, Christian and Jewish religious courts deal with affairs of personal status (marriages, deaths, inheritances, etc.).

There is also a Press Tribunal.

* The 1974 figures for members of the Roman Catholic churches are based on estimates by the curias of dioceses based in the Lebanon. National and diocesan boundaries do not necessarily correspond.

It will be seen that the largest single community in the Lebanon is the Maronite, a Uniate sect of the Roman Church. The Maronites inhabited the old territory of Mount Lebanon, i.e. immediately east of Beirut. In the south, towards the Israeli frontier, Shi'i villages are most common whilst between the Shi'i and the Maronites live the Druzes (divided between the Yazbakis and the Jumblatis). The Bekaa has many Greek Christians, whilst the Tripoli area is mainly Sunni Muslim. Altogether, of all the regions of the Middle East, the Lebanon probably presents the closest juxtaposition of sects and peoples within a small territory. As Lebanese political life is organized on a sectarian basis, the Maronites also enjoy much political influence, including a predominant voice in the nomination of the President of the Republic.

THE PRESS

The most important dailies are *al-Anwar* and *an-Nahar* which have the highest circulations, *The Daily Star*, *al-Jarida* and *L'Orient-Le Jour*, the foremost French paper. The latter two are owned by Georges Naccache, former Lebanese ambassador to France, and tend to take a pro-government line. In a country where most of the élite speak French the other French daily, *Le Soir*, is also influential, and, for the same reason, the twice-weekly publication *Le Commerce du Levant* occupies an important place in the periodical Press.

The civil war hindered the operation of the Press, but even at the height of the civil war about two dozen newspapers and magazines appeared, reflecting every shade of political opinion. In January 1977, however, censorship was imposed on all publications. Some papers ceased publication, if only temporarily. Before this, Lebanon enjoyed the reputation of having one of the freest presses in the Middle East and was an important base for foreign correspondents. Some Lebanese papers have since introduced London and Paris editions.

FINANCE

(cap. = capital; p.u. = paid up; dep. = deposits; m. = million; L£ = Lebanese £; res. = reserves.)

Beirut has for long been the leading financial and commercial centre in the Middle East, as can be seen from the extensive list of banking organizations given below. However, public confidence in the banking system was strained by the closing of the Intra Bank, the largest domestic bank, late in 1966 when its liquid funds proved insufficient to cope with a run of withdrawals. The bank obtained enough guarantees to re-open in January 1968, though it is now an investment bank managed by a New York company. In 1970 the decision was taken to grant no new licences (except for medium-term lending institutions) until 1976, and foreign banks have therefore been acquiring interests in Lebanese-owned banks to establish a foothold in Beirut. The civil disturbances between April 1975 and October 1976 considerably disrupted Beirut's banking and commercial facilities. The war forced 15 of the 70 Lebanese banks and 25 foreign banks to shift their operations to Athens, Cairo and the Persian Gulf. During 1977 many of the banks which had moved returned to Beirut. By November 1977 it was estimated that banking operations had reached between 40 and 50 per cent of the pre-war level.

ADEL HAMIE; Dir.-Gen. ANTOINE BAROUKI.

ROADS

Lebanon has 7,100 km. of roads, of which 1,990 km. are main roads. Most are generally good by Middle Eastern standards. The two international motorways are the north-south coastal road and the road connecting Beirut with Damascus in Syria. Among the major roads are that crossing the Bekaa and continuing South to Bent-Jbail and the Chtaura-Baalbek road. Hard-surfaced roads connect Jezzine with Moukhtara, Bzebdine with Metn, Meyroub with Afka and Tannourine.

Automobile et Touring Club du Liban: Immeuble Fattal, rue du Port, P.O.B. 3545, Beirut.

SHIPPING

Beirut is the principal port of call for the main shipping and forwarding business of the Levant; the port was closed during the civil war, but reopened in December 1976. Tripoli, the northern Mediterranean terminus of the oil pipeline from Iraq (the other is Haifa), is also a busy port, with good equipment and facilities. Saida is still relatively unimportant as a port. Shipping was disrupted by the civil war.

There are many shipping companies and agents in Beirut.

The following are some of the largest:

LESOTHO

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Lesotho is a land-locked enclave in the Republic of South Africa. Rainfall averages about 70 cm. per year, mostly falling between October and April. The official languages are English and Sesotho. About 75 per cent of the population are Christians, mainly Roman Catholic, Lesotho Evangelical and Anglican. The national flag (proportions 3 by 2) is blue with green and red vertical stripes at the hoist, and a white Basotho hat in the centre. The capital is Maseru.

Recent History

Basutoland's progress to independence as the Kingdom of Lesotho was initiated by the Constitution of 1959 which established representative government. In 1965 Basutoland became self-governing under a new constitution, with a bi-cameral parliament and a ministerial council. Lesotho achieved independence from the United Kingdom in 1966. Following the general election in 1970, in which the opposition Congress Party claimed to have won a majority, Chief Leabua Jonathan, the Prime Minister, declared a state of emergency, suspended the constitution and arrested Ntsu Mokhehle and other leaders of the Congress Party. King Moshoeshoe II was placed under house arrest and later exiled, though he returned later that year, after accepting a government order prohibiting the monarchy from participating in politics. Most of those detained in 1970 had been released by 1972, during Chief Jonathan's declared "holiday from politics", and during 1973 there was hope of a gradual return to democracy. Political instability returned in early 1974 with the failure of an attempted coup, which was followed by the introduction of strict new security laws.

In 1974 Chief Jonathan accepted proposals to draft a new constitution, which would retain the constitutional monarchy, but he continues to rule by means of a National Assembly of Chiefs and Cabinet nominees, dominated by the National Party. However, the inclusion of two members of the Opposition in the new Cabinet formed in November 1975 indicated an attempt at political reconciliation, and in 1976 discussions were reopened with Ntsu Mokhehle and other exiled opposition leaders about a peaceful solution to the constitutional problem.

Lesotho's relations with South Africa, upon which it totally depends economically and geographically, are generally friendly despite its rejection of the apartheid policy. However, Lesotho refused to recognize the independence granted by South Africa to the Transkei "homeland" in October 1976. The consequent closing of Lesotho's border with the Transkei has been especially damaging as the mountainous terrain between Maseru and the quarter of the population who live in the south-west of the country makes communication impossible except by air. Tension was exacerbated by a South African decision to stop subsidizing exports of wheat and maize to Lesotho, and by Chief Jonathan's renewed claims to large areas of land, including the Orange Free State, in South Africa.

Lesotho has embarked on a more open foreign policy, including closer links with socialist countries such as Mozambique and the People's Republic of China. Plans to reduce the country's dependence on South Africa include a telecommunications link with Nairobi, a new international airport and a road construction programme.

Government

Lesotho is a hereditary monarchy. The King is Head of State but has no political power. In 1970 the Prime Minister declared a state of emergency, dissolved Parliament and suspended the constitution. The Cabinet, formerly responsible to Parliament, assumed full power. A National Assembly of 93 members, comprising the former Senate (22 Chiefs and 11 Senators nominated by the King) and 60 members nominated by the Cabinet, was inaugurated in 1973. Lesotho comprises nine administrative districts, each under an appointed District Commissioner.

Defence

Lesotho has no armed forces, but there is a police force of 1,500 and also a paramilitary force, the Lesotho la Khotso, of some 4,000 men drawn from Government supporters.

Economic Affairs

The economy is primarily agricultural, with about two-thirds of the G.D.P. and 85 per cent of employment provided by agriculture. The main crop is maize, though substantial amounts of wheat, sorghum, barley, peas and beans are grown. Yields are low and variable, and large quantities of food are imported, principally from South Africa. The major livestock products are wool and mohair, which are marketed for export. There is an acute land shortage and severe soil erosion due to overgrazing. Development is hampered by a complicated and archaic system of land tenure and is concentrated on five large rural schemes, largely financed from abroad. The planned Basic Agricultural Services Project is intended to improve farming practices throughout the country.

Water is an important resource and a hydro-electric scheme, using the waters of the Oxbow Gorge, is expected to come on stream in 1983, with Canadian assistance. Minerals are scarce but the Letseng-la-Terai diamond mine, in which the Government has taken a 62.5 per cent share of the profits, is expected to reach full production of 50,000 carats per year in 1978. Diamonds are already an important export. Manufacturing contributed only 3 per cent to G.D.P. in 1971/72 but has the advantages of proximity and duty-free access to the South African market and plentiful labour. The Lesotho National Development Corporation (LNDC), supplemented in 1977 by the Basotho Enterprise Development Corporation, has attracted some industry to Lesotho, especially tourism.

The economy of Lesotho is overwhelmingly dependent upon South Africa, especially for employment; about 140,000 Basotho were employed there in 1976, many in the mines. Lesotho, with Botswana and Swaziland, forms part of the customs and monetary area of South Africa,

although it became responsible for its own monetary policy and financial institutions in 1974. Its share of the customs receipts now provides over half the current revenue. In addition, the Lesotho Bank is entitled to hold 60 per cent of Basotho mine workers' wages by way of deferred payments, and these rose from R43 million in 1974 to an estimated R57 million in 1975.

The 1970-75 economic plan achieved the intended 5 per cent annual growth rate of the G.D.P. but only 5,000 of the intended 20,000 jobs were created. Lesotho's second five-year plan, for 1976-80, is based on an estimated expenditure of R112 million, over four times that of the previous one. Most emphasis will fall on agricultural and rural development, accounting for over 30 per cent of expenditure, and the finance will be raised almost totally from abroad. Closure of the Transkei border, with its attendant problems, led the UN to declare in 1977 that Lesotho needed two programmes for 1977-80: an emergency scheme to cover road and air transport and food distribution, costing R57.1 million, and an accelerated development programme costing R40.7 million. These do not supplant the five-year plan. In 1977 the LNDC announced that it intends to spend R15-20 million by 1980 to reduce the country's dependence on South Africa.

Transport and Communications

The only railway is one mile of South African Railway line at Maseru. The main road from Butha-Buthe to Quthing is 304 km. long, of which 144 km., from Leribe to Tsoaing, is tarred. There are 589 km. of minor roads. The road system is to be expanded by 1980 to deal with problems caused by closure of the Transkei border. There is an airport at Leabua and 32 airstrips throughout the country. No international airlines serve Lesotho but there is a scheduled thrice-weekly air service to Johannesburg in South Africa. There are plans to build a R9 million international airport.

Social Welfare

The Government runs eleven hospitals, including a mental hospital and a leper settlement, and 87 rural health clinics. In addition, there are eight mission hospitals. In 1974 the country had 2,114 hospital beds and 50 physicians. The service is hampered by the location of hospitals in urban areas, whereas most of the population are rurally-based. Efforts are being made to expand health education.

Education

All primary education is free, and is largely in the hands of the three main missions (Lesotho Evangelical, Roman

Catholic and Church of England) under the direction of the Ministry of Education. In 1975/76 236,000 pupils received primary and secondary education. In 1975 the Roma campus, near Maseru, of the University of Botswana, Lesotho and Swaziland was nationalized to form the National University of Lesotho. In 1966 adult illiteracy averaged 41.2 per cent (males 55.9 per cent, females 32.2 per cent), one of the lowest rates in Africa.

Tourism

Lesotho's scenic beauty, including a spectacular national park at Sehlabathebe, offers great opportunities for tourism, and the industry is being steadily developed. Two luxury hotels were being built in Maseru in 1976 and a second casino is scheduled to open in 1978; there are plans for a ski resort in the Maluti mountains and for a second national park on the Qeme plateau. There were an estimated 178,000 tourist arrivals in 1976, mostly from South Africa.

Visas are not required to visit Lesotho by nationals of Belgium, Commonwealth countries, Denmark, Finland, Greece, Iceland, Ireland, Israel, Japan, the Republic of Korea, Luxembourg, the Netherlands, Norway, San Marino, South Africa and Sweden.

Sport

Football is the national sport and tennis, athletics and netball are also popular.

Subordinate Courts. Each of the nine districts possesses the following subordinate courts: Resident Magistrate Courts, or First Class, Second Class and Third Class.

Judicial Commissioners' Courts. These deal with civil and criminal appeals from Central and Local Courts. Further appeal may be made to the High Court and finally to the Court of Appeal.

Central and Local Courts. There are 71 of these courts, of which 58 are Local Courts and 13 are Central Courts which also serve as courts of appeal from the Local Courts. They have limited jurisdiction on civil and criminal cases.

TRANSPORT

RAILWAYS

The territory is linked with the railway system of the Republic of South Africa by a short line from Maseru to Marseilles on the Bloemfontein/Natal main line.

ROADS

The main road system, 896 km., is principally confined to the western lowlands. A 144-km. stretch of the main lowland road, from Leribe in the north to Tsoaing, past Maseru, has been bitumenized and is now all-weather. Other parts of this road are being improved to an all-weather gravel surface. Many other new roads, principally in the mountains, are being constructed under self-help campaigns, and the government has given top priority to road construction. There are 589 km. of minor roads serving trading stations and Basotho villages; these are maintained by the traders and subsidized by the government. There are about 2,560 km. of bridle paths which are constructed and maintained by the Basotho Administration.

CIVIL AVIATION

LIBERIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Liberia lies on the west coast of Africa with Sierra Leone and Guinea to the north and the Ivory Coast to the east. The climate is tropical with temperatures ranging from 18°C (65°F) to 49°C (120°F). English is the official language but the 16 major ethnic groups speak their own languages and dialects. Liberia is officially a Christian state, though some Liberians hold traditional beliefs. There are about 100,000 Muslims. The national flag (proportions 19 by 10) has 11 horizontal stripes, alternately of red and white, with a navy blue square canton, containing a five-pointed white star, in the top left-hand corner. The capital is Monrovia.

Recent History

Liberia has played a leading part in African affairs and in 1961 initiated the meeting of twenty African nations in Monrovia which founded the Inter-African and Malagasy States Organization (the Monrovia Group), subsequently re-formed as Organisation Communale Africaine et Malgache—(OCAM). President Tubman, in office since 1944, died in July 1971, and was succeeded by his Vice-President, William R. Tolbert, who was re-elected in October 1975. While continuing to pursue the "open door" economic and foreign policies of his predecessor, which have led to close relations between Liberia and other West African states, as well as consolidating the alliance with the U.S.A., President Tolbert has encouraged national development along the lines of "Liberianization" and self-sufficiency. He has also reorganized the civil service and tax system, and taken measures to combat crime and corruption.

Government

The Constitution is modelled on that of the U.S.A. The bicameral legislature, elected by universal adult suffrage, comprises a Senate, with 18 members (two from each of the 9 counties) serving overlapping six-year terms, and a House of Representatives (84 members serving four-year terms). Executive power is held by the President, directly elected (with a Vice-President) for eight years. The President governs with the assistance of an appointed Cabinet. Each County is administered by an appointed Superintendent.

Defence

In 1977 the armed forces of Liberia consisted of a National Guard of 5,020 men and a paramilitary force of 1,300 men. There is a small navy for coastguard duties with 200 men and a People's Militia numbering 20,000. Military service commences at the age of sixteen. The United States provides technical assistance.

Economic Affairs

The economy is predominantly agricultural, about 90 per cent of the population living off the land. Much farming is at subsistence level, but there are plantations producing chiefly rubber, which is the principal cash crop. Other crops include cassava, rice, cocoa, coffee and palm oil. Rural development projects have been established in

Lofa and Bong Counties. Timber resources are vast and since 1967 timber production has greatly increased. The country is rich in iron ore, of which it is the largest producer in Africa. In 1977 80 per cent of Liberia's export earnings came from iron ore and diamonds.

The Mano River Union, formed in 1973, provides for close economic co-operation between Liberia and Sierra Leone. Trade between the two countries was completely liberalized at the end of 1976, and customs tariffs harmonized in 1977. Liberia is a member of the Economic Community of West African States (ECOWAS).

Liberia's economy has expanded very fast as a result of its "open door" policy to foreign investors. The Liberian-American-Swedish Minerals Company (LAMCO) has exploited the largest iron ore deposits, constructed Africa's first pelletizing plant at Buchanan, a new port at Buchanan and a 170-mile railway as part of the Nimba project which is one of the largest private enterprises in Africa. The West German Bong Mining Company has plans to open a second pelletizing plant and also to develop the vast iron ore reserves at Putu. The Government and LISCO, an international consortium, plan to develop the iron ore deposits at Wologisi, and a pelletizing plant is expected to be operational by the mid-1980s. Foreign investment in Liberia is vast, and new projects costing over \$2,000 million are expected to double iron ore production by 1985. The country's first development plan, covering the period 1976-80, aims at increasing incomes and production in the rural sector by improving the infrastructure and providing better extension services and marketing facilities for the small farmer. The Government has set up an industrial free zone in Monrovia in an attempt to develop the small manufacturing sector of the economy.

Despite the considerable economic growth rate, favourable foreign trade balance and budgetary surpluses achieved in the 1970s, the gap between the small modern and the large rural sectors has not been closed. Liberia receives foreign aid, mostly from the U.S.A. In 1977 President Tolbert announced his intention of seeking foreign loans to help in financing development projects.

Transport and Communications

There are 493 km. of railways, which are privately owned, and 7,282 km. of private and public roads. One-third of the investment under the 1976-80 Development Plan will be devoted to road construction and improvements. There are nine ports including the deep-water berths at Monrovia. A large number of vessels based in many countries are registered as belonging to the Liberian merchant fleet, which is the largest in the world. Air Liberia and foreign lines operate internal and international air services.

Social Welfare

Basic health services are limited and there is no adequate state welfare system, though progress has been achieved since 1971. A National Social Security and Welfare Cor-

puration was established in 1976 to administer pensions, sickness benefit and welfare funds, and a national social insurance scheme was under preparation in 1977. Six hospitals and health clinics have been built since 1972, bringing the total in 1975 to 39. In 1973 the country had 132 physicians. There is free care of children until the age of two. A low-cost housing scheme is under way, on which the Government had spent \$1 million by 1975.

Education

Primary and secondary education are free, and the Government provides a 50 per cent subsidy for university education. Between 1972 and 1975, 208 new schools were opened, and secondary and university student enrolment increased by over 50 per cent. In 1975 there were 1,326 schools, 190,799 students and 5,409 teachers. There are plans to almost double school enrolment by 1985 and to change the emphasis from academic to vocational training. In 1962 adult illiteracy in English averaged 91.1 per cent (males 86.1 per cent, females 95.8 per cent). In spite of the increased part played by education in national development, the literacy rate remains low.

Tourism

Tourism is slowly being developed, though communications outside Monrovia are poor and this is a major hindrance to expansion as is the scarcity of funds for tourist facilities. There were 6,000 tourists in 1976.

Visas are required by all nationalities.

Sport

Football and athletics are the most popular sports.

Public Holidays

1978: May 13th (National Rally Day), May 14th (National Unification Day), July 26th (Independence Day), August 24th (National Flag Day), November 2nd (Thanksgiving Day), November 29th (President Tubman's Birthday), December 1st (Matilda Newport Day), December 25th (Christmas Day).

THE CONSTITUTION

The Constitution is modelled on that of the United States of America. Authority is divided into the Legislative, the Executive and the Judicial.

Legislative authority is vested in a Legislature consisting of two Houses: the Senate, with 18 members, elected for a six-year term; and the House of Representatives elected for four years, consisting of 84 members.

The Executive power rests with the President, who, with the Vice-President, is elected for an eight-year term after which he can no longer stand for office, in accordance with a constitutional amendment approved in 1975.

All Liberian citizens over the age of 18 are eligible to vote.

LIBYA

(The Popular Socialist Libyan Arab Jamahiriya)

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Popular Socialist Libyan Arab Jamahiriya (Libya) extends along the Mediterranean coast of North Africa. Its neighbours are Tunisia and Algeria to the west, Niger and Chad to the south, Egypt to the east and Sudan to the south-east. The climate is dry and desert conditions prevail over most of the territory, with temperatures between 13° and 38°C (55° and 100°F). Arabic is the official language but English and Italian are used in trade. The great majority of the population are Muslims. The national flag (proportions 2 by 1) has three equal horizontal stripes of red, white and black, with an eagle emblem in gold at the centre of the white stripe. The capital is Tripoli.

Recent History

Formerly an Italian colony, Libya was conquered in 1942 by British and French troops, Cyrenaica and Tripolitania being subsequently governed by the British and Fezzan by the French. The United Kingdom of Libya was formed in 1951, following a UN Resolution of 1949. Muhammad Idris as-Sanusi, Amir of Cyrenaica, became King Idris of Libya. The country drew upon British and American aid in return for the uses of Libyan bases by Allied troops, but since the discovery of oil this has not been necessary. Libya enjoyed internal political stability and good relations with both the Arab world and the West, though oil supplies to the latter were restricted immediately after the "Six-Day War" between Israel and the Arab states in June 1967. The bloodless revolution of September 1969 brought a group of young nationalist army officers to power and deposed the aged King, then convalescing abroad. The officers established a Revolution Command Council (RCC), with Col. Muammar al-Gaddafi as Chairman, and proclaimed the Libyan Arab Republic. In June 1971 the Arab Socialist Union (ASU) was established as the country's sole political party.

Since the coup Libya has assumed a much more active role in the Arab world. Various schemes for Arab unity led to the formation in January 1972 of the Federation of Arab Republics, comprising Libya, Egypt and Syria. In 1972 Libya concluded an agreement with Egypt to merge the two countries in 1973. Neither of these unions proved effective in practice and in January 1974 Col. Gaddafi announced impending union with Tunisia, which also proved abortive.

In April 1973 Col. Gaddafi introduced a "cultural revolution", which involved the formation of people's committees and an attempt to run the country on a wholly Islamic basis. Relations with Egypt, strained when the Libya-Egypt union took place in principle rather than in fact, further deteriorated when President Sadat embarked on the October 1973 war with Israel without consulting Col. Gaddafi. Relations with Egypt have remained strained since then, with an outbreak of border fighting in July 1977. Internal problems developed in 1975, with an attempted coup against Col. Gaddafi. The General National Congress of the ASU held its first session in January 1976 and later became the General People's Congress (GPC),

which first met in November 1976. In July 1976 an attempted coup in Sudan was attributed to Libyan influence.

In March 1977 the GPC endorsed Gaddafi's plans to change the official name of the country to The Popular Socialist Libyan Arab Jamahiriya. Power was vested in the people through People's Congresses and Popular Committees. The RCC disappeared, and a General Secretariat of the GPC (with Col. Gaddafi as General Secretary) was established. The GPC elected Col. Gaddafi as President of the new state. The Council of Ministers was replaced by the General Popular Committee, with 26 members, each a Secretary of a Department. Libya objected very strongly to Sadat's peace initiative with Israel in November 1977, and Tripoli was the venue for a summit of Arab "rejectionist" states which immediately followed Sadat's visit to Jerusalem.

Government

Power is vested in the people through People's Congresses, Popular Committees, Trade Unions, Vocational Syndicates, and the General People's Congress (GPC), with its General Secretariat. The Head of State is the President, elected by the GPC. Executive power is exercised by the General Popular Committee, which comprises 26 Secretaries, each responsible for a Department. The country is divided into 10 Governorates.

Defence

Libya's armed forces totalled 29,200 in 1977. Military service is voluntary. The army, which numbered 22,000 in 1977, is equipped with British and Soviet tanks, while France has supplied jet fighters for the 4,500-strong air force. Libya's defence budget for 1976 amounted to LD 67.9 million.

Economic Affairs

Until several years after independence Libya had to rely on U.S., U.K. and UN aid to supplement a primarily subsistence agriculture with some export of livestock, hides and skins, nuts and seeds. From 1955 to 1970 prospecting for petroleum yielded increasing returns and Libya is among the major oil producers in the world. Expansion was particularly rapid owing to political stability, nearness to the Western European markets, and to the oil's freedom from sulphur which makes it especially suitable for refining. Libya now has the highest gross national product per head in Africa and oil now accounts for over 95 per cent of export earnings, although it provides employment for less than 10 per cent of the total labour force.

Libya also exports liquefied natural gas. In common with other oil-producing countries Libya has been entering into participation agreements with some of the foreign oil companies operating on her soil and in some cases has nationalized their assets. It has been in the forefront of moves to limit oil production and secure higher prices for

crude oil since 1973. World demand for oil fell in 1975 and Libyan oil exports fell by 2.4 per cent compared with 1974 and averaged 1,525,000 barrels a day. Demand picked up in 1976, however, with production averaging 1,930,000 barrels a day in 1976, an increase of 29.5 per cent compared with 1975, the largest percentage increase in the Middle East.

Transport and Communications

Good main roads run along the coast, and inland from Tripoli to Sebha, chief city of the Fezzan area. The Tripoli-Benghazi highway has been improved. The port of Tripoli is a natural deep-water harbour and those of Benghazi and Tobruk are being improved. Tripoli and Benina (for Benghazi) are international airports and Tripoli provides internal links with Benghazi and Sebha.

Social Welfare

The Government runs free health services, including two big hospitals in Benghazi and Tripoli. There is a scheme of national insurance and government servants contribute to a pension scheme.

Education

Primary education is compulsory and there are secondary schools and institutes for agricultural, technical and vocational training. In 1975/76 there were over 2,000 primary schools with over 24,000 teachers and 556,000 pupils. There are a number of foreign schools in Tripoli and Benghazi. There are universities in Tripoli and Benghazi.

Tourism

Tripoli with its beaches and clubs and its annual International Fair attracts numerous visitors, while three Roman provincial cities, Sabratha, Leptis Magna and Cyrene, have been well excavated and are of considerable interest. Inland are the historic Oases of Ghadames and Mizda.

Sport

Football is the most popular sport.

Public Holidays

1978: May 25th (Sudanese National Day), June 11th (Evacuation Day), July 23rd (National Day—Egypt), September 1st (Revolution Day), September 4th/5th (Id ul Fitr, end of Ramadan), October 7th (Evacuation Day), November 11th (Id ul Adha, Feast of the Sacrifice), December 2nd (Muslim New Year).

1979: February 10th (Mouloud, Birth of the Prophet), March 28th (Evacuation Day).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

1,000 dirhams = 1 Libyan dinar (LD).

Exchange rates (December 1977):

£1 sterling = 542.22 dirhams;

U.S. \$1 = 296.05 dirhams.

THE CONSTITUTION

The Libyan Arab People, meeting in the General People's Congress in Sebha from March 2nd to March 28th, 1977, proclaimed its adherence to freedom and its readiness to defend it on its own land and anywhere else in the world. It also announced its adherence to socialism and its commitment to achieving total Arab Unity; its adherence to the moral human values, and confirmed the march of the revolution led by Col. Muammar al-Gaddafi, the revolutionary leader, towards complete People's Authority.

The Libyan Arab People announced the following:

- (i) The official name of Libya is henceforth *The Popular Socialist Libyan Arab Jamahiriya*.
- (ii) The Holy Koran is the social code in The Popular Socialist Libyan Arab Jamahiriya.
- (iii) The Direct People's Authority is the basis for the political order in The Popular Socialist Libyan Arab Jamahiriya. The People shall practise its authority through People's Congresses, Popular Committees, Trade Unions, Vocational Syndicates, and The General People's Congress, in the presence of the law.

- (iv) The defence of our homeland is the responsibility of every citizen. The whole people shall be trained militarily and armed by general military training, the preparation of which shall be specified by the law.

The General People's Congress in its extraordinary session held in Sebha issued four decrees:

The first decree announced the establishment of The People's Authority in compliance with the resolutions and recommendations of the People's Congresses and Trade Unions.

The second decree stipulated the choice of Col. Muammar al-Gaddafi, the Revolutionary Leader, as Secretary-General of the General People's Congress.

The third decree stipulated the formation of the General Secretariat of the General People's Congress (see The Government, below).

The fourth decree stipulated the formation of the General Popular Committee which comprises 26 Secretaries to carry out the tasks of the various former ministries (see The Government, below).

GENERAL PEOPLE'S CONGRESS

The Senate and House of Representatives were dissolved after the *coup d'état* of September 1969, and the provisional constitution issued in December 1969 made no mention of elections or a return to Parliamentary procedure. However, in January 1971 Col. Gaddafi announced that a new Parliament would be appointed, not elected; no date was mentioned. All political parties other than the Arab Socialist Union were banned. In November 1975 provision was

made for the creation of the General National Congress of the Arab Socialist Union, which met officially in January 1976. This later became the General People's Congress, which met for the first time in November 1976 and in March 1977 introduced the wide-ranging changes outlined in "The Constitution" (above).

JUDICIAL SYSTEM

President of the Supreme Court: MUHAMMAD ABDULKAREEM AZZUZ.

The law of the Judicial System of 1954 established the following courts: the Federal Supreme Court, the Courts of Appeal, the Courts of First Instance and the Summary Courts. Sittings are in public, unless the court decides to hold them *in camera* in the interests of decency or public order. Judgment is in all cases given in public. The language of the courts is Arabic, but there is a translation office attached to each Court to help non-Arabic speaking parties or lawyers.

In October 1971 the Revolution Command Council decreed that all legislation should conform with the basic principles of Islamic Law and set up committees to carry this out. In April 1973 Colonel Gaddafi declared that any legislation likely to impede the progress of the revolution or to defeat public interest must be repealed.

The Supreme Court consists at present of a Chief Justice and ten justices.

Courts of Appeal exist in Tripoli, Benghazi and Misurata, consisting of a President, Vice-President and three judges; judgments must be given by three judges. Each Court of Appeal includes a Court of Assize consisting of three judges.

Courts of First Instance are set up in the provinces, consisting of a President, Vice-President and a number of judges; judgment in these courts is given by one judge.

Summary Courts, composed of one judge, exist within the territorial jurisdiction of every Court of First Instance.

The **People's Court** is a special court set up by decree in October 1969 and is particularly concerned with cases of political or administrative corruption.

RELIGION

Muslims: The Libyan Arabs practically without exception follow Sunni Muslim rites.

Chief Mufti of Libya: Sheikh TAHER AHMED AL ZAWI.

Roman Catholic Church: Apostolic Vicariates of Benghazi, Derna and Tripoli, Apostolic Prefecture of Misurata; 9 priests, 4,000 Catholics (1972).

THE PRESS

In October 1973 the Revolution Command Council decreed the nationalization of all private newspapers, which were to be handed over to the Public Press Organization.

TRANSPORT

ROADS

The most important road is the 1,822 km. national coast road from the Tunisian to the Egyptian border, passing through Tripoli and Benghazi. It has a second link between Barce and Lamluda, 141 km. long. The other national road runs from a point on the coastal road 120 km. south of Misurata through Sebha to Ghat near the Algerian border (total length 1,250 km.). There is a branch 260 km. long running from Vaddan to Sirte. There is a road crossing the desert from Sebha to the frontiers of Chad and Niger.

In addition to the national highways, the west of Libya has about 1,200 km. of black-top and macadamized roads and the east about 500 km. Practically all the towns and villages of Libya, including the desert oases, are accessible by motor vehicle, but the going is sometimes rough.

SHIPPING

Principal ports are Tripoli, Benghazi, Port Brega and the Oasis Marine Terminal at Es-Sider. Port Brega was opened to oil tankers in 1961. A 30-inch crude oil pipeline connects the Zelten oilfields with Marsa El Brega. Another pipeline joins the Sarir oilfield with Marsa Hariga, the port of Tobruk, and a pipeline from the Sarir field to Zuetina was opened in 1968. There is another oil port at Ras Lunuf. Libya also has the use of Tunisian port facilities at Sfax and Gabes, to alleviate congestion at Tripoli.

Libyan General Maritime Transport Organization: 10 Garnaia St., P.O.B. 4673, Tripoli; f. 1970 to handle all projects dealing with maritime trade.

CIVIL AVIATION

There are four civil airports: the International Airport, situated at Ben Gashir, 21 miles from Tripoli; Benina Airport, 12 miles from Benghazi; Sebha Airport; Misurata Airport (domestic flights only).

Libyan Arab Airlines: P.O.B. 2555, Tripoli; f. 1965; passenger and cargo services from Tripoli and Benghazi to London, Paris, Zürich, Frankfurt, Rome, Belgrade, Istanbul, Athens, Malta, Beirut, Damascus, Jeddah, Tunis, Algiers, Casablanca and Niamey; domestic services throughout Libya; fleet of 8 Boeing 727-2000, 8 F-27; Chair. HASSAN M. EL-CUNIALI; Deputy Chair. ABDEL GADER H. EL-THULTHY.

Libya is also served by the following foreign airlines: Aeroflot, Air Algérie, Alitalia, British Caledonian, ČSA, EgyptAir, JAT, KLM, Lufthansa, Malta Airlines, Saudia, Sudan Airways, Swissair, Syrian Arab, Tunis Air, UTA.

TOURISM

General Board of Tourism and Fairs: Tripoli; f. 1964.

Tourism is being developed in Libya, but major potential attractions include the superb Roman remains at Leptis Magna, Sabratha and Cyrene, the fine climate, mountains and hundreds of miles of unspoilt beaches.

MACAO

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Capital

Macao comprises the peninsula of Macao, an enclave on the mainland of southern China, and three nearby islands, the two Taipa islands and Colôane. It lies opposite Hong Kong on the western side of the mouth of the Sikiang river. Climate is tropical. The official language is Portuguese, but English and Cantonese are widely spoken. The predominant religions are Roman Catholicism and Chinese Buddhism. The capital, the city of Macao, is situated on the peninsula.

Recent History

Established by the Portuguese in 1557 as a trading post with China, Macao became a Portuguese Overseas Province in 1951.

After the military coup in Portugal in April 1974, Colonel José Garcia Leandro was appointed Governor of the province. A new statute promulgated in February 1976 redefined Macao as a "Special Territory" under Portuguese legislature, but with a greater measure of administrative and economic independence. The 17-seat legislature, headed by the Governor, consists of six elected members, five appointed by the Governor and six chosen by business associations. These measures have been approved by the People's Republic of China, whose Government has expressed no wish to alter the status of Macao.

Colonel Leandro has pledged himself to furthering administrative reform as well as developing industry and tourism and attempting to integrate the Portuguese and Chinese communities.

Defence

The official Portuguese garrison has been replaced by the *Comando de Forças de Segurança* (Comforseg) of 1,800 men, which consists of a paramilitary force of about 150 men and the fire brigade and police force. Military service lasts for one year and is voluntary only for Chinese residents.

Economic Affairs

The mainstays of Macao's economy are textile manufactures and tourism, but other industries, such as plastics, electronics and precision instruments, are also being introduced. The lack of an effective taxation system has exacerbated economic difficulties and the pataca was

unofficially "floated" in 1975 after a HK \$30 million loan was secured from banking groups in the province. In 1977 the pataca was linked to the Hong Kong dollar, rather than to the Portuguese escudo. Macao's own currency-issuing bank is expected to open in 1978. The provisional budget for 1977 represented 134.2 million patacas, a 31.4 per cent increase on 1976. In 1977 gambling accounted for one-third of total government income. Domestic exports increased by 67.5 per cent in 1976, giving Macao its first trade surplus for many decades. This trend continued in 1977.

Tourism

The main tourist attractions are gambling, dog-racing and the annual Macao Grand Prix. The majority of visitors travel by sea-ferry, jetfoil and hydrofoil services from Hong Kong.

Visas are required by all foreign visitors, except residents of Hong Kong, and are normally valid for two journeys.

Public Holidays

1978: May 1st (Labour Day), May 25th (Corpus Christi), June 10th (Camões Day), June 24th (St. John the Baptist, Patron Saint of Macao), August 15th (Assumption), September 17th (Mid-Autumn Festival), October 5th (Portuguese Republic Day), November 1st (All Saints' Day), November 2nd (All Souls' Day), December 1st (Restoration of Portuguese Independence, 1640), December 8th (Immaculate Conception), December 24th and 25th (Christmas).

1979: January 1st (New Year), January-February* (Chinese Lunar New Year), April 13th-16th (Easter), April 25th (Portuguese National Day).

* From the first to the third day of the first moon of the lunar calendar.

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 avos = 1 pataca.

Exchange rates (December 1977):

£1 sterling = 9.14 patacas;

U.S. \$1 = 4.99 patacas.

Notes: 5, 10, 50, 100 and 500 patacas.

Exchange rates (December 1977): £1 sterling = 9.14 patacas; U.S. \$1 = 4.99 patacas.

100 patacas = £10.94 = \$20.04.

Note: From January 1968 to February 1973 the pataca was valued at 4.80 Portuguese escudos. The exchange rate was U.S. \$1 = 5.990 patacas from January 1968 to August 1971; and \$1 = 5.677 patacas from December 1971 to February 1973. In terms of sterling, the rate was £1 = 14.375 patacas from January 1968 to August 1971; and £1 = 14.793 patacas from December 1971 to June 1972. From February 1973 to April 1977 the official exchange rate was 1 pataca = 5.00 escudos but the pataca's value in terms of most other currencies was fixed in relation to its rate against the Hong Kong dollar, which was frequently adjusted. In April 1977 the link with the escudo was ended and a new parity of H.K. \$1 = 1.075 patacas was established. Exchange rates against other currencies are determined by reference to rates against the Hong Kong dollar, which also circulates freely in Macao.

THE CONSTITUTION

The constitution of Macao is embodied in an organic statute of Portugal promulgated in February 1976.

Macao, comprising the town of Nome de Deus de Macau (God's Name of Macao) and the Taipa and Colôane islands, has administrative, economical, financial and legislative autonomy.

The sovereign organs of Portugal, except the Law Courts, are represented in the territory by the Governor. In foreign relations and international agreements or conventions, Macao is represented by the President of Portugal who may delegate to the Governor if the matters concern the territory only.

The judicial power is independent and it is regulated by legislation enacted in Portugal.

The Governor

The Governor is nominated after the local population is consulted and dismissed by the President of Portugal to whom he is responsible politically. He has a rank similar to a Minister of Government in Portugal.

The Secretaries-Adjunct

The Secretaries-Adjunct, up to five in number, are nominated and dismissed by the President of Portugal on the Governor's proposal. Each has a rank similar to a Secretary of State of Government in Portugal.

They exercise the executive powers which have been delegated by the Governor.

The Superior Council of Security

The Superior Council of Security works in conjunction with the Governor who presides over it. It comprises the Secretaries-Adjunct, the Commander, Second-Commander and Chief of General Staff of the Security Forces, and three deputies elected by the Legislative Assembly. Its duties are to settle and to co-ordinate directives relating to the security of the territory.

The Legislative Assembly

The Legislative Assembly comprises 17 deputies with a

mandate of three years. Five deputies are appointed by the Governor from among residents of recognized reputation, six are elected by direct and universal suffrage and six elected by indirect suffrage.

The President of Portugal can dissolve the Assembly in the public interest on the Governor's recommendation.

The Consultative Council

The Consultative Council is presided over by the Governor and has five elected members (two elected by the members of the administrative bodies and from among them, one by organizations representing moral, cultural and welfare interests, and two by associations with economic interests; three statutory members (the Secretary-Adjunct for the Civil Administration Services, the Attorney of the Republic and the Chief of Finance Services); and two members nominated by the Governor.

Judicial System

Ordinary justice is administered directly from Portugal.

Under the superintendence of the Attorney of Portugal are the Delegate of the Attorney of the Republic, the Delegation of the Attorneyship of the Republic, the Services of Registries and of Notarial Affairs, the Judiciary Police, and the Cabinet of the Government's Juridical Consultation.

Finance

Macao draws up its own budget, which is annual and unitary.

The issuing bank of Macao will be the Government's banker of the territory.

The annual public accounts of the territory must be submitted to the judgment of the Administrative Law Court.

Public Services

The public services of Macao are private organizations and they can constitute autonomous entities, with or without juridical personality.

MADAGASCAR

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Democratic Republic of Madagascar comprises one large island and several much smaller ones in the western Indian Ocean, about 500 km. off the coast of Mozambique. The climate is tropical. The northern parts of the island receive monsoon rains from December to April but the rest of the country is fairly dry. The official languages are Malagasy and French. Hova and other dialects are widely spoken. About half the population follow animist beliefs, Christians constitute about 40 per cent and the remainder are Muslims. The national flag (proportions 3 by 2) has a vertical white stripe (one-third of the length) at the hoist and horizontal stripes of red and green. The capital is Antananarivo (formerly Tananarive).

Recent History

Formerly a French colony, Madagascar became an autonomous state within the French Community in October 1958, as the Malagasy Republic. In May 1959 Philibert Tsiranana, leader of the *Parti social démocrate* (PSD), was elected President. The country achieved full independence on June 26th, 1960. Before independence France encouraged the PSD, identified with the majority coastal tribes (*côtiens*), as an alternative to the more nationalistic highland people, the Merina, the traditional ruling group in the island. Conflict between these two groups underlies the island's recent history.

Tsiranana maintained close relations with France after independence and his party won large majorities in elections. After 1967 the economy declined and there was growing opposition to the Government's authoritarianism and subservience to French interests. In May 1972, after three days of violence, President Tsiranana handed over full powers to his Chief of Staff, Major-Gen. Gabriel Ramanantsoa.

During 1972 Gen. Ramanantsoa reasserted order and initiated reform. By reforming taxation and introducing austerity measures he won popular support, and by placing members of the armed forces in key government posts he ensured obedience. There was a drive to "Madagasize" education and industry, and a re-orientation of foreign policy was begun in which co-operative agreements with France were re-negotiated. Under the Minister of the Interior, Col. Richard Ratsimandrava, the traditional rural assemblies of the Merina, the *fokonolona*, were revived and expanded to replace the French administration. All these reforms increased the control exercised by the Merina over the Government and economy.

In the summer of 1972, free expression of political views was allowed though parties were not represented in the Government. In October a referendum gave Gen. Ramanantsoa a mandate to rule for five years, abolished existing institutions and set 1977 as the year for a constitutional referendum and national elections, a plan carried out despite the changes of government in the interval.

Ramanantsoa's rule, however, was confused and uncertain. Opposition came from extreme left elements, suppor-

ters of ex-President Tsiranana and *côtiens* who resented the domination of the new government by Merinas. The economy declined and there was widespread discontent caused by inflation, unemployment and food shortages. Though the elections to the People's National Development Council in October 1973 provided a great victory for pro-government parties, the economic situation continued to worsen during 1974. On December 31st, rebellious security forces attempted a coup and precipitated a crisis within the Government. On February 5th, 1975, Gen. Ramanantsoa handed over full power to Col. Ratsimandrava. Six days later, however, the new Head of State was assassinated. On February 12th Brig.-Gen. Gilles Andriamahazo assumed power at the head of a military directorate and imposed martial law. The rebel security forces were swiftly subdued. All political parties were suspended and some of their leaders arrested, including ex-President Tsiranana. Over 300 people were subsequently brought to trial, but only three were found guilty. The rest, including Tsiranana and the other party leaders were released.

In June 1975, when the trials ended, the military directorate resigned after electing Lt.-Cdr. Didier Ratsiraka to be Head of State as Chairman of the Supreme Revolutionary Council (SRC). In a referendum in December, 94 per cent of voters approved a new constitution, a Socialist Revolutionary Charter (the "Little Red Book") formulated by Ratsiraka, and the appointment of Ratsiraka as President of the Republic for seven years. The Charter formulated the policy of expanding the *fokonolona* in order to carry out administrative and agrarian reforms in accordance with its radical socialist ideology. The constitution altered the country's name to the Democratic Republic of Madagascar.

In January 1976 the Government and judicial institutions were reformed. Colonel Joël Rakotomalala was appointed Prime Minister but the civilian element in the Government was increased and representatives of different regions and parties were included in the power structure. In March the Vanguard of the Malagasy Revolution (AREMA) was founded and order re-established. In July, however, the death of Rakotomalala precipitated a series of conflicts which were halted only by the achievement of AREMA domination. The new cabinet, formed in August under Justin Rakotonjaina, of civilians committed to a more militant socialism provoked the opposition of the bourgeoisie and the impatience of the radicals. To bolster itself against criticism, the Government began to organize AREMA cells throughout the country, greatly alarming the other parties. Elections held at all levels from March to June 1977 resulted in overwhelming victories for AREMA. After the elections to the *fokonolona* and the Provincial Councils the left-wing MONIMA withdrew from the elections and the Government. The *Front National pour la Défense de la Révolution Socialiste Malgache*, of which AREMA is the nucleus, presented the sole list of candidates for election to the new National People's Assembly. Rakotonjaina resigned in July and a new Council of Ministers was formed under Lt.-Col. Désiré

Rakotoarijaona; new appointments were made to the SRC which was extended to include leaders of the former political parties, in an attempt to restore political equilibrium.

Government

According to the Constitution of December 1975, the supreme legislative authority is the National People's Assembly, with 137 members elected by universal suffrage for a five-year term. The Head of State is a President elected for seven years by universal adult suffrage. The President is Chairman of a Supreme Revolutionary Council. The members of the Council are chosen by the President, one-third of them from a list presented by the National People's Assembly. The President appoints a Prime Minister and endorses his choice of ministers. A single ruling party has been created. The *fokonolona*, traditional community units which have been introduced as the basis of local government since 1973, are to grow in importance.

Defence

In 1977 total armed forces numbered 10,150 men; army 9,550, navy 250 and air force 350. There is a paramilitary gendarmerie of 7,000.

Economic Affairs

The economy is principally agricultural with the great majority of the population living on the land. Agricultural produce is mainly for subsistence but also forms the bulk of exports, the most important of which is coffee, followed by cloves and clove oil, vanilla, rice and sugar. Tobacco, pepper and bananas are also grown for export. Large herds of cattle are maintained but contribute little to the economy. There are extensive mineral deposits including graphite, mica, nickel and copper, but only limited commercial exploitation. Since 1969 chromite deposits at Andriamena have been mined, and in 1975 over 80,000 tons of chromium ore were extracted. In 1971 bauxite was found in the south and a company set up to mine it. The oil refinery at Tamatave, which is based on imported petroleum, has contributed significantly to exports since 1967. Industry is confined largely to processing agricultural produce.

The economy has long been dominated by foreign business interests but since 1972 successive governments have extended state control of essential sectors and imposed strict controls on the operation of foreign-owned enterprises. Since mid-1975 Ratsiraka's government has nationalized the banking and insurance sectors and has taken control of the major industrial and commercial organizations. There has been a serious drop in private investment from abroad since 1972, but aid from foreign government sources enables the economy to survive. Madagascar withdrew from the Franc Zone in 1973 but France continued to support the Malagasy currency. Both the balance of payments and the budget show a considerable deficit. There have been serious shortages, especially of rice, the basic food on the island. Agricultural reform is a priority of the 1974-77 development plan and there are signs that redistribution of land is beginning to increase production. The annual population growth rate of 3 per cent exacerbates the difficulties of the economy. However, inflation was reduced from 22 per cent in 1974 to 6.6 per cent in the year ending September 1976 and to only 2.8 per cent in the following 12 months.

Transport and Communications

The terrain is difficult and transport is not well developed. There are 884 km. of railway, mainly single track and narrow gauge. Of the 27,500 km. of roads and tracks, most can be used only in dry weather. Most of the west coast rivers are navigable for about 160 km., and on the east coast the Pangalanes canal follows the coast from Tamatave to Farafungana. The chief ports are Tamatave, Majunga and Diégo-Suarez. The international airport is at Ivato, near Antananarivo, and there is an extensive internal airways network which provides the main means of travel, especially in the wet season.

Social Welfare

All medical services are free and there are family allowances as well as benefits for industrial accidents and occupational diseases. Much welfare is offered by Christian missions. In 1973 the country had 19,781 hospital beds and 687 physicians.

Education

Madagascar has both public and private schools. Efforts are being made to increase the number of schools and the primary schools can now accommodate over half the children. There is one university. The education system is being remodelled to suit local conditions and needs. Since 1976 five years' education has been officially compulsory.

Tourism

Plans have been prepared to develop tourism and it was hoped to increase the number of tourists from 6,000 in 1968 to 20,000 in 1973, but this has proved over-optimistic.

Visas are not required to visit Madagascar by nationals of France.

Sport

The most popular sports are football, rugby, basketball and swimming. Athletics, tennis, golf and volleyball also have their followings.

FINANCE

100 centimes=1 franc malgache (Malagasy franc).

Coins: 1, 2, 5, 10 and 20 francs MG.

Notes: 50, 100, 500, 1,000 and 5,000 francs MG.

Exchange rates (December 1977): 1 franc MG=2 French centimes; £1 sterling=442.2 francs MG;

U.S. \$1=241.4 francs MG.

1,000 francs MG=£2.26=\$4.14.

Note: Between December 1958 and August 1969 the value of the Malagasy franc was 3.6 milligrammes of gold, equal to 0.4051 U.S. cent (U.S. \$1=246.853 Malagasy francs). Since January 1960 the Malagasy franc has been equivalent to 2 French centimes (1 French franc=50 Malagasy francs). In August 1969 the Malagasy franc was devalued (in line with the French franc) to 3.2 milligrammes of gold, the exchange rate being 1 Malagasy franc=0.3601 U.S. cent (\$1=277.71 Malagasy francs) until August 1971. From December 1971 to February 1973 the official rate was 1 Malagasy franc=0.3909 U.S. cent (\$1=255.785 Malagasy francs). Since March 1973 the French authorities have ceased to maintain the franc-dollar rate within previously agreed margins. As a result, the value of the Malagasy franc has fluctuated on foreign exchange markets in line with the French franc. The average market rates (Malagasy francs per U.S. dollar) were: 252.2 in 1972; 222.7 in 1973; 240.5 in 1974; 214.3 in 1975; 239.0 in 1976. In terms of sterling, the central exchange rate between August 1969 and June 1972 was £1=666.503 Malagasy francs (1 Malagasy franc=0.15004p).

THE CONSTITUTION

According to the constitution endorsed by referendum on December 21st, 1975, Madagascar's institutions are as follows:

The President of the Republic, elected for seven years by universal suffrage;

The Supreme Revolutionary Council (SRC), "the guardian of the Malagasy Socialist Revolution". The President of the Republic is Chairman by automatic right of the SRC, of which he names two-thirds of the members. He chooses the other members from a list presented by the National People's Assembly.

The National People's Assembly, whose deputies are elected for five years by universal suffrage. It holds two ordinary sessions a year;

The Government, responsible to the President of the Republic, who names the Prime Minister and endorses the Premier's choice of Ministers. The Prime Minister is automatically a member of the SRC;

The Military Development Committee, a consultative organ whose endorsement is essential for any national defence programme or programme of social and economic development;

The Constitutional High Court, seven members, with a renewable five-year mandate.

Local government is entrusted to six Provincial Councils and 11,000 *fokonolona*, traditional small communities.

The ideology of the state is socialist, as expressed in the Malagasy Socialist Revolutionary Charter.

MALAWI

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Malawi lies in southern central Africa, with Zambia to the west, Mozambique to the south and east, and Tanzania to the north. Lake Malawi forms most of the eastern boundary. The climate is tropical, but much of the country is high enough to modify the heat. The official language is English, though Chichewa is being promoted as the basis for a "Malawi Language". Most Africans follow traditional beliefs. There are about 10 per cent Protestants and 10 per cent Roman Catholics, and there is a Muslim community among the Asians, as well as a Hindu minority. The national flag (proportions 3 by 2) has black, red and green horizontal stripes, with a rising sun in red on the black stripe. The capital is Lilongwe.

Recent History

Malawi was formerly the British protectorate of Nyasaland. In 1953 it was linked with two other British dependencies, Northern and Southern Rhodesia, to form the Federation of Rhodesia and Nyasaland. Elections in August 1961 gave the Malawi Congress Party (MCP), led by Dr. Hastings Kamuzu Banda, a majority on the Legislative Council. The MCP campaigned for independence and secession from the Federation. Dr. Banda became Prime Minister in February 1963 and the Federation was dissolved in December. Nyasaland became independent, as Malawi, in July 1964. Two years later the country became a republic, and a one-party state, with Dr. Banda as the first President. In 1967 Malawi created a major controversy amongst African states by officially recognizing the Republic of South Africa and this recognition has continued to draw much criticism from leaders of other African states. In 1971 Dr. Banda became Life President of Malawi and the first African head of state to visit South Africa. In 1976, however, Malawi recognized the communist-backed MPLA Government in Angola and refused to recognize the independence granted by South Africa to the Transkei "homeland".

Malawi, both economically and militarily, lies in the South African sphere of influence although recruitment of Malawi citizens to work in South African mines was banned between 1974 and 1977. Malawi has an extradition agreement with South Africa, which has also supplied Malawi with arms. Relations with its neighbours, Zambia and Tanzania, have been strained for some years though in 1975 Dr. Banda made his first official visit to Zambia. Dr. Banda rules the country firmly and tolerates no political opposition. A number of dissident elements have been indefinitely detained. These include several thousand Jehovah's Witnesses who have been persecuted and detained since 1972 for refusing to join the MCP. In February 1977 Albert Muwalo Nqumayo, a former minister without portfolio, and Focus Martin Gwede, a former head of the police special branch, were found guilty of treason. In July the Cabinet was completely reshuffled. In November it was reported that many political prisoners had been released and foreign journalists were invited to visit Malawi after being banned for many years.

Government

Malawi is a republic with an elected President whose

term of office is normally five years, though Dr. Banda is now President for life. Executive power is vested in the President and legislative power in the unicameral National Assembly. The Assembly has 87 members elected for five years and up to 15 additional members nominated by the President. The country is divided into three Regions and 24 Districts.

Defence

Malawi's defence forces number 2,300 men. All services form part of the army. There is also a national police force totalling about 3,000 men.

Economic Affairs

Malawi has few resources, and agriculture, which employs 90 per cent of the population, mostly at subsistence level, is the mainstay of the economy. The principal cash crops are tea and tobacco (which account for over 60 per cent of export receipts), sugar, cotton, groundnuts and maize. Despite a doubling of the maize crop in 1976, agricultural production, particularly on smallholdings, has been disappointing in recent years. There are a number of integrated rural development projects including the Lilongwe Land Development Programme, begun in 1968, which aims to transform 1,000,000 acres (4,000 sq. km.) into an agricultural and social base for 500,000 people. The Dwangwa Sugar Corporation intends to double annual sugar production to 135,000 tons by 1978.

The economy is hampered by a consistently adverse balance of trade. The lack of mineral wealth is a severely limiting factor although the manufacturing sector has made considerable progress since independence, helped by a favourable political and economic climate for foreign investment. By 1975 manufacturing contributed 14 per cent of G.D.P. and construction a further 6.5 per cent, but the former has since declined although the latter remains buoyant, largely because of the building of the new capital and airport at Lilongwe. Trade is mainly with the United Kingdom, South Africa and Rhodesia, with the United Kingdom accounting for by far the largest share of exports.

Malawi's traditional trade deficit has increased since 1974/75 because of international recession and inflation. G.D.P. has continued to grow—by 5 per cent in 1976—but only at the cost of substantial inroads into external reserves, which declined from a peak of more than U.S. \$80 million in 1974 to U.S. \$21.4 million by January 1977, and an increase in borrowing from abroad. The fall in foreign investment, despite Malawi's reputation as an efficient user of aid, will be a major constraint on development.

Transport and Communications

There are 566 km. of railways in Malawi, which are linked at two points to those of Mozambique, and there are plans for the construction of a line from the capital to the Zambian border. A 120-km. line from Lilongwe to Salima is under construction, with Canadian assistance, and the line from Salima to Balaka is being reconstructed. There are about 2,000 miles (3,200 km.) of trunk roads. As well as Air Malawi there are air charter firms. Since Rhodesia's declaration of independence, Blantyre has become a focal

point for regional air services in southern Africa. In 1977 construction of a new international airport at Lilongwe began.

Social Welfare

A social development agency, now part of the Ministry of Labour, was set up in 1958. Its work includes care and protection of young people, the destitute, and the physically handicapped, probation work, sport, community centres and women's clubs. In 1969 Malawi had 114 physicians and in 1970 there were 6,951 hospital beds. The Ministry of Community Development and of Social Welfare, created in 1972, initiates and expands welfare projects. Hospitals and health facilities are to be extended under a 15-year plan compiled by the Ministry of Health.

Education

In 1975/76 there were over 641,000 African children receiving primary education and over 14,000 receiving secondary education, provided in government and government-aided schools. The University of Malawi has more than 1,200 students. Many students go to the United Kingdom and the U.S.A. In 1966 adult illiteracy averaged 77.9 per cent (males 66.2 per cent, females 87.7 per cent). In 1975 Malawi began a five-year education project to build 22 primary schools, 22 rural education centres and a teachers' training college.

Tourism

The country has a small but growing tourist industry. Big game, fine scenery and an excellent climate form the basis of the country's tourist potential.

Visas are not required to visit Malawi by nationals of EEC countries (except France), Finland, Iceland, Israel (diplomatic and military only), Madagascar, Norway, Portugal, Rhodesia, San Marino, South Africa, Sweden, Commonwealth countries and United States of America (for duration of six months).

Public Holidays

1978: May 14th (Kamuzu Day, birthday of President Banda), July 6th (Republic Day), August 7th (Bank Holiday), October 17th (Mothers' Day), December 25th-26th (Christmas and Boxing Day).

1979: January 1st (New Year's Day), March 3rd (Martyrs' Day), April 13th-16th (Easter).

Weights and Measures

The imperial system is in use.

Currency and Exchange Rates

100 tambala = 1 kwacha (K).

Exchange rates (December 1977):

£1 sterling = 1.571 kwacha;

U.S. \$1 = 85.8 tambala.

FINANCE

100 tambala = 1 Malawi kwacha (K).

Coins: 1, 2, 5, 10 and 20 tambala.

Notes: 50 tambala; 1, 5 and 10 kwacha.

Exchange rates (December 1977): £1 sterling = 1.571 kwacha; U.S. \$1 = 85.8 tambala.

100 Malawi kwacha = £63.66 = \$116.60.

Note: The Malawi kwacha was introduced in February 1971, replacing the Malawi pound (at par with the pound sterling) at the rate of £1 = 2 kwacha. From November 1967 the exchange rate was £1 = U.S. \$2.40, so the initial value of the kwacha was \$1.20 (\$1 = 83.33 tambala). This valuation remained in force until August 1971. The exchange rate was 1 kwacha = \$1.303 (\$1 = 76.75 tambala) from December 1971 to June 1972, when the kwacha began "floating" with the pound sterling. The fixed rate of £1 sterling = 2 kwacha remained effective until November 1973. From November 1973 to June 1975 the value of the kwacha was determined independently on the basis of movements of sterling and the U.S. dollar in exchange markets. Since June 1975 the kwacha has been valued in terms of the IMF Special Drawing Right (based on a weighted "basket" of 16 national currencies), with a mid-point rate of 1 SDR = 1.054 kwacha, while the exchange rate against the U.S. dollar continues to be adjusted from month to month. The average exchange rate (kwacha per U.S. dollar) was: 0.807 in 1972; 0.816 in 1973; 0.840 in 1974; 0.866 in 1975; 0.913 in 1976.

THE CONSTITUTION

A new Constitution was introduced in 1966. Malawi is a one-party state with a Presidential form of government. There is a unicameral parliament of 87 elected members and up to 15 members nominated by the President.

Fundamental Rights

Fundamental rights are guaranteed by the Constitution.

The President

The President is both Head of State and Head of Government. He has the right to participate in parliamentary debates and may refuse his assent to any Bill; if the Bill is passed again within six months he must either assent or dissolve Parliament and thus submit himself to an election. However, in 1971 Dr. H. Kamuzu Banda was appointed President for life. The Chief Justice is appointed by the President, as are senior civil servants and members of the armed forces. The President may proclaim a state of emergency. On the death of a President, the functions of

that office will be performed by a Presidential Council comprising the Secretary-General of the Malawi Congress Party, as Chairman, and two Cabinet Ministers.

Parliament

There is a Parliament, consisting of the President and the National Assembly. The National Assembly has 87 elected members and up to 15 members nominated by the President. A Speaker is elected from among the ordinary members of the Assembly. The Assembly may change the Constitution by a two-thirds majority on the second and third readings. All members must belong to the Malawi Congress Party. The Parliamentary term is normally five years. The President has power to prorogue or dissolve Parliament.

Executive Powers

Executive power is exercised by the President acting as Prime Minister. Ministers are responsible to the President.

THE GOVERNMENT**HEAD OF STATE**

JUDICIAL SYSTEM

The Courts administering justice are the Supreme Court of Appeal, High Court, Magistrates' Courts and Traditional Courts.

The High Court consists of the Chief Justice and three Puisne Judges. The High Court has unlimited jurisdiction in civil and criminal matters. Traditional Courts established under the Laws of Malawi exercise civil and criminal jurisdiction over cases and charges involving Africans and, in other cases, non-Africans. Appeals lie to the District Traditional Appeal Courts and then to the National Appeal Court. Regional Traditional Courts are criminal courts of first instance and have no appellate jurisdiction. They hear only cases involving Africans, including cases of homicide and treason. Appeals from Regional Traditional Courts lie as of right to the National Traditional Appeal Court. Appeals from the High Court go to the Supreme Court of Appeal in Blantyre.

Secretary for Justice and Attorney-General: F. L. MAKUTA.

Chief Justice: The Hon. JAMES JOHN SKINNER.

Malawi Railways Ltd. and the Central Africa Railway Co. Ltd., its wholly-owned subsidiary, operate between Nsanje and Salima and between Nkaya and Nayuci on the eastern border with Mozambique, covering a total of 566 km. The two railways and the Trans-Zambesia Railway Co. Ltd. and Mozambique Railways form the links from the Mozambique ports of Beira and Nacala to Malawi and countries to the west. Construction has commenced on an extension from Salima to Lilongwe, and an additional line from Lilongwe to the Zambian border is due to be completed by 1978.

The line has a rail/lake interchange station at Chipoka on Lake Malawi from where Malawi Railways vessels operate services to other lake ports in Malawi.

Malawi Railways also operate a local collection and delivery road service in Blantyre and co-ordinated trunk road haulage throughout the country.

ROADS

The total road mileage in 1976 was 6,823 miles of which 977 miles are bitumenized. The road system runs from the Salisbury-Blantyre road east and then north through Blantyre, Lilongwe and Mzimba to join Tanzania and Zambia at Tunduma. Other important roads link this north-south route with the railway and Lake Malawi in the east, and Zambia and Mozambique in the west. A 300-mile highway along the edge of Lake Malawi, the "Kamuzu Highway", is under construction. All main, and most secondary roads, are all-weather roads.

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The federation of Malaysia consists of the 11 States of Peninsular Malaysia in the southern part of the Kra peninsula, with Thailand to the north and the island of Singapore to the south, and the States of Sabah and Sarawak on the north of the island of Kalimantan (Borneo), bordering Indonesia. The climate is tropical, with uniformly high temperatures and rain in all seasons. The official language is *Bahasa Malaysia*, based on Malay, but English is widely used. Islam is the established religion, practised by all Malays; most of the Chinese community follow Buddhism, Confucianism and Taoism, the Indians are predominantly Hindu; there is a minority of Christians among all races, and animism is practised, particularly in Sabah and Sarawak. Malaysia's national flag (proportions 2 by 1) has 14 horizontal stripes, alternating red and white, with a blue canton containing a yellow crescent and star. The capital is Kuala Lumpur.

Recent History

In 1948 the Federation of Malaya was created under British protection. In the same year an armed Communist revolt broke out and was not completely suppressed until 1960. In August 1957 Malaya became independent.

Malaysia was established on September 16th, 1963, through the union of the independent Federation of Malaya, the internally self-governing state of Singapore, and the former British colonies of Sarawak and Sabah (North Borneo). Singapore left the federation in August 1965. The States of Malaya were designated West Malaysia in 1966 and later styled Peninsular Malaysia. Malaysia is a member of the Colombo Plan and the Association of South-East Asian Nations (ASEAN).

The general elections held in 1969 were followed by serious inter-communal rioting, engendered by Chinese discontent with the increasingly Malay-dominated government and Malay resentment of the economic dominance of the Chinese community. The rioting precipitated the resignation, in September 1970, of Tunku Abdul Rahman, Prime Minister since independence. The new Prime Minister, Tun Abdul Razak, widened the Government coalition to create a ten-party National Front, which absorbed most of the former opposition parties. Racial tension was reduced, though not eradicated, by the government policy of increasing Malay participation in commerce and industry while, at the same time, improving the political rights of the Chinese community. In the 1974 general elections the National Front gained an overwhelming majority in Parliament and retained control of all 13 state assemblies. In January 1976 the Prime Minister, Tun Abdul Razak, died and was succeeded by the Deputy Prime Minister, Datuk Hussein bin Onn.

In 1975 political stability was threatened by the resurgence of the communist guerrilla movement in Peninsular Malaysia. A number of emergency regulations were introduced but the Government was unable to prevent continuing terrorist attacks during 1976 and 1977.

In October 1977 the expulsion of the Chief Minister of Kelantan from the dominant Pan-Malaya Islamic Party

(PMIP) resulted in violent political disturbances in the State and the declaration of a state of emergency by the Federal Government. Direct rule was imposed, provoking the resignation of all but one of the PMIP members in the Cabinet and leading to the expulsion of the party from the National Front at the end of December. A major cabinet reshuffle followed.

Since 1971 the Government has moved away from its previous pro-Western, anti-Communist stance in international affairs, adopting a more neutral line and establishing diplomatic relations with its Communist neighbours. However, during 1976 the Government adopted a harder line against internal communism, launching a campaign to eliminate communist influence in politics and the media. During 1977 the Malaysian and Thai Governments co-operated in military action against communist insurgency in the border regions. Relations with the Philippines improved markedly in 1977 with the surrender by President Marcos of the Philippines' long-standing claim to Sabah.

The Government

Malaysia is a federation of 13 states. The capital, Kuala Lumpur, is a separate Federal Territory. The Supreme Head of Malaysia is a monarch, elected for a five-year term from the hereditary Rulers of nine of the states. The monarch acts on the advice of Parliament and a Cabinet. Parliament consists of the Dewan Negara (Senate) and the Dewan Rakyat (House of Representatives). The Senate has 58 members, including 32 appointed by the Head of State and 26 elected by State Legislative Assemblies (two from each). The House of Representatives consists of 154 members elected for five years by universal adult suffrage, 114 from Peninsular Malaysia, 24 from Sarawak and 16 from Sabah. The Head of State appoints the Prime Minister and, on the latter's recommendation, other Ministers. The Cabinet is responsible to Parliament.

Defence

In 1977 the armed forces totalled 64,000: army 52,500, navy 5,500, and air force 6,000. The Five-Power Defence Arrangement for joint consultations between Malaysia, New Zealand, Australia and the United Kingdom established a token Commonwealth force in Malaysia. Estimated defence spending for 1977 totalled 1,350 million ringgits.

Economic Affairs

The economy is based on the export earnings of a narrow range of products, in which rubber, tin, palm oil, timber and petroleum predominate. Malaysia is the world's leading producer of natural rubber. The rubber industry provided about 23 per cent of total export earnings in 1976, and is the chief employer of labour in Malaysia, as well as the largest single source of government revenue. In 1976 earnings from palm oil amounted to M\$1,220 million, about 9 per cent of total export earnings. Malaysia is also the world's major producer of tin, producing 62,399 tons of tin concentrate in 1976. Tin is mined exclusively in Peninsular Malaysia and is sold mainly to the U.S.A. Malaysia's other major export is timber and export earnings from logs and timber rose by over 50 per cent in 1976

to reach M\$2,359 million. Petroleum production has risen rapidly from 100,000 barrels per day in 1975 to 180,000 in 1976, and is now one of Malaysia's major exports. Malaysia produces 85 per cent of its rice requirements.

In 1974 the world prices of rubber and timber fell significantly and, while these recovered only slightly in 1975, the fall was in some way offset by the improvement in earnings from petroleum and palm oil exports, and by the fact that the price of tin remained relatively high. In 1976 prices of all Malaysia's major export commodities rose, contributing to a trade surplus of M\$3,721 million.

The Third Malaysia Plan (1976-80) aims to achieve an annual real growth rate of 8.5 per cent, compared with 7.4 per cent under the Second Malaysia Plan. It is hoped to keep price inflation down to 5 per cent a year and to reduce unemployment from 7 per cent to 6.1 per cent over the plan period.

In 1976 the G.N.P. grew by over 11 per cent in real terms, compared with 2.2 per cent in 1975. However, in 1977 the rate was expected to be about 8 per cent. The manufacturing sector maintained its position as the fastest growing sector of the economy in 1975, accounting for nearly 15 per cent of G.D.P., and expanded by 20 per cent in 1976. In 1977 the manufacturing sector achieved an estimated growth of 14 per cent, the agriculture and mining sectors 2.2 per cent, and the construction sector 12 per cent. The 1976-80 Plan aims to achieve a total investment of M\$47,100 million but by 1977 private sector investment had fallen below Plan targets. However, measures taken in 1977 were designed to overcome this problem.

Transport and Communications

Communications within Peninsular Malaysia are excellent and there are frequent services by air and sea between Peninsular Malaysia and Sarawak and Sabah. In Peninsular Malaysia there were 11,308 km. of roads in 1975, including 9,606 km. of main roads. In 1977 a M\$1,000 million road and bridge improvement programme was announced. The state-owned Malayan Railway had a total length of 1,659 km. in 1974. The country has a network of airfields and five major international airports.

Social Welfare

Social welfare comes under the two Malaysian Ministries of Health and of Welfare Services. Employers and employees contribute to the Employees' Provident Fund for retirement benefits. The independent Social Welfare Lotteries Board contributes large sums to welfare schemes. Government-sponsored social work among the aged and disabled is supported by many voluntary societies. Under the Third Malaysia Plan (1976-80), M\$1,044 million has been allocated to social and community services.

Education

Total school enrolment in 1975 was nearly 2.4 million. In 1974, 91 per cent of the 6 to 11 age group in Peninsular Malaysia were enrolled at primary schools. Education

between the ages of 6 and 15 is free and compulsory in Peninsular Malaysia. Sabah and Sarawak, although under the Federal Ministry of Education, enjoy some local autonomy over education. There are five universities with a total of 17,000 students in 1976. In 1970 illiteracy among people aged 10 and over averaged 42 per cent (males 30.9 per cent, females 53.2 per cent). The illiteracy rate was 39.2 per cent in Peninsular Malaysia, 55.7 per cent in Sabah and 61.7 per cent in Sarawak.

Tourism

Malaysia has a fast-growing tourist industry, the cultures of the many ethnic groups present being a particular attraction. Over 2.5 million tourists visited Malaysia in 1976 and foreign exchange earnings from tourism were M\$390 million in 1975.

Visas are not required to visit Malaysia by nationals of Belgium, Denmark, Finland, France, the Federal Republic of Germany, Iceland, Indonesia, Ireland, Italy, Liechtenstein, Luxembourg, the Netherlands, Norway, the Philippines, San Marino, Sweden, Switzerland, Thailand, the United Kingdom and Commonwealth and the U.S.A.

Sport

The national sport is football but badminton, cricket, tennis, golf, basketball, table tennis and bowling are also played. There is some sea-fishing and jungle exploration.

Public Holidays

Each State has its own public holidays, and the following federal holidays are also observed:

1978: May 1st (Labour Day), May 2nd (Wesak Day), June 1st (Birthday of H.M. of the Yang di-Pertuan Agong), August 31st (National Day), September 4th and 5th (Hari Raya Puasa), October 31st (Deepavali), November 11th (Hari Raya Haji), December 25th (Christmas).

1979: January/February* (Chinese New Year), February 19th (Maloud, Prophet Muhammad's Birthday).

*From the 1st-3rd day of the first moon of the Lunar Calendar.

Weights and Measures

In 1972 a 10-year programme of conversion from the imperial system to the metric system began. There is also a local system of weights and measures:

1 cupak	= 1 quart
1 gantang	= 1 gallon
1 tahlil	= 1½ ounces
16 tahils	= 1 kati = 1½ lb.
100 katis	= 1 picul = 133½ lb.
40 piculs	= 1 koyan = 5,333½ lb.

Currency and Exchange Rates

100 cents = 1 ringgit or Malaysian dollar (M\$).

Exchange rates (December 1977):

£1 sterling = M\$4.33;

U.S. \$1 = M\$2.36.

FINANCE

(Malaysia)

100 cents (sen) = 1 ringgit or Malaysian dollar (M\$).

Coins: 1, 5, 10, 20 and 50 cents; 1 ringgit.

Notes: 1, 5, 10, 50, 100 and 1,000 ringgits.

Exchange rates (December 1977): £1 sterling = M\$4.33; U.S. \$1 = M\$2.36.

M\$100 = £23.11 = U.S. \$42.32.

Note: The Malaysian dollar was introduced in June 1967, replacing (at par) the Malayan dollar. From September 1949 the Malayan dollar was valued at 2s. 4d. sterling (£1 = M\$8.5714) or 32.667 U.S. cents (U.S. \$1 = M\$3.0612). This valuation in terms of U.S. currency remained in effect until August 1971. Between December 1971 and February 1973 the Malaysian dollar was valued at 35.467 U.S. cents (U.S. \$1 = M\$2.8195). From February to June 1973 the Malaysian dollar's value was 39.407 U.S. cents (U.S. \$1 = M\$2.5376). In terms of sterling, the exchange rate was £1 = M\$7.347 from November 1967 to June 1972. The Malaysian dollar was interchangeable with the Singapore and Brunei dollars until May 1973. Since June 1973 the Malaysian dollar has been allowed to "float". From September 1975 the Malaysian dollar's link with the U.S. dollar was ended and its value determined by changes in a weighted "basket" of currencies of the country's main trading partners. In June 1976 the Malaysian dollar was officially renamed the ringgit. The average market exchange rate (ringgits per U.S. dollar) was: 2.443 in 1973; 2.407 in 1974; 2.402 in 1975; 2.542 in 1976.

THE CONSTITUTION

Supreme Head of State

The Yang di-Pertuan Agong (King or Supreme Sovereign) is the Supreme Head of Malaysia.

Every act of government flows from his authority although he acts on the advice of Parliament and the Cabinet. The appointment of a Prime Minister lies within his discretion, and he has the right to refuse to dissolve Parliament even against the advice of the Prime Minister. He appoints the Judges of the Federal Court and the High Courts on the advice of the Prime Minister. He is the Supreme Commander of the Armed Forces. The Yang di-Pertuan Agong is elected by the Conference of Rulers, and to qualify for election he must be one of the nine Rulers. He holds office for five years or until his earlier resignation or death. Election is by secret ballot on each Ruler in turn, starting with the Ruler next in precedence after the late or former Yang di-Pertuan Agong. The first Ruler to obtain not fewer than five votes is declared elected. A Deputy Supreme Head of State (the Timbalan Yang di-Pertuan Agong) is elected by a similar process. On election the Yang di-Pertuan Agong relinquishes, for his tenure of office, all his functions as Ruler of his own State and may appoint a Regent. The Timbalan Yang di-Pertuan Agong exercises no powers in the ordinary course, but is immediately available to fill the post of Yang di-Pertuan Agong and carry out his functions in the latter's absence or disability. In the event of the Yang di-Pertuan Agong's death or resignation he takes over the exercise of sovereignty until the Conference of Rulers has elected a successor.

Conference of Rulers

The Conference of Rulers consists of the Rulers and the heads of the other States. Its prime duty is the election by the Rulers only of the Yang di-Pertuan Agong and his deputy. The Conference must be consulted in the appointment of judges, the Auditor-General, the Election Commission and the Services Commissions. It must also be consulted and concur in the alteration of State boundaries, the extension to the federation as a whole, of Islamic religious acts and observances, and in any bill to amend the Constitution. Consultation is mandatory in matters affecting public policy or the special position of the Malays and natives of Sabah and Sarawak. The Conference also considers matters affecting the rights, prerogatives and privileges of the Rulers themselves.

Federal Parliament

Parliament has two Houses—the Dewan Negara (Senate) and the Dewan Rakyat (House of Representatives). The Senate has a membership of 58, made up of 26 elected and 32 appointed members. Each State Legislature, acting as an electoral college, elects two Senators; these may be members of the State Legislative Assembly or otherwise. The Yang di-Pertuan Agong appoints the other 32 members of the Senate. Members of the Senate must be at least 30 years old. The Senate elects a President and a Deputy President from among its members. It may initiate legislation, but all money bills must be introduced in the first instance in the House of Representatives. All bills must be passed by both Houses of Parliament before being presented to the Yang di-Pertuan Agong for the Royal Assent in order to become law. A bill originating in the Senate cannot receive Royal Assent until it has been agreed to by the House of Representatives, but the Senate has delaying powers only over a bill originating from and approved by the House of Representatives. Senators serve for a period of six years, but the Senate is not subject to dissolution. Parliament can by statute increase the number of Senators elected from each State to three. The House of Representatives consists

of 154 elected members. Of these, 114 are from Peninsular Malaysia, 24 from Sarawak and 16 from Sabah. Members are returned from single-member constituencies on the basis of universal adult franchise. The life of the House of Representatives is limited to five years, after which time a fresh general election must be held. The Yang di-Pertuan Agong may dissolve Parliament before then if the Prime Minister so advises.

The Cabinet

The Yang di-Pertuan Agong appoints a Cabinet to advise him in the exercise of his functions, consisting of the Prime Minister and an unspecified number of Ministers who must all be members of Parliament. The Prime Minister must be a citizen born in Malaysia and a member of the House of Representatives who, in the opinion of the Yang di-Pertuan Agong, commands the confidence of that House. Ministers are appointed on the advice of the Prime Minister. A number of Deputy Ministers (who are not members of the Cabinet) are also appointed from among Members of Parliament. The Cabinet meets regularly under the chairmanship of the Prime Minister to formulate policy.

Public Services

The Public Services, civilian and military, are non-political and owe their loyalty not to the party in power but to the Yang di-Pertuan Agong and the Rulers. They serve whichever government may be in power, irrespective of the latter's political affiliation. To ensure the impartiality of the service, and to protect it from political interference, a number of Services Commissions are established under the Constitution to select and appoint officers, to place them on the pensionable establishment, to decide as to promotion, and to maintain discipline.

The States

The heads of nine of the thirteen States are hereditary Rulers. The Ruler of Perlis has the title of Raja and that of Negri Sembilan, Yang di-Pertuan Besar. The rest of the Rulers are Sultans. The heads of the States of Malacca, Penang, Sabah and Sarawak are each designated Yang di-Pertua Negeri and do not participate in the election of the Yang di-Pertuan Agong. Each of the 13 States has its own written Constitution, and a single Legislative Assembly. Every State Legislature has powers to legislate on matters not reserved for the Federal Parliament. Each State Legislative Assembly has the right to order its own procedure, and the members enjoy parliamentary privilege. All members of the Legislative Assemblies are directly elected from single-member constituencies. The head of the State acts on the advice of the State Government, which advice is tendered by the State Executive Council or Cabinet in precisely the same manner as the Federal Cabinet tenders advice to the Yang di-Pertuan Agong.

The Legislative authority of the State is vested in the head of the State in the State Legislative Assembly. The executive authority of the State is vested in the head of the State but executive functions may be conferred on other persons by law. Every State has an Executive Council or Cabinet to advise the head of the State, headed by a Chief Minister (in Malacca, Penang, Sabah and Sarawak) or Menteri Besar (in other States), and collectively responsible to the State legislature. Each State in Peninsular Malaysia is divided into administrative districts under a District Officer. Sabah is divided into four residencies: West Coast, Interior, Sandakan and Tawau with headquarters at Kota Kinabalu, Keningau, Sandakan and Tawau respectively. The island of Labuan is administered by a District Officer responsible direct to the State Secre-

tary in Kota Kinabalu. Sarawak is divided into five Divisions, each in charge of a Resident—the First Division, with headquarters at Kuching; the Second Division, with headquarters at Simanggang; the Third Division, with headquarters at Sibü; the Fourth Division, with headquarters at Miri; the Fifth Division, with headquarters at Limbang.

Amendment

From February 1st, 1974, the city of Kuala Lumpur, formerly the seat of the Federal Government and capital of Selangor State, is designated the Federal Territory of Kuala Lumpur. It is administered directly by the Federal Government and returns five members to the Dewan Rakyat.

JUDICIAL SYSTEM

The two High Courts, one in Peninsular Malaysia and the other in Sabah and Sarawak, have original, appellate and revisional jurisdiction as the federal law provides. Above these two High Courts is a Federal Court which has, to the exclusion of any other court, jurisdiction in any dispute between States or between the federation and any State; and has special jurisdiction as to the interpretation of the Constitution. There is also unlimited right of appeal from the High Courts to the Federal Court and limited right of appeal from the Federal Court to the Yang di-Pertuan Agong who may refer appeals in certain civil matters to the Judicial Committee of the Privy Council in the United Kingdom. The High Courts each consist of the Chief Justice and a number of Puisne Judges. The Federal Court consists of the Lord President together with the two Chief Justices of the High Courts and four Federal Judges. The Lord President and Judges of the Federal Court, and the Chief Justices and Judges of the High Courts, are appointed by the Yang di-Pertuan Agong on the advice of the Prime Minister, after consulting the Conference of Rulers.

The Sessions Courts, which are situated in the principal urban and rural centres, are presided over by a President, who is a member of the Federation Legal Service and is a qualified barrister. Their criminal jurisdiction covers the

less serious indictable offences, excluding those which carry penalties of death or life imprisonment. Civil cases are usually heard without a jury. Civil jurisdiction of a President Sessions Court is up to \$5,000 and Special President's Sessions Courts can hear cases of up to \$10,000. The Presidents are appointed by the Yang di-Pertuan Agong.

The Magistrates' Courts are also found in the main urban and rural centres and have both civil and criminal jurisdiction, although of a more restricted nature than that of the Sessions Courts. The Magistrates consist of officers from either the Federation Legal Service or are seconded from the administration to the Judicial Department for varying periods up to three years. They are appointed by the heads of the States in which they officiate on the recommendation of the Chief Justice.

Lord President of the Federal Court of Malaysia: Hon. Mr. Justice Tun MOHAMED SUFFIAN BIN HASHIM, S.S.M., D.I.M.P., J.M.N. (Brunei), P.J.K., M.A., LL.B., Bar-at-Law.

Chief Justice of the High Court in Peninsular Malaysia: Tan Sri GILL, S.S., P.S.M.

Chief Justice of the High Court in Sabah and Sarawak: Hon. B. T. H. LEE, (Kota Kinabalu).

RELIGION

Islam is the established religion but freedom of religious practice is guaranteed. All Malays are Muslims. A small minority of Chinese are Christians but most Chinese follow Buddhism, Confucianism or Taoism. Of the Indian community, about 70 per cent are Hindu, 20 per cent Muslim, 5 per cent Christian and 2 per cent Sikh. In Sabah and Sarawak there are many animists.

The chief ports are Labuan, Sandakan, Kota Kinabalu, Kudat, Tawau, Semporna and Lahad Datu. The operation of all ports, except Labuan, is carried out by the Sabah Ports Authority. The Authority also controls the minor port of Kunak which has facilities for loading palm oil in bulk to ocean carriers and a small landing jetty for general cargo from local craft.

Many international shipping lines serve Sabah. Local services are maintained by a fleet of coastal steamers and numerous small craft to all ports in Sabah, Brunei and Sarawak.

SARAWAK

Under the Second Malaysia Plan (1971-75), work started on a new port at Pending Point, near Kuching.

CIVIL AVIATION

Malaysia has five international airports at Kuala Lumpur, Kota Kinabalu, Penang, Johore Bahru and Kuching. In addition there are airports catering for domestic services at Alor Star, Ipoh, Kota Bahru, Kota Trengganu, Kuantan, Malacca and Johore Bahru, in Peninsular Malaysia, Sibuan and Miri in Sarawak and Sandakan, Tawau and Labuan in Sabah. There are also numerous smaller airstrips all over Malaysia.

Under the Third Malaysia Plan funds will be allocated for the further development of the following airports to cater for heavier air traffic and larger aircraft: Penang, Kota Kinabalu, Kuching, Kota Bahru, Johore Bahru, Miri and Sandakan.

MALDIVES

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Maldives, lying about 420 miles (675 km.) south-west of Sri Lanka, consists of 1,196 islands in the Indian Ocean. The climate is equatorial. The language, Divehi, is related to Sinhala. Islam is the predominant religion. The flag (proportions 3 by 2) is red, bearing a green rectangle in the centre, charged with a white crescent. The capital is Malé.

Recent History

Maldives, called the Maldivian Islands until 1969, formerly had an elected Sultan as head of state. The islands were placed under British protection, with internal self-government, in 1887. They became a republic in January 1953 but the sultanate was restored in February 1954. Maldives became fully independent, outside the Commonwealth, on July 26th, 1965. Following a referendum, the country became a republic again in November 1968, with Ibrahim Nasir, Prime Minister since 1954, as President. The islands have been a member of the Colombo Plan since 1963 and of the UN since 1965.

In 1956 the Maldivian and United Kingdom Governments agreed to the establishment of a Royal Air Force staging post on Gan, an island in the southernmost atoll, Addu. In 1960 the Maldivian Government entrusted Gan and other areas of Addu as a free gift to the United Kingdom for an initial 30 years. However, in 1975 the British Government decided to close the base. The evacuation of Gan by the British forces was completed in March 1976. This created a large commercial and military gap, with 800 Maldivians losing jobs at the base from which they derived an income of £300,000 per year in foreign exchange.

In October 1977 President Nasir rejected a U.S. \$1 million offer from the U.S.S.R. to lease the former base on Gan, on the grounds that he did not want to lease the island to a superpower. Gan is still available for development, however, and the Government is seeking bids and ideas for suitable ways of using it.

There has been little political opposition to President Nasir since independence. However, in June 1974 demonstrations against rising prices took place in Malé and 400 people were arrested. In March 1975 the Prime Minister, Ahmed Zaki, was dismissed and sent into exile on a remote island. The post of Prime Minister was abolished.

Government

Legislative power is held by the unicameral People's Council (*Majilis*), with 48 members (40 elected for five years by universal adult suffrage and eight appointed by the President). Executive power is vested in the President, elected by popular vote for five years. He governs with the assistance of an appointed Cabinet, responsible to the *Majilis*. The country has 19 administrative districts.

Economic Affairs

The bulk of the population live in tiny villages on remote atolls and, in the main, outside a money economy, subsisting by fishing, which forms the basis of the economy,

and collecting coconuts. Malé has traditionally maintained a higher standard of living by levying an indirect tax on these products. Arable land is minimal and, while small amounts of coconuts, millet, sorghum, maize and yams are grown, virtually all the main food staples have to be imported.

Apart from fishing, which accounts for a third of the national income, and the production of coconut oil, the most important sources of income are shipping, tourism and copra production. The considerable development in tourism since 1972 has been financed by a local private enterprise. Maldivian Shipping Ltd. has grown into a major public enterprise, becoming the principal source of revenue in 1975.

An estimate of per capita national income at current prices in 1974 was about U.S. \$135. However, there is an increasing disparity of wealth on the islands. The working population in 1974 was estimated at about 52,000, 40 per cent of the total population.

In 1974 India indicated that it would aid the creation of an economic infrastructure. Foreign aid is usually distributed through government-owned stores. Rice, given by Pakistan or Kuwait, is openly for sale in the country. In times of hardship outlying islanders may be lent supplies of staple food provided by international aid, but only on the understanding that it must be paid for at a later date.

Transport and Communications

Frequent shipping services link Maldives with Sri Lanka. Smaller vessels provide services between the islands on an irregular basis. The national airline, Air Maldives, operates daily flights to Sri Lanka. The airport, on Hululé island, is being expanded with financial assistance from Kuwait.

Social Welfare

In 1974 Maldives had one government hospital and 45 hospital beds. In 1973 there were five physicians.

Education

In 1976 Maldives had 16 schools (10 primary, five secondary and one vocational), with 138 teachers and 3,894 pupils.

Tourism

The tourist industry brings considerable foreign exchange to Maldives, with its white sandy beaches and multi-coloured coral formations. By 1976 seven islands had been developed for tourists, with a capacity of almost 1,000 beds. The number of foreign visitors rose from 1,799 in 1972/73 to 9,164 in 1976 and an estimated 20,000 in 1977.

MALI

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Mali is a land-locked state in West Africa, with Algeria to the north, Mauritania and Senegal to the west, Guinea and the Ivory Coast to the south and Upper Volta and Niger to the east. The climate is hot and dry with temperatures ranging from 24° to 32°C (75°–90°F) and increasing northward into the Sahara Desert. The official language is French but a number of other languages, including Bambara and Sonrai, are widely spoken. About 65 per cent of the population are Muslims and more than 30 per cent follow animist beliefs, the remainder being Christians. The national flag (proportions 3 by 2) is a vertical tricolour of green, gold and red. The capital is Bamako.

Recent History

Mali was formerly French Sudan, a part of French West Africa. In April 1959 it merged with Senegal to form the Federation of Mali, which became independent in June 1960. Senegal seceded two months later and the remnant of the Federation was proclaimed the Republic of Mali in September 1960. The first President, Modibo Keita, adopted authoritarian socialist policies and broke away from the French political and financial bloc. Despite communist aid, rapid inflation forced Keita to return to the Franc Zone in 1967, at the price of a 50 per cent devaluation. The elected National Assembly was dissolved in January 1968. Keita was overthrown in November 1968 by a group of junior army officers, who ruled as the Military Committee of National Liberation (CMLN). The constitution was abrogated and political parties banned.

Lieutenant (later Col.) Moussa Traoré emerged as the dominant figure in the new regime, with the posts of Head of State and President of the CMLN, and in September 1969 replaced Capt. Yoro Diakité as President of the Government. Diakité died in prison in 1973. The regime maintained military rule and quashed opposition, promising civilian rule when the economic problems created by the drought in the Sahel had been overcome and new political institutions had been created.

Mass support for President Traoré's plan for a gradual return to civilian one-party rule was demonstrated in a referendum in June 1974, but there was persistent opposition from politicians active before the 1968 coup who were barred from political activity, and from those, particularly students, who would prefer a multi-party democracy. There were many arrests after demonstrations at ex-President Keita's funeral in 1976, but most of these detainees were released at the end of 1977. There was also reported to be resistance to civilian rule from within the army, although President Traoré has stressed the continued role of the military in social projects such as the mass literacy campaign, and in January 1978 introduced two more army members in a Cabinet shuffle.

Mali follows French foreign policy in its attitude towards the guerrilla war being waged by the inhabitants of the former Spanish Sahara against its occupiers, Mauritania and Morocco. In 1977 Mali troops were stationed in the north of the country to prevent recruitment of guerrillas there.

Government

Since the coup of 1968, the Military Committee of National Liberation (CMLN) has ruled by decree with the assistance of an appointed Council of Ministers. A new constitution, approved by referendum in June 1974, provides for the CMLN to remain in power for a further five years, after which a President and National Assembly would be the main institutions of government. Mali has eight administrative regions and a district government in Bamako. President Traoré plans to establish local groups of the sole political party, the Union Démocratique du Peuple Malien (UDPM), founded in 1976, by the end of 1979.

Defence

The army numbers 4,200, including a paratroop company. There are also three patrol boats on the Niger, and 150 men in the Soviet-equipped air force.

Economic Affairs

Mali is poor in natural resources. A large part of the country lies in the Sahara Desert and is capable of supporting only a sparse nomadic population dependent on its flocks and herds. The severe drought of 1968–74 drastically reduced livestock levels, although by 1976 there was some recovery. Only about 20 per cent of the land is suitable for cultivation, the principal crops being rice, cotton, millet, cassava and groundnuts. There is extensive river fishing and dried and smoked fish are exported. Industry still occupies a minor position in the economy and is based on the processing of food, cotton, hides, skins and wool. Imports exceeded exports during the drought, largely because of cereals imports, but in 1976 imports were restricted and credit purchases of consumer goods controlled.

Apart from old-established salt mines, small quantities of phosphates and gold are mined, and there has been extensive prospecting for gold, uranium, lithium, diamonds and petroleum.

Since Mali's return to the Franc Zone in 1967 an austerity programme has been in force as a condition of French support for the Mali franc. Wages have been held down and the state sector has been restricted. However, the Government has proved incapable of pruning the bureaucracy on which it depends for vital support. Aid has been received from many sources, especially France, the People's Republic of China and the U.S.S.R. International relief organizations have helped mitigate the effects of the Sahel drought; foreign aid programmes are designed to restore self-sufficiency in food and reduce vulnerability to future droughts.

Mali is a member of the OAU, CEAO and ECOWAS and is a signatory to the Lomé Convention.

Transport and Communications

The River Senegal and the River Niger, which is navigable for its total length in Mali of 1,782 km., form the chief arteries of transport. The only railway runs from Koulikoro via Bamako to the Senegal border (640 km.) and then to Dakar (Senegal). Roads are being improved, and almost

half the 13,000 km. of classified roads are open all the year. Domestic and international air services are provided by Air Mali and several foreign airlines.

Social Welfare

The Government maintains anti-smallpox and yellow fever services and there are a number of state hospitals and medical centres. In 1971 Mali had 54 government hospitals, with 3,718 beds. In 1975 there was one doctor for every 40,000 inhabitants.

Education

Education is free and, in theory, compulsory for all children between the ages of 6 and 15. In 1975 only 20 per cent of children eligible for primary education were enrolled in schools. Over 500 Malian students receive higher education abroad, mainly in France and Senegal.

Tourism

Tourism is being developed, based on hunting and fishing and the celebrated city of Timbuktu.

Visas are required to visit Mali by citizens of all countries except France.

Public Holidays

1978: May 1st (Labour Day), July 14th (National Day), September 4th (Id ul Fitr, end of Ramadan), September 22nd (Independence Day), November 11th (Id ul Adha, Feast of the Sacrifice), December 2nd (Muslim New Year), December 25th (Christmas).

1979: February 10th (Mouloud, Birth of the Prophet).

Weights and Measures

The metric system is in force.

THE CONSTITUTION

The 1960 Constitution was abrogated by the Military Committee of National Liberation (CMLN), which in November 1968 replaced it by a "Fundamental Law". Under this, the CMLN and the Supreme Court ruled by decree. The CMLN published a new Constitution on April 26th, 1974, and it was approved by referendum on June 2nd, 1974. Under its provisions there is to be a President and Head of Government elected by universal suffrage for not more than two five-year terms, and a National Assembly elected for a four-year period. Mali is to be a single-party state. The Constitution also allows, however, for a five-year transition period during which the CMLN will continue to rule the country. People who held political office between March 1966 and November 1968 will be ineligible for membership of the new institutions.

MAURITANIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Islamic Republic of Mauritania lies in north-west Africa, with Morocco and Algeria to the north, Mali to the east and south and Senegal due south. The north of the country is mainly desert, but the south is more fertile and suitable for cultivation. The climate is hot and dry. The official languages are French and Arabic, although most people speak Arabic or Hassaniya. The population is almost entirely Muslim, Islam being the State religion. The national flag (proportions 3 by 2) is emerald green with a five-pointed gold star and a horizontal gold crescent moon in the centre. The capital is Nouakchott.

Recent History

Mauritania, a former French colony, became independent in November 1960. President Moktar Ould Daddah has held power since then, meeting opposition from the non-Arab minority and from the small proletariat. Miners' strikes led to the integration of the trade union into the sole political party, the *Parti du peuple Mauritanien* (PPM). In 1974 Daddah responded to left-wing opposition pressure by nationalizing the foreign-owned iron-mining company, MIFERMA.

After independence Mauritania moved away from the French sphere of influence and towards closer relations with Arab nations. After withdrawing from OCAM in 1965, a national currency was established in 1973 and Mauritania became a member of the Arab League. In 1977 it became a member of the Arab Common Market.

When Spain withdrew from its Saharan territories Mauritania was a party, with Morocco and Spain, to the tripartite agreement of November 1975 and established control over the southern portion of the territory in February 1976. General elections were held in August 1976 and President Daddah claimed that the support for the annexation expressed in the polls in the new territory was overwhelming and rejected international calls for a referendum there.

Guerrilla fighting ensued between the Algerian-backed liberation organization, Polisario, and Moroccan and Mauritanian troops. The Mauritanian army was swiftly built up but lacked morale and training. Polisario attacks on villages and particularly the railway line, essential for the transport of iron ore from Zouerate, were highly damaging to the economy. During 1975-77 15 French nationals working in the mining area were captured or killed, and in June 1976 the Polisario attacked Nouakchott, although suffering heavy losses in doing so.

Relations with Algeria, which refused to stop supporting the Polisario base-camps at Tindouf inside its borders, were broken off in 1976. Relations with Morocco, which had been poor until the renunciation of claims to a "greater Morocco", grew more friendly, although the presence of 4,000 Moroccan troops, to patrol the railway and to train the Mauritanians, caused some disquiet. In June 1977 a joint defence pact with Morocco was formed and there were changes in the command structure of the army.

The kidnapping of French technicians in the mining areas brought open French military aid for Mauritania.

Polisario members were expelled from France, instructors and equipment were flown in and reinforcements were air-lifted to Senegal. Polisario, under international pressure, released some French prisoners in December 1977 at the same time as French Jaguar aircraft were reported to be involved in air strikes on Polisario targets and conducting photo-reconnaissance flights. In the early part of 1978 there was a partial truce, but there were fears of a general escalation of war in the Maghreb if Morocco fulfilled its threats to pursue guerrilla groups into Algerian territory.

In 1977-78 President Daddah reshuffled his Cabinet several times, reducing its size. At the third extraordinary congress of the PPM in January 1978 he received warm support for his policy of streamlining the Government structure but less enthusiasm for the idea of total integration of the new territories.

Government

The sole political party, the *Parti du peuple mauritanien* (PPM), nominates the President, who is elected by popular referendum for five years. He exercises executive power and governs with the assistance of an appointed Council of Ministers. Legislative power belongs to the unicameral National Assembly, with 77 members elected by universal adult suffrage for five years from a single list of PPM candidates.

Defence

The armed forces are being expanded rapidly with Moroccan and French assistance. By mid-1977 the army numbered 7,000 men, the gendarmerie 6,000, the navy 300 and the air force 150. Military service for two years is compulsory. Defence accounted for over 30 per cent of the 1976 budget.

Economic Affairs

Nomadic Moors, many of whom are serfs, living by herding cattle and sheep, make up some 70 per cent of the population. Persistent drought has killed much of their livestock and disrupted their traditional way of life. Settled agriculture is restricted to about 400,000 African peasants in the Senegal valley, who grow millet, sorghum and rice with the aid of irrigation. In 1977 renewed drought reduced the Senegal to low levels, making irrigation impossible.

Rich offshore fishing grounds have been extended by the acquisition of additional Saharan coastline and agreements on catches have been concluded with several countries, although there are signs of over-fishing of valuable species. The freezing and processing of fish at Nouadhibou is a significant industry. Plans for industrial development include the establishment of an iron and steel industry.

Iron ore from F'Derik and copper from Akjoujt provide some 90 per cent of export earnings, and give Mauritania a trade surplus. These mineral reserves are expected to last less than 20 years and the companies exploiting them were nationalized in 1974 and 1975. Mauritania is to take an as yet unspecified share in the Moroccan-held Bou-Craa phosphate mines, but the cost of pursuing the war against Polisario and of administering the new Saharan region

have set back development plans and it is proving to be a liability rather than an asset.

Transport and Communications

The Senegal river is an important artery of transport. A 652-km. railway runs from F'Derik to Nouadhibou for the transport of iron ore. There are plans to extend the line for 63 km. to exploit deposits of magnetite. The port of Nouadhibou has been extended to handle mineral exports and accommodate the fishing industry. The main international airport is at Nouakchott, with a second at Nouadhibou. There are about 6,200 km. of roads and tracks, and the 1,000 km. Trans-Mauritanian highway linking Nouakchott and Néma is due for completion in the early 1980s.

Social Welfare

The National Social Insurance Fund administers family allowances, industrial-accident benefits, insurance against occupational diseases, and old-age benefits. Nouakchott has a hospital and there are a few regional dispensaries. In 1973 the country had 71 physicians.

Education

Despite expansion in education facilities since 1960 including provisions for nomadic families, only 19 per cent of children attend school. Arabic has been compulsory since 1967, in addition to French.

Tourism

Owing to the hot climate, the best months for visiting

Mauritania are from November to May. There are hotels in the principal towns. Hunting, visiting the oases, and touring the Berber villages are the chief attractions.

Visas are not required to visit Mauritania by the nationals of Andorra, Benin, the Central African Empire, Chad, the Congo People's Republic, France, Gabon, Guinea, the Ivory Coast, Libya, Mali, Monaco, Niger, Senegal, Togo, Tunisia and Upper Volta.

Sport

There is little organized sport, although football is sometimes played. Hunting and fishing are popular.

Public Holidays

1978: May 1st (Labour Day), May 25th (African Liberation Day), July 3rd (Leilat al Meiraj—Ascension of Muhammed), September 4th (Korité—Id ul Fitr, end of Ramadan), November 11th (Tabaski—Id ul Adha), November 28th (National Day), December 2nd (Muslim New Year).

1979: January 1st (New Year's Day), February 10th (Mouloud—Birth of Muhammad).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

U.S. \$1=46.15 ouguiya.

STATISTICAL SURVEY

Unless otherwise indicated, figures in this Survey exclude Mauritania's section of Western Sahara, acquired in 1976.

There are thirteen regions, known only by a number; the capital, Nouakchott, is a separate district. Region XIII was the Southern Region (formerly Río de Oro) of Western Sahara, which came under Mauritanian control in February 1976 and was renamed Tiris el Gharbia. Its chief town is Dakhla (formerly Villa Cisneros) and it has an area of approximately 104,000 sq. km.

Area: 1,030,700 sq. km. (397,950 sq. miles).

Population: 1,481,000 (census of December 22nd, 1976), including an estimate of 539,000 for the nomad population.

1,000 ouguiya=£11.83=\$21.67.

Note: The ouguiya was introduced on June 29th, 1973, replacing the franc CFA at the rate of 1 ouguiya=5 francs CFA=10 French centimes. The fixed relationship to French currency (and thus to the franc CFA) was maintained until the end of 1973. Since then the rate against the U.S. dollar has been fixed by the Central Bank of Mauritania and is adjusted from month to month. The average exchange rates (ouguiya per U.S. dollar) were: 45.18 in 1974; 43.18 in 1975; 44.96 in 1976. Many of the figures in the tables below are expressed in francs CFA. For details of previous changes in the exchange rate of the franc CFA, see the chapter on Benin, Volume I.

RAILWAYS

A 650-km. railway connects Nouadhibou with Tazadit and the iron ore fields at F'Derik. It is used primarily for transporting iron ore to the coast. Motive power is all diesel. The railway has been the principal target of Polisario attacks and was closed to traffic from October to December 1977.

Finance, Trade and Industry, Transport, Tourism

SNIM-COMINOR, Mauritania Railway: P.O.B. 42, Nouadhibou; state-owned; responsible for all freight and passenger traffic on Nouadhibou-F'Derik railway; Gen. Man. ISMAEL OULD AMAR.

ROADS

There are 6,186 km. of roads and tracks including 560 km. of tarred road. Two important routes have recently been completed (Nouakchott-Rosso, Nouakchott-Akjoujt) and another is under construction (Kaédi-Kiffa).

Société des Transports Publics de Nouakchott: B.P. 342, Nouakchott; f. 1975; Pres. CHEIKH MALANINE ROBERT.

Société Nouvelle des Etablissements Lacombe: B.P. 204, Nouakchott; road transport; Pres. GEORGES ESQUILAT; Dir. ROLAND SOLON.

INLAND WATERWAYS

Messageries du Sénégal: Saint Louis (Senegal); the river Senegal is navigable by small coastal vessels as far as Kayes (Mali) and by river vessels as far as Kaédi in the wet season; in the dry season as far as Rosso and Boghe, respectively.

SHIPPING

The leading port is at Point-Central, 10 km. south of Nouadhibou. In service since 1963, it is almost wholly devoted to mineral exports. There is a commercial and fishing port at Nouadhibou which is being expanded. The port of Nouakchott is also being developed, to handle the copper from Akjoujt.

Port Autonome de Nouadhibou: Nouadhibou; Pres. HAMEDINE KANE.

SHIPPING COMPANIES

Compagnie Mauritanienne de Navigation Maritime (COMANAM): Nouakchott; f. 1973; national shipping company; Pres. MOHAMED GENDOZ; Dir. BELKHADI NEDIR.

Société Ouest Africaine d'Entreprises Maritimes (Mauritanie): B.P. 351, Nouakchott; f. 1967; Dir. (Nouakchott) PIERRE BOBILLO.

Several shipping companies serve Nouadhibou and Nouakchott, the most important being La Compagnie Paquet and La Compagnie Maurel-Prom.

CIVIL AVIATION

There are two international airfields, at Nouadhibou and Nouakchott, to be transferred to Jreya; and fourteen smaller airstrips.

Air Mauritanie: B.P. 41, Nouakchott; f. 1962; scheduled domestic passenger and cargo services from Nouakchott and Nouadhibou and international services to Las Palmas, Canary Islands, and Dakar, Senegal; 20 per cent owned by Air Afrique; fleet of 2 F.27A, 2 DC-3 and 2 Navajo; Dir.-Gen. SIDI OULD ZEIN.

Air Afrique: Mauritania has a 7 per cent share in Air Afrique; see under Ivory Coast.

Mauritania is also served by the following airlines: Iberia, Royal Air Maroc and Union des Transports Aériens (UTA).

TOURISM

Société Mauritanienne de Tourisme et d'Hôtellerie: Nouakchott; f. 1969; promotes tourism in Mauritania, manages hotels etc., organizes tourist trips; Pres. AHMED OULD DIE.

MAURITIUS

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

Mauritius lies in the Indian Ocean. The principal island, from which the country takes its name, lies east of Madagascar. The other main islands are Rodrigues, the Agalega Islands and the Cargados Carajos Shoals (St. Brandon Islands). The climate is sub-tropical, and cyclones can be severe. English, French, Creole (derived from French), Hindi, Urdu and Chinese are all spoken by the various communities, though the first two are normally used for official purposes. Europeans and Creoles are mostly Roman Catholics; 70 per cent of the Indian population are Hindus, the rest being Muslims. The national flag (proportions 3 by 2) has four equal horizontal stripes: red, blue, gold and green. The capital is Port Louis.

Recent History

The island was a French colony from 1715 to 1810, when it was taken by Britain. Immigration, however, came mainly from East Africa and India (Mauritius had no indigenous human inhabitants) and the European population is largely French-speaking.

Racial strife led to serious riots in 1968. Following the victory of the pro-independence Labour Party in the 1967 general election, Mauritius attained independence within the Commonwealth on March 12th, 1968, with Dr. Sir Seewoosagur Ramgoolam as Prime Minister.

The coalition government formed after independence broke down in December 1973, when Gaëtan Duval disassociated the *Parti Mauricien Social Démocrate* (PMSD) from the Prime Minister's Labour Party following disagreement over foreign policy and increases in taxation. The Labour Party, in coalition with the *Comité d'Action Musulman* (CAM), continued in office and steadily pursued an open foreign policy that led to closer relations with continental Africa and a wide variety of socialist states while maintaining the established contacts with France, India and the United Kingdom.

The state of emergency imposed shortly before independence was revoked in 1970 but reimposed the following year when a general strike and radical political opposition began. General elections were postponed in 1972 and, when held in December 1976, surprisingly made the left-wing opposition *Mouvement Militant Mauricien* (MMM) led by Paul Bérenger, the largest single party in the Legislative Assembly. Contributory factors included the influence of 200,000 newly-enfranchised young voters, the high level of unemployment and opposition to the American base on the island of Diego Garcia in the Chagos Archipelago, a former Mauritian dependency incorporated in the British Indian Ocean Territory in 1965. Sir Seewoosagur Ramgoolam was, however, able to form a new coalition government including the Labour Party and the CAM, which had contested the elections jointly as the Independence Party, and the PMSD. To the surprise of the opposition, the coalition remained in power throughout 1977.

Government

Executive power is vested in the British monarch as Head of State, represented by an appointed Governor-

General who is guided by the advice of the Cabinet. Legislative power is vested in the unicameral Legislative Assembly, with 71 members: the Speaker, 62 members elected by universal adult suffrage for five years and eight "additional" members (the most successful losing candidates of each community). The Governor-General appoints the Prime Minister and, on the latter's recommendation, other Ministers. The Cabinet is responsible to the Assembly.

Defence

The country has no standing defence forces.

Economic Affairs

The island is an extreme example of a one-crop economy, with sugar production accounting for about 85 per cent of export earnings, over 90 per cent of total cultivable land, and employing over 33 per cent of the labour force. Good crops and rising prices resulted in a real growth in G.N.P. of 20 per cent in 1973 and 18 per cent in 1974, but 1975 production was badly affected by a cyclone, which destroyed between 20 and 30 per cent of the crop, and export prices fell in 1976.

Tea was successfully introduced as a new crop and now constitutes a valuable export, though the 1975 crop was also damaged by the cyclone. Subsistence farming is on a very small scale and food imports account for nearly a quarter of the total, contributing greatly to the 15 per cent rate of inflation in 1975. Petroleum products form less than 11 per cent of imports, as power is provided by hydro-electric sources and the recycling of sugar by-products. Technical assistance from Japan and the U.S.S.R. is regenerating the fishing industry.

By developing subsistence agriculture, industry and tourism, the government aims to diversify the economy and reduce unemployment (21,000 in 1976). The Mauritius Export Processing Zone has, since 1971, successfully attracted foreign investment in manufacturing, particularly in import substitution industries. Manufactured goods accounted for 13 per cent of exports in 1975. The 1975-80 Second Development Plan is principally concerned with overcoming poverty and unemployment through the expansion of agriculture, technological industries and skilled manufacturing. Textiles, electronics and diamonds are the fastest growing sectors. Tourism is the country's second-ranking earner of foreign exchange and has expanded rapidly since 1967.

Mauritius is a member of OCAM which it joined in 1971. In 1972 it became an associate member of the EEC and exports to the Community benefit from a reduction in tariffs. Following the expiry of the Commonwealth Sugar Agreement in 1974, Mauritius was allotted an annual quota of 492,000 tons of sugar on EEC markets. The agreement, vital to Mauritius's economic future, is to last indefinitely subject to a review after seven years, and the sugar price is to be reviewed annually.

Transport and Communications

Port Louis is served by several cargo shipping lines crossing the Indian Ocean, as well as coastal shipping ser-

viccs, and there is an international airport. Modernization of the harbour at Port Louis is due to be completed in 1980 and a new airport at Plaines des Roches is to be constructed with aid from the People's Republic of China. The road network is good considering the mountainous terrain, and there were 375 km. of metalled roads in 1976.

Social Welfare

The social infrastructure includes a well developed health service with eleven hospitals, 53 dispensaries and 46 child and maternity clinics.

Education

Primary education and, from 1978, secondary education are free. In 1976 about 140,000 children attended government and government-aided primary schools. Standards are high, though education is not compulsory. The large private sector in secondary education was indirectly taken over by the Government in 1977, total enrolment was 66,920 in 1976. Teacher training is undertaken by a college and the Institute of Education which also pioneers education reform. Six junior technical schools, six laboratories and workshops, an industrial training centre and five rural education centres were under construction in 1977, with assistance from the World Bank. In addition, 15 primary schools were being built and there are plans to build two more secondary schools and a teachers' training college. The University of Mauritius has over 1,300 full and part-time students and in 1973 there were over 1,300 students abroad. In 1962 illiteracy among people aged 13 and over averaged 39.2 per cent (males 28.5 per cent, females 49.9 per cent).

Tourism

Major attractions include the superb beaches, fine mountain scenery, the ideal climate and the blend of cultures. Distance from major centres of population has so far limited the industry's development to the luxury trade but growth in recent years has been remarkable. The number of visitors increased from 15,000 in 1968 and

Introductory Survey, Statistical Survey

49,000 in 1971 to 74,597 in 1975, when revenue from tourism reached 135 million rupees. Tourism provides work for about 9,000 people and it is hoped that the number of visitors will rise to 200,000 by 1985.

Visas are not required to visit Mauritius by nationals of the United Kingdom and Commonwealth; nationals of Belgium, Denmark, Finland, the Federal Republic of Germany, Greece, Iceland, the Netherlands, Norway, Spain, Sweden, Tunisia and Turkey require no visas for a visit of six months or less, and nationals of France, Italy and South Africa for a visit of three months or less.

Sport

Football, basketball, tennis, volleyball, fishing, swimming and golf are popular sports.

FINANCE

100 cents = 1 Mauritian rupee.

Coins: 1, 2, 5, 10, 25 and 50 cents; 1 rupee.

Notes: 5, 10, 25 and 50 rupees.

Exchange rates (December 1977): £1 sterling = 11.81 rupees; U.S. \$1 = 6.45 rupees.

100 Mauritian rupees = £8.46 = \$15.50.

Note: Before January 1976 the Mauritian rupee was tied to the pound sterling, its value being fixed at 7½p (£1 = 13.333 rupees). From November 1967 to August 1971 the central exchange rate was 1 rupee = 18 U.S. cents (U.S. \$1 = 5.556 rupees). In December 1971 the U.S. dollar was devalued but the rupee retained its value in terms of sterling and the IMF Special Drawing Right (SDR), so the new exchange rate was 1 rupee = 19.543 U.S. cents (\$1 = 5.117 rupees). However, in June 1972 the rupee was "floated" in line with sterling. The average market exchange rates (rupees per U.S. dollar) were: 5.3385 in 1972; 5.4422 in 1973; 5.7031 in 1974; and 6.0268 in 1975. In January 1976 the rupee's link with sterling was broken and the currency was pegged to the SDR (based on a weighted "basket" of 16 national currencies since July 1974) at a mid-point of 7.714 rupees per SDR, representing a depreciation of 28 per cent from its pre-float valuation. For 1976 the average exchange rate was U.S. \$1 = 6.6832 rupees.

THE CONSTITUTION

The Mauritius Independence Order, 1968, as amended by the Constitution of Mauritius (Amendment) Act No. 39 of 1969, provides for a Cabinet consisting of the Prime Minister and not more than twenty other Ministers. The Prime Minister, appointed by the Governor-General, is the member of the Legislative Assembly who appears to the Governor-General best able to command the support of the majority of members of the Assembly. Other Ministers are appointed by the Governor-General acting in accordance with the advice of the Prime Minister.

The Legislative Assembly consists of the following:

- (i) The Speaker.
- (ii) Sixty-two elected members.
- (iii) Eight additional members.
- (iv) The Attorney-General if not an elected member.

For the purpose of electing members of the Legislative Assembly, the island of Mauritius is divided into twenty-three member constituencies. Rodrigues returns two members. The official language of the Legislative Assembly is English but any member may address the Chair in French.

MEXICO

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The United Mexican States are bordered to the north by the U.S.A. and to the south by Guatemala and Belize. The climate varies with altitude. The lowlands are hot and wet with an average temperature of 18°C (64°F) while the highlands are temperate. Much of the north and west is desert. The principal language is Spanish, the mother tongue of 90 per cent in 1970, while about 8 per cent speak indigenous languages. About 96 per cent of the population are Roman Catholics and there are about 900,000 Protestants. The national flag (proportions 7 by 4) consists of vertical green, white and red stripes, the central white stripe being charged with the state emblem. The capital is Mexico City.

Recent History

Since 1929 the country has been governed by the Partido Revolucionario Institucional (PRI) in an effective one-party system, while maintaining a democratic form of election. In 1940 the President, Gen. Manuel Avila Camacho, embarked on a programme of industrialization. His successor, President Miguel Valdés (1946-52), concentrated on expanding educational services. President Adolfo Ruiz Cortines held office from 1952 to 1958 and President Adolfo López Mateos from 1958 to 1964. In 1963 agreement was reached with the U.S.A. over the disputed Chamizal zone under which 437 acres (177 hectares) of land were transferred to Mexico. In July 1964 Lic. Gustavo Díaz Ordaz was elected President and took office in December. The 1968 Olympic Games were held in Mexico City in October and were accompanied by violent worker and student demonstrations against the Government. Lic. Luis Echeverría Álvarez won the presidential elections of 1970 and pledged that his government would extend the benefits of Mexico's prosperity to all sectors of the population. President Echeverría strengthened diplomatic links with countries of all political persuasions, particularly with Third World countries. In 1975 the Government signed trade and co-operation agreements with the EEC and CMEA in an effort to reduce its economic dependence on the U.S.A. Just before the end of his mandate, President Echeverría expropriated 100,000 hectares of land in Sonora, resulting in a major protest by farm owners and businessmen throughout the country. It also sparked off illegal seizures of land and blockades by landless peasants. In December the courts decided to return the land to its former owners, causing an outcry from peasant unions, but this was later deemed impractical and compensation was offered to the owners.

In the July 1976 elections the PRI candidate, José López Portillo, a former Secretary of Finance, was elected President with almost 95 per cent of the votes cast. On taking office in December 1976 President López Portillo called for national unity and a period of austerity. Throughout 1977 the President promoted better relations with the U.S.A. and other Western countries. Steps were also taken to return to more business-oriented policies and a political reform was promulgated to improve minority party representation in Congress and to widen political choice within the country.

Government

Mexico is a federal republic comprising 31 states and a Federal District (around the capital). Under the 1917 Constitution, legislative power is vested in the bicameral National Congress, elected by universal adult suffrage. The Senate has 64 members (two from each state and the Federal District) who serve a six-year term. The Chamber of Deputies has 245 members who serve for three years. A law promulgated in December 1977 provides that from 1979 the Chamber will have 300 deputies elected by majority vote and up to 100 deputies elected by proportional representation, all serving for three years. Executive power is held by the President, directly elected for six years at the same time as the Senate. He governs with the assistance of an appointed Cabinet. Each state has its own constitution and is administered by a Governor (elected for six years) and an elected Chamber of Deputies.

Defence

Military service is voluntary but there is a part-time conscript militia. In 1977 the armed forces totalled 95,500 regulars plus 250,000 part-time conscripts to the army. There were 72,000 regulars in the army, 17,500 in the navy (including naval air force and marines) and 6,000 in the air force. Defence expenditure for 1977 was 12,260 million pesos.

Economic Affairs

Agriculture suffers from inefficient exploitation of small, non-irrigated plots and in 1975 contributed only 9.7 per cent of the G.D.P. Considerable food imports are required to keep pace with the high population growth. Programmes to collectivize small holdings and *ejidos* (co-operative farms), aimed at increasing farm production, and to increase the output of basic grains and to develop livestock breeding began in the mid-1970s. The principal food crops are maize, wheat, rice and kidney beans, and the major export crops are sugar cane, cotton, coffee, fruit and vegetables. The forests provide a variety of hard and soft woods. The investment of 3,600 million pesos in the fishing industry between 1971 and 1976 resulted in an increase in the fish catch of 197,000 metric tons to 524,689 tons and the 1977-82 fisheries plan aims at increasing fishing activities by 29 per cent and production by 361 per cent.

Mexico is the world's leading producer of fluorite and graphite. Other important minerals include silver, copper, lead, zinc, sulphur, manganese, phosphates and uranium. As a result of the discovery of extensive oil reserves in Tabasco, Chiapas, Veracruz and Campeche, petroleum production reached 1.10 million barrels per day (b.p.d.) in 1976. By mid-1977 it was estimated that reserves were 16,800 million barrels and that potential reserves could be as high as 120,000 million barrels. A \$17,000 million expansion programme should result in a daily output of 2.24 million barrels by 1982. Exports are to increase from 150,000 b.p.d. to 1.1 million b.p.d., refining capacity is to increase by 93 per cent to 1.67 million b.p.d. and the annual production capacity of basic petrochemicals is to increase from 5.2 million tons to 18.6 million tons by 1982.

A 1,140 km. gas pipeline, with a daily capacity of 2,700 million cubic feet, is to be built between the Reforma field and the U.S. border, at a cost of \$1,500 million, by 1979.

There has been considerable expansion of industry: manufactured goods account for about 40 per cent of exports and in 1976 manufacturing contributed 24.8 per cent of the G.D.P. However, in 1976 industrial production grew by only 2.3 per cent compared with 4.7 per cent in 1975, due to the initially unfavourable impact of the peso devaluation in August 1976 which brought about increased costs and wages. As the Government enforced a system of price controls many firms suffered liquidity problems. This industrial stagnation has had an unfavourable effect on the steel industry which had been expanding rapidly. The second stage of the Sicitarsa steel complex at Las Truchas, which should double steel production by 1982, was postponed from 1977 to 1979. The Government is encouraging investment in industry and in December 1976 a \$5,000 million industrial investment plan was announced, aimed at promoting export growth, reducing dependence on imports and creating 300,000 jobs in the near future.

In mid-1976 the economy was in a state of crisis due to the effect of inflation in distorting the pattern of demand, low investment and the effect on competitiveness of the over-valued exchange rate. In August 1976 the Government abandoned the parity of the peso against the U.S. dollar, fixed in 1954, and allowed the peso to float freely. By the end of the year the peso's value had fallen by about 55 per cent. However, with the accession of President López Portillo the outflow of funds slowed. The Government accepted substantial support facilities from the IMF and therefore was obliged to adopt IMF policies designed to bring about a gradual readjustment of the economy. These measures resulted in a slackening of economic activity and increased unemployment but by the end of 1977 the economy began to show signs of considerable improvement. Inflation fell from 27 per cent in 1976 to an estimated 21 per cent in 1977 and the trade deficit was reduced by 81 per cent, partly due to high prices for major exports and the fact that import demand was restrained due to the low level of economic activity. In 1977 the Government held down net foreign borrowings to the specified \$3,000 million and the budget deficit was reduced to 6 per cent of the G.D.P.

The Government's policies emphasize increased co-operation between public and private sectors and oil is to play a key role in reflation of the economy. Despite the conflict between expansionists and strict monetarists within the Government, the free floating of the exchange rate had had a corrective influence on foreign trade and confidence in economic development is being restored.

Mexico is a member of the OAS, LAFTA and SELA.

Transport and Communications

Road transport accounts for some 70 per cent of all public passenger traffic and 60 per cent of freight traffic. Uneconomic railway lines have been replaced by highways, narrow-gauge sections by broad-gauge, and a network of feeder roads serves the main-line railways. In 1977 there were 24,434 km. of railways and 123,404 km. of all-weather roads, including three sections of the Pan American Highway. The difficult terrain encourages air transport and

there are 17 international and 23 national airports and 1,040 landing fields and feeder airports. International air transport is provided by a large number of national and foreign airlines. The chief ports are Veracruz, Tampico and Acapulco. A new port, Puerto Lázaro Cárdenas, in Michoacán, was opened in 1974, and a port at Puerto Madero is due for completion in 1979. In 1977 the Government invested 26,800 million pesos in the transport system.

Social Welfare

Social welfare is administered by the Mexican Social Security Institute and financed by contributions from employers, employees and the Government. In May 1970 a new Labour Law was instituted to replace the existing law of 1931. It provided for longer holidays, overtime rates and restrictions, increased bonuses, sexual equality, and trade union surveillance of company tax returns. Of particular note was the innovation of compulsory profit-sharing, and the law's demand that employers provide housing for their employees. Since 1970 the number of beneficiaries has doubled to 12 million. Twenty-two per cent of the 1977 federal budget was allocated to social welfare.

Education

State education is free and compulsory. It covers six years of primary education but a National Education Plan, approved by the Government in 1977, provides for this to increase to nine years. Much is being done in the field of adult education and the illiteracy rate dropped from 29 per cent in 1960 to 12 per cent in 1976. In 1976/77 there were 917 adult education centres with 151,440 students. There were also 189 institutes of higher education, of which 60 were universities. In the 1977 federal budget over 54,000 million pesos were allocated to education.

Tourism

In 1976 tourism accounted for over 35 per cent of foreign exchange earnings. Eighty-four per cent of visitors come from the United States and Canada. The country is famous for volcanoes, coastal scenery and the great Sierra Nevada (Sierra Madre). The relics of the Mayan and Aztec civilizations and of Spanish Colonial Mexico are of historic and artistic interest. Zihuatanejo on the Pacific coast and Cancún on the Caribbean are being developed as tourist resorts by the Government with funds supplied by the World Bank and the Inter-American Development Bank. The Government also plans to spend \$2,100 million on doubling existing accommodation between 1974 and 1980.

Visas are not required to visit Mexico by nationals of the following countries: Australia, Austria, Belgium, Canada, Denmark, Finland, France, the Federal Republic of Germany, Iceland, Ireland, Italy, Liechtenstein, Luxembourg, Monaco, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, the United Kingdom and the U.S.A., and most countries in Asia and South and Central America.

Sport

Football and baseball are the chief sports and cycling, boxing, tennis, basketball, horseracing, polo, golf and climbing have a considerable following; bullfighting, rodeos and jai-alai (pelota) retain their popularity. Facilities for swimming and sea-fishing are excellent.

Public Holidays

1978: May 1st (Labour Day), May 5th (Anniversary of the Battle of Puebla), September 1st (Presidential Message), September 16th (Independence Day), October 12th (Discovery of America), November 20th (Anniversary of the Revolution), December 25th (Christmas).

1979: January 1st (New Year's Day), February 5th (Constitution Day), February 24th (Flag Day), March 21st (Birthday of Benito Juárez), April 12th-13th (Easter).

Weights and Measures

The metric system is in force.

THE CONSTITUTION

The present Mexican Constitution was proclaimed on February 5th, 1917, at the end of the revolution which began in 1910 against the regime of Porfirio Díaz. Its provisions regarding religion, education and the ownership and exploitation of mineral wealth reflect the long revolutionary struggle against the concentration of power in the hands of the Church and the large landowners, and the struggle which culminated in the 1930s in the expropriation of the properties of the foreign oil companies. It has been amended from time to time; the most recent amendment converted the territories of Baja California Sur and Quintana Roo into states.

GOVERNMENT

The President and Congress. The President of the Republic, in agreement with the Council of Ministers and with the approval of Congress or of the Permanent Committee when Congress is not in session, may suspend constitutional guarantees in case of foreign invasion, serious disturbance, or any other emergency endangering the people.

The exercise of supreme executive authority is vested in the President, who is elected for six years and enters upon his office on December 1st of the year of his election. The presidential powers include the right to appoint and remove members of his cabinet, the Attorney-General and the governor of the Federal District; to appoint, with the approval of the Senate, diplomatic officials, the higher officers of the army, and ministers of the Supreme and higher courts of justice. He is also empowered to dispose of the armed forces for the internal and external security of the federation.

Congress is composed of a Chamber of Deputies elected every three years, and a Senate whose members hold office for six years. The number of deputies increases in accordance with the increase in population. The Senate is composed of two members for each state and two for the federal district. Regular sessions of Congress begin on September 1st and may not continue beyond December 31st of the same year. Extraordinary sessions may be convened by the Permanent Committee.

The powers of Congress include the right to pass laws and regulations; impose taxes; specify the bases on which the Executive may negotiate loans; declare war; raise, maintain and regulate the organization of the armed forces; establish and maintain schools of various types throughout the country; approve or reject the budget; sanction appointments submitted by the President of ministers of the Supreme Court and magistrates of the superior court of the Federal District; approve or reject treaties and conventions made with foreign powers, and ratify diplomatic appointments.

The Permanent Committee, consisting of 29 members of Congress (15 of whom are deputies and 14 senators), officiates when Congress is in recess, and is responsible for the convening of extraordinary sessions of Congress.

The States. Governors are elected by popular vote in a general election every six years. The local legislature is formed by deputies, who are changed every three years. The judicature is specially appointed under the Constitution by the competent authority (it is never subject to the popular vote).

Each state is a separate unit, with the right to levy taxes and to legislate in certain matters. The states are not allowed to levy inter-state customs duties.

The Federal District consists of Mexico City and several neighbouring small towns and villages. The Governor is appointed by the President.

EDUCATION

According to the Constitution, the providing of educational facilities is the joint responsibility of the federation, the states and the municipalities. Education shall be democratic, and shall be directed to developing all the faculties of the individual, at the same time imbuing him with a love of his country and a consciousness of international solidarity and justice. Religious bodies may not provide education, except training for the priesthood. Private educational institutions must conform to the requirements of the Constitution with regard to the nature of the teaching given. The education provided by the states shall be free of charge.

RELIGION

Religious bodies of whatever denomination shall not have the capacity to possess or administer real estate or capital invested therein. Churches are the property of the nation; the headquarters of bishops, seminaries, convents and other property used for the propagation of a religious creed shall pass into the hands of the State, to be dedicated to the public service of the federation or of the respective state. Institutions of charity, provided they are not connected with a religious body, may hold real property. The establishment of monastic orders is prohibited. Ministers of religion must be Mexican; they may not criticize the fundamental laws of the country in a public or private meeting; they may not vote or form associations for political purposes. Political meetings may not be held in places of worship.

LAND AND MINERAL OWNERSHIP

Article 27 of the Constitution vests direct ownership of minerals and other products of the subsoil, including petroleum and water, in the nation, and reserves to the federal government alone the right to grant concessions in accordance with the laws to individuals and companies, on the condition that they establish regular work for the exploitation of the materials. At the same time, the right to acquire ownership of lands and waters belonging to the nation, or concessions for their exploitation, is limited to Mexican individuals and companies, although the State may concede similar rights to foreigners who agree not to invoke the protection of their governments to enforce such rights. No alien may acquire direct ownership over lands and waters within an area 100 kilometres wide along the frontiers or 50 kilometres along the coast.

The same article declares null all alienations of lands, waters and forests belonging to towns or communities made by political chiefs or other local authorities in violation of the provisions of the law of June 25th, 1856,* and all concessions or sales of communally-held lands, waters and forests made by the federal authorities after December 1st, 1876. The population settlements which lack *ejidos*, or cannot obtain restitution of lands previously held, shall be granted lands in proportion to the needs of the population. The area of land granted to the individual may not be less than 10 hectares of irrigated or watered land, or the equivalent in other kinds of land.

The owners affected by decisions to divide and redistribute land (with the exception of the owners of farming or cattle-rearing properties) shall not have any right of redress, nor may they invoke the right of *expropiación* in protection of their interests. They may, however, apply to the Government for indemnification. Small properties, the areas of which are defined in the Constitution, will not be subject to expropriation. The Constitution leaves to Congress the duty of determining the maximum size of rural properties.

MEXICO

Monopolies and measures to restrict competition in industry, commerce or public services are prohibited.

A section of the Constitution deals with work and social security.

On December 30th, 1977, a Federal Law on Political Organizations and Electoral Procedure was promulgated. It includes the following provisions:

Legislative power lies in a General Congress which comprises a Chamber of Deputies and a Senate. The Chamber of Deputies shall comprise 300 deputies elected by majority vote within single-member electoral districts and up to 100 deputies elected by a system of proportional representation from regional lists within multi-member constituencies. The Senate comprises two members for each state and two for the Federal District, elected by majority vote.

Executive power is held by the President of the Republic of the United Mexican States, elected by majority vote.

Ordinary elections will be held every three years for the federal deputies and every six years for the senators and the President of the Republic on the first Sunday of July of the year in question. When a vacancy occurs

The Constitution, The Government, State Governors,

* The Lerdo Law against ecclesiastical privilege, which became the basis of the Liberal Constitution of 1857.

† The Constitution provides for the procedure known as *juicio de amparo*, a wider form of *habeas corpus*, which the individual may invoke in protection of his constitutional rights.

among members of the Congress elected by majority vote, the Chamber in question shall call extraordinary elections, and when a vacancy occurs among members of the Chamber of Deputies elected by proportional representation it shall be filled by the candidate of the same party who received the next highest number of votes at the last ordinary election.

Voting is the right and duty of every citizen, male or female, over the age of 18 years.

A political party shall be registered if it has at least 3,000 members in each one of at least half the states in Mexico or at least 300 members in each one of at least half of the single-member constituencies. In either case the total number of members must be no less than 65,000. A party can also obtain conditional registration if it has been active for at least four years and if it obtains at least 1.5 per cent of the national vote. All political parties shall have free access to the media.

JUDICIAL SYSTEM

The Mexican legal system follows strictly the principle of written law. Accordingly, the definition of rights and duties, and their scope, and the procedure to ensure and enforce them are fixed in codes, such as the civil code, criminal procedure code, etc.

The courts include the Supreme Court with twenty-one ministers; five Circuit Collegiate Tribunals (*Tribunales Colegiados de Circuito*), each with three magistrates; six Circuit Unitary Tribunals (*Tribunales Unitarios de Circuito*), each with six magistrates; and forty-six District Courts with forty-six judges. The system of trial by jury also exists. Ministers of the Supreme Court, circuit magistrates and district judges, once appointed, may only be removed on the ground of misconduct.

MONGOLIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Mongolian People's Republic lies in Central Asia with the Soviet Union to the north and China to the south, east and west. The climate is dry and extreme with winter temperatures well below freezing. The main language is Mongolian. Kazakh is spoken in the province of Bayan-ölgii. There is no State religion but traces of Buddhist Lamaism and Shamanism still survive. The national flag (proportions 2 by 1) has red, blue and red vertical stripes with a golden star and the soyombo emblem on the left-hand stripe. The capital is Ulan Bator.

Recent History

Mongolia was formerly the Chinese province of Outer Mongolia. In 1911, following the republican revolution in China, Mongolian nationalists declared the province's independence. With backing from Tsarist Russia, Outer Mongolia gained autonomy, as a feudal Buddhist monarchy, but accepted Chinese suzerainty in 1915. Following the Russian revolution of 1917, China began to re-establish control in Mongolia in 1919. Mongol leaders appealed to the new Soviet regime for help in 1920. In March 1921 Mongolian communists met in the U.S.S.R. to found the Mongolian People's Party, called the Mongolian People's Revolutionary Party (MPRP) since 1924, and established a Provisional People's Government. After nationalist forces, with Soviet help, overthrew Chinese rule in the Mongolian capital, independence was proclaimed, and the monarchy restored, in July 1921. The U.S.S.R. recognized the People's Government in November.

In May 1924 the U.S.S.R. acknowledged Chinese authority in Mongolia but in November, after the death of King Bogd Haan Javdzandamba Hutagt VIII, the Mongolian People's Republic (MPR) was proclaimed. Soviet troops left in 1925 but the MPR continued to be dependent on the U.S.S.R.'s support. The Government mounted campaigns to collectivize the economy and to destroy the power of the nobility and Buddhist priests. In 1932 an armed uprising was suppressed with Soviet help. Following a purge of the MPRP and army leadership in 1936-39, power was concentrated in the hands of Marshal Horloogiyin Choybalsan as Prime Minister and Party leader. In 1939 a Japanese invasion from Manchuria was repelled by Soviet and Mongol forces at Halhyn-gol (Nomonhan) and the resultant truce lasted until war was declared on Japan in August 1945, four days before the Japanese surrender, and North China was invaded. A plebiscite in October 1945 voted 100 per cent for independence and this was recognized by China in January 1946.

Choybalsan died in January 1952 and was succeeded as Prime Minister by Yumjaagiyn Tsendenbal. Dashiyn Damba became First Secretary of the MPRP in April 1954. During the 1950s Mongolia, previously recognized only by other communist countries, established relations with non-aligned states. Tsendenbal replaced Damba as First Secretary of the MPRP in November 1958 and a new constitution was adopted in July 1960. Mongolia has not been recognized by the U.S.A., which blocked its membership of the UN until October 1961.

During the early 1960s Mongolia attempted to maintain a neutral position in the Sino-Soviet dispute but since 1966 the Government has given unequivocal support to the U.S.S.R. and relations with China have greatly deteriorated. Mongolia accuses the Chinese Government of ill-treating the Mongol population in China and of wishing to expand its territory at Mongolia's expense. Several border incidents have been reported.

Jamsrangiyn Sambuu, Head of State since July 1954, died in May 1972. He was replaced in June 1974 by Tsendenbal, who retained the MPRP leadership but relinquished the post of Chairman of the Council of Ministers to Jambyn Batmönh.

Government

Under the 1960 Constitution, the supreme organ of state power is the People's Great Hural (Assembly). The Ninth Assembly, elected in June 1977, had 354 deputies elected (unopposed) by universal adult suffrage for four years. The Assembly usually meets only twice a year but elects a Presidium (a Chairman, two Vice-Chairmen, a Secretary and five other members) to be its permanent organ. The Chairman of the Presidium is Head of State. The highest executive body is the Council of Ministers, appointed by (and responsible to) the Assembly.

Political power is held by the communist Mongolian People's Revolutionary Party (MPRP), the only legal party. The MPRP's highest authority is the Party Congress, which elects the Central Committee (91 full members and 61 candidate members were elected in 1976) to supervise Party work. The Committee elects a Political Bureau (eight full members and two candidate members in 1977) to direct its policy.

For local administration, Mongolia is divided into 18 provinces and three municipalities.

Defence

In 1977 defence forces comprised an army of 30,000 men with about 2,000 air force personnel and some Soviet technical advisers. Military service is for 2 years. Weapons, ammunition and vehicles are supplied by the U.S.S.R. Estimated defence expenditure for 1977 is 405 million tögrög, around 12.5 per cent of budgetary expenditure, and a little less than for 1976.

Economic Affairs

Animal herding is the main economic activity and is practised throughout the country. About 24.5 million horses, cattle, sheep, goats and camels are raised. The herdsmen are organized in collectives, of which there were 259 in 1977. State farms, of which there were 36 in 1977, practise agriculture on a large scale. The principal crops produced are cereals, potatoes and vegetables.

Industry, which contributes less to G.N.P. than agriculture, is mainly devoted to the processing of food and livestock products such as hides and wool, textile manufacturing and light engineering. The industrial co-operatives, nationalized in 1972, have formed the basis of the new ministry of communal economy and services. The country's industrialization has been greatly assisted by

foreign aid from other CMEA member countries, particularly the U.S.S.R. The major industrial centres are at Ulan Bator (over 50 per cent of gross industrial production), Darhan and Choybalsan, near supplies of coal. Other important minerals include fluorspar (for the Soviet iron and steel industry), tungsten, tin, gold and lead. Large-scale copper mining and concentrating is to begin in 1978 at Erdenet, 330 kilometres north-west of Ulan Bator.

The deterioration of relations with China led to the loss of Chinese labour and consumer goods and of income from freight traffic between China and the Soviet Union. There have been frequent complaints of inefficiency and poor workmanship in industry. As in the U.S.S.R., a new management system is being introduced, involving greater flexibility in planning and the use of economic incentives.

In 1976, 80 per cent of Mongolia's trade was with the U.S.S.R., and over 16 per cent with other members of the CMEA. Most of the remainder was with China, Viet-Nam and other communist countries. In 1975 Mongolian-Soviet trade was worth about 509 million roubles. In the period 1971-75, Mongolia had a total trade deficit of 137.7 million roubles.

Under the Fifth Five-Year Plan (1971-75), national income increased by 38 per cent, gross industrial production by 55.2 per cent, gross agricultural production by 26 per cent, and the volume of foreign trade by 60 per cent. The draft percentage increases for the Sixth Five-Year Plan (1976-80) are, respectively, 37-41, 60-65, 26-30 and 40-45.

Transport and Communications

In 1977 the Mongolian railway system had 1,589 km. of track in use. There are over 1,500 km. of surfaced roads but much traffic is cross-country by motor vehicle and along the caravan routes. Steamer services operate on the Selenge and Orhon rivers and Lake Hövsgöl. The length of navigable inland waterways totals 397 km. Air transport operates to Irkutsk and Moscow and throughout the country (33,400 km. of routes).

Social Welfare

There were 120 hospitals with 10,865 beds and 2,920 doctors in 1975, with ratios of 10 hospital beds and two doctors per 1,000 of the population (in Ulan Bator, 18 and three respectively). There are also a number of clinics and medical stations.

Education

Elementary education is compulsory. The curriculum varies between four, seven and ten years. In 1977/78 enrolment in the 566 general schools was 336,000, in 23 special secondary schools 16,000, and in 35 technical schools 18,000. Students receiving higher education in 1977 totalled 17,000. There is one university and five other institutions of higher education.

Tourism

A foreign tourist service bureau, managed by the Ministry of Foreign Trade, was established in 1960 but tourism is not very developed. Mongolia had 2,300 foreign visitors in the first 10 months of 1975. The country's main attractions are its scenery, wildlife and historical relics.

Sport

Wrestling, archery and horse-riding are the chief sports. Winter sports, athletics and weight lifting are also popular.

Public Holidays

1978: May 1st (Labour Day), July 11th (National Day), November 7th (Russia's October Revolution).

1979: January 1st (New Year), March 8th (International Women's Day).

Weights and Measures

The metric system is in force.

Currency and Exchange Rates

100 mōngō = 1 tögrög (tughrük).

Exchange rates (December 1977):

£1 sterling = 5.69 tögrög;

U.S. \$1 = 3.26 tögrög.

THE CONSTITUTION

The Mongolian People's Republic is a sovereign democratic state of working people. All land, natural resources, factories, transport and banking organizations are state property. In addition to state ownership the people have co-operative ownership of public enterprises, especially in livestock herding. A limited degree of private ownership is also permitted.

The supreme state power is the People's Great Hural (Assembly), which is elected every four years by universal, direct and secret suffrage of all citizens over the age of 18; the last elections took place in June 1977. It has the power of amending the Constitution (by a two-thirds majority), adopting laws, formulating the basic principles of policy

and approving the budget and economic plans. Its Presidium consists of a Chairman (who is Head of State), two Vice-Chairmen, a Secretary and five members. The functions of the Presidium are to interpret legislation and issue decrees, ratify treaties and appoint or dismiss (with the approval of the People's Great Hural) the members of the Council of Ministers.

The Council of Ministers is the highest executive power and consists of the Chairman, First Vice-Chairmen, Vice-Chairmen, Ministers and Chairmen of State Commissions.

Local government is exercised by Hurals and their executive committees at Aymag (Province) and Somon (County) levels.

Insurance is covered by a non-contributory scheme administered by the State Directorate for Insurance of the Ministry of Finance; Head J. PUREVDORJ.

TRADE AND INDUSTRY

All trade and industry is concentrated in the hands of the state, either through direct state ownership or through co-operatives.

Ministry of Trade and Procurement: Ulan Bator; Minister DUNJMAAGIYN DORJGOTOV.

Central Council of Mongolian Trade Unions: Ulan Bator; branches throughout the country; Chair. GOMBOJAVYN OCHIRBAT; Head of Foreign Department Dz. DEJEE; 318,500 mems. (1977); affiliated to WFTU.

CO-OPERATIVES

Federation of Agricultural Production Associations (Co-operatives): Ulan Bator; body administering the 259 agricultural co-operatives throughout the country; Chair. of Council: Minister of Agriculture (*ex officio*); Sec. D. RINCHINSANGI.

Industrial co-operatives have now been absorbed into the state industrial structure. Industrial production associations are gradually being established under various ministries; they are not co-operatives but groupings of allied enterprises (flourmilling, leather processing, etc.)

FOREIGN TRADE

The Mongolian People's Republic has trading relations with over 20 countries. The Ministry of Foreign Trade is responsible for the foreign trade monopoly and controls the operations of several importing and exporting companies.

There are four specialized import and export organizations dealing in trade with foreign countries.

Mongoleksport: Export of Mongolian goods.

Mongolraznoimport: Import of consumer goods.

Mongoltekhnoimport: Import of machinery and equipment, other than motor vehicles, fuels and lubricants.

Avtonefteimport: Import of motor vehicles, fuels and lubricants.

Mongol Nom: Export of Mongolian publications.

Chamber of Commerce of the Mongolian People's Republic: Nayramdlyn Gudamj 24, Ulan Bator; f. 1960; is responsible for establishing economic and trading relations, contacts between trade and industrial organizations both at home and abroad and assists foreign countries; organizes commodity inspection, press information and international exhibitions and fairs at home and abroad; Pres. D. HISHGEE; Gen. Sec. Yo. CHULUUN.

TRANSPORT

RAILWAYS

Ulan Bator Railway: Ulan Bator; Dir. V. A. REYMAROV; Deputy Dir. N. TSERENNOROV.

External Lines: from the Soviet frontier at Naushki Sühbaatar (connecting with the Trans-Siberian Railway) to Ulan Bator on to the Chinese frontier at Dzamyn-üüd/Erhlien and connecting with Peking (total length 1,115 km.).

Branches: from Darhan to Sharyn Gol coalfield (length 68 km.); branch from Salhit near Darhan westwards to Erdenet (Erdenetiyn-ovoo open-cast copper mine) in Bulgan Province (length about 170 km.); from Maan't to Baga nuur coal-mine south-east of Ulan Bator (about 120 km.).

Eastern Railway: Choybalsan; from the Soviet frontier at Borzya/Ereentsav to Choybalsan (length 237 km.).

Mongolia's railways account for over 75 per cent of total freight turnover.

ROADS

Main roads link Ulan Bator with the Chinese frontier at Dzamyn üüd/Erhlien and with the Soviet frontier at Altanbulag/Kyakhta. A road from Chita in the U.S.S.R. crosses the frontier in the east at Mangut/Onon (Öldziy) and branches for Choybalsan and Öndörhaan. In the west and north-west, roads from Biysk and Irkutsk in the U.S.S.R. go to Tsagaannuur, Bayan-ölgii Aymag, and Hanh, on Lake Hövsgöl, respectively. The total length of these and other main roads is about 8,600 km. The length of asphalted roads is now approaching 1,600 km., almost entirely in towns. The first section of a hard-surfaced road between Ulan Bator and Bayanhongor was completed in 1975. The road from Darhan to Erdenet is also to be surfaced. Inter-provincial and intra-provincial traffic goes across country in most cases.

There are bus services in Ulan Bator and other large towns, and lorry services throughout the country on the basis of 25 motor transport depots, mostly situated in provincial centres.

INLAND WATERWAYS

Water transport plies Lake Hövsgöl and the River Selenge (474 km. navigable) in the northern part of the country. Tugs and barges on Lake Hövsgöl transport goods brought in by road to Hanh from the U.S.S.R. to Hatgal on the southern shore.

CIVIL AVIATION

Mongolian Civil Air Transport (MIAT): Ulan Bator; f. 1956; internal services to most provincial centres and many county centres; thrice-weekly service from Ulan Bator (Buyant-Uhaa) to Irkutsk; equipment includes four An-24, three Il-14, An-2, Mi-4, Yak 12; Head of Chief Directorate for Civil Aviation Lt.-Gen. SANDAGIYN SANJNYATAV.

Mongolia is also served by Aeroflot.

TOURISM

Juulchin: Ulan Bator; f. 1960; the official foreign tourist service bureau, managed by the Ministry for Foreign Trade; Dir. T. TSEREN-ÖCHIR.

There were 2,300 foreign tourists in the period Jan.-Oct. 1975.

UNIVERSITY

Mongolian State University: Ulan Bator; Rector Prof. NAMSRAYN SODNOM; over 350 teachers, 3,000 students.

MOROCCO

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Morocco is situated in the extreme north-west of Africa. It is bordered by Algeria to the east and Mauritania to the south. The climate is warm and sunny on the coast, while the plains of the interior are intensely hot in summer. Average temperatures are 27°C (81°F) in summer and 7°C (45°F) in winter for Rabat, and 38°C (101°F) and 4°C (40°F) respectively for Marrakesh. The rainy season in the north is from November to April. The official language is Arabic, but a large minority speak Berber. Spanish is widely spoken in the northern regions and French in the rest of Morocco. The established religion is Islam, to which most people belong, and there are Christian and Jewish minorities. The national flag (proportions 3 by 2) is red with a five-pointed green star in the centre. The capital is Rabat.

Recent History

From 1912 to 1956 Morocco was divided into French and Spanish Protectorates and the International Zone of Tangier (created in 1923). In 1956 the country became independent and Tangier's special status was ended in 1960. Previously a Sultanate, Morocco became a Kingdom in 1957 and acquired the northern strip of Spanish Sahara in 1958. In 1960 King Mohammed V took charge as Prime Minister but died the following year and was succeeded by his son, the present King Hassan II. A new constitution was drawn up in 1962 to provide for a more widely-based government. Following disturbances in Casablanca, a "state of exception" was declared in June 1965, and Parliament was suspended until 1970. The Spanish enclave of Ifni was ceded to Morocco in June 1969. A new Constitution, approved in July 1970, provided for a unicameral Chamber of Representatives and strengthened the power of the King.

In July 1971 a section of the army attempted to overthrow the monarchy; but the revolt was suppressed by loyal troops led by Gen. Mohammed Oufkir. There were many arrests and executions and a purge of government officials was carried out. At the same time numerous members of the left-wing *Union Nationale des Forces Populaires* (UNFP) were tried for allegedly plotting to overthrow the Government. Another new constitution was approved by referendum in March 1972.

An unsuccessful attempt to assassinate King Hassan was made in August 1972, apparently instigated by the Minister of Defence and Army Chief of Staff, Gen. Oufkir, who committed suicide immediately afterwards. The King took personal command of the army and offered government participation to the opposition parties, Istiqlal and UNFP. However, he refused to allow the fundamental reforms which they demanded as a pre-condition of acceptance. Terrorist activities in early 1973 were officially interpreted as the beginnings of a guerrilla movement, backed by the military regime in Libya. The Rabat section of the UNFP was outlawed and several hundred people, including UNFP leaders, were arrested.

A major diplomatic campaign initiated in July 1974 to annex the Spanish Sahara received active support from all

opposition parties. Morocco brought the issue before the International Court of Justice and a mission from the UN Committee on Colonialism was sent to the territory. The findings of both the mission and the World Court were unsatisfactory to Morocco. In November 1975 Hassan ordered a "Green March" by over 100,000 Moroccan volunteers to occupy the territory. The marchers barely crossed the border before they were stopped, but on November 14th Spain, Mauritania and Morocco agreed on a tripartite administration in the Sahara. Moroccan troops moved into the territory to confront a guerrilla uprising led by the local Algerian-backed liberation movement, Polisario.

In January and February 1976 there were clashes between Moroccan and Algerian troops in the Sahara. At the end of February Spain's withdrawal from the territory was officially completed and Morocco and Mauritania occupied Western Sahara. At the beginning of March Polisario formed a Saharan Government-in-exile in Algeria. Morocco and Mauritania broke off diplomatic relations with Algeria, but the possibility of full-scale war receded since Algeria limited itself to providing support and refuge for Polisario guerrillas. In April Morocco and Mauritania agreed on a division of the territory and the joint exploitation of its phosphates. The Moroccan sector was annexed as three new provinces centred on Laayoune (formerly El Aaiun), Es-smara (Smara) and Boujdour (Bojador). In May, Morocco and Mauritania agreed to mutual defence assistance. Guerrilla warfare continued throughout 1976. Moroccan troops were able to inflict heavy casualties and to ensure the security of the major towns, but they could not prevent constant infiltration, harassment and sabotage, especially of the important conveyor belt linking the Bucraa mines with the coast. This led to King Hassan's claim that Morocco would exercise the "right of pursuit", to attack Polisario bases in Algeria.

In November 1976 local elections were held throughout Morocco. All but one of the opposition parties agreed to participate in the elections for the first time since 1963. Although political arrests and trials continued, even the left-wing USFP (formerly the banned Rabat branch of the UNFP) declared its support for King Hassan and his Saharan policy.

In June 1977 general elections took place, marking a return to parliamentary democracy after 14 years of direct rule. The Independents and the *Mouvement Populaire*, both of which support King Hassan's policies, won a majority. Some opposition leaders complained that the election results had been affected by "irregular practices". The *Parti du Progrès et du Socialisme* won a seat for the first time.

The Cabinet was dismissed by the King in October 1977 and a new Government of National Unity was formed to include representatives of the two strongest parties, Istiqlal and the *Mouvement Populaire*, in addition to the pro-monarchist Independents. A member of the *Union Nationale des Forces Populaires*, Maati Bouabid, was also included and was consequently expelled from the party for accepting a portfolio.

Morocco has declared its interest in closer economic co-operation with France.

Government

The 1972 Constitution provides for a modified constitutional monarchy. Legislative power is vested in the unicameral Chamber of Representatives, with 264 members elected for four years (176 by direct universal adult suffrage and 88 by an electoral college). Executive power is vested in the King, who appoints (and may dismiss) the Prime Minister and other members of the Cabinet. The King may also dissolve the Chamber.

Defence

In 1977 Morocco had an army of 75,000, a navy of 4,000 and an air force of 5,650 men. There is obligatory military service of 18 months. Defence expenditure in 1977 totalled 1,560 million dirhams.

Economic Affairs

Agriculture and mining are the mainstays of the economy. The chief crops are wheat, barley, maize and citrus fruits. Livestock-raising is important and fishing is well developed. The most important minerals extracted are phosphates, of which Morocco is by far the world's leading exporter. The Office Chérifien des Phosphates, the Moroccan state phosphate company, has obtained a loan of U.S. \$200 million to finance the development of a major phosphoric acid plant, Maroc Phosphore II, which will allow Morocco to diversify its industrial base and provide much needed employment. Other deposits include iron ore, coal, lead, zinc, cobalt and manganese.

Industry is still on a small scale but has been developed under a series of Five-Year Plans since 1960. A number of important dam projects have been completed, providing both power and irrigation.

King Hassan has consistently encouraged foreign investment and private enterprise, but in recent years the State has adopted a more active and aggressive role in promoting Morocco's economic interests. In 1973 over 200,000 hectares of foreign-owned land were taken over by the State for redistribution among the rural population, a considerable step forward in the agrarian reform programme which has been pursued since 1966. Certain measures of Moroccanization have been imposed on foreign firms and strong action has been taken against those failing to comply.

Morocco's trade deficit is worsening due to an increase in imports. A poor crop in 1977 resulted in increased food imports. There has been a considerable increase in the price of capital goods which are imported in accordance with Morocco's investment plans. Revenue from the export of phosphates is not increasing sufficiently to cover the import bill while Morocco's exports of vegetables and clothing have fallen as a result of restrictions imposed by the EEC. National security and defence are absorbing an increasing proportion of the national income as the war in the Western Sahara continues.

Morocco receives aid from Saudi Arabia and other Middle Eastern countries. In December 1977 Morocco obtained a seven-year loan of U.S. \$225 million from a group of banks to finance the fourth development plan.

There are still great inequalities of wealth in Moroccan society. Full-time speculators operate, cornering one

market after another, causing increased prices and shortages of goods. There is a serious unemployment problem, especially in the countryside, resulting in a drift to the towns. The emigration of workers is encouraged, the money they earn abroad being an important source of income for the country. Tourism is also a valuable sector of the economy. During the 1968-72 development plan an average growth rate of 5.5 per cent per annum was achieved, and the 1973-77 plan envisages an annual growth rate of 6.5 per cent.

Transport and Communications

There are 1,778 km. of railway of which 730 km. are electrified. Paved roads extend for 13,500 km., of a total road length of 25,000 km. The chief ports are Casablanca, Safi and Mohammedia. There are six international airports and about 50 airfields.

Social Welfare

All employees are required to contribute to a Social Welfare Fund which provides against illness, occupational accidents and old age. In 1974 Morocco had 144 hospitals, with 23,056 beds, and 1,223 physicians.

Education

There are state primary, secondary and technical schools and also private schools. All primary school teachers are Moroccan, but about 7,000 secondary school teachers come from France, although teacher-training is expanding. Over half the children of school age attend school. Education for both sexes between 7 and 13 years old has been compulsory since 1963. Girls generally leave school younger than boys and make up only 28 per cent of secondary school pupils and 13 per cent of students in higher education. There are two universities and several other institutions for higher education. In 1971 adult illiteracy averaged 78.6 per cent (males 66.4 per cent, females 90.2 per cent).

Tourism

Morocco is famous for a hot and sunny climate, its ancient, walled towns, the modern capital Rabat and the modern port Casablanca, for desert and mountains and Atlantic and Mediterranean resorts. Tourists from all over the world visit Fez and Marrakesh.

Visas are not required to visit Morocco by nationals of Arab League states (except Sudan), Argentina, Australia, Brazil, Canada, Chile, Ghana, Guinea, Indonesia, Ivory Coast, Japan, Liberia, Madagascar, Mali, Mexico, New Zealand, Nigeria, Peru, Philippines, Puerto Rico, Turkey, U.S.A., Venezuela, Zaire, or any West European country except Portugal and Spain).

Sport

Football is the most important sport and tennis and skiing are also popular.

Public Holidays

1978: May 1st (Labour Day), August 5th (Beginning of Ramadan), September 4th (Eid el Seghir-Id ul Fitr, end of Ramadan), November 11th (Eid el Kebir-Id ul Adha, Feast of the Sacrifice, November 18th (Independence Day), December 2nd (Muslim New Year), December 11th (Ashoura).

FINANCE

100 Moroccan francs (centimes)=1 Moroccan dirham.

Coins: 1, 2, 5, 10, 20 and 50 francs; 1 and 5 dirhams.

Notes: 5, 10, 50 and 100 dirhams.

Exchange rates (December 1977): £1 sterling=8.13 dirhams; U.S. \$1=4.44 dirhams.

100 Moroccan dirhams=£12.29=\$22.52.

Note: The dirham was introduced in October 1959, replacing the Moroccan franc (at par with the old French franc until December 1958) at the rate of 1 dirham=100 francs. At the same time the currency was devalued by 17.0 per cent, with the former exchange rate (U.S. \$1=420 Moroccan francs) being replaced by a new rate based on a relationship with French currency, initially fixed at 1 French franc=1.025 Moroccan francs (1 French franc=1.025 dirhams after the introduction of the new French franc in January 1960). In terms of U.S. currency, the rate was \$1=5.0605 dirhams (1 dirham=19.761 U.S. cents), which remained in operation until August 1971, while the relationship to French currency became 1 French franc=91.111 Moroccan francs after August 1969. From December 1971 to February 1973 the official exchange rate was \$1=4.661 dirhams (1 dirham=21.455 U.S. cents). A new par value of \$1=4.195 dirhams (1 dirham=23.84 U.S. cents) was established in February 1973 but in March 1973 the French authorities ceased to maintain the franc-dollar rate within previously agreed margins. Morocco maintained a link with the French franc, although the fixed relationship was ended in May 1973. As a result of these changes, the market exchange rate since March 1973 has fluctuated widely above and below the par value, although the latter continued to be the basis for calculating the value of foreign trade transactions until the end of 1974. The average market rates (dirhams per U.S. dollar) were: 4.5959 in 1972; 4.1069 in 1973; 4.3698 in 1974; 4.0525 in 1975; 4.4193 in 1976. In terms of sterling, the exchange rate between November 1967 and June 1972 was £1=12.145 dirhams.

THE CONSTITUTION

(Promulgated March 10th, 1972, after having been approved by national referendum.)*

Preamble: The Kingdom of Morocco, a sovereign Moslem State, shall be a part of the Great Maghreb. As an African State one of its aims shall be the realization of African unity. It will adhere to the principles, rights and obligations of those international organizations of which it is a member and will work for the preservation of peace and security in the world.

General Principles: Morocco shall be a constitutional, democratic and social monarchy. Sovereignty shall pertain to the nation and be exercised directly by means of the referendum and indirectly by the constitutional institutions. All Moroccans shall be equal before the law, and all adults shall enjoy equal political rights including the franchise. Freedoms of movement, opinion and speech and the right of assembly shall be guaranteed. Islam shall be the state religion.

The Monarchy: The Crown of Morocco and its attendant constitutional rights shall be hereditary in the line of H.M. King Hassan II, and shall be transmitted to the oldest son, unless during his lifetime the King has appointed as his successor another of his sons. The King is the symbol of unity, guarantees the continuity of the state, and safeguards respect for Islam and the Constitution. The King shall have the power to appoint and dismiss the Prime Minister and Cabinet Ministers and shall preside over the Cabinet. He shall promulgate legislation passed by the Chamber of Representatives and have the power to dissolve the Chamber; is empowered to declare a state of emergency and to initiate revisions to the Constitution. The Sovereign is the Commander-in-Chief of the Armed Forces; makes appointments to civil and military posts; appoints Ambassadors; signs and ratifies treaties; presides over the Council for National Development Planning and

the Supreme Judiciary Council; and exercises the right of pardon.

Legislature: This shall consist of a single assembly, the Chamber of Representatives, which shall comprise 264 members elected for a four-year term. Two-thirds of the members shall be elected by direct universal suffrage, and one-third by an electoral college composed of councillors in local government and employers' and employees' representatives. The Chamber shall pass legislation, which may be initiated by its members or by the Prime Minister; authorize any declaration of war; and approve any extension beyond thirty days of a state of emergency.

Government: The Government shall be responsible to the King and the Chamber of Representatives and shall ensure the execution of laws. The Prime Minister shall be empowered to initiate legislation and to exercise statutory powers except where these are reserved to the King. He shall put before the Chamber the Government's intended

* For the most part the Constitution is unchanged from the one drawn up by King Hassan II and promulgated in 1962. This provided for two houses of parliament, one elected by universal suffrage and one by electoral colleges, and was superseded by that of July 1970, which introduced a unicameral Chamber of Representatives, of which two-thirds of the members were to be elected by universal suffrage, and increased the powers of the monarch.

programme and shall be responsible for co-ordinating ministerial work.

Relations between the Authorities: The King may request further consideration of legislation by the Chamber of Representatives before giving his assent; submit proposed legislation to a referendum by decree; and dissolve the Chamber if a Bill rejected by it is approved by referendum. He may also dissolve the Chamber by decree, but the succeeding Chamber may not be dissolved within a year of its election. The Chamber of Representatives may defeat the Government either by refusing a vote of confidence moved by the Prime Minister or by passing a censure motion; either eventually shall involve the Government's collective resignation.

Judiciary: The Judiciary shall be independent. Judges shall be appointed on the recommendation of the Supreme Council of the Judiciary presided over by the King.

JUDICIAL SYSTEM

The **Supreme Court** (*Majlis el Aala*) is responsible for the interpretation of the law and regulates the jurisprudence of the courts and tribunals of the Kingdom. The Supreme Court sits at Rabat and is divided into five Chambers.

First President and Attorney-General: BRAHIM KEDDARA.

The nine **Courts of Appeal** hear appeals from lower courts and also comprise a criminal division.

The **Sadat Tribunals** pass judgment, without possibility of appeal, in personal, civil and commercial cases involving up to 300 dirhams. These tribunals also pass judgment, subject to appeal before the Regional Tribunals, in the same cases up to 900 dirhams, in disputes related to the personal and successional statutes of Moroccan Muslims and Jews, and in penal cases involving misdemeanours or infringements of the law.

The **Regional Tribunals** deal with appeals against judgments made by the Sadat Tribunals; and pass judgment in the first and last resort in cases of personal property of 900 to 1,200 dirhams or property producing a yield of up to 80 dirhams. The Regional Tribunals also pass judgment, subject to appeal before the Court of Appeal, in actions brought against public administrations in administrative affairs, and in cases of minor offences in penal matters.

Labour Tribunals settle, by means of conciliation, disputes arising from rental contracts or services between employers and employees engaged in private industry. There are 14 labour tribunals in the Kingdom.

A special court was created in 1965 in Rabat to deal with corruption among public officials.

MOZAMBIQUE

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The People's Republic of Mozambique lies on the east coast of Africa, bordered to the north by Tanzania, to the west by Malawi, Zambia and Rhodesia and to the south by South Africa. The wet season has average temperatures of 28°C (82°F) and the dry season has average temperatures of 18°–20°C (64°–68°F) at Maputo. Portuguese is the official language although tribal dialects, principally Makua, Lomwe, are widely spoken. The population is mainly animist although there are over 1,500,000 Christians, the majority of whom are Roman Catholic, and 800,000 Muslims. The national flag features four triangles radiating from a common apex at the upper hoist corner. From the top the stripes, separated by white slivers, are green, red, black and yellow. A white cog-wheel, featuring a hoe, book, rifle and red star, is superimposed in the upper left. The capital is Maputo.

Recent History

Mozambique became a Portuguese colony in the nineteenth century and an overseas province in 1951. Nationalist groups began to form in the 1960s. Frelimo (Frente de Libertação de Moçambique—Mozambique Liberation Front) was formed in 1962 by the merger of three existing nationalist parties. Its military campaign was launched in 1964 and continued until the ceasefire in September 1974. After the *coup* in Portugal in April 1974, independence negotiations between Frelimo and the new Portuguese government took place. In September agreement was reached and the country was administered by a transitional government composed of representatives of Portugal and Frelimo until independence on June 25th, 1975. Samora Machel, leader of Frelimo since 1970, became the first President of Mozambique.

Shortly after independence the Government nationalized land, rented property, private law practices, schools, hospitals, banking and insurance without compensation. However, the increasing economic chaos has since caused Mozambique to give guarantees against expropriation to foreign companies. Compensation was mentioned when the Sonarep oil refinery was taken over in May 1977.

In December 1975 a revolt by dissident elements of the armed forces and police was put down. The economic crisis has caused discontent and Frelimo has made concerted efforts to secure a political power base outside the areas liberated during Portuguese rule. In 1977 measures were taken to transform the party into a vanguard Marxist-Leninist organization with restricted membership, and People's Assemblies were elected from village to national level.

In March 1976 the border with Rhodesia was closed, economic sanctions applied and all Rhodesian assets in Mozambique were seized. The country was put on a war footing. In January 1977 President Machel joined the Presidents of Angola, Botswana, Tanzania and Zambia in declaring exclusive support for the Patriotic Front, the Rhodesian nationalist group led by Joshua Nkomo and Robert Mugabe. Mozambique is the principal base for

Rhodesian guerrillas and large parts of western Mozambique have been devastated in Rhodesian raids on the guerrilla training and refugee camps. In November 1977 the UN estimated that 15,000 people had been killed and 50,000 affected by repeated Rhodesian attacks. International aid has been insufficient to cover the costs to Mozambique of applying sanctions and repairing the damage.

Relations with Portugal deteriorated in 1976, and almost all the 250,000 Portuguese who had remained in the country after independence left by June 1977. Of necessity, Mozambique has developed close economic relations with South Africa, which has reconstructed the Transvaal-to-Maputo railway. South Africa helps to run Maputo docks and employs 40–70,000 Mozambicans in its mines. Mozambique is establishing closer ties with the U.S.S.R. and after President Podgorny's visit in March 1977 signed a 20-year friendship treaty with the Soviet Government. At the end of 1975 Mozambique and Tanzania set up a Joint Co-operation Committee with the aim of making their economies complementary. In May 1977 a similar committee was established with Zambia.

Government

The 1975 Constitution proclaims that Frelimo is the directing power of the state and of society. Legislative power is vested in the People's Assembly, with a maximum of 210 elected members. The President of the Republic, who is Head of State, is the President of Frelimo. He holds executive power and governs with the assistance of an appointed Council of Ministers.

Defence

A National Defence Force has been created, including an army of 19,000 troops. A people's organization, Serviço Nacional de Segurança Popular (the National Service of Popular Security), was established to work with the Government and the armed forces on matters of national security. Two battalions of Tanzanian troops are deployed in Mozambique.

Economic Affairs

The economy is based on agriculture which employs about 90 per cent of the working population. The major cash crops are cashew nuts, sugar, cotton, tea and sisal. Maize, bananas, rice and coconuts are also grown. In 1976 the Government began a scheme of resettling peasants, including more than 60,000 refugees repatriated from Tanzania, into communal villages of about 1,000 families who would work communal farms. This process was accelerated after the devastating flooding of the Limpopo basin in February 1977.

There are considerable mineral resources although only coal and bauxite are at present exploited. Production of coal from Moatize in the Tete region is to be increased from 300,000 tons in 1975 to a target of 2.5 million tons by 1980. High-grade iron ore deposits exist in large quantities in the Mccuco area. Diamonds, gold, emeralds and semi-

precious stones have been discovered in Tete province. Mozambique has two-thirds of the world's known reserves of tantalite and is the world's second largest source of beryl. Vast natural gas deposits have been discovered.

Industry is limited and Mozambique is heavily dependent on South African industrial products. Food processing forms the basis of this sector, with sugar refining, cashew- and wheat-processing predominating. Other industries include cotton spinning and weaving, brewing and the manufacture of cement and fertilizers.

Since independence agricultural and industrial production has fallen by between 70 and 75 per cent, due to the flight of Portuguese capital and skill, the escalating Rhodesian war, commercial disruption, the return of thousands of refugees and the flooding of the Limpopo basin in February 1977. Traditionally 60 per cent of foreign trade passed through Rhodesia but this traffic has been lost due to the closure of the border in March 1976. Closure of road and rail links has also meant lost revenue from traffic with Zaire, Botswana, Malawi and South Africa. There is a severe shortage of staple foods and industrial products as Rhodesia was the principal supplier before 1976. In that year Mozambique was forced to import 40,000 tons of rice, 90,000 tons of maize and 120,000 tons of wheat.

Trade with South Africa continues and the South African Government is helping Mozambique to reorganize its ports and to electrify various railway lines into South Africa. Mozambique has traditionally received over 25 per cent of its foreign exchange from South Africa in the form of gold sent as part payment for the 130,000 Mozambican miners working in South African mines. However, this income, approximately R100 million in 1975, fell in 1976 because of the lower price of gold and a decreased labour flow. This will be offset to some extent by sales of electricity to South Africa from the Cabora Bassa dam.

The Mozambique economy is suffering during the change from a colonial to a socialist system. As a colony, the country offset a massive trade deficit with the services it provided to neighbouring countries—miners in South Africa, tourism and transport. The decline of tourism and transport since 1975, coupled with a slump in agricultural and industrial production, has led to a large balance of payments deficit (an estimated \$220 million in 1976) which severe import restrictions have been unable to reverse. At the third Frelimo Congress in February 1977 it was agreed that, while agriculture would form the basis of the economy, heavy industry would provide the required dynamism.

Pre-independence production levels are not expected to be regained until 1980. Priority sectors are agriculture, energy and communications, and Mozambique is relying heavily on aid from international agencies and individual countries. It is co-operating closely with Tanzania and hopes to alleviate its economic situation by forging closer links with the rest of Black Africa as well as with the U.S.S.R.

Transport and Communications

In 1977 there were 3,696 km. of railways. The country is lacking a good network of roads, with only 39,173 km. of roads and tracks in 1974. A road linking Mozambique with Zambia is under construction and there are plans to link Mozambique with Tanzania by building a bridge over the Ruvuma River. The main ports are Maputo, the second largest port in Africa, Beira, Nacala and Quelimane. A cargo terminal at Moatize, opened in 1976, will link the port of Beira to Zambia and Zaire and handle goods for these countries. Air transport is operated by the state-owned DETA which has pooled its resources with the Angolan airline TAAG. There are sixteen airports, three of which are international airports.

Social Welfare

Most white doctors have left, leaving only 100 doctors for a population of 9 million in late 1975. Some medical assistance is given by Zambia. Health services have been nationalized and an emergency medical plan, to cost \$22 million, has been drawn up. It gives priority to medical training. As part of a ten-year campaign against tetanus, smallpox and tuberculosis, three million people had been vaccinated by 1977.

Education

Eighty-five per cent of the population are illiterate. There is a major emphasis on campaigns of adult literacy as well as on widening the scope of primary and secondary schooling. The university at Maputo, renamed the Eduardo Mondlane University in 1976, reopened in 1976 after having been closed for a year. All university students must give as many years of public service as time spent at university.

THE CONSTITUTION

The Constitution of the People's Republic of Mozambique was approved by the Central Committee of Frelimo on June 20th, 1975, and came into force at independence on June 25th, 1975. Subsequent legislation made provision for the conduct of elections. The following summary includes the most important articles of the Constitution (including the subsequent electoral law):

Section I: General Principles

1. The People's Republic of Mozambique is a sovereign, independent and democratic State.
2. Power belongs to the workers and peasants united and led by Frelimo and is exercised by the organs of people's power.
3. Frelimo is the leading force of the State and Society.
4. The Republic has the following fundamental objectives:

The elimination of colonial and traditional structures;
the extension of people's democratic power;
the building of an independent economy;
the defence and consolidation of national independence and unity;
the pursuit of the struggle against colonialism and imperialism.

5. The Mozambique People's Liberation Forces (FPLM) are responsible for national defence. Its Commander-in-Chief is the President of Frelimo.
6. The land and the natural resources of the soil and subsoil, of the territorial waters and continental shelf of Mozambique are the property of the State.

10. The State economic sector is the leading and driving factor in the national economy.
11. The State encourages individual peasants and workers to organize themselves in collective forms of production.
- 12-14. Personal property is guaranteed and foreign capital shall be authorized to operate within the framework of the State's economic policy.
19. The Republic is a secular State in which there is absolute separation between the State and religious institutions.

Section II: Fundamental rights and duties of citizens

26. All citizens enjoy the same rights and are subject to the same duties, irrespective of colour, race, sex, ethnic origin, place of birth, religion, level of education, social position or occupation.
28. All citizens over 18 years of age are entitled to vote and be elected.
30. Active participation in the defence of the country and the Revolution is the right and supreme duty of every citizen.
27. All citizens enjoy freedom of opinion, assembly and association.
33. Individual freedoms are guaranteed by the State, including the freedom to practise or not to practise a religion.
35. The State guarantees accused persons the right to a legal defence.

Section III: State Organs

Chapter I: People's Assembly

37. The People's Assembly, with no more than 210 members, is the supreme organ of the State and is the highest legislative organ of the Republic.
38. Decisions are made by absolute majority vote of members present. The Assembly may deliberate only when a majority of its members are present.
42. The Assembly is convened and presided over by the President of the Republic. It meets in ordinary sessions twice a year and in extraordinary session when requested by the Central Committee, the President, the Permanent Commission of the Assembly or by at least one-third of the members of the Assembly.
44. The Permanent Commission of the Assembly consists of 15 members elected by the Assembly from among its members on the proposal of the Central Committee.
45. The Permanent Commission assumes the functions of the Assembly in the periods between meetings of that body. It is answerable to the Assembly, and is presided over by the President.

Chapter III: President of the Republic

- 47-52. The President of the People's Republic of Mozambique is the President of Frelimo and the Head of State. His function is to create ministries and define their jurisdiction; to direct the activities of the Council of Ministers and preside over its meetings; to appoint and dismiss members of the Council of Ministers, the President and Vice-President of the Supreme People's Court and the Attorney-General of the Republic, provincial governors, the governor and deputy governor of the Bank of Mozambique, the general commander and deputy general commander of the Police Corps, the rector of the University and diplomatic representatives of the Republic in other countries; to promulgate and have issued laws and legislative decrees; to declare a state of war and conclude peace treaties; to proclaim mobilization; to accredit diplomatic representatives of other countries; to pardon and commute sentences and to declare a state of siege or emergency. In the event of the President's death, resignation or permanent incapacity his functions shall be immediately assumed by Frelimo's Central Committee who shall nominate a new President.

Chapter IV: Council of Ministers

- 53-54. The Council of Ministers comprises the Ministers and Vice-Ministers of the Republic and is presided

over by the President of the Republic. It is answerable to the Assembly and must comply with resolutions of Frelimo's Congress, Central Committee and Executive Committee, laws of the Assembly and its Permanent Commission and decisions of the President of the Republic.

Chapter V: Administrative organization and local state organs

55. The Republic is administered in provinces, districts and localities.
57. The highest State organ in a province is the Provincial Government presided over by the governor, who is answerable to Frelimo and the Central Government.
58. There shall be a Provincial Assembly in each province.
60. The President of the Republic may annul decisions of the governors, Provincial Governments and Provincial Assemblies.

Chapter VI: Judiciary

62. Judicial functions shall be performed by the courts, through the Supreme People's Court and other courts provided for in the law on the judiciary.
64. The President of the Supreme People's Court is appointed by the President of the Republic.
65. The judiciary is independent.

Section IV: Symbols of the People's Republic of Mozambique

Section V: Final and transitional provisions

70. Pending the creation of the Assembly with constituent powers, any alteration to the Constitution is the task of Frelimo's Central Committee.
72. Until the People's Assembly starts to function, its legislative powers shall be exercised by the Council of Ministers.

Conduct of Elections

Elections to assemblies at the locality, district, provincial and national levels were held between September 25th and December 4th, 1977, under the control of Frelimo and on the basis of universal franchise for all citizens over 18 (with certain exceptions). These elections were conducted in accordance with the electoral law adopted at the first meeting of the People's Assembly, held with a provisional membership in August 1977.

NAMIBIA

(SOUTH WEST AFRICA)

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Capital

Namibia lies in south-west Africa, with South Africa to the south and south-east, Botswana to the east and Angola to the north. The narrow Caprivi Strip between Angola and Botswana in the north-east extends Namibia to the Zambezi river, giving it a border with Zambia. The coastal areas have mild temperatures though the territory is subject to droughts and unreliable rainfall, and includes the Namib Desert. The official languages are Afrikaans, German and English. The Europeans and substantial numbers of the African communities are Christians. The capital is Windhoek.

History

In 1920 the League of Nations granted South Africa a mandate over South West Africa. The interpretations of its obligations have been the subject of repeated controversy, and South Africa has been consistently criticized at the UN over its extension of apartheid to the territory. The UN General Assembly voted to terminate South Africa's mandate in October 1966; set up a UN Council for South West Africa in May 1967; and changed the name of the territory to Namibia in June 1968. The International Court of Justice considered the dispute five times and in 1971 South Africa's presence was ruled illegal.

In 1964 a South African government commission recommended setting up ten homelands for the territory's ethnic groups. Legislative Councils were created for the Ovambo Homeland in 1968 and others were formed during the following years but the system of tribal appointment for leadership continues in some homelands.

In 1972 the UN Security Council initiated contacts with South Africa in an attempt to resolve the deadlock over Namibia. These were abandoned in December 1973 and the Security Council ended contact with South Africa. The General Assembly recognized the South West African People's Organisation (SWAPO) as the sole representative of the Namibian people. SWAPO has a legal wing which is tolerated in Namibia, though its members are subject to harassment and detention without trial under South Africa's security laws, and an illegal external wing based in exile, both led by the SWAPO President, Sam Nujoma. The external wing controls the People's Liberation Army of Namibia (PLAN), whose guerrilla activities have steadily increased since its first operations in the 1960s.

During 1973 and 1974 South Africa became more flexible, influenced by events in Rhodesia and in the former Portuguese territories of Angola and Mozambique. The South African Prime Minister, B. J. Vorster, tried to create a multi-racial Advisory Council for the territory but it was boycotted by SWAPO and most influential Africans. In November 1974 the all-white South West Africa Legislative Assembly organized a multiracial constitutional conference on the territory's future which began at the Turnhalle in Windhoek in September 1975, attended by 134 delegates representing the territory's eleven main ethnic groups. Neither the UN nor the Or-

ganization of African Unity (OAU) recognizes the conference, owing to its ethnic and non-democratic basis and its exclusion of political organizations. In January 1976 the UN Security Council again ordered South Africa to withdraw its forces from Namibia and allow free elections. The South African Prime Minister undertook not to interfere if the Turnhalle conference invited the participation of delegates from the legal wing of SWAPO, a move advocated by many of the conference delegates. This was rejected by SWAPO, which declared that it would negotiate for Namibian independence directly with South Africa only after several preconditions, including the withdrawal of South African armed forces and the release of political prisoners, had been met.

In August 1976 the constitutional committee of the Turnhalle conference announced December 31st, 1978, as a target date for Namibian independence, that it should be a unitary state (a point previously resisted by the white delegates) and that an interim government was to be formed as soon as a constitution had been drafted. These proposals received South African backing but were rejected by SWAPO, the UN and the OAU, which stated that SWAPO was entitled to foreign military assistance in its struggle to liberate Namibia. In December the UN Committee on the Ending of Colonialism declared its support for the guerrilla war.

In March 1977 the Turnhalle conference agreed a draft constitution for an interim government pending the granting of independence by South Africa in December 1978. The plans envisaged a 3-tier system of municipal, provincial and national government headed by a 60-member National Assembly, with each ethnic group represented in proportion to its numbers, and an Executive Council of 11 ministers, including leaders of ethnic groups. SWAPO rejected the plan as a device to ensure continuing white control. After endorsement in May 1977 by 95 per cent of voters in a whites-only referendum, the proposals were dropped in June 1977 following pressure from the UN Security Council. In September 1977 South Africa appointed an Administrator-General (*see below*) to govern the territory and promised that free elections would be held in 1978. Unsuccessful negotiations to achieve an internationally recognized independence for Namibia were held between South Africa and the Western powers at the UN in February 1978, and South Africa indicated that it would continue to pursue an internal settlement.

Government

In September 1977 former South African Supreme Court Justice Marthinus J. Steyn was appointed by the South African Government as Administrator-General in the territory in preparation for independence on December 31st, 1978. All departments of government are subject to the Administrator-General's authority and policy decisions during this period. Namibian representation in the South African Parliament, which comprised six seats in the House of Assembly and four in the Senate, has been

NAMIBIA (SOUTH WEST AFRICA)

terminated and the South West African Legislative Assembly, elected by white voters, is now subordinate to the Administrator-General.

Defence

South African defence forces, estimated at 50,000 troops in 1977, are stationed in the territory. There have been frequent clashes with guerrilla forces of the People's Liberation Army of Namibia (PLAN), the military wing of SWAPO.

Economic Affairs

Namibia is rich in minerals, particularly diamonds, copper, lead, zinc, tin and vanadium. In 1976 revenue from mineral sales totalled R248 million. Consolidated Diamond Mines of South West Africa, the world's largest producer of gem diamonds, is based in Namibia. The huge uranium mine at Rössing is being jointly developed by the South African Industrial Development Corporation and the British company Rio Tinto-Zinc. An initial annual output of 5,000 metric tons of uranium oxide was expected in 1976 but, owing to technical difficulties, that figure is unlikely to be reached before 1978. No official statistics for production for Namibia have been issued since 1966, but it has been estimated that the G.D.P. is 30 per cent higher than the G.N.P. A large share of the national income is remitted abroad in the form of dividends and other payments. The fishing industry is second to mining, and is based on the production and processing of pilchards (sardines).

The major agricultural industries are the processing of meat and livestock products, including karakul pelts from the estimated 4.4 million karakul sheep in the territory. Manufacturing output is negligible. The gap between black and white workers' wages is larger than that in South Africa, and African wage levels are in general very low.

Transport and Communications

Since 1969 South Africa has increased expenditure on roads and railways and joint hydro-electric development schemes, initially with Portugal, but since 1975 with Angola. In 1972 there were 2,756 km. of tarred roads with a further 303 km. under construction. Most improvements

Introductory Survey, Statistical Survey

are concentrated on benefiting the southern, white-occupied zone.

Social Welfare

In 1973 there were 66 hospital establishments with 6,905 beds.

Education

The South African Government took control of education in 1921. A large-scale education development plan began only after 1964 with a Five-Year Plan in accordance with the Bantu Education Act of 1953. Education is based on *apartheid*, with separate facilities for different ethnic groups. A 1973 survey estimated that 69 per cent of black Namibians were illiterate. The South African Government forced the closure of over 170 independent church schools between 1922 and 1973.

Tourism

Tourism is considerably stimulated by the Etosha Pan, one of the finest game reserves in Africa. In 1972 an estimated 250,000 tourists visited Namibia, an increase of 34,000 over 1971 and 59,000 over 1970.

Sport

Sport is racially segregated. Rugby football is the most popular game.

Public Holidays

1978: May 4th (Ascension Day), May 31st (Republic Day), September 4th (Settlers' Day), October 10th (Kruger Day), December 16th (Covenant Day), December 25th-26th (Christmas).

1979: January 1st (New Year's Day), April 13th-16th (Easter).

Weights and Measures

The metric system is in use.

Currency and Exchange Rates

South African currency: 100 cents = 1 rand.

Exchange rates (December 1977):

£1 sterling = 1.596 rand;

U.S. \$1 = 87.0 South African cents.

NAURU

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag

The Republic of Nauru is a small island in the Central Pacific, lying about 41 km. south of the Equator and about 4,000 km. north-east of Sydney, Australia. The climate is tropical, with a westerly monsoon season from November to February. The average annual rainfall is 45.5 cm., but actual rainfall is extremely variable. About half the population are Nauruans. Their language is Nauruan but English is widely understood. Most Nauruans belong to the Nauruan Protestant Church. The national flag (proportions 2 by 1) is blue, divided by a horizontal gold bar, with a 12-pointed white star at the lower left.

Recent History

A former German colony, the island was occupied by Australia during the 1914-18 war. The island continued under the administration of Australia under a League of Nations mandate which also named the United Kingdom and New Zealand as co-trustees. Between 1942 and 1945 Nauru was occupied by the Japanese. In 1947 the island was placed under United Nations Trusteeship, with Australia as the administering power on behalf of the Governments of Australia, New Zealand and the United Kingdom. The UN Trusteeship Council proposed in 1964 that the indigenous people of Nauru be resettled on Curtis Island, off the Queensland coast. This offer was made in anticipation of the progressive exhaustion of the island's phosphate deposits. The Nauruans elected to remain on the island, and studies were put in train in 1966 for the shipping of soil to the island to replace the phosphate rock. Nauru received a considerable measure of self-government in January 1966, with the establishment of Legislative and Executive Councils, and proceeded to independence on January 31st, 1968. Nauru is a "special member" of the Commonwealth but is not represented at meetings of Heads of Government.

The Head Chief of Nauru, Hammer DeRoburt, was elected President in May 1968 and re-elected in 1971 and 1973. Dissatisfaction with his increasingly personal rule led to the Parliamentary election of a new President, Bernard Dowiyogo, in December 1976 and the formation of a new Cabinet. In 1977 the Opposition, led by Hammer DeRoburt, unsuccessfully challenged the legality of a controversial Supply Act passed in June. The Government later resigned, and a general election was held in November 1977. Bernard Dowiyogo's Nauru Party was returned with a small majority, and he was re-elected President.

Government

Legislative power is held by a unicameral Parliament, with 18 members elected by universal adult suffrage for up to three years. Executive power is held by the President, who is elected by Parliament for its duration and governs with the assistance of an appointed Cabinet, responsible to Parliament.

Economic Affairs

The island's economy is based on phosphate mining, which is manned largely by indentured labour. About four-fifths of the area is phosphate-bearing rock, but deposits are expected to be exhausted by 1992, by which time, it is hoped, Nauru will be able to derive economic security from its shipping and civil aviation services and from its proposed role as a tax haven for international business.

In March 1977 Nauru opened a multi-storey office block in Melbourne, financed from phosphate revenues. It will serve as a Nauruan office in Australia as well as a capital investment. The Nauru Phosphate Corporation is reclaiming worked-out phosphate land for possible use in the small tourist industry.

Social Welfare

The Government maintains a comprehensive social welfare system which provides housing and free medical treatment for all citizens.

Education

Education is free and compulsory for Nauruan children between the ages of 6 and 16. In 1975 there were six infant schools, three primary schools and two secondary schools, with 1,501 pupils at primary level and 472 at secondary level. Local teacher training is supplemented by cadetships in Australia, and in 1975 there were approximately 130 teachers on the island.

Sport

Australian Rules football and softball are played.

NEPAL

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Kingdom of Nepal is a landlocked country in the Himalaya mountain range, between India and the People's Republic of China. The climate varies sharply with altitude. The central Valley of Kathmandu is warm and sunny in summer with an average annual temperature of 11°C (62°F). Winter temperatures fall below zero at times in January. The official language is Nepali, spoken by 52 per cent of the population in 1971. Other languages include Maithiri (11.5 per cent) and Bhojपुरी (7 per cent). Nearly 90 per cent of the population are Hindus, with 7.5 per cent Buddhists and 3 per cent Muslims. The national flag (proportions 3 by 4) is comprised of two crimson pennants, each with a blue border. The upper section is charged with a white crescent moon and the lower section with a white sun in splendour. The capital is Kathmandu.

Recent History

Nepal is a hereditary monarchy but for more than 100 years, until 1951, effective power was held by the Rana family, who created the post of hereditary Prime Minister. In 1950-51 a popular revolution toppled the Ranas and restored King Tribhuvan to power. A limited constitutional monarchy was established in February 1951.

During most of the 1950s government was controlled by the monarchy, first under Tribhuvan and then, after his death in March 1955, under his son, Mahendra. In February 1959 King Mahendra promulgated Nepal's first constitution, providing for a bicameral Parliament, including an elected Lower House. Elections took place between February and April 1959, resulting in victory for the Nepali Congress, led by B. P. Koirala, who became Prime Minister in May.

In a royal coup in December 1960 the King dismissed the Cabinet and dissolved Parliament. A royal decree of January 1961 banned political parties. The King accused the Koirala administration of corruption and misuse of power, and claimed that Nepal was not ready for parliamentary institutions. In December 1962 he introduced a new constitution, reasserting royal power and providing for a party-less system of government based on the Panchayat (village council).

In January 1972 King Mahendra died and was succeeded by his son, who was crowned as King Birendra Bir Bikram Shah Dev in February 1975. In December 1975 Nagendra Prasad Rijal resigned as Prime Minister and was succeeded by Dr. Tulsī Giri. The new Government made major changes to the Constitution, the most significant of which established the influential "Back To the Village" National Campaign committee as a constitutional body with control over political affairs and Panchayat activities.

The former Prime Minister and advocate of parliamentary democracy, B. P. Koirala, was arrested in 1976 on his return from India to Nepal, where he had been living in exile since 1968. In 1977 it was announced that Koirala would be tried for treason. King Birendra, whilst regarding Koirala's presence as a danger, has made a public call for more genuine popular participation in the political process.

Some of Nepal's political prisoners have been released, including some prominent opposition figures, but at the end of 1977 there were still about 100 remaining in detention.

In September 1977 Dr. Tulsī Giri resigned as Prime Minister, after being accused of corrupt practices and failing to balance Nepal's relations with India and China. Kirti Nidhi Bista took over as Prime Minister and a new 25-member Council of Ministers was appointed.

Another challenge to King Birendra's system emerged in 1977 in the form of a joint statement issued by an alliance of four politicians, backed by the Soviet Union, demanding the revival of a multi-party parliamentary democracy and the restoration of fundamental rights.

Nepal seeks good relations with both India and China, whilst maintaining a policy of "equidistance" between the two countries. However, landlocked Nepal is very dependent on India, through which all Nepal's trade must pass. In September 1977 Bista stated his intention to consolidate Nepal's "extensive relations" with India. During the visit of Morarji Desai, the Indian Prime Minister, to Nepal in December 1977, India conceded the Nepalese demand to replace the old Trade and Transit Treaty between the two countries by two separate treaties allowing Nepal to expand freely its trade with other countries.

Nepal signed a friendship treaty with China in 1956 and a border agreement in 1961. In January 1978 Nepal signed two treaties with Bangladesh, setting up a joint economic commission and providing for cultural exchanges between the two countries.

Government

Nepal is a constitutional monarchy. Executive power is vested in the King, who presides over the unicameral legislature, the Rashtriya Panchayat (National Assembly), from whose 135 members he also selects a Prime Minister and Cabinet. The Panchayat system is four-tiered. Village councils are elected, whose members then elect district councils, whose members elect zonal councils, whose members elect 112 members of the National Panchayat. The remaining 23 members of the National Panchayat are nominated by the Crown. The term of office of the National Panchayat is four years. No political parties are allowed under the Panchayat system. A constitutional body was formed in 1975 to watch over political affairs and to propagate Panchayat ideology.

For local administration, Nepal is divided into 14 zones, each headed by an appointed Commissioner.

Defence

Nepal has an army of 20,000 men. Military service is voluntary. Nepal spent 146 million rupees on defence in 1975.

Economic Affairs

Much of the country is heavily forested and too steep for cultivation, yet 92 per cent of the population depend on agriculture. The agricultural settlements are confined to

the Kathmandu valley and wider sections of the river valleys and there is a small exportable surplus of food-stuffs. Steps are being taken to develop agriculture with particular emphasis on irrigation. Cotton-growing is being introduced into the western Terai region.

The only mineral so far discovered in significant quantities is mica, mined east of Kathmandu; there are also small deposits of lignite, copper, cobalt and iron ore. Nepal's rivers have a potential for hydro-electric power production. Two hydro-electric projects are under way, costing more than U.S. \$1,000 million in international aid. The projects are expected to become productive in the late 1980s and could supply all the energy requirements of northern India. In 1977 India agreed to assist Nepal in the planning and erection of four other hydro-electric projects.

A New Industrial Development Policy, implemented in 1974/75, encouraged new industries in the private sector. The fifth Five-Year Plan (1975-80) envisages setting up new industries, including cotton textiles, vegetable oil and paper and pulp, in both private and public sectors. The jute, timber and tourist industries are the major earners of foreign currency. However, jute exports suffered because of fire at factories in Biratnagar in 1976, and forest is disappearing at an annual rate of 8 per cent in spite of the Government's reafforestation scheme.

Nepal's major trading partner is India, taking more than 80 per cent of its foreign trade, and almost all Nepal's imports pass through the port of Calcutta. In 1974 India increased the prices to Nepal of many previously subsidized goods. Nepal renewed trade agreements with the People's Republic of China and North Korea in 1975, and imports of oil from the U.S.S.R., which began when India suspended supplies in 1974, met Nepal's oil requirements almost entirely in 1976.

The fifth Five-Year Plan (1975-80) envisages expanding agricultural production by almost 20 per cent. Foreign aid will finance 45 per cent of the total outlay. Nepal receives aid from the U.S.A., the People's Republic of China and India as well as from Europe. In 1975 Kuwait agreed to finance the Kulekhani hydro-electric power project, and Iran agreed to assist with development of tourist facilities.

Nepal is one of the 25 least developed nations on the World Bank scale. Between 1967 and 1975 the average real growth in Nepal's gross domestic product, of 2.2 per cent per year, was absorbed by an identical registered population increase. The gross national product per capita remained about U.S. \$111.

Transport and Communications

There are short sections of motorable roads around Kathmandu and a mountain road links the capital with the Indian railhead at Raxaul. Heavy goods on this route are transported by a 42-kilometre ropeway from Hetauda to Kathmandu. A number of important new roads have been built, notably that linking Kathmandu and the Tibetan border at Kodari, and others are under construction, including the 992-kilometre Mahendra Highway and the 400-kilometre Pokhara-Surkhet Road. There are two sections of railway totalling 100 kilometres. Coolies,

however, are still the principal means of transport; supplemented by ponies, mules and yaks in the more open upper valleys. A national shipping corporation was set up in 1971. Regular air services link India, Thailand and the larger towns in Nepal. Nepal has telegraph links with both India and Pakistan.

Social Welfare

In 1975 hospital beds totalled 2,148, less than one for every 5,000 of the population; and there was one physician for every 33,000. The fifth Five-Year Plan envisages building 24 new hospitals and increasing the number of health centres from 351 to 459.

Education

Free primary education for five years was introduced in government schools in 1975 and it is expected that by 1980 64 per cent of primary school-age children will be enrolled. In 1974/75 primary school pupils totalled some 458,000 and there were about 250,000 pupils at over 1,800 secondary and higher educational establishments. A national education plan with a vocational emphasis was introduced in 1971 to ensure greater manpower utilization. There is one university. In 1971 adult illiteracy averaged 87.5 per cent (males 77.6 per cent, females 97.4 per cent).

Tourism and Sport

Tourism is being developed by the construction of new tourist centres in the Kathmandu valley and regular air services link Kathmandu with Pokhara Lake. Mountaineering requires large-scale organization and Sherpa porters may be engaged. Big game hunting can be found in the "Terai" of southern Nepal. Major tourist attractions include Lumbini, the birthplace of Buddha, and Mount Everest. Over 92,000 tourists visited Nepal in 1975.

Visas are required by nationals of all countries except India.

Public Holidays

THE CONSTITUTION

(Promulgated December 1962, amended in 1967 and 1976)

GOVERNMENT

The Constitution of Nepal comprises a constitutional monarchy with executive power vested in the King but ordinarily exercised on the recommendation of a Cabinet led by a Prime Minister, selected by the King from among the membership of the National Panchayat or Assembly. The Cabinet is responsible to the Panchayat but the King has power to grant or withhold assent to Bills at his discretion.

STATE COUNCIL

The Constitution also provides for a State Council which will declare upon the succession or appoint a Regency Council, besides giving advice to the King in times of emergency.

LEGISLATURE—RASHTRIYA PANCHAYAT

The Rashtriya (National) Panchayat, which is at the apex of the party-less Panchayat system of democracy, is

NEPAL

the supreme national unicameral legislature, comprising 133 members, 112 of whom are elected from among the members of the Anchal Sabhas (Zonal Councils), who in turn are elected from among the members of Zilla Sabhas (District Councils) who, again in turn, are elected from the Gaon Sabhas (Village Councils). In other words, membership of the Rashtriya Panchayat is based on the popular election of Local Panchayat (which is the basic unit of the four-tiered Panchayat System), from each of which members choose from among themselves representatives for District Panchayat. They may advance by similar stages to the zonal and then to the Rashtriya Panchayat. The remaining members are nominated by the Crown according to the Constitution.

The Rashtriya Panchayat is a perpetual body whose members are elected from Zonal Councils and serve a fixed term of four years. House proceedings are open to the public. A summary record of the proceedings of every meeting of the House or its committees is published.

Bills to the House are presented by the Committees of the House, in consultation with Ministers. The annual budget is submitted to the House for consideration, deliberation and adoption. And in order that these legislative tasks be conducted with becoming dignity and

The Constitution, The Government, National Panchayat

efficiency, the members of the House fully enjoy the privilege of freedom from arrest for anything spoken in the House or the manner in which voting is exercised.

CITIZENS' RIGHTS AND DUTIES

Besides enumerating a number of fundamental rights, including the right against exile, the Constitution lays down a series of fundamental duties of the citizen.

AMENDMENTS

Amendments to the 1962 Constitution, adopted in 1967 and 1976, include the following: Prime Minister to be appointed by the King who may, if he wishes, consult the National Panchayat; Ministers to be collectively and individually responsible to the King; King to appoint directly the Zonal Commissioners who are to enjoy greater powers than the Chairmen of Zonal Panchayat Assemblies; Speaker of the House to be appointed by at least two-thirds of Rashtriya Panchayat; Associations for non-political purposes allowed but political parties continue to be banned; provision for appointment of an independent Election Commission; the country to be divided into four zones for electoral purposes, with elections for all elective bodies every four years on a rotational basis; elected members of National Panchayat can be recalled.

ROADS

There are over 3,000 kilometres of roads, of which about 1,700 are metalled. Around Kathmandu there are short sections of motorable roads and there is a 28 km. ring road round the valley. A mountain road, Tribhuvana Rajpath, links the capital with the Indian railhead at Raxaul. The Siddhartha Highway, constructed with

Trade and Industry, Transport, Tourism, University

Indian assistance, connects the Pokhara Valley in mid-west Nepal with Sonauli on the Indian border in Uttar Pradesh. A British-built section of 40 km. links Butwal with Barghat. Mahendra Highway will have a total length of 992 km. of which 655 km. had been completed in 1976. Construction of the 400 km. Pokhara-Surkhet road began in 1974 and this will eventually be linked to the 149 km. all-weather highway which stretches from Dhangadhi to Dedelhura in the west.

A fleet of container trucks operates between Calcutta and Raxaul and other points in Nepal for transporting exports to, and imports from, third countries. Trolley buses provide a passenger service over the 13 km. between Kathmandu and Bhaktapur.

RAILWAYS

The 53 kilometres long Janakpur Railway links Jayanagar (India) with Janakpurdham and Bijalpura. Another section of railway 48 kilometres long (the Nepal Government Railway) links Raxaul to Amlekhganj. Between Raxaul and Birgunj 5 kilometres away this railway is used for goods transportation.

ROPEWAY

A 42-kilometre ropeway links Hetauda and Kathmandu and can carry 25 tons of freight per hour throughout the year. Food grains, construction goods and heavy goods on this route are transported by this ropeway.

THE NETHERLANDS ANTILLES

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Netherlands Antilles consist of two groups of islands in the Caribbean, some 800 km. apart. The main group, lying off the coast of Venezuela, consists of Aruba, Bonaire and Curaçao which are known as the "Leeward Islands"; to the north lie the small volcanic islands of St. Eustatius, Saba and St. Maarten (the northern half of the latter island being part of the French dependency of Guadeloupe), known as the "Windward Islands" (though actually in the Leeward group of the Lesser Antilles). The climate is tropical, moderated by the sea, with temperatures averaging 27.5°C (81°F), and little rainfall. The official language is Dutch. The dominant language of the "Leeward Islands" is Papiamentu, a mixture of Dutch, Spanish, Portuguese, English and African dialect, and that of the "Windward Islands" is English. Spanish is also spoken. The population of the "Leeward Islands" and Saba is predominantly Roman Catholic whereas that of St. Eustatius and St. Maarten is predominantly Protestant. The state flag (proportions 3 by 2) has a red vertical stripe on a white background, crossed by a horizontal blue stripe charged with six white five-pointed stars arranged in an oval. The capital is Willemstad in Curaçao.

Recent History

Although first discovered by Spanish explorers in 1499, the Netherlands Antilles have been in Dutch possession since the seventeenth century. In 1954 a Charter gave the islands full autonomy in domestic affairs. In May 1969, severe workers' riots in Curaçao brought about the resignation of the Prime Minister; elections were held in October. In February 1970, the socialist Government of Ciriaco De la Cruz resigned over the nomination of a new Governor and in 1971 the Government of E. Petronia resigned over the defeat in the *Staten* of new financial measures. Elections were held in August 1973, and Juancho Evertsz became Prime Minister. Negotiations have taken place with the Dutch Government with the aim of achieving independence, in the form of a federation, by 1980. In March 1977 a referendum was held on Aruba on the question of independence outside the proposed federation. An overwhelming majority voted for separate independence as a reaction against alleged political domination by Curaçao. The June elections for a new *Staten* resulted in gains for the Democratic Party (DP). A coalition Government, excluding the *Movimiento Electoral di Pueblo* (MEP), of Aruba, was formed with the DP's leader, S. Rozendal, as Prime Minister. However, the swearing in of members of the *Staten* and the Cabinet was delayed by an MEP and *Frente Obrero* boycott of the *Staten* session. The *Staten* was eventually convened by a Governor's decree in October, although MEP members refused to take the oath in protest against the Governor's action.

Government

The Governor of the Netherlands Antilles, appointed by the Crown, represents H.M. Queen Juliana of the Netherlands. He has executive power over external affairs and is assisted by an Advisory Council. Executive power in internal affairs is vested in the Council of Ministers. The

Council is responsible to the *Staten* (legislature) of 22 members elected by universal adult suffrage. The administration of each of the four island groups of Curaçao, Aruba, Bonaire and the "Windward Islands" is in the hands of an Island Council, an Executive Council and a Lieutenant-Governor.

Defence

Although defence is the responsibility of the Netherlands, compulsory military service is laid down in an Antilles Ordinance. The Governor is the Commander-in-Chief of the armed forces in the islands and a naval contingent is stationed in the Netherlands Antilles.

Economic Affairs

Agriculture is comparatively unimportant although efforts are being made by the Government to promote farming, cattle raising and horticulture. The chief products are aloes (Bonaire is a major exporter), sorghum, divi-divi, groundnuts and beans, fresh vegetables and tropical fruit. The chief industry is oil refining; Curaçao and Aruba have become increasingly important with the development of the Venezuelan oil industry. The Shell refinery at Curaçao (capacity 360,000 barrels per day) and that of Lago Oil in Aruba (capacity 440,000 barrels per day) are among the largest in the world. Oil refining accounts for about 95 per cent of exports by value.

Under the Multi-Annual Development Plan (1962-76), financed by the Netherlands, the Government's aim was to improve the islands' infrastructure and diversify the economy. Efforts were made to attract non-oil manufacturing industries and an electronics plant and two chemical plants were set up in the late 1960s. One of the largest dry docks in the western hemisphere, capable of handling ships of 120,000 d.w.t., was established in Curaçao. There are also two oil transshipment terminals on Aruba and Curaçao and a further terminal was completed on Bonaire in 1976.

The economy was severely affected by the oil crisis in 1973, and by mid-1974 the oil refineries were operating well below capacity. The non-oil manufacturing sector suffered from the adverse effects of the world recession and the electronics plant on Curaçao was closed down in 1975. Also, a system of free zones, in which goods imported for re-export are not subject to import duties, has met with rather limited success in its aim to develop the Netherlands Antilles into a major distribution centre.

These economic difficulties resulted in a 20 per cent unemployment rate in 1975, the most severely affected island being Curaçao, which relies heavily on the declining oil industry. The other islands, in particular Aruba, benefited from the growth in tourism in the 1970s. The economy showed signs of recovery in 1976: a thermic plant for high quality products was completed at the Shell refinery, oil transshipment activities expanded and the construction began of an oil terminal on St. Eustatius. Dry dock activities also expanded and tourism continued its growth in 1976.

NETHERLANDS ANTILLES

Introductory Survey, Statistical Survey

Education

Education is not compulsory. The Government spends about a third of the budget on education and there are good facilities. In 1974 there were 126 primary schools, three-quarters of which were private. There is very little illiteracy.

Transport and Communications

There are no railways. All the islands have a good system of all-weather roads. Each island has a good harbour and an airport. There are international airports on Curaçao, Aruba and St. Maarten, while Bonaire, St. Eustatius and Saba have air strips for inter-island flight.

Tourism

Tourism is a major industry on all the islands and several new hotels have been built on Aruba. Tourism by cruise ships continues to expand.

Visas are not required by nationals of Belgium, Bolivia,

Chile, Colombia, Ecuador, Luxembourg and the Netherlands.

Public Holidays

1978: May 1st (Labour Day), May 4th (Ascension), May 15th (Whit Monday), December 15th (Statute Day), December 25th-26th (Christmas).

1979: January 1st (New Year's Day), April 13th (Good Friday), April 16th (Easter Monday), April 30th (Queen's Birthday).

THE CONSTITUTION

The form of government for the Netherlands Antilles is embodied in the Charter of the Kingdom of the Netherlands, which came into force on December 29th, 1954. The Netherlands and the Netherlands Antilles each enjoy full autonomy in domestic and internal affairs and are united on a footing of equality for the protection of their common interests and the granting of mutual assistance.

Whenever the Netherlands Council of Ministers is dealing with matters coming under the heading of joint affairs of the realm (in practice mainly foreign affairs and defence) the Council assumes the status of Council of Ministers of the Kingdom. In that event the Minister Plenipotentiary appointed by the Government of the Netherlands Antilles takes part with full voting powers in the deliberations.

A legislative proposal regarding affairs of the realm and applying to the Netherlands Antilles as well as to the metropolitan Netherlands is sent, simultaneously with its submission to the Netherlands Parliament, the States-General, and to the legislature (*Staten*) of the Netherlands Antilles. The latter body can report in writing to the States-General on the draft Kingdom Statute and designate one or more special delegates to attend the debates and furnish information in the meetings of the Chambers of the States-General. Before the final vote on a draft the Minister Plenipotentiary has the right to express an opinion on it. If he disapproves of the draft, and if in the Second Chamber a three-fifths majority of the votes cast is not obtained, the discussions on the draft are suspended and further deliberations take place in the Council of Ministers of the Kingdom. When special delegates attend the meetings of the Chambers this right devolves upon the delegates of the parliamentary body designated for this purpose.

Executive power in internal affairs is vested in a nominated Council of Ministers, who are responsible to the legislature (*Staten*). The Netherlands Antilles *Staten* consists of 22 members elected by universal adult suffrage. Every island group is an electoral district. Aruba elects eight members, Bonaire one member, the Netherlands "Windward Islands" one member and Curaçao 12 members. In the island groups where more than one member is elected, the election is by proportional representation. Inhabitants have the right to vote if they have Dutch nationality and have reached the age of 18. Voting is not compulsory. Candidates for election to the *Staten* must be electors who are at least 21 years old. The *Staten* is elected for four years and has the right of amendment, of inquiry, of interpellation and of initiative. The budget must be approved by the *Staten*.

The Governor, as representative of the Crown, has executive power in external affairs which he exercises in co-operation with the Council of Ministers. He is assisted by an Advisory Council which consists of at least five members appointed by him.

In its programme, published in August 1977, the new Government agreed *inter alia* to give each of the six islands a separate constitution, in addition to the national constitution and with any disputes to be submitted to an independent court. Matters reserved for the national Government were to include control of the police, posts and telecommunications, monetary affairs and customs. The islands of Saba and St. Eustatius were each to be given a representative in the *Staten* who would provisionally have observer status. These provisions were to supersede previous constitutional arrangements.

THE GOVERNMENT

Governor: Dr. B. M. LEITO.

THE NEW HEBRIDES

The New Hebrides, including the Banks and Torres Islands, form an archipelago of some 70 islands in the south-western Pacific Ocean, stretching from south of the Solomon Islands to the East of New Caledonia. The group extends for about 800 kilometres from north to south. The winter months are fairly cool, and hurricanes occur during the summer months (December to April). Vila, the capital, has an average year-round humidity of 83 per cent and an average annual rainfall of about 2,300mm.

Since 1906 the islands governed as an Anglo-French Condominium. Under this arrangement each power have been responsible for its own citizens and other non-New Hebrideans who choose to be "ressortissant" of either power.

In 1974 a Representative Assembly was established but this did not satisfy nationalist aspirations, led by the Vanuakaku Party (formerly the National Party) which in 1975 won a majority of the elected seats in the Assembly.

The Vanuakaku Party (VP) boycotted the second session of the Representative Assembly which opened in February 1977, and the Assembly was subsequently dissolved. However, the VP succeeded in reaching an agreement with the Condominium powers for new elections to be held on the basis of universal adult suffrage for all seats.

In July it was announced at a conference in Paris between British, French and New Hebridean representatives that the islands would be given full independence in 1980, following elections and a referendum on independence; the VP refused to attend the talks on the grounds that the party seeks immediate independence.

New elections were held on the basis of universal suffrage in November 1977; these were also boycotted by the VP after their demands to lower the voting age from 21 to 18, the right to form a government and a referendum on independence were rejected. They declared a "People's Provisional Government" and civil unrest ensued. Nevertheless, a new Government was formed in January 1978.

A measure of self-government was introduced early in 1978; a Council of Ministers and the office of Chief Minister were established, and the French, British and Condominium Services were being replaced by a single New Hebrides Public Service.

During 1977 the New Hebridean nationalist movement adopted militant methods to focus attention on what the VP described as "the maldistribution of land between New Hebrideans and Europeans", the former constituting 95 per cent of the population and holding 64 per cent of the land while the latter constituted 3 per cent of the population and owned 36 per cent of the land.

STATISTICAL SURVEY

Area: 14,763 square kilometres (12 large and 60 small islands forming a double chain of islands about 800 kilometres long).

Population (1967 Census): 77,898 (72,243 indigenes). Est. population at June 30th, 1977: 99,325; Vila (capital) 16,604 (December 31st, 1975).

Employment: The native population is mainly engaged in peasant agriculture, producing both subsistence and cash crops. Most Europeans are employed in commerce or government service.

Agriculture: 95,000 hectares are cultivated; there are 16,000 hectares of forest. Production (1976—metric tons, FAO estimates): coconuts 260,000, copra 40,000, meat 1,000; small quantities of cocoa and coffee.

Livestock: (1976—FAO estimates): Cattle 110,000, Pigs 64,000, Goats 7,000, Poultry 131,000.

Fishing: 8,000 metric tons per year (FAO estimate); (1975) 5,218 metric tons of frozen fish.

Mining: (1976) 45,208 tons of manganese exported.

Finance: Australian and local currency are both legal tender.

100 cents = 1 Australian dollar (\$A). Coins: 1, 2, 5, 10, 20 and 50 cents. Notes: 1, 2, 5, 10, 20 and 50 dollars; Exchange rates (December 1977): £1 sterling = \$A1.622; U.S. \$1 = 88.2 Australian cents; \$A100 = £61.64 = U.S. \$113.35. Note: For previous changes in the exchange rate, see the chapter on Australia, Volume I.

100 centimes = 1 New Hebrides franc (franc néo-hébridais or FNH). Exchange rates (December 1977): 1 FNH = 6.1875 French centimes; £1 sterling = 142.93 FNH; U.S. \$1 = 78.02 FNH; 1,000 FNH = £7.00 = U.S. \$12.82.

The currencies are locally interchangeable at the rate of \$A1 = 90 FNH (February 1978).

Condominium Budget (1976 recurrent): Revenue \$72 million FNH; Expenditure \$78 million FNH.

British Budget (1974/75): Revenue \$A4,450,453; Expenditure \$A4,220,528.

French Budget (1976): Revenue 1,496 million FNH; Expenditure 1,497 million FNH.

External Trade (1976, provisional): *Imports:* 2,628 million FNH (chief items rice, canned foods, beer and wines, building materials, petrol and fuel oils, clothing, textiles, machinery, vehicles and spares). *Exports:* 1,292 million FNH (chief items frozen fish, copra; others: timber, manganese, cocoa, frozen and canned beef). Principal trading partners are Australia, France, Japan and U.S.A.

Transport (1976): *Roads:* 4,254 vehicles. *Shipping:* 412 ships called at New Hebrides ports. *Aviation:* 922 aircraft landed at Vila.

Tourism: In 1976 48,742 cruise ships passengers arrived in the New Hebrides and a further 17,929 visitors arrived for longer stays. Visitors are mainly from Australia and New Caledonia.

Education (1977): *British National Service:* 136 primary schools, 9,864 pupils; 5 secondary schools, 1,021 pupils. *French National Service:* 111 primary schools, 10,818 pupils; 2 secondary schools, 1,030 pupils.

THE CONSTITUTION

In 1902 Joint Deputy Commissioners were appointed by Britain and France and in 1906 an Anglo-French Convention established the Condominium as a Joint Administration. Until 1978 there were three elements in this structure of administration: the British National Service, the French National Service and the Condominium (Joint) Departments. An Advisory Council was set up in 1957 but replaced by a Representative Assembly of 42 members in 1975.

A single New Hebrides Public Service was being established in 1978 to replace the former administration. The Representative Assembly was dissolved in 1976, following a boycott by the Vanuakaku Party, and elections for a new 39-member Representative Assembly were held on the basis of universal adult suffrage for all seats in November 1977. The Assembly elected a Chief Minister and a Chairman in December 1977. Early in 1978 the Chief Minister appointed a Council of Ministers, responsible to the Representative Assembly. The Chief Minister is head of the

THE NEW HEBRIDES

local administration but certain matters, particularly those relating to defence, external affairs, foreign exchange and security, remain reserved to the administering powers until independence, which is planned for 1980.

More than half the islands have local authorities and in 1975 the municipal authorities of Vila and Santo were created.

THE GOVERNMENT

British High Commissioner: R. J. STRATTON (resident in London).

French High Commissioner: JEAN-GABRIEL ERIAU (resident in Nouméa, New Caledonia).

British Resident Commissioner: JOHN S. CHAMPION, C.M.G., O.B.E.

French Resident Commissioner: BERNARD POTTIER.

(The High Commissioners act locally through the Resident Commissioners).

COUNCIL OF MINISTERS

Chief Minister: G. KALSAKAU (Natatok).

Minister of Finance: M. G. PREVOT (Tan Union).

Minister of the Interior: V. BOULEKONE (Tan Union).

Minister of Transport, Posts and Telecommunications: L. DINI (Federation of Independents).

Minister of Natural Resources: A. RAVUTIA (Tan Union).

Minister of Trade, Industry and Tourism: AIMÉ MALÉRE (MANH).

The Council of Ministers was appointed by the Chief Minister following the first meeting of the Representative Assembly in December 1977. The Council comprised six members in February 1978; the Chief Minister offered a further three posts to the Vanuaaku Party, but the invitation was declined.

REPRESENTATIVE ASSEMBLY

A 39-member Representative Assembly was established in 1977; members are elected on the basis of universal adult suffrage for a three-year term.

In February 1978 the Tan Union held 17 of the 39 seats, the MANH/Na Grialmel 12 seats, Natatok 5 seats and non-party members 4 seats. One seat remained vacant. The Vanuaaku Party, which held a majority of the elected seats in the previous assembly, boycotted the 1977 elections.

Chairman: M. CARLOT.

POLITICAL PARTIES

MANH/Na Grialmel: Vila; f. 1977; a loose alliance of the Mouvement Autonomiste des Nouvelles-Hébrides (MANH, f. 1974) and Na Grialmel (f. 1963); seeks involvement of Melanesians in creating a political structure and the return of land to the indigenes; MANH Pres. AIMÉ MALÉRE; Na Grialmel Pres. JIMMY STEVENS.

Natatok: Vila; f. 1977; mainly Anglophone party based on the island of Efate; pro-independence.

Tan Union: Vila; f. 1977 by an alliance of the Union des Communautés Néo-Hébridaises (f. 1974) with the smaller Tabwemasana, Kapiel, John Frum and Freu Mélanésie parties; its broad policy is to work gradually for a viable independence; Sec.-Gen. V. BOULEKONE.

Vanuaaku Party (formerly National Party): f. 1972; aims at immediate independence from Franco-British administration and more power for the indigenes and for the return of their lands; Pres. Rev. WALTER LINI.

The Constitution, The Government, Political Parties, etc.

JUDICIAL SYSTEM

CONDOMINIUM COURTS

The Joint Court: comprises a British Judge and a French Judge who alternate as President and are assisted by a Public Prosecutor, a Registrar and a Native Advocate.

British Judge: Sir LOUIS GEORGES SOUYAVE.

French Judge: L. CAZENDRES.

Courts of First Instance: In each District. The court has jurisdiction over all offences committed against Joint administrative regulations. Composed of British and French District Agents or full-time magistrates sitting with one assessor.

NATIONAL COURTS

For all suits between non-natives, except for certain land claims.

NATIVE COURTS

Composed of one of the two Agents of the District sitting with two native assessors. Their jurisdiction covers all criminal offences committed by natives.

By early 1978 work was well advanced on the unification of the criminal law and court system, with the aim of setting up a single system based on British criminal procedures and the French penal code.

RELIGION

Most of the inhabitants are Christian. Twelve Protestant groups are represented, including Presbyterian and Church of Melanesia (Anglican). The Roman Catholic Church is also well established.

Church of Melanesia: Bishop: The Rt. Rev. D. A. RAWCLIFFE; Lolowai, Longana.

Roman Catholic: Bishop of Port Vila: Rt. Rev. LOUIS JULLIARD; B.P. 59, Port Vila.

THE PRESS

There are no independent daily or weekly newspapers.

New Hebrides News: British Residency; f. 1955; fortnightly; circ. 2,500.

Nabanga: French Residency; f. 1975; fortnightly tabloid; circ. 1,600.

Vanuaaku Viewpoints: quarterly journal published by the Vanuaaku Party, Vila.

RADIO

Radio Vila: P.O.B. 90, Port Vila; f. 1966; broadcasts in English, French and Bislama; Mans. R. J. MAKIN, J. MASSIAS.

In 1977 there were 15,000 receivers.

FINANCE

New Hebrides is rapidly developing as a tax-haven. There are a growing number of banks, exempted from tax, largely administered by trust companies. Banque de l'Indochine et de Suez, Barclays International, Bank of New South Wales, National Bank of Australasia, Hong Kong and Shanghai Bank, Australia and New Zealand Bank, Commercial Bank of Australia have branches in the New Hebrides.

TRANSPORT

ROADS

In 1975 there were 640 km. of roads, 384 km. of which consisted of seasonal earth motor tracks.

SHIPPING

The principal ports are Vila and Santo.

Burns Philp (New Hebrides) Ltd.: P.O.B. 27, Port Vila, P.O.B. 28, Santo; sole IATA and local airline travel; agents for regular services linking the New Hebrides with Australia, New Zealand, Japan, Fiji, the Solomon Islands and Papua New Guinea.

The New Hebrides are served by Compagnie Maritime, Bank Line, Sofrana-Unilines, CN Co. and Daiwa Navigation Co.

There are also other passenger and cargo services linking the New Hebrides with the United Kingdom, Australia and New Zealand.

CIVIL AVIATION

The principal airports are Bauer Field (Efate) and Pekoa (Santo).

Air Melanesia: P.O.B. 72, Hong Kong and New Zealand House, Vila; f. 1966; operates internal regular and charter service under the auspices of New Hebrides Airways and Société Française Air Hébrides, a subsidiary of Union des Transports Aériens.

The New Hebrides are also served by Air Nauru, Air Pacific and Union des Transports Aériens.

NEW ZEALAND

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

New Zealand lies in the South Pacific Ocean, 1,100 miles south-east of Australia. It consists of North Island and South Island, separated by the narrow Cook Strait, and several smaller islands, including Stewart Island in the south. The climate is moderate, with an average temperature of 12°C (52°F), except in the far north where higher temperatures are reached. The language is English and the Maori population also uses its own tongue. About 35 per cent of the population are Anglicans, 22 per cent Presbyterian and 16 per cent Roman Catholics, with the remainder belonging to other Christian denominations. The national flag (proportions 2 by 1) is blue, with a United Kingdom flag as a canton in the upper hoist. In the fly are four five-pointed red stars, edged in white, in the form of the Southern Cross. The capital is Wellington, on North Island.

Recent History

New Zealand is a former British colony. It became a dominion, under the British Crown, in 1907 and achieved full independence by the Statute of Westminster, passed by the British Parliament in 1931 and accepted by New Zealand in 1947. Since the Second World War New Zealand has taken an increasing part in world affairs.

In 1962 Western Samoa, formerly administered by New Zealand, attained independence, and in 1965 the Cook Islands attained full internal self-government, but retained many links, including common citizenship, with New Zealand. In October 1974, Niue, one of New Zealand's island territories, obtained similar status "in free association with New Zealand". The latter, however, remains responsible for Niue's defence and external affairs and continues to provide financial and other aid.

In December 1972 the first Labour government for over twelve years came to power, under the leadership of Norman Kirk, after a succession of National Party administrations. When Labour took office, the economy was thriving, mainly as a result of an international price boom for agricultural commodities. However, this prosperity brought with it the problem of inflation. The Kirk cabinet imposed a three-year price freeze on government charges, including transport and public utilities, but soaring domestic demand and the energy crisis of 1973-74 led to a rapid rise in imports, a consequent reduction in exchange reserves and a severe balance of payments problem, leading to extensive borrowing from abroad to maintain full employment.

The Labour government pursued a more independent foreign policy than its predecessors. It phased out New Zealand's military commitments under the South-East Asia Treaty Organization (SEATO) and established diplomatic relations with the People's Republic of China. In 1974 New Zealand protested strongly against French testing of nuclear weapons in the Pacific.

Norman Kirk died in August 1974 and Wallace Rowling, his Finance Minister, became Prime Minister in September. During his term of office the economic recession worsened and the currency was devalued twice. In November 1975

a general election resulted in victory for the National Party. The new Prime Minister, Robert Muldoon, introduced austere economic policies and a wage freeze which has led to prolonged and bitter conflict with the trade unions. In 1976 the Government reduced the annual intake of migrants from 30,000 to 5,000, and conducted a determined campaign against illegal immigrants. In the year ending March 1977 there was a net migration loss of over 19,000.

Fear of the extensive inroads being made by the U.S.S.R., Japan and South Korea into its fishing resources caused New Zealand to enforce a fishing limit of 200 nautical miles (370 km.) around its coasts in 1977.

Government

Executive power is vested in the British monarch, as Head of State, and is exercisable by an appointed representative, the Governor-General, who must be guided by the advice of the Executive Council (Cabinet), led by the Prime Minister. Legislative power is vested in the unicameral House of Representatives, with 87 members (including four Maoris) elected for three years by universal adult suffrage from single-member constituencies. The Governor-General appoints the Prime Minister and, on the latter's recommendation, other Ministers. The Cabinet is responsible to the House.

Defence

The total strength of regular forces in 1977 was 12,466: army 5,457, navy 2,741, air force 4,268. Defence spending for 1976/77 amounted to \$NZ221 million.

Economic Affairs

The external economy is heavily dependent on the pastoral and agricultural industries: wool, meat and dairy produce account for over 75 per cent of total exports and 13 per cent of GDP. In 1976/77 the United Kingdom took over 20 per cent of exports, including about 36 per cent of the dairy industry's total export earnings. The United Kingdom's entry into the EEC in 1973 has resulted in reduced trade, but better terms than were expected, especially for New Zealand's dairy produce, were negotiated. New Zealand's next largest overseas markets are Australia, the U.S.A., the rest of the EEC and Japan. Markets are being extended in the Pacific region, South-East Asia, Latin America and the Caribbean countries.

In 1965 New Zealand and Australia established a free trade agreement (NAFTA), under which duties on selected commodities have been progressively eliminated.

Industrial production is expanding and now accounts for nearly a quarter of GDP and 12 per cent of total exports. Exotic forests, under controlled management, provide a continuing supply of timber for the growing pulp and paper industry. Coal production is sufficient for all local needs and the refining of imported crude oil supplies most of the country's petroleum and related products. Light industry continues to expand, the principal branches being food-processing and canning, car-assembly, transport

equipment, wood and cork products, textiles and footwear, apparel and made-up textile goods. Hydro-electric power resources have been further developed. A government-sponsored steel industry, based on the smelting of local iron sands, is in operation on the west coast of the North Island, and a large aluminium smelter at Bluff produces about 80,000 tons annually. High quality silica sand has also been found in South Canterbury (South Island). In addition to the oil refinery at Marsden Point, Whangarei, and an inland natural gas field at Kapuni, North Island, off-shore oil and extensive natural gas deposits have been discovered at Maui off the Taranaki Coast.

Since 1974 New Zealand has faced serious economic problems. The trade surplus of 1973 was followed by a 1974 deficit of \$NZ 880 million and the trade gap exceeded \$NZ 1,000 million per year by mid-1975. Heavy foreign borrowing, stricter import controls and a 15 per cent devaluation in August 1975 went some way towards stabilizing the situation and the trade deficit for the 12 months ending July 1977 was about \$NZ 270 million. Throughout 1976 the Muldoon Government pursued austere budgetary policies and implemented a wage freeze. In March 1977, however, an independent wages tribunal awarded a general wage increase of 6 per cent, and in October the Government announced a 5 per cent income tax cut.

Following the 17.5 per cent devaluation of the Australian dollar in November 1976 New Zealand devalued by 7 per cent but in December adjusted this to a 5 per cent devaluation.

New Zealand's terms of trade have been deteriorating due to the rapidly rising cost of manufactured imports, offsetting increases in the prices obtained for wool and meat exports. Emphasizing the need for an export-led recovery, the Government's July 1977 budget included incentives for exporters using indigenous materials. New Zealand's dependence on imports and lack of labour-intensive industry have resulted in an unemployment problem; the unemployment level stood at over 5,000 at the end of 1976, and in 1977 reached its highest since the Second World War.

Transport and Communications

In 1976 New Zealand had almost 5,000 km. of railways and 92,604 km. of roads. There are about forty ports, the chief of which are Auckland, Wellington, Lyttelton (the port of Christchurch) and Dunedin. Much traffic between North and South Island is by air; there are also roll-on roll-off ferry services linking Wellington with Picton and Lyttelton. The main centres are joined by an air service network and New Zealand is linked to most major Pacific countries by international airlines. There are international airports at Auckland, Christchurch and Wellington. In July 1971 the earth satellite station at Warkworth (north of Auckland) was opened and is linked to the INTELSAT III communications system over the Pacific.

Social Welfare

New Zealand has a comprehensive social welfare system administered by the Department of Social Security. It is levied on all incomes to finance the services, provide medical care and benefits for old age, blindness, widowhood, orphanhood, unemployment and sickness, as well as superannuation and family benefits. There are reciprocal agreements with Australia and the U.K. New Zealand had 3,426 physicians (one for every 846 inhabitants) in 1972 and 31,959 hospital beds (one for every 100 inhabitants) in 1973.

Education

State education is free and, between the ages of five and fifteen, compulsory. Primary education lasts from five to eleven, after which children pass on to intermediate schools for two years before going on to secondary school until a maximum age of eighteen. In 1976 442,082 pupils were enrolled in primary schools, 82,930 at intermediate schools, and nearly 230,300 in secondary schools. Special educational services cater for children in remote areas and for the physically handicapped. There are six universities and an agricultural college with university status.

Tourism

New Zealand's tourist attractions are chiefly natural: high mountains, lakes, hot springs and beaches. There are abundant opportunities for outdoor recreation and New Zealand is particularly well-known for its fishing.

Visas are not required to visit New Zealand by nationals of Belgium, Denmark, France, Liechtenstein, Luxembourg, Monaco, the Netherlands, Norway, Sweden, Switzerland and the United Kingdom. Visa requirements are waived for limited periods for nationals of the Federal Republic of Germany, Finland, Iceland, Japan and the U.S.A.

Sport

Rugby football is the national game but rugby league, soccer, swimming and tennis are also very popular. Horse racing also has a wide following.

FINANCE

100 cents=1 New Zealand dollar (\$NZ).

Coins: 1, 2, 5, 10, 20 and 50 cents.

Notes: 1, 2, 5, 10, 20 and 100 dollars.

Exchange rates (December 1977): £1 sterling=\$NZ1.831; U.S. \$1=\$NZ1.000.

\$NZ100=£54.61=U.S. \$100.02.

Note: The New Zealand dollar was introduced in July 1967, replacing the New Zealand pound at the rate of £NZ1=\$NZ2. From October 1961 the New Zealand pound had a value of U.S. \$2.78, so the initial value of the New Zealand dollar was U.S. \$1.39 (U.S. \$1=71.9 NZ cents). This remained in force until November 1967, after which the exchange rate was \$NZ1=U.S. \$1.12 (U.S. \$1=89.3 NZ cents) until August 1971. From December 1971 to February 1973 the par value of the New Zealand dollar was U.S. \$1.216 (U.S. \$1=82.2 NZ cents), though the effective mid-point rate was \$NZ1=U.S. \$1.195. From February to July 1973 the exchange rate was \$NZ1=U.S. \$1.351 (U.S. \$1=74.0 NZ cents). In terms of sterling, the exchange rate was £1=\$NZ2.143 (\$NZ1=9s. 4d. or 46.67p.) from November 1967 to December 1971; and £1=\$NZ2.180 from December 1971 to June 1972. The fixed relationship with the U.S. dollar was ended in July 1973, since when the basis for the New Zealand dollar's valuation has been a weighted "basket" of currencies of the country's main trading partners. In September 1973 the New Zealand dollar was revalued by 10 per cent against this "basket" (becoming equivalent to U.S. \$1.478) but in September 1974 it was effectively devalued by about 6.2 per cent, and in August 1975 by 15 per cent. In November 1976 the currency was devalued by a further 7 per cent but this was partially reversed in December. For converting the value of foreign trade transactions, the average value of the New Zealand dollar was: U.S. \$1.136 in 1971; U.S. \$1.195 in 1972; U.S. \$1.363 in 1973; U.S. \$1.401 in 1974; U.S. \$1.215 in 1975; 99.6 U.S. cents in 1976.

THE CONSTITUTION

Head of State

Executive power is vested in the Queen and is exercisable by her personal representative, the Governor-General.

In the execution of the powers and authorities vested in him the Governor-General must be guided by the advice of the Executive Council; but if in any case he sees sufficient cause to dissent from the opinion of the Council, he may act in the exercise of his powers and authorities in opposition to the opinion of the Council, reporting the matter to the monarch without delay, with the reasons for his so acting.

Executive Council

The Executive Council consists of the Governor-General and all the Ministers. Two members, exclusive of the Governor-General or the presiding member, constitute a quorum. The Governor-General appoints the Prime Minister and, on the latter's recommendation, the other Ministers.

House of Representatives

Parliament comprises the Crown and the House of Representatives.

The number of members constituting the House of Representatives is eighty-seven—eighty-three drawn from

general seats and four from Maori seats. They are designated "Members of Parliament".

Parliaments sit for three-year terms.

Everyone over 18 may vote in the election of members for the House of Representatives. Since August 1975 any person, regardless of nationality, ordinarily resident in New Zealand for 12 months or more and resident in an electoral district for one month or more is qualified to be registered as a voter. Compulsory registration of all electors except Maoris was introduced at the end of 1924; it was introduced for Maoris in 1956.

There are 83 European electoral districts and four Maori electoral districts. As from August 1975 any person of the Maori race, which includes any descendant of such a person, who elects to be considered as a Maori for the purposes of the Electoral Act may enrol on the Maori roll for that particular Maori electoral district in which that person resides.

By the Electoral Amendment Act, 1937, which made provision for a secret ballot in Maori elections, Maori electors were granted the same privileges, in the exercise of their vote, as general electors.

In local government, with some minor exceptions, there is a wider electoral franchise, non-residential rate payers also being eligible to vote.

RADIO AND TELEVISION

The Broadcasting Corporation of New Zealand (BCNZ),
established in 1977, supervises the independent operating
Services, Radio New Zealand (RNZ), Television One
(TV1) and South Pacific Television (TV2), and provides
transmission facilities for them. It also receives licence
revenues and allocates them to the corporations. Each
corporation keeps its own revenue from commercial
advertising. Colour broadcasting began in 1973.

Broadcasting Corporation of New Zealand (BCNZ): Bowen
State Bldg., Bowen St., P.O.B. 98, Wellington; f. 1977;

television in New Zealand; Chair. IAN R. CROSS.

RADIO

Radio New Zealand: P.O.B. 2092, Wellington; f. 1975;
controls 26 community radio stations, 3 public radio
networks (one of which is a commercial network
comprising 23 stations) and a short-wave service
which rebroadcasts the main National Programme to
the south-west Pacific islands and Southern Australia.
The non-commercial National Programme broadcasts
24 hours a day; Chair. Standing Cttee. P. J. DOWNEY;
Dir.-Gen. GEOFFREY F. WHITEHEAD.

Commercial radio has been operating in New Zealand
since 1937. In 1976 there were seven privately-owned
commercial radio stations, depending entirely on com-

NEW ZEALAND'S ASSOCIATED TERRITORIES

New Zealand's associated territories are the self-governing Cook Islands and Niue and the dependent territories of Tokelau and the Ross Dependency.

COOK ISLANDS

The 14 inhabited and one uninhabited islands of the Cook Islands are located midway between Samoa and Tahiti. The total land area of the islands is 234 square kilometres, and they extend over two million square kilometres of ocean. The Cooks form two groups; the Northern Cooks which are all atolls, and include Pukapuka, Rakahanga and Manihiki, and the Southern Cooks, including Aitutaki, Mangaia and Rarotonga, which are all volcanic islands. From December to March the climate is warm and humid, with the possibility of serious storms; from April to November the climate is mild and equable. The average annual rainfall in Rarotonga is 2,134 mm.

Recent History

The Cook Islands were proclaimed a British Protectorate in 1888 and a part of New Zealand in 1901. On August 4th, 1965, they became a self-governing territory in free association with New Zealand. The people are British subjects and New Zealand citizens. The Premier elected in 1965, Sir Albert Henry, has retained power, but in the 1974 elections met his stiffest opposition thus far.

Economic Affairs

Economic and agricultural development on the Cook Islands has always suffered from isolation and smallness. All forms of exports, but in particular fresh fruit, oranges, bananas, tomatoes and pineapples, have been hindered by lack of shipping and inadequate marketing in New Zealand metropolitan centres.

The islands receive a large proportion of their revenue in the form of aid from New Zealand and remittances sent back to the islands by migrants. A New Zealand-owned plant canned pineapple and orange juice near Avarua until 1977, but was forced to close down due to a sharp decrease in production in 1976. The worsening economic situation also caused all rural co-operatives to disband during 1976 and early 1977.

The outstanding feature of the Cook Islands is the migration of outer islanders into Rarotonga and from there to New Zealand, where, until 1976, Cook Islanders enjoyed free entry as New Zealand citizens. In 1975 more Cook Islanders lived in New Zealand than in the islands but in March 1977 the flow of migrants was reversed for the first time in 30 years. Migrants have tended to work in the timber towns of Kawerau and Tokoroa, in the Auckland metropolitan area, in Wellington and in the meat packing industry in Southland.

EMPLOYMENT

Most of the working population are engaged in agriculture, services and commerce. The Government is a major employer, with (in 1975) 900 casual workers, 1,200 local public servants, and 40 officers seconded from the New Zealand public service. There are two clothing factories, a fruit canning factory and four factories manufacturing handicrafts. A tourist industry is developing, with three hotels and eight motels completed and further construction under way.

FINANCE

New Zealand and local currency are both legal tender.

New Zealand currency: 100 cents=1 New Zealand dollar (\$NZ).

Coins: 1, 2, 5, 10, 20 and 50 cents.

Notes: 1, 2, 5, 10, 20 and 100 dollars.

Primary items of expenditure: Education, public health, public works.

EXTERNAL TRADE

(1973)

Total Imports: \$NZ4,947,000, principal items are food-stuffs, piece goods, timber, fuel and cement.

NEW ZEALAND'S ASSOCIATED TERRITORIES

Cook Islands

Total Exports: \$NZ2,877,000; the principal item was fruit juices (\$NZ1,674,000), but other exports include tomatoes, mother-of-pearl, copra, citrus fruits, canned fruit preparations, clothing and handicrafts.

Trade is chiefly with New Zealand, the EEC, Japan, the U.S.A., Hong Kong and Australia. Imports from New Zealand represented 76.27 per cent of total imports in 1970.

EDUCATION

(1975)

Government schools: 4,687 primary pupils; 690 secondary pupils; 698 high school pupils.

Tereora Teachers' College: 28 students.

Up to 100 students and trainees receive education or vocational training each year under the New Zealand Training Scheme.

GOVERNMENT

Executive authority is vested in Her Majesty the Queen. The Chief Justice of the High Court in the Cook Islands is temporarily representing the Queen. The New Zealand Government is represented by the New Zealand representative, who resides on Rarotonga.

Executive Government is carried out by a Cabinet consisting of a Premier, six Ministers and one Deputy to the Premier. The Cabinet is collectively responsible to the Legislative Assembly.

THE CABINET

(January 1978)

Premier, Minister for Government and Central Administration, External Affairs, Outer Islands Affairs, Police, Immigration, National Provident Fund, Civil Aviation, Housing and Civil Defence: Hon. Sir ALBERT R. HENRY, K.B.E.

Minister for Finance and the National Development Corporation, and Postmaster-General: Hon. G. A. HENRY.

Minister for Agriculture, Marine and Science and Industrial Research: Hon. W. ESTALL.

Minister for Justice, Lands and Survey, Physical Planning and Conservation and Internal Affairs: Hon. TURU ARIKI HENRY.

Minister for Supportive Services and Electricity: Hon. I. AKARURU.

Minister for Health and Education: Hon. Dr. J. WILLIAMS.

Minister for Trade, Industries, Labour and Commerce, Tourism and Shipping: Hon. G. ELLIS.

LEGISLATIVE ASSEMBLY

The Legislative Assembly consists of 22 members elected by universal suffrage every four years from a common roll for both Maoris and Europeans and is presided over by a Speaker.

Speaker: Mrs. MARGUERITE STORY.

President of the House of Ariki: MARGARET KARIKA ARIEL.

Each of the main islands has an Island Council.

In the December 1974 elections the Cook Islands Party won 14 seats against the Democratic Party's 8 seats.

POLITICAL PARTIES

Cook Islands Party: Rarotonga; the government party; 14 representatives in the Legislative Assembly; Leader Sir ALBERT HENRY, K.B.E.

Democratic Party: P.O.B. 202, Rarotonga; opposition party; Leader Dr. TOM DAVIS.

JUDICIAL SYSTEM

High Court; Land Court; Land Appellate Court.

The High Court exercises civil and criminal jurisdiction throughout the Cook Islands. The Land Court is concerned with litigation over land and titles. The Land Appellate Court hears appeals over decisions of the Land Court.

Chief Justice of the High Court: G. J. DONNE.

Judge of the Land Court: J. J. MACCAULEY.

RELIGION

Main groups are Cook Islands Christian Church (Congregational), Roman Catholic, Latter Day Saints and Seventh Day Adventists.

Roman Catholic:

Bishop of Rarotonga (Cook Islands and Niue): Most Rev. DENIS G. BROWNE.

There are about 2,200 Catholics in the Cook Islands.

There were 8,000 radio sets in 1977.

FINANCE

BANKING

The National Bank of New Zealand has a Branch on Rarotonga and the government Post Office Savings Bank also operates in the islands.

TRANSPORT

Roads: On Rarotonga, a 33 km. sealed road encircles the island's coastline.

Shipping: Ships from New Zealand, the United Kingdom, Japan and the U.S.A. call at Rarotonga. The New Zealand Shipping Corporation operates fortnightly services between the Cook Islands and New Zealand ports.

Civil Aviation: An international airport was opened at Rarotonga in 1972.

Air New Zealand: Passenger flights between Rarotonga and New Zealand are made three times a week—two direct and one via Fiji.

Cook Islands Airways: Owned by Air New Zealand and the Cook Islands Government; operates an internal air service between Rarotonga, Mauke, Aitutaki, Mitiaro, and Atiu.

NIUE

Niue is a coral island of 259 square kilometres, located about 480 kilometres east of Tonga and 930 kilometres west of the Southern Cook Islands. It is a self-governing dependency of New Zealand. Niueans have free entry to New Zealand and a sizeable resident Niuean community exists there. The 1976 population figures showed a 23 per cent decrease compared with those for 1971; about twice as many Niueans live in New Zealand as on Niue. Emigration is continuing. Vegetables, fruit, copra and handicrafts are exported to New Zealand. New Zealand aid is being employed to establish a bee industry and to introduce dairy and beef cattle for local consumption. An Australian mining company spent five years looking for economic bauxite and uranium deposits, and in 1977 drilled the first test bores to determine the quantity and grade of uranium discovered earlier that year. New Zealand aid is providing a deep-sea fishing boat and gear, and training for the crew. A small forestry project is being undertaken, and New Zealand is also to supply portable sawmills and preservative plants to extend the use of coconut wood for fencing, furniture, etc.

STATISTICS

Area: 259 sq. km. (100 sq. miles).

Population: 3,843 (September 1976 census).

The birth rate in 1975 was 41.3 per 1,000 and the crude death rate 6.0. The infant mortality rate per 1,000 live births was 12.5.

EMPLOYMENT

Under a current programme the Agriculture Department is rehabilitating the coconut industry and developing grass land, cattle and other farming operations. The Niue government is the major employer, however, and most workers are employed by government departments. There is no unemployment problem.

AGRICULTURE

The main crops are coconuts, taro, yams, limes, cassava (manioc), kumara and passion fruit. About 51,000 of the island's 64,000 acres are used for agriculture and over 13,000 acres are merchantable forest. Niue supplies about one-third of New Zealand's passion fruit market, and approximately 50 acres are given over to passion fruit production. Efforts are being made to boost production from the 1975 total of 75 metric tons to 300 metric tons in 1978. The main livestock are beef cattle, pigs and poultry.

Export items include copra, plaited ware, honey, passion fruit and limes.

New Zealand takes most of Niue's exports (nearly 73 per cent in 1975) and provides a large part of the island's imports (nearly 79 per cent in 1975). The main imports are foodstuffs, vehicles and spares, building materials, and oil and petrol.

GOVERNMENT

In October 1974 Niue gained self-government in free association with New Zealand. The latter, however, remains responsible for Niue's defence and external affairs and will continue economic and administrative assistance. Executive government in Niue is through the Premier, assisted by three Ministers. Legislation is carried out by the Niue Assembly but New Zealand, if called upon to do so by the Assembly, will also legislate for the island. There is a New Zealand representative in the territory.

New Zealand Representative: W. J. ASHWELL.

TRANSPORT

There are 123 kilometres of all-weather roads and 106 kilometres of access and plantation roads. At March 31st, 1976, there were 739 registered motor vehicles of which 497 were motor cycles, 205 cars and 37 trucks. The best anchorage is an open roadstead at Alofi, the largest of Niue's 13 villages. A shipping service is maintained with New Zealand via Tonga, Fiji and Samoa on a regular four-weekly basis.

An airstrip of 1,650 metres, capable of taking most types of aircraft except modern jet aircraft, and a twice-weekly air service from New Zealand, via Fiji, Tonga and Western Samoa, is operated by Air N.Z. Ltd. and Polynesian Airlines Ltd.

ROSS DEPENDENCY

The Ross Dependency comprises the sector of Antarctica between 160° E. and 150° W. longitude and the islands lying between those degrees of longitude and south of latitude 60° S. It has been administered by New Zealand since 1923.

Scott Base on Ross Island was established in 1957. Cape Hallett is a joint New Zealand-United States base. In 1968 a new scientific station was set up some 130 km. west of Scott Base.

Ross Dependency Research Committee: Wellington; responsible for co-ordinating and supervising all scientific activity in the Dependency.

TOKELAU

Tokelau consists of three atolls, Atafu, Nukunono and Fakaofu, which lie about 480 kilometres north of Western Samoa. The mean average temperature is 20°C.; July is the coolest month and May the warmest; rainfall is heavy but inconsistent.

The islands became a British protectorate in 1877. At the request of the inhabitants Britain annexed the islands in 1916 and included them within the Gilbert and Ellice Islands Colony. In 1925 the United Kingdom Government transferred administrative control to New Zealand. In 1946 the group was officially designated the Tokelau Islands and in 1948 sovereignty was transferred to New Zealand. From 1962 until the end of 1971 the High Commissioner for New Zealand in Western Samoa was also the Administrator of the Tokelau Islands. In November 1974 the administration of the Tokelau Islands was transferred to the Ministry of Foreign Affairs in New Zealand. In 1977 the Tokelau Islands were officially redesignated Tokelau.

Financial aid from New Zealand for three years 1974/75 to 1976/77 totalled \$NZ856,362.

Revenue is derived mainly from copra export duty, import duty, and sale of postage stamps. Expenditure is devoted mainly to the provision of social services, particularly health, education, agriculture and communications.

EXTERNAL TRADE

In 1976/77 copra exports totalled \$NZ13,001. There were no other exports. The main imports are foodstuffs, building materials and fuel.

TRANSPORT

The territory is visited five or six times per year by vessels under charter.

GOVERNMENT

The administration of Tokelau is the responsibility of the Ministry of Foreign Affairs in New Zealand. The Secretary of Foreign Affairs is the Administrator and most of his powers are delegated to the Official Secretary, Office of Tokelau Affairs and senior officers of the Ministry of Foreign Affairs. By agreement with the Government of Western Samoa, the Office of Tokelau Affairs is based in Apia.

LOCAL GOVERNMENT

There is a *Faipule* (who is also the magistrate) and a

Pulenuka on each island who are democratically elected by the people triennially. The *Faipule* presides over a Council of Elders comprising the heads of family groups.

RELIGION

On Atafu all inhabitants are members of the Congregational Christian Church of Samoa, deriving from the London Missionary Society; on Nukunonu all are Roman Catholic, while both denominations are represented on Fakaofo.

NICARAGUA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of Nicaragua lies in the Central American isthmus, bounded by the Pacific Ocean to the west and the Caribbean to the east. Its neighbours are Honduras to the north and Costa Rica to the south. The climate is tropical, with a mean average temperature of 25.5°C (78°F). The rainy season extends from May to October. The national language is Spanish, although English is widely understood. There is no state church but Roman Catholicism is dominant. The national flag (proportions 2 by 1) has three horizontal stripes of blue, white, and blue, with the state emblem in the centre. The capital is Managua, Distrito Nacional.

Recent History

Since 1933 the Somoza family has dominated Nicaraguan politics. In that year Gen. Anastasio "Tacho" Somoza, commander of the National Guard, seized power by *coup d'état*. On his death by assassination in 1956, his son Luis became President and another son, Anastasio "Tachito", assumed the command of the National Guard. On the retirement of Luis Somoza in 1963, René Schick Gutiérrez became President until his death in 1966. After a violent electoral campaign, he was succeeded in 1967 by Gen. Anastasio Somoza Debayle, who retained his command over the National Guard. Gen. Somoza's term as President ended in April 1972.

Following a pact between the opposition Conservatives and the Liberal Party, which supports Gen. Somoza, both houses of Congress voted their dissolution in August 1971 in order that elections be held to form a constituent assembly which would amend the Constitution to allow Gen. Somoza to be re-elected as President in 1974. In the meantime a triumvirate composed of members of the Liberal and Conservative parties ruled the country.

In December 1972 an earthquake destroyed about three-quarters of the buildings in Managua, making a quarter of a million people homeless and killing about 10,000 others. In January 1973 Gen. Somoza became President of the National Emergency Committee and imposed martial law. In September 1974 he was elected President by an overwhelming majority and took office in December. Martial law was lifted in June 1974 but a state of emergency continued. In December 1974, following the mass kidnapping by guerrillas of several prominent Nicaraguans, martial law was again imposed, all constitutional guarantees were suspended and strict censorship introduced.

Previously moderate opposition grew in strength during 1975 and 1976. In early 1977, following Amnesty International allegations of systematic torture and murder by the regime, influential groups, including businessmen and the Church, spoke out against the Government. President Somoza temporarily withdrew from political activity in July, due to ill-health. Partly as a result of his absence, new power groups began to emerge. The left-wing Sandinist National Liberation Front stepped up its military offensive and established a political alliance with important non-Marxist groups. On his return to politics in

September the President ended martial law and re-established constitutional guarantees. Despite this action, however, the broadly-based opposition coalition began a new political campaign against the regime, demanding a dialogue with the President to press for liberalization. The President was unable to take repressive measures for fear of further alienating the U.S.A., a former supporter of the regime. Relations with the U.S.A. had deteriorated in 1977 over the new administration's position on the human rights issue. In January 1978 the murder of Pedro Joaquín Chamorro Cardenal, leader of the opposition coalition, sparked off violent demonstrations against the Government. A general strike was called on January 23rd which lasted for 17 days and which effectively closed 80 per cent of the country's businesses. It was backed by employers, workers and opposition politicians, all demanding a full investigation into the murder and the immediate resignation of President Somoza. Demonstrations and riots, resulting in several deaths and many arrests, continued into February and March.

Government

Under the 1974 Constitution, legislative power is vested in the bicameral National Congress, comprising a Senate (30 members) and a Chamber of Deputies (70 members). Both houses are elected for six years by universal adult suffrage. Executive power is held by the President, also directly elected for six years. He governs with the assistance of an appointed Council of Ministers.

Defence

Nicaragua had armed forces totalling 7,100 men in 1977: 5,400 in the army, 1,500 in the air force and 200 in the navy. Paramilitary forces numbered 4,000 men. The defence budget for 1976 was 226.4 million córdobas. Nicaragua is a member of the Central American Defence Council (CONDECA).

Economic Affairs

Agriculture is the dominant industry, employing over half the work force and accounting for almost 75 per cent of export earnings. Cotton, coffee and meat are the principal exports. Sugar, timber, bananas, tobacco and shellfish are also important. Workable deposits of gold, silver, lead and zinc were discovered in 1968 in northern Nicaragua. Large deposits of natural gas were discovered in 1974 off the Pacific coast and several oil companies are exploring for oil off the Nicaraguan coast. Industry is on a modest scale, including a petroleum refinery, textile mills, tobacco, cement and soluble coffee plants, dairies and a wide range of processing plants. Industrial production fell by 9 per cent in 1973 as a result of the earthquake in December 1972 but recovered in 1974. An estimated U.S. \$1,000 million were required to restore the economy.

A 1975-79 Reconstruction and Development Plan is being implemented at a cost of some U.S. \$6,000 million, of which one-third will be invested in the reconstruction and development of Managua. The aims of the Plan are to improve living conditions, employment and per capita income, to encourage regional development and to reduce

NICARAGUA

the economy's dependence on the external sector. To this end it is planned to harness geothermic power for the generation of electricity, build a hydro-electricity plant on the San Juan river, open the river for commercial traffic and develop an inland canal system. The Government is also planning more credit and promotion incentives for tourism and the production of non-traditional goods.

The economic growth rate in 1975 was only 2.1 per cent, compared with 9.2 per cent in 1974. This decline was due mainly to the fall in world commodity prices, higher import costs, credit restrictions and the collapse of the reconstruction boom. Inflation fell to 10 per cent in 1975, compared with 17 per cent in 1974. The economy improved in 1976. The growth rate reached 5.6 per cent, due to higher export prices, especially for coffee. Nicaragua is a member of the OAS, ODECA, the Central American Common Market, SELA and the IADB.

Transport and Communications

In 1976 there were 17,564 km. of roads, including a 384 km. north-south stretch of the Pan American Highway. State railways (373 km.) join important towns and private lines serve the banana plantations. Several rivers are navigable to small craft and steamers serve towns on Lake Nicaragua. LANICA, the state airline, operates internal and international services.

Social Welfare

There is a compulsory national health insurance scheme for wage-earners in all departments on the Pacific coast. In 1974 Nicaragua had 59 hospitals, with 4,627 beds, and 1,214 physicians. The allocation for health in the 1976 budget was 120 million córdobas.

Education

Primary education is free and compulsory for children between the ages of 6 and 13. In 1976 there were 2,529 primary and secondary schools. The literacy rate was 41.6 per cent in 1973. There are many commercial schools and

Introductory Survey, Statistical Survey

three universities. In 1976, 346.2 million córdobas was allocated to education.

Tourism

The mountainous region with its occasionally active volcanoes, the Huellas de Acahualinca outside Managua which show ancient footprints of men fleeing from volcanic lava, the mineral baths of Tipitapa and the abundant sea, lake and river fishing are the principal tourist attractions of Nicaragua. Several large hotels are under construction.

Visas are not required to visit Nicaragua by nationals of Belgium, Costa Rica, Denmark, El Salvador, Guatemala, Honduras, Luxembourg, the Netherlands, Norway, Spain, Sweden, Switzerland and the United Kingdom.

Sport

Baseball and basketball are widely played. Swimming and fishing are popular.

Public Holidays

1978: May 1st (Labour Day), May 27th (Army Day), July 14th (Abrogation of the Chamorro-Bryan Treaty), August 10th (Managua local holiday), September 14th (Battle of San Jacinto), September 15th (Independence Day), October 12th (Columbus Day), November 1st (All Saints' Day), December 8th (Immaculate Conception), December 24th-25th (Christmas).

1979: January 1st (New Year's Day), February 1st (Air Force Day), April 8th-16th (Holy Week).

A considerable number of local holidays are also observed.

Weights and Measures

The metric system is officially used, although some Spanish and local units are also in general use.

FINANCE

100 centavos = 1 córdoba.

Coins: 5, 10, 25 and 50 centavos; 1 córdoba.

Notes: 1, 2, 5, 10, 20, 50, 100, 500 and 1,000 córdobas.

Exchange rates (December 1977): £1 sterling = 12.87 córdobas; U.S. \$1 = 7.03 córdobas.

100 córdobas = £7.77 = \$14.23.

Note: In July 1955 the central exchange rate was fixed at U.S. \$1 = 7.00 córdobas (1 córdoba = 14.286 U.S. cents). The market rate is \$1 = 7.0263 córdobas (1 córdoba = 14.232 U.S. cents). These rates have remained in effect despite two devaluations of the U.S. dollar (in December 1971 and February 1973). In terms of sterling, the central rate was £1 = 16.80 córdobas from November 1967 to August 1971; and £1 = 18.24 córdobas from December 1971 to June 1972. The Central American peso (C.A.\$), used for transactions within the Central American Common Market, is at par with the United States dollar.

THE CONSTITUTION

The constitution was promulgated in March 1974.

Nicaragua is a unitary, sovereign and independent state. Nicaraguan citizens include those over 21 years of age, those over 18 years of age who are literate or who are married and those under 18 years of age who have finished secondary education.

Rights and guarantees

All Nicaraguans are equal before the law. The State guarantees individual liberty; no-one can be detained without an order and anyone detained must be freed or tried after 24 hours. The State guarantees the inviolability of the home. Everyone has the right to movement, to choose a place of residence, and to emigrate and immigrate. The nation's cultural treasures are under the protection of the State and cannot be removed from the national territory. The State can declare a state of economic emergency when deemed necessary. Private monopolies are prohibited but state monopolies can be established when deemed necessary. Unions or associations may be established for legal purposes. No-one can be persecuted for his beliefs or for any action that is within the law. The State guarantees freedom of speech and the right to meet in private for peaceful purposes. The State prohibits the establishment of a Communist Party or any party with a similar ideology, or of any party with an international organization. Anyone belonging to such a party is prohibited from holding any public office. The State guarantees the right to petition and the inviolability of correspondence. The state also guarantees and protects intellectual property and the rights of the author, inventor or artist, freedom of conscience and the practice of religion. All citizens have the right and duty to work.

The Guardia Nacional de Nicaragua shall guarantee the sovereignty and independence of the nation, the integrity of its territory, internal peace and individual freedoms. Its members can neither vote nor hold any political office. The Supreme Commander of the Armed Forces is the President of the Republic. Military service is obligatory.

Legislative power

Legislative power is exercised by a two-chamber Congress elected by direct popular vote every six years. The Chamber of Deputies shall have no fewer than 70 members and the Senate shall have no fewer than 30 members and their substitutes. The Senate also includes those former Presidents who were elected by popular vote and the Presidential candidate who was second in the poll. Congress shall meet in the capital on April 15th each year and shall hold 60 sessions. Extraordinary sessions may be convened by the executive or by a majority of the members of Congress through its President. The quorum is the majority of its members and all decisions shall be made by absolute majority except where specified otherwise. The armed forces may enter the chambers only when requested to do so by the President of the House.

Each chamber has the following individual functions:

- to elect its governing board;
- to establish the agenda;
- to appoint commissions;
- to request information from the Ministers

As separate bodies, the Congress has the following functions:

- to form laws;
- to declare a state of economic emergency;
- to approve or reject treaties;
- to impose taxes and fix the administration's expenditure;

- to vote on the budget;
- to declare war;
- to approve, modify or reject treaties and contracts made by the Executive;
- to grant amnesties.

On the proposal of the executive, the chambers of Congress may grant subsidies, give prizes, awards, pensions and honours and confer military ranks.

The two chambers of Congress also meet as one body and are presided over in alternate three-monthly periods by the Presidents of the two chambers. In this form they have the following functions:

- to elect their President, Vice-President, Secretaries and Vice-Secretaries;
- to establish the agenda of each session;
- to elect three of its members to replace the President in the case of temporary or permanent absence. The President must approve those chosen;
- to elect magistrates;
- to accept the resignation of the President of the Republic, his replacements, magistrates and judges.

Once a bill, proposed by the Chamber of Deputies or the Executive, is approved by the Chamber of Deputies, it passes to the Senate and then to an Examining Board, after which it is passed to the Executive for promulgation. If the bill is rejected by the Senate it is returned to the Chamber of Deputies for amendment, but if it is returned to the Senate without amendments and is again rejected by the Senate it cannot be promulgated. The President may exercise his power of veto. If so the bill is returned to the Senate which may propose a combined session of Congress. If this Congress ratifies the rejected bill by a two-thirds majority the Executive must promulgate it.

Executive power

Executive power is vested in the President and Council of Ministers. The President is elected for six years by direct popular vote. In the case of his temporary incapacity, absence or in the case of his resignation, he shall be replaced by the Minister of the Interior and then his elected substitute. The President has the following powers:

- to open Congress;
- to convene extraordinary sessions of Congress;
- to present the budget;
- to present annual reports, bills and treaties through a Minister;
- to promulgate laws and use the power of veto;
- to issue laws when Congress is in recess;
- to grant amnesties;
- to supervise the conduct of the members of the judiciary;
- to command the armed forces;
- to appoint Ministers, Vice-Ministers and civil servants;
- to direct foreign affairs, appoint ambassadors and receive foreign ambassadors;
- to declare war and conclude peace treaties;
- to supervise credit institutions;
- to direct and supervise education and to combat illiteracy;
- to supervise monetary stability;
- to guarantee and protect artistic and literary property;
- to order the arrest of those who threaten public security;
- to order a state of national emergency;
- to suspend or restrict constitutional guarantees under special circumstances.

NIGER

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Republic of the Niger is a landlocked state in West Africa, with Algeria and Libya to the north and Nigeria and Benin to the south. Mali and Upper Volta lie to the west and Chad to the east. The climate is hot and dry with an average temperature of 28°C (84°F). The official language is French but numerous indigenous languages are used, including Hausa (spoken by half the population), Tuareg, Djerma and Fulani. About 85 per cent of the population are Muslims. Most of the remainder follow animist beliefs and there is a small Christian minority. The national flag (proportions 8 by 7) is a horizontal tricolour of orange, white and green, the central white stripe being charged with an orange disc. The capital is Niamey.

Recent History

Formerly a part of French West Africa, Niger was granted independence in 1960. Hamani Diori was elected President, and re-elected in 1965 and 1970, when he received the support of 98 per cent of the electorate. His one-party Government, having repressed an attempted rebellion in 1963-64, seemed one of the most secure in Africa, and President Diori himself gained considerable international prestige as a spokesman for francophone Africa. He maintained very close links with France, and received aid from Nigeria and Libya. The discovery of uranium in Niger, and its exploitation by France, provided an opportunity for the economic development of the country, previously limited to simple agriculture and nomadic stock-raising.

Amidst widespread civil disorder during the Sahel drought, and after a four-month education strike, the army staged an almost bloodless coup in April 1974. Diori was arrested, and Lieut.-Col. Seyni Kountché, the Chief of Staff of the Armed Forces, became President. The new military Government suspended the Constitution, dissolved the National Assembly and announced that its main objectives were the elimination of corruption and greater efficiency in dealing with the famine.

In the interest of national independence the new government obtained the withdrawal of French troops from Niger and weakened French control of uranium exploitation. In August 1975 the Vice-President of the ruling Supreme Military Council was arrested, along with two other prominent figures, on a charge of plotting to seize power, and in January 1976 the Secretary of State for Information was detained. In March 1976 Major Moussa Bayere, dismissed from the Government in February, led an abortive coup. Nine of those implicated, including Bayere, were subsequently sentenced to death.

The proportion of army officers in the Government was reduced as the unpopular and corrupt administration was gradually replaced. The Government's major preoccupation was planning an economic recovery after the Sahel drought. In February 1977 a new co-operation agreement was concluded with France, which was claimed to have eradicated all traces of paternalism in their relations. Niger has strongly supported international solutions to social projects such as transport, water and mineral

prospecting, and in August 1977 acted as mediator in an attempted settlement of the dispute between Chad and Libya.

Government

Since the military coup of April 1974, Niger has been ruled by a Supreme Military Council of army officers, and by a Council of Ministers appointed by the President.

Defence

Niger's armed forces are on a small scale. There is an army of 2,000 men and paramilitary forces totalling 1,800 men. Arms and equipment come mainly from France. The air force consists of 50 men and a few transport planes.

Economic Affairs

The economy is agricultural and 90 per cent of the people are dependent on cultivation and the raising of livestock. The herds of cattle, sheep and goats are large but often of poor quality. Much of the land is desert, over three-quarters of the country receiving an average annual rainfall of less than 250 mm. The chief crops are millet, sorghum, cassava and beans. A ten-year development plan for 1973-82 emphasizes the importance of rural development. Priority will be given to growing millet, both for food and for export after processing. Persistent drought and the depredations of pests are the main problems. In 1976/77 cereal production exceeded domestic requirements for the first time since 1970, but by late 1977 there were fears for the cereal and bean crops because of drought.

Large uranium deposits at Arlit, in the north-west, were discovered in 1966 by the French Atomic Energy Commissariat, which was granted mining rights for 75 years. Production from the first mine began in 1971. France continued to be the main recipient of uranium ore even after the nationalization of the mines in 1974. By 1975 Niger was the fifth largest uranium producer in the non-communist world, exporting 1,192 metric tons, worth 6,300 million francs CFA. Production in 1976 was still higher, at 1,475 metric tons, enabling a reduction in the tax threshold and a raising of the guaranteed minimum industrial wage in 1977. Production of cassiterite, a tin-bearing mineral mined in three locations, declined in 1976. Mining of extensive deposits of phosphates 150 km. west of Niamey was expected to start in 1978, and open-cast mining of coal at Anon Araren should start in 1990. Indications of petroleum deposits in the Madama Termit area north-east of Lake Chad in 1977 were expected to lead to more definite discoveries in 1978.

Industry is on a small scale and manufacturing accounted for only 8.5 per cent of Gross Domestic Product in 1973. The industrial sector is to be expanded under the current ten-year plan, mainly to replace imports.

Transport and Communications

There are no railways. Two highways cross the country from east to west and from north to south, giving access to neighbouring countries. Roads and tracks total about 7,000 km. Many road extension and improvement schemes are in progress, including a 645 km. "uranium road" from

NIGER

Agadez and Arlit to Tahoua. The River Niger is navigable for 300 km. In 1973 a river route between Gaya, in the south of Niger, and Port Harcourt, in Nigeria, was opened, giving access to the sea. The internal airways system is operated by Air Niger. The main international airport is at Niamey.

Social Welfare

There are 2 hospitals, 36 departmental medical centres, 116 dispensaries and a number of mobile clinics. In 1973 the country had 100 physicians.

Education

Education is free but there are insufficient schools; in 1977 only 13 per cent of children of school age received education. A university was opened at Niamey in 1973 and in 1976 the construction of the Islamic University of West Africa began at Say. Scholarships are provided for higher education in France and Senegal.

Tourism

There is an abundance of wild life and hunting is the chief tourist attraction. Lake Chad also provides game fishing.

Visas for visits to Niger are not required by subjects of the following countries: Andorra, Benin, the Central African Empire, Chad, the Congo, France, Gabon, Guinea, the Ivory Coast, Mali, Mauritania, Monaco, Senegal, Togo, the United Kingdom and Upper Volta.

Introductory Survey, Statistical Survey

Sport

There is very little organized sport, but football is popular.

NIGERIA

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Federal Republic of Nigeria is a West African coastal state within the Gulf of Guinea, with Niger to the north, Benin to the west and Cameroon to the south-east. The climate is tropical in the south with an average temperature of 32°C (90°F) and high humidity. It is drier and semi-tropical in the north. Rainfall reaches more than 380 cm. in parts of the south-east. The official language is English. Hausa, Ibo and Yoruba are spoken in the north, east and west respectively. Islam is the main religion in northern and part of western Nigeria. Some of the population follow animist beliefs and about a quarter are Christians. The national flag (proportions 2 by 1) has vertical bands of green, white and green. The capital is Lagos.

Recent History

The Nigerian people, previously organized in the Yoruba, Hausa, Bornu, Fulani, Ibo and other states, obtained their independence from the United Kingdom in 1960 as a federation of four regions. In 1961 the northern part of the British-administered Trust Territory of Cameroon was incorporated into the Northern Region. In October 1963 Nigeria became a Republic within the Commonwealth. In January 1966 civil government was brought to an end by the overthrow and death of two Regional Premiers and of the Federal Prime Minister, Alhaji Sir Abubakar Tafawa Balewa. A Supreme Military Council was set up by the Army Commander, Maj.-Gen. Johnson Aguiyi-Ironsi, who proposed to abolish the federal structure and establish a unitary state. Inter-communal violence, in which many Ibos living outside their homeland in the Eastern Region were killed or forced to leave, resulted in dislocation of the country and the breakdown of central authority. Gen. Aguiyi-Ironsi was killed in July 1966 and his successor, Lt.-Col. (later Gen.) Yakubu Gowon, revived federalism.

Early in 1967 relations between the Federal Government and the Military Governor of the Eastern Region, Lt.-Col. Chukwuemeka Odumegwu-Ojukwu, rapidly grew worse and in May Col. Ojukwu announced the secession of the Eastern Region and its independence as the Republic of Biafra. War between the Federal Government and Biafra broke out in July 1967 and continued until January 1970, when, after Ojukwu's departure to the Ivory Coast, Biafra surrendered. Meanwhile a 12-state structure proposed by the Federal Government to replace the four regions came into effect in April 1968.

After Biafra's surrender, General Gowon's regime reunited the nation and reconstructed the areas devastated in the civil war. Internal stability and increasing economic prosperity derived from oil gave Nigeria an influential voice in African affairs and allowed it to pursue an open foreign policy. After revoking a promise to restore civilian rule in 1976 and failing to curb widespread corruption in the administrative and public sectors, General Gowon faced mounting opposition which culminated in his overthrow by a bloodless coup in July 1975, while he was attending a summit meeting of the OAU in Uganda. Brig. (later Gen.) Murtala Ramat Muhammed, formerly

Federal Commissioner for Communications, was nominated as Head of State by Nigeria's new military leaders. General Muhammed was killed in an abortive coup in February 1976 and was succeeded as Head of State by Lt.-Gen. Olusegun Obasanjo, Chief of Staff of the armed forces.

In 1975 the Federal Military Government purged the civil service and armed forces. It took over the country's radio and television network and leading newspapers, announced a partial demobilization of the army and embarked on a programme to restore democracy and civilian rule by October 1979. The Federal Military Government has extended federal power at the expense of regional considerations; in March 1976 the 12 existing states were replaced by 19 and the decision taken to build a new federal capital near Abuja in Niger State. Nigeria has taken a leading role in African affairs and has been sharply critical of the white regimes in southern Africa.

Government

Nigeria has been under military rule since January 1966. Under the 1967 Constitutional Decree, legislative and executive functions are vested in the Supreme Military Council (SMC), whose President is Head of State and Government. The SMC rules by decree but delegates powers to the Federal Executive Council, comprising Commissioners in charge of government Ministries. Nigeria consists of 19 States, each administered by an appointed Military Governor at the head of an Executive Council. The leading military commanders liaise with the State Governors through the National Council of States.

In August 1976 many of the functions of State governments were devolved to Local Government Councils, whose members were elected in November and December. A constituent assembly of 230 members, partly elected in August 1977 by these councils, acting as electoral colleges, and partly nominated by the SMC, was inaugurated in October 1977 to consider the draft constitution published in October 1976. An electoral commission has been established to organize elections to state and federal legislatures, to register political parties and to draw up constituencies. The Government proposes to lift the ban on political activity by October 1978, and democratic civilian rule is promised by October 1979.

Defence

1977 estimates put the strength of the army at 221,000 men. Naval strength is 3,500 and the air force has 6,000 men. There is a civil police force of 10,000. Military service is voluntary. In December 1975, it was announced that 100,000 soldiers would be demobilized. Nigeria has the largest defence force in Africa. Defence expenditure in the Third National Development Plan (1973-80) is N2,500 million, much of it for new equipment, and the Plan provides for the doubling of the police force.

Economic Affairs

The huge rise in the price of oil after the 1973 M. E. E. East War gave an extra impetus to the Nigerian economy.

As a member of OPEC and the world's eighth largest producer of oil in 1977, the benefits for Nigeria from the oil boom have been enormous. The foreign exchange position has been strengthened, the economy has expanded at an estimated annual rate of 8 per cent in real terms since 1971, foreign aid has been greatly reduced and large numbers of jobs created. In 1977 crude petroleum exports provided 90 per cent of total export earnings. Nigeria's trade balance, which has consistently remained in surplus since 1965 despite the civil war, more than doubled from 1972 to 1973, when it was ₦1,054 million. In 1974 it exceeded ₦4,000 million but dropped to ₦1,204 million in 1975, largely owing to a decline in oil production. In 1976 it rose to ₦1,570 million. An investment of ₦5,000 million is planned in the petroleum industry and the oil sector during 1975-80. Owing to the Government's conservation policy and the fall in world demand, average daily production fell from 2.26 million barrels in 1974 to 1.78 million barrels in 1975. The 20 per cent reduction in output, however, meant only a 4 per cent decrease in revenues. Daily production increased to about 2.1 million barrels in 1976 and 2.2 million in mid-1977, but had declined to 1.85 million by late 1977. In 1974 negotiations led to a government majority shareholding in Shell/BP, AGIP/Phillips, SAFRAP, Mobil and Texaco. In 1977 the Nigerian National Oil Corporation merged with the Federal Ministry for Petroleum to form the Nigerian National Petroleum Corporation. There is an oil refinery at Eleka Eleme, near Port Harcourt. The Warri refinery is expected to be fully operational by late 1978, and that at Kaduna by 1980. Nigeria has large reserves of natural gas, and a gas liquefaction plant is to be constructed on the River Bonny by 1983. A petrochemical complex at Port Harcourt is to be completed by 1981.

Under the 1972 Nigerian Enterprises Promotion Decree, which was strengthened and expanded in 1976, "indigenization" has been energetically pursued, alien participation in many small businesses has been barred, and Nigerian majority shareholding in numerous larger firms made compulsory.

Agriculture used to be the mainstay of the economy and in 1960 provided 80 per cent of total export earnings. By 1975, because of the vast growth in petroleum exports, agriculture's share had dropped to 7 per cent though it still employs over two-thirds of the working population. In 1976 the Federal Military Government introduced an emergency programme, "Operation Feed the Nation", to increase agricultural production and reduce the high level of food imports and inflation, but in 1977 agricultural exports continued to decline. The main commercial crops are cocoa, palm oil and kernels, groundnuts, cotton and rubber. There is extensive exploitation of forests for various timbers. Nigeria's fish resources are to be developed. Fishing provides a living for an estimated 1.5 million people. There are also plans to expand and modernize the livestock industry. Minerals include tin, columbite (of which Nigeria supplies 95 per cent of the world's industrial requirements), coal, iron ore and crude petroleum. The U.S.S.R. is helping to build a major iron and steel complex at Ajaokuta, which is due to become fully operational by 1983, and further plants are planned near Warri and Port Harcourt.

Industry is diversified, and there has been rapid expansion of manufacturing industries. The brewing,

aluminium products, motor vehicles, textiles, cigarettes and cement sectors are important. The main priorities of the National Reconstruction and Development Plan (1970-75) were the problems of economic management and unemployment. The 1975-80 Development Plan lays emphasis on development of agriculture and the industrial infrastructure and increased federal aid for education and health. G.D.P., which rose from ₦2,400 million in 1960 to ₦15,000 million in 1976, is expected to increase at an average rate of 9.1 per cent annually during the plan period. Estimated expenditure under the plan is ₦43,000 million, of which ₦26,500 million is to be spent in the public sector.

Despite the introduction since 1976 of controls on wages and imports, particularly of luxury goods, and stringent foreign exchange measures, there was some deterioration in the economy during 1977. For the first half of the year the balance of payments deficit was ₦266.8 million, in June foreign exchange reserves had fallen to under ₦3,000 million, and by late 1977 the inflation rate had risen to almost 30 per cent. Contributory factors were the decline in world demand for oil, and increased imports and government spending. In January 1978 the Government negotiated a \$1,000 million seven-year loan with the Euromarkets, and was reported to be seeking a total of \$5,500 million in overseas loans during the next two years. Nigeria is a founder member of ECOWAS.

Transport and Communications

There are 3,504 km. of railways and over 88,000 km. of roads. The Nigerian Government has embarked on a major road construction programme to which it has allocated ₦3,400 million from the 1975-80 Development Plan. The narrow-gauge railway system is being extensively rebuilt and the standard-gauge system extended throughout Nigeria. The Niger and other rivers are navigable. The chief ports are Lagos and Port Harcourt. There are two international airports. An internal air network links the principal towns, and international services are provided by Nigerian Airways and foreign lines. Eighteen airports in Nigeria are to be redeveloped by the Government and Nigerian Airways' fleet is being expanded. Each of the state capitals is to have a modern airport.

The development of telecommunications is being given priority in the 1975-80 Development Plan. There is a satellite earth station at Lanlate and another is planned in the Northern Region.

Social Welfare

The National Provident Fund provides against sickness, retirement and old age. A scheme of retirement pensions and other benefits covers government employees. During 1974 the Federal Government introduced legislation to provide a workers' welfare scheme and a National Emergency Relief Agency. The Federal Government has assumed the states' responsibility for the buildings, equipment and personnel of the health service. Nigeria had 42,101 hospital beds in 1972 and 2,343 physicians in 1973. By 1980 the National Basic Health Service Scheme, introduced in 1977, plans to establish 450 comprehensive health centres with 56,700 beds, 1,800 primary health centres, 2,250 mobile clinics and 9,000 health clinics. The number of teaching hospitals is to be expanded from six to

NIGERIA

18 and 20 combined schools of nursing and health technology are to be built.

Education

Only 20 per cent of the population is literate. In 1977 there were 8,000,000 pupils in primary schools and over 40,000 at university. Education is partly the responsibility of the State governments although the Federal Government has played an increasingly important role since 1970 and controls the 13 universities. The 1975-80 Development Plan allows for ₦2,500 million to be spent on the development of education. Universal free primary education was introduced in 1976 and will be compulsory from 1980, and 800 secondary schools are to be established, increasing the expected student enrolment at all educational levels to about 14 million by 1980. Problems include shortages of schools and trained teachers; in 1976 there were 156 teacher-training colleges but 74 new ones are to be built by 1980. Priority is being given to technical training, and it was announced in 1977 that two of the universities would be converted to technological universities.

Tourism

Tourism is being developed. The country has fine coastal scenery, thick forests and a stimulating climate on the northern plateau. Nigerian traditional art has exceptional richness and diversity. The All Nigerian Festival of Arts and Culture is held annually in different states.

Introductory Survey, Statistical Survey

Visas are not required to visit Nigeria by nationals of Benin, Cameroon, Chad, Ireland, the Ivory Coast, Morocco, Niger, Togo, the United Kingdom and Commonwealth countries.

Sport

Football, boxing, wrestling, athletics, tennis and swimming are the most popular sports. The Government allocated ₦7 million for expenditure on sports projects in 1975.

Public Holidays

1978: September 5th and 6th (Id ul Fitr, end of Ramadan), September 29th (for National Day), November 13th (Id ul Kabir), December 25th-26th (Christmas).

1979: January 1st (New Year's Day), February 10th (Mouloud, Birth of the Prophet), April 13th-16th (Easter).

* Figures refer to the 19 states established by the administrative reorganization of March 1976. The population figures may be unreliable as it is generally believed that the 1963 census results overstated the number of inhabitants. The official figure of total population enumerated in 1963 was 55,670,055, compared with a UN estimate of 46.3 million for mid-1963. Another census was held in November 1973 but the results have been officially repudiated.

FINANCE

100 kobo = 1 naira (₦).

Coins: ½, 1, 5, 10 and 25 kobo.

Notes: 50 kobo; 1, 5 10, and 20 naira.

Exchange rates (December 1977): £1 sterling = 1.193 naira; U.S. \$1 = 65.1 kobo.

100 naira = £83.82 = \$153.52.

Note: The naira was introduced on January 1st, 1973, replacing the Nigerian pound (£N) of 20 shillings (240 pence) at the rate of £N1 = 2 naira. Between September 1949 and August 1971 the Nigerian pound was valued at U.S. \$2.80. In December 1971 the value was revised to \$3.04. The value of the naira was consequently fixed at \$1.52 (U.S. \$1 = 65.79 kobo). Despite the devaluation of the U.S. dollar in February 1973, this exchange rate remained in effect until April 1974, since when the naira has been allowed to "float". The average value of the naira was \$1.590 in 1974; \$1.625 in 1975; \$1.596 in 1976. From April to June 1977 and since August 1977 the exchange rate has been 1 naira = \$1.5352. The Nigerian pound was at par with the pound sterling until November 1967, after which the exchange rate was £N1 = £1.167 sterling until June 1972.

THE CONSTITUTION

A Constitutional Decree was published in Lagos on March 17th, 1967, to replace all earlier Decrees. The following are its principal provisions:

1. Legislative and executive power is vested in the Supreme Military Council. The Chairman of the Council is the head of the Military Government. The Supreme Military Council is composed of the Regional Military Governors and the Military Administrator of the Federal Territory; the Heads of the Nigerian Army, Navy and Air Force, the Chief of Staff of the Armed Forces and the Inspector-General of Police or his Deputy.

2. The Supreme Military Council can delegate powers to a Federal Executive Council, which is composed of military and civilian Commissioners drawn from all the States of the Federation, with representatives of the armed forces. The Federal Attorney-General and the Secretaries to Federal and State Governors, as well as other appropriate officials, may attend the meetings of either Council in an advisory capacity.

3. On certain matters of legislation, the concurrence of all the Military Governors is required. These matters include any decrees affecting or relating to the territorial integrity of a State, or altering entrenched clauses of the 1963 Constitution, or affecting the Federation in respect of trade, commerce, transport, industry, communications, labour, the public service or public finance (including approval of new capital projects in Federal estimates), or affecting external or security affairs, or affecting the professions and higher education.

4. Special powers are given to the Supreme Military Council to override State legislation, with the concurrence of a majority of Military Governors, if that legislation impedes the exercise of Federal authority or constitutes a danger to the continuance of Federal Government in Nigeria.

5. The creation of new States will be treated as an entrenched clause of the Constitution.

6. Certain additional matters covered by the Decree include: the revived power to appoint local authority police; one Federal Supreme Court judge will be appointed by each State; decrees made since January 1966 may be repealed or amended by individual Military Governors; the new Decree cannot be challenged in a court of law; power of appointment to higher Civil Service posts is in the hands of the Supreme Military Council, acting on the advice of the Public Service Commission.

On May 27th, 1967, the Supreme Military Council issued a decree creating 12 states out of the four existing Regions.

In July 1975 the Federal Military Government announced a five-stage transitional programme which would ensure democratic civilian rule by October 1st, 1979. A draft constitution was published by the Supreme Military Council (SMC) on October 7th, 1976. It provided for an elected National Assembly composed of a President with executive powers, a Senate and a House of Representatives. A plurality of political parties is envisaged and fundamental human rights would be guaranteed by the constitution. In October 1977 the 230-member Constituent Assembly was inaugurated to debate the draft constitution. It consisted of 203 members elected in August by the Local Government Councils, 20 nominated by the SMC, and 7 ad-hoc members. The Government started lifting the ban on political parties in October 1978.

In March 1979 the number of states was increased from 12 to 19, and a plan to transfer the Federal capital from Lagos to Nnewi State, near Abaya, was announced.

JUDICIAL SYSTEM

The High Courts of Justice are superior Courts of Record and have unlimited jurisdiction in the first instance except in certain cases which are reserved to the Federal Supreme Court, for example, disputes between any of the component parts of the Federation involving any question as to the existence or extent of any legal right, and matters arising under any Treaty or affecting Consular Officers or any international organization outside Nigeria. The High Courts also have jurisdiction to hear appeals from Magistrates' and Native Courts. There is also a Revenue Court and a National Industrial Court.

In 1976 a Special Military Tribunal was set up to try cases of treason, certain categories of murder and other offences. The president and four other judges are all members of the armed forces or police. Sentences are subject to confirmation by the SMC and there is no right of appeal. Two Exchange Control Tribunals were established in 1977 to try offences under the Exchange Control (Anti-sabotage) Decree.

The Magistrates' Courts have original jurisdiction in a large variety of civil and criminal cases, some also have jurisdiction to hear appeals from Native Courts. The offices of Chief Magistrate have been retained in all areas.

Native Courts have been retained throughout the Federation. The law administered in those Courts is, generally speaking, the Native Law and Custom prevailing in the area of their jurisdiction. In the Islamic districts of the Northern States Muslim law is administered and the Sharia Courts act as the courts of appeal.

The Federal Supreme Court is the final Court of Appeal in Nigeria, consisting of the Chief Justice and ten Justices of the Supreme Court. The Federal Court of Appeal was established by decree in 1977 and is an intermediate appellate court between the Supreme Court, the High Court of a State, the Revenue Court and certain tribunals.

The Judges of the Federal Supreme Court and of the High Courts of Justice are appointed by the President. Judges of the High Courts of the States are appointed by the Governor of each State.

OMAN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Sultanate of Oman lies at the extreme south-east of the Arabian peninsula and is flanked by the United Arab Emirates on the extreme north, by Saudi Arabia on the north and west, and by the People's Democratic Republic of Yemen on the extreme west. All frontiers are ill-defined and none is demarcated. The climate is exceptionally hot and humid in the summer (maximum temperature 42°C (108°F)) and mild in the winter. The official language is Arabic, though English is spoken in business circles. The majority of the population are Ibadhi Muslims; about a quarter are Sunni Muslims. The national flag has horizontal stripes of white, red (one-fifth of the depth) and green, with a red vertical stripe at the hoist. In a canton at the upper left is the state badge, in white. The capital is Muscat, but there is a capital area extending from Muscat through Mutrah to Seeb.

Recent History

Officially known as Muscat and Oman until 1970, the Sultanate has had a special relationship with Britain since the nineteenth century. The army and police force still have some British officers. Sultan Said bin Taimur succeeded his father in 1932 and maintained a strictly conservative and isolationist rule until July 1970, when he was overthrown by his son in a bloodless palace coup. The new Sultan, Qaboos bin Said, then began a liberalization of the regime, and increased spending on development.

A major problem in recent years has been a drawn-out conflict with Marxist guerrilla forces in Dhofar Province. These groups united to form the Popular Front for the Liberation of Oman and the Arabian Gulf in 1972, and the name was changed in July 1974 to People's Front for the Liberation of Oman (PFLO). Much of the guerrillas' support came from the People's Democratic Republic of Yemen. In March 1976 a cease-fire between Oman and the People's Democratic Republic of Yemen was arranged by Saudi Arabia, and Sultan Qaboos granted an amnesty to Omanis who had been fighting for the PFLO. Peaceful development of the Dhofar (renamed "Southern") region then began, although Iranian troops, who had been aiding the Sultan, remained in Dhofar until January 1977, when their withdrawal was announced. The United Kingdom withdrew its forces from Masirah Island in the spring of 1977.

Government

The Sultan rules with the advice of an appointed Cabinet. Oman has no parliament and no political parties. Legislation is by decree. The country is divided into 39 *wilayat* (governorates).

Defence

The Omani armed forces number 13,000, excluding expatriate personnel of various nationalities on secondment

or contract. Defence expenditure increased from 12.4 million rials in 1970 to 288 million in 1976, falling to 158 million in 1977 as the Dhofar operations became less active. Support for Oman in the Dhofar operations came from Jordan, Saudi Arabia, Iran and the United Arab Emirates.

Economic Affairs

Cereal crops are grown for local consumption, while dates, limes and pomegranates are the chief export crops. Cattle breeding is extensive in Dhofar, and the Oman camel is highly valued throughout Arabia. The most urgent problem is the shortage of water. Production of oil was begun in August 1967 by Petroleum Development (Oman) Ltd., in which the Oman Government took a 60 per cent share in July 1974. Royal Dutch/Shell now own 34 per cent, the Compagnie Française des Pétroles 4 per cent and Partex 2 per cent. Concessions have also been awarded to other companies (see Oil section). Oman's oil revenues in 1976 were RO454.7 million and they were expected to be about RO458 million in 1977. Oil production has passed its peak, however, and is expected to fall from its 1976 level of 365,000 barrels a day to less than 250,000 barrels a day by 1980. There is hope that copper and other mineral production will be developed.

Social Welfare

Oman has a free National Health Service, and in 1977 there were 13 hospitals, 169 doctors and 522 health assistants. There were also more than 50 clinics.

Education

Since 1970 great advances have been made in education and by 1976 64,975 children were receiving education, including 18,465 girls.

Public Holidays

1978: July 3rd* (Leilat al Meiraj, Ascension of the Prophet), September 4th* (Id ul Fitr, end of Ramadan), November 11th* (Id ul Adha, Feast of the Sacrifice), November 18th (National Day), November 19th (Birthday of the Sultan), December 2nd* (Muslim New Year).

1979: February 10th* (Mouloud, Birth of the Prophet).

* Dependent on the Muslim lunar calendar; these dates may vary by one or two days from the dates given.

Weights and Measures

The imperial, metric and local systems are all used although the metric system was adopted in 1974.

Currency and Exchange Rates

1,000 baiza = 1 rial Omani (RO).

Exchange rates (December 1977):

£1 sterling = 632.6 baiza;

U.S. \$1 = 345.4 baiza.

STATISTICAL SURVEY

Area: 300,000 sq. km. (120,000 sq. miles).

Population: 750,000 (estimate for mid-1973); Capital area (Muscat to Seeb) estimated 50,000. Estimated number of gainfully employed 150,000; agriculture 109,000; fisheries 15,000; government 10,000; construction 6,000; oil, banking, services 5,000; others 5,000 (1972.)

Agriculture: Land utilization 1971 (hectares): Batinah 13,800; Interior 19,920; capital area 1,080; Musandam 400; Dhofar 800. Crops include dates, lucerne, limes, onions, wheat, bananas, mangoes, tobacco, sorghum, sweet potatoes, chickpeas and coconuts.

Estimated Livestock (1976, '000 head): goats 164.6, sheep 57.2, cattle 133.8, camels 13.5.

FINANCE

1,000 baiza = 1 rial Omani (formerly called the rial Saidi).

Coins: 2, 5, 10, 25, 50 and 100 baiza.

Notes: 100, 250 and 500 baiza; 1, 5 and 10 rials.

Exchange rates (December 1977): £1 sterling = 632.6 baiza; U.S. \$1 = 345.4 baiza.

100 rials Omani = £158.08 = \$289.52.

Note: The rial was introduced in May 1970, replacing the Persian Gulf Indian rupee at the rate of 1 rial = 21 rupees = £1 sterling. The initial value of the rial was U.S. \$2.40 (\$1 = 416.7 baiza), which remained in operation until August 1971. From December 1971 to February 1973 the rial's value was \$2.6057 (\$1 = 383.8 baiza). The present dollar valuation has been effective since February 1973. The rial was at par with the pound sterling until the latter was allowed to "float" in June 1972.

TRANSPORT

ROADS

A network of adequate graded roads links all the main centres of population and only a few mountain villages are not accessible by Land Rover. A rapid road construction programme began in 1970 and by 1976 there were 1,272 km. of asphalt road and 8,500 km. of graded roads. The final link in the 362 km. Dubai-Oman highway was expected to be finished in November 1977, with the opening of the Wayaya Bridge at Wadi Hatta. A new coastal highway between Muscat and Mutrah is under construction and scheduled for completion in 1978. In Dhofar tarmac roads have been completed from Raysut through Salalah to

Taga. Roads between Seeb and Nizwa and Salalah and Thumrait have been completed and a rural bus service started operations in 1975.

SHIPPING

The new port of Mina Qaboos which was completed in 1974 at a cost of RO.18.2 million provides nine deep-water berths, warehousing facilities and a harbour for dhows and coastal vessels. In 1976 729 ships visited Mina Qaboos and 154 ships visited Raysut, which has berths for five ships. The oil terminal at Mina al Fahal can accommodate the largest super-tankers on off-shore loading buoys. Similar facilities for the import of refined petroleum products exist at Mina al Fahal and Riyam (near Muscat). In 1977 the Government created the Port Services Commission to take over Mina Qaboos.

There are regular services to Britain (Strick Line), Australia (P & O), India and Pakistan (Gulf Shipping Co.) and Japan (Showa Line).

Loading facilities for smaller craft exist at Sohar, Khaboura, Sur, Marbat and Salalah.

Oman United Agencies Ltd.: P.O.B. 70, Muscat; shipping, clearing and forwarding agents and general merchants; subsidiary of Gray, Mackenzie and Co. Ltd.

CIVIL AVIATION

All domestic and international flights now operate from Seeb International Airport. Its runway is being extended from the present 10,000 feet to 12,000 feet. Most towns of any size have small air strips. Gulf Aviation operate frequent flights to the Gulf States, Beirut, London, Iran, India and Pakistan, and return flights four times a week to Salalah. A modern civil airport is under construction at Salalah. Other airlines using Seeb include Alia, Air India, British Airways, Iran Air, Kuwait Airlines, Middle East Airlines, Pakistan International Airways, Saudia, Somali Airlines and UTA (passenger); and Trans Mediterranean Airways and Tradewinds (cargo).

Gulf Air: P.O.B. 138, Bahrain; f. 1950; jointly owned by the Governments of Bahrain, Qatar, the United Arab Emirates and Oman; services linking Bahrain, Doha, Abu Dhabi, Dubai, Sharjah, Salalah and Muscat with London, Amsterdam, Paris, Larnaca, Beirut, Cairo, Kuwait, Dharan, Shiraz, Bandar Abbas, Karachi, Bombay, Basra, Baghdad, Amman and Athens; fleet consists of four TriStars, five VC-10, four BAC 1-11, three F27, four Skyvaits, two Islanders, two Beechcraft B30; five Boeing 737 were due to be delivered in June 1977.

PAKISTAN

INTRODUCTORY SURVEY

Location, Climate, Language, Religion, Flag, Capital

The Islamic Republic of Pakistan is bordered by India to the east and Afghanistan and Iran to the west. It has a short frontier with China in the far north-east. The climate is hot and dry with an average temperature of 80°F (27°C) except in the mountains where the winters are cold. The national language is Urdu. Punjabi, Sindhi and Pushtu are also widely spoken and English is extensively used. The state religion is Islam, embracing about 97 per cent of the population, the remainder being mainly Hindu or Christian. The national flag (proportions 3 by 2) is dark green, charged with a white crescent moon and a five-pointed white star, with a vertical white stripe at the hoist. The capital is Islamabad.

Recent History

Pakistan was created in August 1947 by the partition of the former British India into the independent states of India and Pakistan. It originally had two parts, East Pakistan and West Pakistan, separated by about 1,000 miles of Indian territory. The new nation was formed in response to demands by Muhammad Ali Jinnah's Muslim League for a specifically Islamic state, to free Muslims from domination by the Hindu majority in the sub-continent. Partition led immediately to religious and frontier conflicts in which hundreds of thousands of lives were lost. Since 1949 a cease-fire line has separated Pakistani and Indian forces in the disputed territory of Jammu and Kashmir.

From the time of partition the eastern and western sections of Pakistan were united only by religion, with no geographical, economic or racial coherence. The majority of the population lived in the smaller wing, East Pakistan, but political and military power was concentrated in the West. Pakistan's difficulties were increased by the search for a workable political system. A republic was established in March 1956 but in October 1958 parliamentary government ceased and was replaced by martial law. General (later Field-Marshal) Muhammad Ayub Khan was appointed Martial Law Administrator and in 1960 was elected President by the "basic democracy" system he had established. Wide-spread disorders in 1968, especially in East Pakistan, led to Ayub Khan's resignation in March 1969. General Agha Muhammad Yahya Khan replaced him and martial law was reimposed.

In December 1970 elections were held for an assembly which was to draw up a new constitution. For the first time the East Pakistanis were to be allowed a majority in the assembly. Sheikh Mujibur Rahman's Awami League, standing for autonomy, won with an overwhelming majority in East Pakistan and the Pakistan People's Party (PPP) won most seats in the West. Yahya Khan tried to persuade Sheikh Mujib to form a coalition government with the PPP, but negotiations broke down and in March 1971 the army was sent in to settle the matter by force. East Pakistan declared its independence as the People's Republic of Bangladesh and civil war broke out. Indian support for Bangladesh grew and in December 1971 the Indian army intervened, forcing the Pakistani

army to surrender within two weeks. Bangladesh's independence became a reality. A cease-fire was accepted and Yahya Khan resigned. Zulfikar Ali Bhutto, head of the PPP, became President of the truncated Pakistan, which left the Commonwealth in January 1972. In February 1974 Pakistan recognized Bangladesh.

In 1972 President Bhutto proposed a constitution which seemed to have the support of all parties. In early 1973, however, opposition parties of the right and left formed a United Democratic Front to demand amendments. Their fears that the constitution gave too much power to the Prime Minister and the central government were encouraged by events in Baluchistan, where tribal fighting was followed, in February 1973, by the imposition of direct presidential rule and the taking of emergency powers.

An amended constitution came into force in August 1973, with Bhutto as Prime Minister. The situation in Baluchistan remained grave, with fighting between government forces and tribal guerrilla groups. In April 1974 the Government announced the ending of army operations in Baluchistan and an amnesty for political opponents, but fighting continued until the end of the year. In December 1975, following reports of uprisings in the province, Governor's rule was imposed on Baluchistan. This was ended in December 1976 and a new PPP Cabinet was sworn in.

At the beginning of 1975 violence increased in the North-West Frontier Province, and in February the Chief Minister, Hayat Mohammed Sherpao, was murdered. The Prime Minister banned the National Awami Party (NAP), which he accused of working to bring about the secession of a large part of Pakistan and of directing terrorist activities with the reported support of Afghanistan. Abdul Wali Khan, the leader of the NAP, and many others were arrested.

In March 1977 elections were held for the National and Provincial Assemblies. The NAP was barred from taking part in the elections. The nine opposition parties fought the election jointly as the Pakistan National Alliance (PNA). The ruling PPP won 155 of the 200 seats in the National Assembly. The Opposition accused the Government of rigging the elections, called for fresh elections to be held, the ending of the state of emergency and the restoration of fundamental rights and of the power of the judiciary.

A breakdown in law and order followed, the armed forces were called in to assist the civilian authorities in several places and martial law was imposed in Karachi, Lahore and Hyderabad. In July 1977 the Army carried out a coup and deposed Bhutto. A martial law regime was established, with General Mohammad Zia ul-Haq, the Army Chief of Staff, as Chief Martial Law Administrator. A four-man Military Council was formed to assist the President, who remained in office as Head of State. Government and PNA leaders were arrested and political and trade union activities were banned.

In September the seven-year-old state of emergency was ended in preparation for elections which were due to take

PAKISTAN

place in October. At the same time Bhutto was arrested and imprisoned in connection with the murder of Nawab Mohammed Ahmed Khan, the father of a former National Assembly member. Additional charges were later brought against him: abduction, contempt of court, treason, misappropriation of government funds and corruption. In October General Zia announced that the elections would be postponed until Bhutto had been tried on all charges.

In December Abdul Wali Khan, leader of the banned NAP, was released from prison and joined the National Democratic Party in order to participate in the elections. In the same month General Zia announced the formation of a political front and in January 1978 an Advisory Council was appointed.

General Zia has emphasized the policy of maintaining close relations with other Islamic states in the Middle East and Africa, which have been important sources of aid to Pakistan. Pakistan also maintains close relations with the People's Republic of China, which has provided considerable economic support for Pakistan. In February 1978 talks took place between Pakistan and India, aimed at improving relations and paving the way for future economic co-operation. Pakistan has also agreed to set up a joint commission with Bangladesh to increase co-operation.

During 1977 Pakistan's relations with the U.S.A. became strained over Pakistan's contract with France to buy a nuclear reprocessing plant.

Government

In July 1977 a martial law administration was set up and the 1973 constitution (which provided for a bicameral Federal Legislature, including a 216-member elected National Assembly, and a Prime Minister as the chief executive, elected by the Assembly) was put into abeyance until elections are held and a new government is formed. The martial law administration consists of a four-member Military Council, headed by the Chief Martial Law Administrator, and an appointed Advisory Council. Under martial law, the President, a constitutional Head of State elected by the Federal Legislature, remains in office.

Pakistan comprises four provinces (each with an appointed Governor), the federal capital of Islamabad and federally administered "tribal areas". The provincial legislatures were dissolved after the imposition of martial law.

Defence

In 1978 the armed forces totalled 428,000 men including 11,000 in the navy and 17,000 in the air force. The defence budget for 1977/78 is 8,100 million rupces. Pakistan is a member of the Central Treaty Organization (CENTO).

Economic Affairs

Agriculture is the mainstay of the economy. Wheat, rice, sugar cane and cotton are the main crops. After 1971 agricultural production increased more slowly than it had during the 1960s, and in 1974/75 it declined by 2 per cent because of drought. However, output of all major crops except cotton subsequently increased and in 1976/77 Pakistan achieved self-sufficiency in wheat. Land remained unevenly distributed in spite of legislation to limit the size of holdings. In January 1977 further land reforms were introduced and the land recovered from individual owners

Introductory Survey

was distributed free to the peasants cultivating it. At the same time the land revenue system was replaced by an agricultural income tax system.

Pakistan has a wide range of minerals, but mining is not greatly developed. Gas fields have been discovered during extensive searches for petroleum in Pirkoh, Baluchistan. In January 1977 oil was struck at Doudak. Oilfields are also being developed at Tut. Water is a valuable resource and extensive irrigation works have been undertaken. The large earth-filled Tarbela Dam, as well as providing irrigation, had a capacity of 700,000 kW. of electricity in December 1976.

Most major industries, except sugar and textiles, have been taken over or nationalized, as have the insurance companies, banks, shipping firms and distributors of petroleum products. However, agricultural processing plants were denationalized in 1977 and a number of state-controlled industries were opened to foreign and domestic investment. Pakistan's first steel mills, due to be completed in 1980, will be built with Soviet aid near Karachi.

Over 50 per cent of export earnings are from rice and cotton. Aiming at narrowing the trade gap, the Government encouraged diversification of export markets in 1974/75, and no country took more than 7 per cent of total exports. Foreign aid is needed to offset the trade deficit, which reached U.S. \$100 million per month in 1977. Aid, which is now given in the form of loans rather than grants, has come from the U.S.A., Iran, the U.S.S.R., the Federal Republic of Germany, the United Kingdom, Canada and Japan.

Pakistan's economy was adversely affected by the political unrest in 1977: there was a loss of Rs. 5,000 million in production while prices continued to increase. Industrial production declined by 2 per cent during 1976/77, and the G.N.P. decreased by 1.2 per cent, compared with a 4.3 per cent increase in 1975/76. A new five-year plan has been outlined for 1978-83, with emphasis on greater production of basic foodstuffs, including improvements in the rural infrastructure, improved manpower to enable Pakistanis to work abroad and a larger role in industry for the private sector.

Transport and Communications

There were 20,234 km. of roads in 1972. A highway linking Karachi with the north is under construction and the "Friendship Highway" through the Himalayas, linking northern Pakistan with Sinkiang, in China, is expected to be completed by 1980. There were 8,808 km. of railways in 1973. Modernization of Pakistan's railway system is due to be completed by 1979. The principal port is Karachi. A second port some 20 miles away, Port Mohammad Bin Qasim, is due to start operating in 1980. International air transport is provided by Pakistan International Airways Corporation (PIA) and twenty-three foreign airlines.

Social Welfare

Social welfare services are run mainly through the Development Schemes and Urban Community Projects. Government support is given to voluntary bodies providing social relief. The National Council of Social Welfare provides care for children, women, delinquents and the handicapped. An Old-Age Benefits Scheme was inaugurated in 1976, managed by the State Life Insurance Corporation.

PAKISTAN

Introductory Survey, Statistical Survey

In 1974 there were 4,234 hospitals, with 36,417 beds, and 17,194 registered physicians (not all resident or working in Pakistan). In 1976 the Government doubled the birth control budget and planned sterilization of 7 per cent of couples by the 1980s.

Education

Universal free primary education is a constitutional right but less than half Pakistan's children in fact receive it. In 1974 there were 5,166,000 children (3,696,000 boys and 1,470,000 girls) enrolled at primary schools and 1,795,000 (including 1,384,000 boys) at secondary schools. The Government's target is to achieve universal primary education for boys by 1983 and for girls by 1987. All institutions except missions are nationalized. From 1976 agro-technical subjects were introduced into the school curriculum and 25 trade schools were established in 1976. There are 12 universities. Adult literacy averages about 15 per cent.

Tourism

The Himalayan hill stations of Pakistan provide magnificent scenery, a fine climate and excellent opportunities for field sports, mountaineering and winter sports.

Visas are not required for visits up to 3 months by nationals of Belgium, Finland, Iceland, Ireland, Luxembourg, Morocco, the Netherlands, the Philippines, Romania, Tunisia, the United Kingdom and Yugoslavia.

Sport

Pakistan's principal sports are hockey, cricket, football, wrestling and squash rackets. Polo, athletics and swimming are also popular.

Public Holidays

1978: May 1st (May Day), August 14th (Independence Day), September 1st-2nd (Jumatul Wida), September 4th-5th* (Id ul Fitr, end of Ramadan), September 6th (Defence of Pakistan Day), September 11th (Anniversary of Death of Quaid-i-Azam), November 9th (Birthday of Allama Iqbal), November 12th-13th* (Id ul Adha, Feast of the Sacrifice), December 11th* (Muharram Ashura), December 25th (Birthday of Quaid-i-Azam and Christmas), December 26th (Boxing Day).

* Dates of Muslim religious holidays are subject to the sighting of the moon.

† Optional holidays for Christians only.

Weights and Measures

The imperial system of measures is in force, although the railways went metric in October 1976. Local measures of weight include:

1 maund = 82.28 lb. (37.32 kg.).
1 seer = 2.057 lb. (933 grammes).
1 tola = 180 grains (11.66 grammes).

Currency and Exchange Rates

100 paisa = 1 Pakistani rupee.

Exchange rates (December 1977):

£1 sterling = 18.19 rupees;

U.S. \$1 = 9.93 rupees.

THE CONSTITUTION

The Constitution was promulgated in 1973 and amended in 1974, 1975, 1976 and 1977. Certain provisions were suspended in July 1977 following the military take-over.

GOVERNMENT

In the Federal Parliamentary system the Head of the State is to be a constitutional President on whom the advice of the Prime Minister shall be binding in all respects. The Prime Minister, who is to be the chief executive, and his Cabinet shall be answerable to the Federal Legislature.

A constitutional amendment in February 1975 freed the government of the obligation to seek parliamentary approval to declare a state of emergency.

LEGISLATURE—NATIONAL ASSEMBLY
AND SENATE*

The Federal Legislature shall comprise two houses—the lower house called the National Assembly with 200 members elected directly for a term of five years, on the basis of universal adult suffrage, and the upper house, called the Senate, of 63 members who serve for four years, half retiring every two years. Each Provincial Assembly is to elect 14 Senators. The tribal areas are to return five and the remaining two are to be elected from the Federal Capital Territory by members of the Provincial Assemblies. Six seats in the National Assembly are reserved for minorities and for a period of 10 years from 1973 women are to get 10 seats, raising the strength of the Assembly to 216.

There shall be two sessions of the National Assembly and Senate each year, with not more than 120 days between the last sitting of a session and the first sitting of the next session.

The role of the Senate in an overwhelming majority of the subjects shall be merely advisory. Disagreeing with any legislation of the National Assembly, it shall have the right to send it back only once for reconsideration. In case of disagreement in other subjects, the Senate and National Assembly shall sit in a joint session to decide the matter by a simple majority.

An amendment to the Constitution shall require two-thirds majority in the National Assembly and its endorsement by a simple majority in the Senate. The members of the Senate may be taken in the Federal Cabinet provided their total number does not exceed 25 per cent of the total number of Central Ministers.

* Although the Constitution provides for a Senate of 63 members, the number in 1977, when the Senate was dissolved, was still 45, the same as before the promulgation of the Constitution in 1973.

The stability of the parliamentary system is sought to be ensured through four main provisions. Firstly, the Prime Minister shall be elected by the National Assembly and the President must call on him to form a government. Secondly, any resolution calling for the removal of a Prime Minister shall have to name his successor in the same resolution which shall be adopted by not less than two-thirds of the total number of members of the lower house. The requirement of two-thirds majority is to remain in force for 15 years or three electoral terms, whichever is more. Thirdly, the Prime Minister shall have the right to seek dissolution of the legislature at any time even during the pendency of a no-confidence motion. Fourthly, if a no-confidence motion is defeated, such a motion shall not come up before the house for the next six months.

All these provisions for stability shall apply *mutatis mutandis* to the Provincial Assemblies also.

PROVINCIAL GOVERNMENT

In the matter of relations between Federation and Provinces, Parliament shall have the power to make laws, including laws bearing on extra-territorial affairs, for the whole or any part of Pakistan, while a Provincial Assembly shall be empowered to make laws for that Province or any part of it. Matters in the Federal Legislative List shall be subject to the exclusive authority of Parliament, while Parliament and a Provincial Assembly shall have power to legislate with regard to matters referred to in the Concurrent Legislative List. Any matter not referred to in either list may be the subject of laws made by a Provincial Assembly alone, and not by Parliament, although the latter shall have exclusive power to legislate with regard to matters not referred to in either list for those areas in the Federation not included in any Province.

The executive authorities of every Province shall be required to ensure that their actions are in compliance with the Federal laws which apply in that Province. The Federation shall be required to consider the interests of each Province in the exercise of its authority in that Province. The Federation shall further be required to afford every Province protection from external aggression and internal disturbance, and to ensure that every Province is governed in accordance with the provisions of the Constitution.

To further safeguard the rights of the smaller provinces, a Council of Common Interests has been created. Comprising the Chief Ministers of the four provinces and four Central Ministers to decide upon specified matters of common interest, the Council is responsible to the Federal Legislature. The constitutional formula gives the net proceeds of excise duty and royalty on gas to the province concerned. The profits on hydro-electric power generated in each province shall go to that province.
